Derivative classification is the act of assigning a level of classification to information that is determined to be the same in substance as information that is currently classified. Derivative application of classification markings is a responsibility of those who incorporate, paraphrase, restate, or generate in new form, information which is already classified or those who apply markings in accordance with guidance from an original classification authority. Persons who apply derivative classifications should take care to determine whether their paraphrasing, restating, or summarizing of classified information has removed all or part of the basis for classification. Thus,

V 4 / 172 SE 4 7 9 UMI

derivative classification may be accomplished by any person cleared for access to that level of information regardless of whether the person has original classification authority at that level. Persons who apply such derivative classification markings shall:

(a) Respect original classification decisions;

(b) Verify the information's current level of classification so far as practicable before applying the markings; and

(c) Carry forward to any newly created documents the assigned dates or events for declassification or review and any additional authorized markings. Where checks with originators or other appropriate inquiries show that no classification or a lower classification than originally assigned is appropriate, the information shall be marked accordingly.

§ 2400.16 Classification guides.

(a) OSTP shall issue and maintain classification guides to facilitate the proper and uniform classification of information. These guides shall be used to direct derivative classification.

(b) The classification guides shall be approved, in writing, by the Director or by officials having Top Secret original classification authority. Such approval constitutes an original classification decision.

(c) Each classification guide shall specify the information subject to classification in sufficient detail to permit its ready and uniform identification and shall set forth the classification level and duration in each instance as well as, where applicable, justification for any extension beyond six years.

(d) The classification guides shall be kept current and shall be fully reviewed at least every two years.

§ 2400.17 Distribution of classification guides.

The Executive Officer, Office of Science and Technology Policy shall receive and maintain the record copy of all approved classification guides and changes thereto. He will assist the originator in determining the required distribution.

Subpart D—Declassification and Downgrading

§ 2400.18 Policy.

Declassification of information shall be given emphasis comparable to that accorded classification. Information classified pursuant to Executive Order 12065 and prior orders shall be declassified as early as national security considerations permit. Decisions concerning declassification shall be based on the loss of sensitivity of the information with the passage of time or on the occurance of an event which permits declassification. When information is reviewed for declassification pursuant to this regulation, that information shall be declassified unless the designated declassification authority determines that the information continues to meet the classification requirements prescribed in § 2400.9 despite the passage of time.

§ 2400.19 Declassification and downgrading authority.

Authority to declassify and downgrade information classified under the provisions of references (a) and (b) shall be exercised by officials designated to exercise original classification. Further, the Director, Office of Science and Technology Policy shall designate additional officials at the lowest practicable echelons of supervision to exercise declassification and downgrading authority over classified information in their functional areas of interest.

§ 2400.20 Exceptional cases.

It is presumed that information that continues to meet the classification requirements of Subpart B requires continued protection. In some cases, however, the need to protect such information may be outweighed by the public interest in disclosure of that information and in such cases the information should be declassified. When such questions arise concerning Office of Science and Technology Policy information, they shall be referred to the Director, Office of Science and Technology Policy, the Executive Officer of Science and Technology Policy acting as the official with responsibility for processing Freedom of Information Act requests or Mandatory Review requests under § 2400.24, an official with Top Secret classification authority, or in cases of classified Presidential information the Archivist of the United States. That Official, after consultation with other agenices having interest, shall determine whether the public interest in disclosure outweighs the damage to national security that might reasonably be expected from disclosure and, if so, declassify the information.

§ 2400.21 Declassification by the Director of the Information Security Oversight Office.

If the Director of the Information Security Oversight Office (ISOO) determines that information is classified in violation of Executive Order 12065, the Director, ISOO may require the activity that originally classified the information to declassify it. Any such decision by the Director, ISOO may be appealed through the Director, Office of Science and Technology Policy to the National Security Council. The information shall remain classified until the appeal is decided or until one year from the date of the determination by the Director, ISOO whichever comes first.

§ 2400.22 Systematic review for declassification.

The Director, Office of Science and Technology Policy shall designate experienced personnel to assist the Archivist of the United States in the systematic review of twenty-year old U.S. originated information and thirty-year old foreign government information accessioned into the National Archives of the United States, and conduct systematic declassification review of twenty-year old classified information in the possession and control of the Office of Science and Technology Policy. Such personnel shall:

(a) Provide guidance and assistance to National Archives employees in identifying and separating documents and specific categories of information within documents that are deemed to require continued classification;

(b) Submit to the Director, Office of Science and Technology Policy recommendations for, (1) continued classification that identify documents or specific categories of information so separated, and, (2) referrals to other agencies having classification jurisdiction over the information or material for resolution.

§ 2400.23 Systematic review guidelines and procedures.

(a) The Executive Officer, Office of Science and Technology Policy shall develop, in coordination with Office of Science and Technology Policy original classification authorities, guidelines for the systematic review for declassification of information under Office of Science and Technology Policy jurisdiction that has been classified twenty years or more (thirty years for foreign government information). The Director, Office of Science and Technology Policy, after consultation with the Archivist of the United States, shall promulgate these guidelines providing copies to the Information Security Oversight Office.

(b) All Office of Science and Technology Policy classified information transferred to the General Services Administration for accession into the Archives of the United States that is

permanently valuable and more than twenty years old will be systematically reviewed for declassification by the Archivist of the United States with the assistance of the Office of Science and Technology Policy personnel designated for the purpose pursuant to § 2400.22. Such information shall be downgraded or declassified by the Archivist of the United States in accordance with Executive Order 12065, the directives of the Information Security Oversight Office, and Office of Science and Technology Policy guidelines.

(c) All twenty-year old Office of Science and Technology Policy classified permanent records that are in the possession or control of Office of Science and Technology Policy shall be systematically reviewed for declassification by personnel designated pursuant to § 2400.22. Classified nonpermanent records that are scheduled to be retained for more than twenty years need not be systematically reviewed but shall be reviewed for declassification upon request.

(d) The Director, Office of Science and Technology Policy shall determine personally and in writing which category(ies) of information shall remain classified and the date for automatic declassification or subsequent review. The Archivist of the United States shall be notified in writing of this decision.

(e) Classified information over which Office of Science and Technology Policy does not exercise exclusive or final original classification authority may be declassified only in accordance with the systematic review guidelines, promulgated pursuant to reference (b), of the agency responsible for the classification. If such guidelines are not available or authorized for use by Office of Science and Technology Policy personnel, the information shall be referred to the responsible agency.

§ 2400.24 Mandatory review for declassification.

(a) A mandatory review for declassification under Section 3–501 of Executive Order 12065 shall be initiated upon receipt of a request by a member of the public or a government employee or agency to declassify and release information. Requests shall be in writing and reasonably describe the information sought to enable the Office of Science and Technology Policy to identify documents containing that information. Requests should be addressed to:

Executive Officer,
Office of Science and Technology Policy,
Executive Office of the President,
Washington, D.C. 20500.

(b) The Executive Officer, Office of Science and Technology Policy shall inform the requestor of the date and receipt of the request. This date will be the basis for the time limits specified in paragraph (d) of this section.

(c) If the request does not reasonably describe the information sought to allow identification of documents containing such information, the requestor shall be notified that unless additional information is provided or the request is made more specific, no further action will be taken.

(d) The requestor shall be informed of the Office of Science and Technology Policy determination within sixty days of receipt of the original request (or within sixty days of the receipt of the required amplifying information in accordance with paragraph (c) of this section).

(e) If the information may not be released in whole or in part, the requestor shall be given a brief statement as to the reasons for denial, and notice of the right to appeal the determination in writing within sixty days to the chairperson of the Office of Science and Technology Policy Review Committee. If appealed, the requestor shall be informed of the appellate determination within thirty days of receipt of the appeal.

(f) When a request is received for information classified by another agency, the Executive Officer, Office of Science and Technology Policy shall:

(1) Forward the request to such agency for review together with a copy of the document containing the information requested, where practicable, and where appropriate, with the Office of Science and Technology Policy recommendation to withhold or declassify and release any of the information;

(2) Notify the requestor of the referral unless the agency to which the request is referred objects to such notice on grounds that its association with the information requires protection; and

(3) Request, when appropriate that the agency notify the Office of Science and Technology Policy of its determination.

(g) If the request requires the rendering of services for which fees may be charged under Title 5 of the Independent Offices Appropriation Act, 31 U.S.C. 483a the Executive Officer, Office of Science and Technology Policy may calculate the anticipated amount of fees to be charged.

(1) Fees for the location and reproduction of information that is the subject of a mandatory review request shall be assessed according to the following schedule:

(i) Search for records. $5.00 per hour when the search is conducted by a clerical employee; $8.00 per hour when the search is conducted by a professional employee. No fee shall be assessed for searches of less than one hour.

(ii) Reproduction of documents. Documents will be reproduced at a rate of $.25 per page for all copying of four pages or more. No fee shall be assessed for reproducing documents that are three pages or less, or for the first three pages of longer documents.

(2) Where it is anticipated that the fees chargeable under this section will amount to more than $25, and the requestor has not indicated in advance a willingness to pay fees as high as are anticipated, the requestor shall be promptly notified of the amount of the anticipated fee or such portion thereof as can readily be estimated. In instances where the estimated fees will greatly exceed $25, an advance deposit may be required. Dispatch of such a notice or request shall suspend the running of the period for response by OSTP until a reply is received from the requestor.

(3) Remittances shall be in the form either of a personal check or bank draft drawn on a bank in the United States, or a postal money order. Remittances shall be made payable to the Treasury of the United States and mailed to the Executive Officer, Office of Science and Technology Policy, Executive Office of the President, Washington, D.C. 20500.

(4) A receipt for fees paid will be given only upon request. Refund of fees paid for services actually rendered will not be made.

(5) If a requestor fails to pay within thirty days for services rendered, further action on any other requests submitted by that requestor shall be suspended.

(6) The Executive Officer, Office of Science and Technology Policy may waive all or part of any fee provided for in this section when it is deemed to be in either the interest of the OSTP or the general public.

§ 2400.25 Prohibition.

In response to a request under the Feeedom of Information Act or this Section, the Office of Science and Technology Policy, if in possession of a document, shall not refuse to confirm the existence or non-existence of the document, unless the fact of its existence or non-existence would itself be classified under this Regulation.

§ 2400.26 Downgrading.

(a) When it will serve a useful purpose, original classification authorities may, at the time of original classification, specify that downgrading

V 4 4 / 1 7 2 S E 4 7 9 UMI

of the assigned classification will occur on a specified date or upon the occurrence of a stated event.

(b) Classified information marked for automatic downgrading is downgraded accordingly without notification to holders.

(c) Classified information not marked for automatic downgrading may be assigned a lower classification designation by the originator or by an official authorized to declassify the same information. Prompt notice of such downgrading shall be provided to known holders of the information.

Subpart E—Identification and Marking

§ 2400.27 Designation.

Subject to the exception in § 2400.28, information determined to require classification protection under the provisions of this Regulation shall be so designated. Designation by physical marking, notation, or other means serves to warn the holder about the classification of the information involved; to indicate the degree of protection that is required; and to facilitate downgrading and declassification actions.

§ 2400.28 Exception.

No article which has appeared, in whole or in part, in newspapers, magazines or elsewhere in the public domain, or any copy thereof, that is being reviewed and evaluated to compare its content with classified information that is being safeguarded in the Office of Science and Technology Policy by security classification, may be marked with any security classification, control or other kind of restrictive marking. The results of the review and evaluation, if classified, shall be separate from the article in question.

§ 2400.29 Identification and marking.

(a) At the time of classification, the following shall be shown on the face of originally or derivatively classified documents:

(1) the identity of the original classification authority, or a source document or classification guide. If classification is derived from more than one source, the phrase "multiple sources" will be shown and the identification of each source will be maintained with the file or record copy of the document;

(2) The office of origin;

(3) The date of classification;

(4) The overall classification of the document;

(5) The date or event for automatic declassification or for review for declassification;

(6) Documents classified for more than six years shall also be marked with the identity by title of the TOP SECRET classification authority who authorized prolonged classification, unless that official also is the signer or approver, and annotated with the reasons the classification is expected to remain necessary despite the passage of time; and

(7) Any downgrading action to be taken and the date thereof.

(b) The overall classification of a document, whether or not permantly bound, or any copy or reproduction thereof, shall be conspicuously marked, stamped or affixed permanently at the top and bottom on the outside of the front cover (if any), on the title page (if any), on the first page, and on the outside of the back cover (if any). Each interior page shall be marked top and bottom according to its content. Alternatively, the overall classification of the document may be conspicuously marked or stamped at the top and bottom of each interior page when such marking is necessary to achieve production efficiency and particular information to which classification is assigned is otherwise sufficiently identified consistent with the intent of § 2400.29(c). In any case, the classification marking of a page shall not supersede the classification marking of portions (§ 2400.29(c)) of the page marked with lower levels of classification.

(c) Each section, part, paragraph, subparagraph, or similar portion of a classified document shall be marked to show the level of classification of the information contained in or revealed by it, or that it is unclassified. Portions of documents shall be marked in a manner that eliminates doubt as to which of its portions contains or reveals classified information.

Supart F—Safeguarding

§ 2400.30 Access

(a) No person may have access to classified information unless that person has been determined to be trustworthy and unless access is necessary for the performance of official duties. A personnel security clearance is an indication that the trustworthiness decision has been made. Procedures shall be established by the head of each office to prevent unnecessary access to classified information. There shall be a demonstrable need for access to classified information before a request for a personnel security clearance can be initiated. The number of people cleared and granted access to classified information shall be maintained at the minimum number that is consistent with operational requirements and needs. No one has a right to have access to classified information solely by virtue of rank or position. The final responsibility for determining whether an individual's official duties require possession of or access to any element or item of classified information, and whether the individual has been granted the appropriate security clearance by proper authority, rests upon the individual who has authorized possession, knowledge, or control of the information and not upon the prospective recipient. These principles are equally applicable if the prospective recipient is an organizational entity, other Federal Agencies, contractors, foreign governments, and others.

(b) When access to a specific classification category is no longer required for the performance of an individual's assigned duties, the security clearance will be administratively adjusted, without prejudice to the individual, to the classification category, if any, required.

§ 2400.31 Access by historical researchers and former Presidential appointees.

Classified information may be made available to historical researchers and former Presidential appointees. The Director, Office of Science and Technology Policy shall determine, prior to the release of classified information, the propriety of such action in the interest of national security and assurance of the recipient's trustworthiness and need-to-know. Access will be limited to specific categories of information over which the Office of Science and Technology Policy has classification jurisdiction. OSTP shall maintain custody of classified information and obtain the recipient's written agreement to safeguard the information and to authorize a review of any notes and manuscript for determination that no classified information is contained therein.

§ 2400.32 Storage of classified information.

Whenever classified information is not under the personal control and observation of an authorized person, it will be guarded or stored in a locked security container approved for the storage and protection of the appropriate level of classified information.

§ 2400.33 Dissemination of classified information.

Heads of OSTP offices shall establish procedures consistent with this Regulation for the dissemination of classified material. The originating official may prescribe specific restrictions on dissemination of classified information when necessary.

§ 2400.34 Accountability and control.

(a) Each item of Top Secret and Secret information is subject to control and accountability requirements. Confidential information normally is not formally controlled in OSTP, however, it still must be properly safeguarded. Confidential information may be controlled when, in the judgment of the originator or recipient, it requires stringent access or accountability controls. Department of State material designated "LIMITED OFFICIAL USE" will be handled as Confidential information.

(b) The Security Officer will serve as Top Secret Control Officer (TSCO) for the Office of Science and Technology Policy and will be responsible for the supervision of the Top Secret control program. He will be assisted by an Assistant Top Secret Control Officer to effect the Controls prescribed herein for all Top Secret material.

(c) Records shall be maintained to show the number and distribution of reproduced copies of all Top Secret documents, of all classified documents covered by special access programs, and of all Secret and Confidential documents which are marked with special dissemination and reproduction limitations.

(d) Top Secrets Documents and material will be accounted for by a continuous chain of receipts.

(e) The Security Officer will develop procedures for the accountability and control of Secret information.

§ 2400.35 Reproduction of classified information.

Documents or portions of documents and materials that contain Top Secret information shall not be reproduced without the consent of the originator or higher authority. Any stated prohibition against reproduction shall be strictly observed. Copying of documents containing classified information at any level shall be minimized. Specific reproduction equipment shall be designated for the reproduction of classified information and rules for reproduction of classified information shall be posted on or near the designated equipment. Notices prohibiting reproduction of classified information shall be posted on equipment used only for the reproduction of unclassified information. All copies of classified documents reproduced for any purpose including those incorporated in a working paper are subject to the same controls prescribed for the document from which the reproduction is made.

Subpart G—Foreign Government Information

§ 2400.36 Classification.

(a) Foreign government information classified by a foreign government or international organization of governments shall retain its original classification designation or be assigned a United States classification designation that will ensure a degree of protection equivalent to that required by the government or organization that furnished the information. Original classification authority is not required for this purpose.

(b) Foreign government information that was not classified by a foreign entity but was provided with the expectation, expressed or implied, that it be held in confidence must be classified because Executive Order 12065 (reference (a)) states a presumption of a least identifiable damage to the national security in the event of unauthrorized disclosure of such information.

§ 2400.37 Duration of Classification.

(a) Foreign government information is exempt from the automatic declassification and twenty year systematic review requirements of Subpart D.

(b) Foreign government information shall not be assigned a date or event for automatic declassification unless specified or agreed to by the foreign entity.

(c) Foreign government information classified on or after December 1, 1978 shall be assigned a date for review for declassification at thrity years from the time the information was originated by the foreign entity, or acquired or classified by the Office of Science and Technology Policy, whichever is earlier.

§ 2400.38 Declassification.

In weighing the need to protect information against the possible public interest in disclosure as prescribed in § 2400.20, officials shall respect the intent of this Regulation to protect foreign government information and confidential foreign sources.

§ 2400.39 Mandatory Review.

Requests for mandatory review for declassification of foreign government information shall be processed and acted upon in accordance with the provisions of Subpart D of this part, except that foreign government information will be declassified only in accordance with the guidelines developed for such purpose and after necessary consultation with other government agencies with subject matter interest. In cases where these guidelines cannot be applied to the foreign government information requested, or in the absence of such guidelines, consultation with the foreign originator through appropriate channels normally should be effected prior to final action on the request. When the responsible OSTP official is knowlegeable of the foreign originator's view toward declassification or continued classification of the types of information requested, consultation with the foreign originator may not be necessary.

§ 2400.40 Protection of Foreign Government Information.

Classified foreign government information shall be protected as is prescribed by this Regulation for United States classified information of a comparable level.

Subpart H—Security Education

§ 2400.41 Responsibility and Objectives.

The OSTP Security Officer shall establish a security education program for OSTP personnel. The program shall stress the objectives of classifying less information, declassifying more, and improving protection of information that requires it while maintaining the interest of the Government in protecting the national security.

Subpart I—Office of Science and Technology Policy Information Security Program Management

§ 2400.42 Responsibility.

The Director, OSTP is the senior OSTP official having authority and responsibility to ensure effective and uniform compliance with and implementation of Executive Order 12065 and its implementing Directive (references (a) and (b)). As such, the Director, OSTP shall have primary responsibility for providing guidance, oversight and approval of policy and procedures governing the OSTP Information Security Program. The Director, OSTP may approve waivers or exceptions to the provisions of this Regulation to the extent such action is consistent with references (a) and (b).

§ 2400.43 Office Review Committee.

The Office of Science and Technology Policy Review Committee (hereinafter referred to as the Office Review Committee) is hereby established and will be responsible for the continuing review of the administration of this Regulation with respect to the

V 44 / 172 SEP 79

classification and declassification of information or material originated or held by the Office of Science and Technology Policy. The Office Review Committee shall be composed of the Associate Director, National Security and International Affairs who shall serve as Chairperson, the Associate Director, National Resources and Commercial Sciences, and the Security Officer.

§ 2400.44 Security Officer.

Under the general direction of the Director, the Executive Officer will serve as the Security Officer and will supervise the administration of this Regulation. He will develop programs, in particular a Security Education Program, to insure effective compliance with and implementation of the Information Security Program. Specifically he also shall:

(a) Maintain a current listing by title and name of all persons who have been designated in writing to have original Top Secret, Secret, and Confidential Classification authority. Listings will be reviewed by the Director on an annual basis.

(b) Maintain the record copy of all approved OSTP classification guides.

(c) Maintain a current listing of OSTP officials designated in writing to have declassification and downgrading authority.

(d) Develop and maintain systematic review guidelines.

§ 2400.45 Heads of Offices.

The Associate Director of each unit is responsible for the administration of this Regulation within his area. These responsibilities include:

(a) Insuring the national security information is properly classified and protected;

(b) Exercising a continuing review to downgrade and declassify information;

(c) Issuing appropriate internal security instructions and maintaining the prescribed control and accountability records on classified information under their jurisdiction.

§ 2400.46 Custodians.

Custodians of classified material shall be responsible for providing protection and accountability for such material at all times and particularly for locking classified material in approved security equipment whenever it is not in use or under direct supervision of authorized persons. Custodians shall follow procedures which insure that unauthorized persons do not gain access to classified information or material by sight or sound, and classified information shall not be discussed with or in the presence of unauthorized persons.

[FR Doc. 79-27441 Filed 8-31-79; 8:45 am]
BILLING CODE 3170-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Parts 1 and 109

[CGD 79-096]

Anchorage Grounds, Special Anchorages and Drawbridges; Delegation of Authority

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: Under procedures that are presently in effect, the Coast Guard issues a number of routine, non-significant regulations governing anchorages and drawbridges through the Office of the Commandant. As these are matters of local concern that may be processed more effectively and expeditiously at the district level, this rulemaking delegates authority for their issuance to the commanders of each of the twelve Coast Guard districts.

EFFECTIVE DATE: This amendment is effective October 1, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. D. W. Ziegfeld, Project Manager, Office of Marine Environment and Systems (G-WLE/83), Room 7315, Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590 (202) 426-1934.

SUPPLEMENTARY INFORMATION: Sections 471, 180, 258, and 322 of Title 33, United States Code authorize the Secretary of Transportation to issue regulations establishing anchorage grounds and special anchorage areas. Section 499 of the same Title confers similar authority upon the Secretary for the operation of drawbridges. In § 1.46(c) of Title 49, Code of Federal Regulations, the authority contained in all of these statutory provisions has been delegated to the Commandant of the Coast Guard. Section 1.45(b) of Title 49, Code of Federal Regulations enables the Commandant to redelegate this authority within the Coast Guard.

In the past, requests for the issuance of anchorage and drawbridge regulations, accompanied by factual and statistical information, have been submitted by the Coast Guard districts to Coast Guard Headquarters, where proposed and final rulemaking documents have been prepared. Occasionally information submitted must be clarified for Headquarters personnel, creating some delay in the issuance of regulations. As anchorages and drawbridges are essentially matters of local import, the Coast Guard feels that most regulations concerning them should be issued by district officials, who are better able to respond to the needs of the public in the areas where they serve.

Despite this delegation of authority, not every anchorage and drawbridge regulation may be issued at the district level. The Commandant remains obligated to issue any of these which are deemed "significant" under the Department of Transporation's Regulatory Policies and Procedures published in the **Federal Register** on February 26, 1979 (44 FR 11034). A drawbridge or anchorage regulation may conceivably be found significant under that document if it: (1) concerned a matter on which there is substantial public interest or controversy; (2) had a major impact on another Administration, Department, or Agency of the Federal government; (3) had a substantial effect on State and local governments; or (4) had a substantial impact on a major transportation safety problem. Given the magnitude of these criteria, very few anchorage and drawbridge regulations are likely to be found significant.

In addition, the Commandant has reserved the authority to issue any anchorage or drawbridge regulations that have been shown to raise substantial issues concerning the reasonable needs of navigation. The Coast Guard has found that inquiries and complaints from members of Congress and the public are frequently addressed to Coast Guard Headquarters over matters of this nature. A concomitant need often arises to coordinate these matters with local authorities. The Coast Guard feels that it will be in a better position to accommodate the concerns of these diverse interest groups by retaining issuing authority for these regulations at the Headquarters level.

The Commandant has also reserved the authority to issue any anchorage or drawbridge regulations which have been shown to generate controversy on a matter of importance to a particular locality. This has been undertaken in order that decision-making authority may be vested in a position that is suitably removed from the actual point of controversy. The Coast Guard feels that this will allow all necessary determinations to be made with the greatest degree of objectivity.

Drafting Information

The principal persons involved in the drafting of this delegation are: Mr. D. W. Ziegfeld, Project Manager, Office of Marine Environment and Systems, and Mr. Coleman Sachs, Project Attorney, Office of Chief Counsel.

Discussion

Three of the general provisions pertaining to anchorages in 33 CFR Part 109 have been revised to reflect this delegation of authority.

This rulemaking has been reviewed under the Department of Transportation's Regulatory Policies and Procedures of February 26, 1979 (44 FR 11034) and is considered to be non-significant. It has been further determined that the expected economic impact is so minimal that it does not warrant the preparation of a full economic evaluation.

As this action is solely concerned with agency practice and procedure, it is exempted from the provisions of 5 U.S.C. 553. Notice and the opportunity for public participation in this rulemaking have therefore not been provided.

In consideration of the foregoing, Parts 1 and 109 of Title 33 of the Code of Federal Regulations are amended as follows:

1. By revising paragraph (c) and by adding new paragraphs (g) and (h) to § 1.05-1 in Part 1 to read as follows:

§ 1.05-1 General.

* * * * *

(c) The Commandant redelegates to the Chief, Office of Marine Environment and Systems, U.S. Coast Guard Headquarters, with the reservation that this authority shall not be further redelegated, the authority to:

(1) Grant exemptions from provisions of the Vessel Bridge-to-Bridge Radiotelephone Act and Part 26 of this chapter.

* * * * *

(g) Except for those matters specified in paragraph (h) of this section, the Commandant redelegates to each Coast Guard District Commander, with the reservation that this authority shall not be further redelegated, the authority to issue rules and regulations pertaining to the following:

(1) The establishment and disestablishment of anchorage grounds and special anchorage areas.

(2) Changes to the anchorage regulations.

(3) The operation of drawbridges.

(h) The Commandant reserves authority to issue any rules and regulations specified in paragraph (g) of this section which:

(1) Are determined to be significant in accordance with the Department of Transportation's Regulatory Policies and Procedures, as published in the **Federal Register** on February 26, 1979, (44 FR 11034);

(2) Have been shown to raise substantial issues concerning the reasonable needs of navigation; or

(3) Have been shown to generate controversy on an issue of importance to a particular locality.

2. By revising paragraph (b) of § 109.01 in Part 109 to read as follows:

§ 109.01 Purpose.

* * * * *

(b) There were transferred to and vested in the Secretary of Transportation by subsection 6(g) of the Department of Transportation Act (sec. 6(g), 80 Stat. 941, 49 U.S.C. 1655) all functions, powers, and duties of the Secretary of the Army under specified laws. The Secretary of Transportation by Department of Transportation Order 1100.1 (49 CFR 1.4(a)(3)), with specified limitations, delegated to the Commandant, U.S. Coast Guard, authority to exercise the functions, powers, and duties of the Secretary with respect to anchorages, as further described in § 110.1 of this subchapter. The Commandant redelegated this authority to each Coast Guard District Commander with specified limitations, as set forth in § 1.05-1(g) of this Title.

3. By revising paragraphs (a) and (b) of § 109.05 in Part 109 to read as follows:

§ 109.05 Anchorage grounds.

(a) Section 7 of the River and Harbor Act of March 4, 1915 (33 U.S.C. 471), authorizes the establishment of anchorage grounds for vessels in navigable waters of the United States whenever it is apparent that these are required by the maritime or commercial interests of the United States for safe navigation. The statute also authorizes the adoption of suitable rules and regulations regarding the establishment of anchorage grounds, which are enforced by the Coast Guard. The authority conferred by this statute was transferred to and vested in the Secretary of Transportation by sections 6(g)(1)(A) of the Department of Transportation Act (80 Stat. 931) and delegated to the Commandant of the U.S. Coast Guard in section 1.46 of Title 49, Code of Federal Regulations, and redelegated, with specified limitations, by the Commandant to each Coast Guard District Commander in § 1.05-1(g) of this Title.

(b) District Commanders will, whenever matters relating to the anchorage of vessels are under consideration, ascertain the view of the District and Division Engineer, Corps of Engineers, U.S. Army, and the proper representatives of other departments likely to be interested, including the Commandant of the Naval District concerned and the medical officer in charge of the quarantine station at localities where quarantine anchorages are involved, in order that they may arrange for suitable representation at such hearings. The views of the medical officer in charge of the quarantine station relating to the proposed location and boundaries of the quarantine anchorage will be accepted insofar as practicable and consistent with the establishment of other anchorage areas. (An Act of Congress approved July 1, 1944, as amended (42 U.S.C. 267), authorizes the Surgeon General, with the approval of the Secretary of Health, Education, and Welfare, to designate the boundaries of the quarantine grounds and quarantine anchorages for vessels which are reserved for use at each United States quarantine station.) A notice of public hearing concerning changes to the Anchorage Regulations will be issued by the District Commander and will be mailed to all known interested parties. After providing an opportunity for public participation, the District Commander will, if circumstances so warrant, issue changes to the Anchorage Regulations, or in appropriate cases forward recommendations for such changes to the Commandant.

4. By revising § 109.10 in Part 109 to read as follows:

§ 109.10 Special anchorage areas.

An Act of Congress of April 22, 1940, provides for the designation of special anchorage areas wherein vessels not more than sixty-five feet in length, when at anchor, will not be required to carry or exhibit anchorage lights. Such designation is to be made after investigation, by rule, regulation, or order, the procedure for which will be similar to that followed for anchorage grounds under section 7 of the River and Harbor Act of March 4, 1915, as referred to in § 109.05. The areas so designated should be well removed from the fairways and located where general navigation will not endanger or be endangered by unlighted vessels. The authority to designate special anchorage areas was transferred to and vested in the Secretary of Transportation by sections 6(g)(1)(D) of the Department of Transportation Act (80 Stat. 931) and delegated to the Commandant of the U.S. Coast Guard in Title 49, Code of Federal Regulations and redelegated, with specified limitations, by the Commandant to each Coast Guard District Commander in § 1.05-1(g) of this Title.

BILLING CODE 4910-14-M

33 CFR Part 165

[CGD9-79-01R]

Safety Zone—Vicinity of Crisp Point Light (Great Lakes Light List # 1666)

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This amendment to the Coast Guard's Sefety Zone Regulations establishes the area in the vicinity of CRISP POINT LIGHT, EASTERN LAKE SUPERIOR, as a safety zone. This safety zone is established to safeguard the U.S. Army Corps of Engineers Derrick COLEMAN and to allow salvage operations to take place.

DATES: This amendment is effective on July 26, 1979 and remains effective until the completion of the operation on or about August 20, 1979.

FOR FURTHER INFORMATION CONTACT: LT. D. P. FORTUNE, c/o Commanding Officer, U.S. Coast Guard Captain of the Port, 337 Water St., Sault Ste. Marie, MI 49783 Tel: (906) 635-5495.

SUPPLEMENTARY INFORMATION: This amendment is issued without publication of a notice of proposed rulemaking and this amendment is effective in less than 30 days from the date of publication because public procedures on this amendment are impractical.

DRAFTING INFORMATION: The principal person involved in the drafting of the rulemaking is LT. D. P. FORTUNE, COTP Officer, U.S. Coast Guard, Captain of the Port, 337 Water Street, Sault Ste. Marie, MI 49783.

In consideration of the above, Part 165 of Title 33 of the Code of Federal Regulations is amended by adding § 165.949 to read as follows:

§ 165.949 Vicinity, Crisp Point Light (Great Lakes Light List Number 1666), Eastern Lake Superior.

The area enclosed by the following boundary is a safety zone—a 1000 foot radius around U.S. Army Corps of Engineers Derrick COLEMAN in a four point mooring at a position 46 49' N latitude 85 17' E longitude, 8200 yards 359 degrees true from Crisp Point Light.

(92 Stat. 1475 (33 U.S.C. 1225); 49 CFR 1.46(n)(4)).

Dated: July 24, 1979.

Joseph H. Wubbold,

Captain, U.S. Coast Guard Captain of the Port Sault Ste. Marie, MI.

BILLING CODE 4910-14-M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

33 CFR Part 209

Shipping Safety Fairways and Anchorages, Gulf of Mexico

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Final rule.

SUMMARY: The Corps of Engineers is hereby amending the regulations which establish the Galveston Entrance Fairway and Anchorage Areas in the Gulf of Mexico. The purpose of the amendment is to facilitate the production and movement of oil and gas from wells located within the anchorage areas and surrounding area by permitting pipeline construction.

DATE: Effective on 15 September 1979.

ADDRESS: HQDA, DAEN-CWO-N, Washington, D.C. 20314.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph T. Eppard (202) 693-5070.

SUPPLEMENTAL INFORMATION: Shipping safety fairways and anchorages have been established by the Department of the Army to control the erection of structures in shipping approaches to major coastal ports. Department of the Army permits are required for the construction of any structure in or over any navigable water of the United States pursuant to Section 10 of the River and Harbor Act of 1899 and for artificial islands and fixed structures located on the outer continental shelf in accordance with Section 4(e) of the Outer Continental Shelf Lands Act Amendments of 1953. The Corps in effect established the fairways and anchorages by denying permits for the erection of structures within certain designated areas. The Galveston Fairway and Anchorage Areas were established in 33 CFR 209.135 on 18 December 1968.

The Galveston District Engineer has received an application for a permit to construct a pipeline extending from the Galveston Anchorage Area across the Galveston Fairway and East Anchorage Area. Inasmuch as the District Engineer has an established policy that prohibits crossing anchorage areas with pipelines, the Corps is deleting a small portion of the anchorages at the southerly boundaries to facilitate the pipelines. The seaward boundary of the triangular easterly anchorage area is relocated landward about 5 nautical miles, truncating the anchorage area to a more practical quadrangular shape. The seaward boundary of the westerly anchorage is relocated landward approximately 0.5 nautical mile. The pipelines are required to accommodate the production and transmission of vitally needed oil and natural gas. The Corps will continue to restrict the erection of platforms and other structures within the two areas deleted from the anchorage areas.

This amendment was published in the Notice of Proposed Rulemaking Section of the Federal Register on 15 June 1979 (44 FR 34519) with the comment period expiring on 16 July 1979. The U.S. Coast Guard has expressed no objection to the proposed amendment provided the Corps maintains the restriction on structures within the areas deleted. Comments were received from the following:

Summary of Objections

Opposition has been expressed to any change which would predetermine the findings of the U.S. Coast Guard in that Agency's ongoing studies required by the Ports and Waterways Safety Act of 1978 (P.L. 95-474). The Corps has coordinated this action with the Coast Guard and by continuing the prohibition on surface structures has eliminated this concern.

Several objectors expressed concern about the holding quality of the bottom in the anchorage area and feel the area presently is inadequate to accommodate the 50 to 60 ships which are at times using the area. The Corps has concluded that reducing the anchorage area by approximately 9.0 square nautical miles or six percent will not have a significant or critical effect on the capacity of the anchorage area.

Accordingly, the Department of the Army is hereby amending the regulations in 33 CFR 209.135 by revising (d)(11) only as set forth below:

209.135 Shipping Safety Fairways and Anchorage Areas, Gulf of Mexico

BILLING CODE 3710-92-M

PENNSYLVANIA AVENUE DEVELOPMENT CORPORATION

36 CFR Part 922

Planning and Design Objectives, Controls, and Standards on the Western Half of Square 457.

AGENCY: Pennsylvania Avenue Development Corporation.

ACTION: Interim Rule; request for comment.

SUMMARY: The Pennsylvania Avenue Development Corporation proposes regulations relating to controls and standards for the western half of Square 457, an area in the District of Columbia which is scheduled for development and rejuvenation under The Pennsylvania Avenue Plan—1974. The regulations address such areas as height, development massing, pedestrian features and related subjects. The controls and standards are intended to implement The Pennsylvania Avenue Plan—1974, as amended. Public comment is invited on the substance of this Interim Rule as well as the readability and clarity of presentation.

DATES: Effective date: September 4, 1979. comments must be received on or before October 4, 1979.

ADDRESS: Send comments to Mr. Al Milin, Square 457 Coordinator, Pennsylvania Avenue Development Corporation, 425 13th Street, NW., Suite 1148, Washington, D.C. 20004.

FOR FURTHER INFORMATION CONTACT: Ms. Mary M. Schneider, Attorney (202) 566-1078, or Mr. Yong-Duk Chyun, Architect (202) 566-1218, Pennsylvania Avenue Development Corporation.

SUPPLEMENTARY INFORMATION: The Pennsylvania Avenue Development Corporation (the Corporation) is a wholly owned government corporation of the United States with authority to develop and rejuvenate 21 blocks along the north side of Pennsylvania Avenue, NW., Washington, D.C. The Corporation has prepared a development plan, The Pennsylvania Avenue Plan—1974, which has been adopted by Congress. In order to facilitate development in accordance with the Plan, the Corporation will be preparing Controls and Standards for many of the blocks under its jurisdiction.

This interim rule sets forth the Controls and Standards for both required and recommended features applicable to development of the western half of Square 457, an area on Square 457, a block in the District of Columbia, as recorded by the Surveyor of the District of Columbia. The Controls and Standards will be distributed to affected property owners and potential developers, and will become the basis on which development proposals and related actions will be reviewed and approved by the Corporation.

The Controls and Standards set forth required controls and standards for height, development massing, land uses, pedestrian amenities, land parcelization, historic preservation, off-street parking and loading and related subjects. The document also sets forth recommended controls and standards in such areas as uses, energy conservation, off-street loading and parking, historic preservation, and related subjects.

36 CFR Chapter IX, Subchapter B, is amended by adding a new Part 922 to read as follows:

PART 922—WESTERN HALF OF SQUARE 457

Subpart A—General

Sec.
922.1 Definitions.

Subpart B—Required Planning and Design Controls and Standards

922.20 Required controls and standards: Development parcels.
922.21 Required controls and standards: Integration of development parcels.
922.22 Required controls and standards: Development control zones.
922.23 Required controls and standards: Bulk.
922.24 Required controls and standards: Build-to line.
922.25 Required controls and standards: Height of development.
922.26 Required controls and standards: Mandatory court.
922.27 Required controls and standards: Pedestrian features.
922.28 Required controls and standards: Uses.
922.29 Required controls and standards: Rooftop uses.
922.30 Required controls and standards: Curb-cuts.
922.31 Required controls and standards: Off-street parking.
922.32 Required controls and standards: Off-street loading.
922.33 Required controls and standards: Provisions for the handicapped.
922.34 Required controls and standards: Historic preservation.
922.35 Required controls and standards: Streetfront design.
922.36 Required controls and standards: Storefront design.
922.37 Required controls and standards: Fire and life safety.

Subpart C—Recommended Planning and Design Controls and Standards

922.50 Recommended controls and standards: Development parcels.
922.51 Recommended controls and standards: Uses.
922.52 Recommended controls and standards: Court.
922.53 Recommended controls and standards: Energy conservation.
922.54 Recommended controls and standards: Access for offstreet parking and loading.
922.55 Recommended controls and standards: Historic preservation.
922.56 Recommended controls and standards: Fire and life safety.

Authority: Sec. 6(8) Pennsylvania Avenue Development Corporation Act of 1972 (40 U.S.C. 875(8)).

UMI

Subpart A—General

§ 922.1 Definitions.

In addition to the words and phrases defined in this section, the words and phrases as defined in section 1202 of the Zoning Regulations of the District of Columbia, as amended, are applicable to this part. Where a conflict arises in terminology or interpretation between this section and section 1202 of the Zoning Regulations, this section shall control.

Build-to line means a line with which the exterior wall of a building in a *development* is required to coincide, except that architectural features such as recesses, niches, entrances, or other articulations of the facade are permitted, unless otherwise prohibited by these Controls and Standards or the District of Columbia's codes and regulations.

Development means a structure, including a building, planned unit development, or project resulting from the process of planning, land acquisition, demolition, construction, or *rehabilitation* consistent with the objectives and goals of *The Plan*.

Development parcel means an area of land established by the Corporation to be a minimum site on which a *development* may occur under *The Plan* and any applicable Planning and Design Objectives, Controls, and Standards adopted by the Corporation.

Height of development means the vertical distance measured from a specified point at the curb level of a street to the highest point of the roof or parapet of the *development* inclusive of all structures on the roof not otherwise specifically excluded in this part.

The Plan means The Pennsylvania Avenue Plan—1974, as amended, and prepared pursuant to Pub. L. 92–578, 86 Stat. 1266 (40 U.S.C. 871), and the document which sets forth the *development* concepts upon which these controls and standards are based.

Rehabilitation means the process of adapting improvements on real property to make possible an efficient contemporary use achieved by means of a combination of construction, repair, or alteration, as well as *restoration* and *replication* of those portions and features of the property that are significant to its historic, architectural, and cultural values, consistent with the goals and objectives of The Plan.

Replication means the process of using modern methods and materials to reproduce the exact form and details of a vanished building, structure, object, or portion thereof, as it appeared at a particular period of time, and consistent with the objectives and goals of *The Plan*.

Restoration means the process of accurately recovering the form and details of a property as they appeared at a particular period of time by means of removal of later work and the replacement of missing original work, consistent with the objectives and goals of *The Plan*.

Storefront means the street level frontage relating to a single store.

Structural Bay means the distance or span from one vertical structural member fronting on a street to the immediately adjacent vertical structural member fronting on the same street.

Subpart B—Required Planning and Design Controls and Standards

§ 922.20 Required controls and standards: Development parcels.

(a) The western half of Square 457 is the area bounded by 7th, D, and E Streets, NW., Washington, D.C., and the north-south public alley bisecting Square 457 as shown on Diagram 1. The north-south public alley shall be:

(1) The existing north-south public alley between E Street, NW., and D Street, NW.; plus

(2) An area extending southward from the E Street right of way line for a distance of 217 feet and measured westward 5 feet from the west line of the existing north-south public alley.

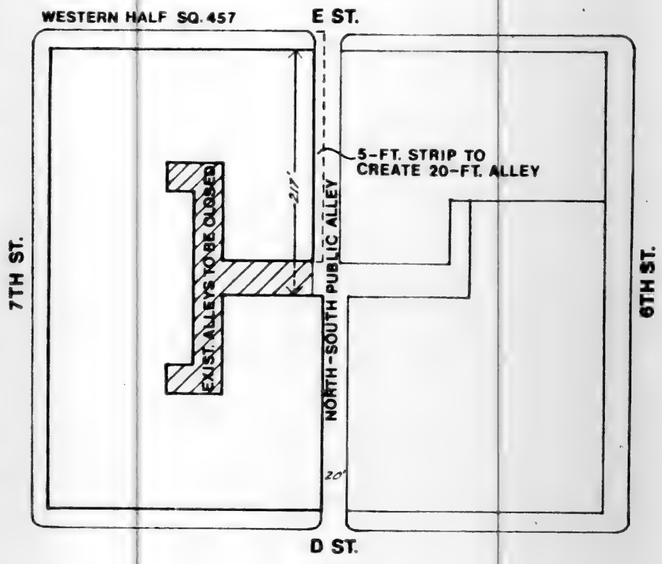

Diagram 1

Western Half of Square 457

(b) The western half of Square 457 shall be developed in no more than four *development parcels* as specified in this § 922.20 and shown on Diagram 2b.

(1) Parcel A is a *development parcel* that fronts on 7th and D Streets, NW., and incorporates all of Lots 815, 848, 853, 818, and portions of Lots 819 and 820 measured eastward from the 7th Street right-of-way line for a distance of approximately 60 feet. Parcel A is approximately 9,070 square feet in area.

(2) Parcel B is a *development parcel* that fronts on 7th and E Streets, NW., and incorporates Lot 826 in its entirety and portions of Lots 823, 824, and 825 measured eastward from the 7th Street right-of-way line for a distance of 60 feet. Parcel B is approximately 9,795 square feet in area.

(3) Parcel C is a *development parcel* and is the remainder of the western half of Square 457. Parcel C is approximately 74,240 square feet in area. (See Diagram 2a.)

(4) The Mayer Building (419–423 7th Street, NW.), located within Parcel C on Lot 36, may be created as a separate *development parcel*, Parcel D (see Diagram 2b): *Provided*, That:

(i) The Mayer Building is *rehabilitated* and integrated with other *developments* as specified in § 922.20;

(ii) The Mayer Building is devoted to a use specified in § 922.27(b); and

(iii) The development process occurs prior to *development* of the remainder of Parcel C; or

(iv) The development process is undertaken by a separate developer contemporaneous with *development* on the remainder of Parcel C.

Parcel D is approximately 9,251 square feet in area, and the remainder of Parcel C is approximately 64,990 square feet in area.

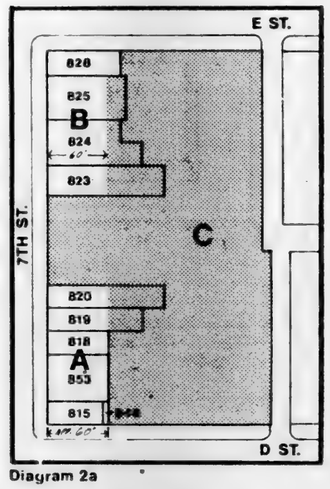

Diagram 2a

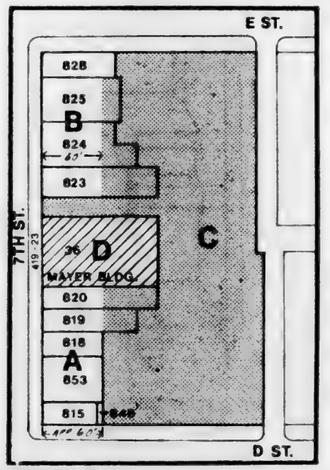

Diagram 2b

Development Parcels

§ 922.21 Required controls and standards: Integration of development parcels.

(a) Each *development* shall be planned and designed so that upon completion of the western half of the Square all *developments* can be integrated with regard to:

(1) Off-street loading facilities, and

(2) Ground floor pedestrian features, where such features are provided.

(b) The Corporation may require that any and all *development parcels* be recorded as a lot of record with the Surveyor's Office of the District of Columbia should such recordation be required to achieve the integrated and comprehensive *development* contemplated for the western half of the square. It is the Corporation's intention that no lot of record shall be created that will adversely impact any *development* on a specified *development parcel* described in § 922.20.

(c) In order to facilitate integration of the western half of Square 457, the Corporation shall require that certain areas, spaces, and facilities within designated Parcel C be made useable by and accessible from Parcels A, B, and D.

(d) Parcels, A, B, and D shall have rights to access and use on those portions of Parcel C described as a court in § 922.26(a) and such rights shall be in accordance with the provisions of § 922.26 (b) through (h); Parcels A, B, and D shall also have rights to subsurface access and off-street loading facilities located within Parcel C.

§ 922.22 Required controls and standards: Development control zones.

The western half of Square 457 shall be divided into three development control zones as specified in this § 922.22 and shown on Diagram 3:

(a) Zone I is bounded on the west by the right-of-way line of 7th Street, NW; on the south by the right-of-way line of D Street, NW; on the north by the right-of-way line of E Street, NW; and on the east by a line measured 60 feet from the 7th Street right-of-way, except that Lot 826 shall be included in its entirety.

(b) Zone II is bounded on the west by Zone I, on the north by the right-of-way line of E Street, NW., on the south by the right-of-way line of D Street, NW., and on the east by a line measured 90 feet east from the right-of-way line of 7th Street, NW.

(c) Zone III shall be the remaining portion of the western half of Square 457.

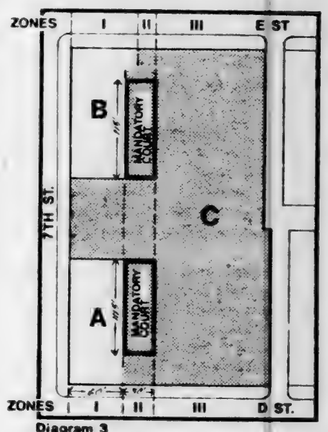

Diagram 3

Development Control Zones

§ 922.23 Required controls and standards: Bulk.

The western half of Square 457 shall be limited to a maximum floor area ratio of 8.5.

§ 922.24 Required controls and standards: Build-to line.

A *build-to line* for a *development* in Zone I is established at the right-of-way line of 7th Street, N.W., for the entire length of the street between D and E Streets, N.W.

§ 922.25 Required controls and standards: Height of development.

(a) The *height of development* in Zone I shall not exceed ninety (90) feet.

(b) The *height of development* in Zone II shall not exceed one hundred ten (110) feet.

(c) The *height of development* in Zone III shall not exceed one hundred thirty (130) feet.

(d) In Zone I and Zone II roof structures are not permitted on roof areas.

(e) *Development* within Zone III is limited to a *height of development* of one hundred ten (110) feet, exclusive of roof structures.

(f) The *height of development* in Zones II and III shall be measured at a point on the curb at the intersection of the curb line of 7th Street, N.W., and the right-of-way line of E Street, N.W. (See "A" in Diagram 4.)

(d) A court shall be landscaped and architecturally treated in an attractive manner and shall not be penetrated, receive exhaust, or otherwise be intruded into by ventilation grates or fans, stairways to subsurface parking and loading, mechanical equipment related to operation of a *development*, or the like; except that restricted access from subsurface space is permitted where (1) the access point occupies only a minimal portion of the court area, (2) the access point is designed in a manner complementary to and compatible with

level, and not less than 350 dwelling units shall be provided.

(b) It is not intended that Parcels A and B be primarily devoted to residential use, but residential use is permitted on Parcels A and B.

(c) In the event the Mayer Building (Parcel D) is *rehabilitated*, it shall be devoted to residential use, or activity generating uses such as theatre, exhibits, retail, or a mixture thereof, but office use shall be prohibited.

(d) The ground floor of the western half of Square 457 shall be primarily devoted to a mix of retail

(d) The maximum number of parking spaces for a *development* shall not exceed the aggregate of the number of parking spaces allowed for each use within the *development*, except that the number of parking spaces allocated to one *development parcel* may be increased by transferring the unused allocation of parking spaces from another *development parcel* on the western half of Square 457. If such allocation is transferred, the parking facility shall be designed to provide access to the parking facility from the

§ 922.23 Required controls and standards: Bulk.

The western half of Square 457 shall be limited to a maximum floor area ratio of 8.5.

§ 922.24 Required controls and standards: Build-to line.

A *build-to line* for a *development* in Zone I is established at the right-of-way line of 7th Street, N.W., for the entire length of the street between D and E Streets, N.W.

§ 922.25 Required controls and standards: Height of development.

(See Diagram 4.)

(a) Within Zone I, no *development* or a portion thereof shall exceed a *height of development* of four stories if the *development* has a flat roof, or three stories if any other roof configuration is provided, except

(1) Where the Mayer Building is rehabilitated, the *height of development* on Parcel D shall be limited to the roof line of the Mayer Building;

(2) Where *development* occurs in conjunction with an existing building or facade, or a relocated building or facade, the *height of development* shall be limited to the height of that building or facade.

For the purpose of this section, any mezzanine provided at any level above the first story shall be considered a story, and any basement area shall not be considered a story.

(b) In Zone I, except on the Mayer Building, Parcel D, the *height of development* specified in § 922.25(a) may be exceeded by two stories if:

(1) The additional stories are added on a flat roof configuration;

(2) The additional stories are devoted to residential use;

(3) The additional stories are set back on a horizontal plane not less than 20 feet from any adjacent street right-of-way and,

(4) The additional stories, where they front on a court are set back one inch for every two inches of height above the *height of development* for Zone I specified in § 922.25(b).

(c) *Development* or a portion thereof within Zone II is limited to a *height of development* of eighty (80) feet, except that the *height of development* on Parcel D shall not exceed the height of the roof line of the Mayer Building.

(d) In Zone I and Zone II roof structures are not permitted on roof areas.

(e) *Development* within Zone III is limited to a *height of development* of one hundred ten (110) feet, exclusive of roof structures.

(f) The *height of development* in Zones II and III shall be measured at a point on the curb at the intersection of the curb line of 7th Street, N.W., and the right-of-way line of E Street, N.W. (See "A" in Diagram 4.)

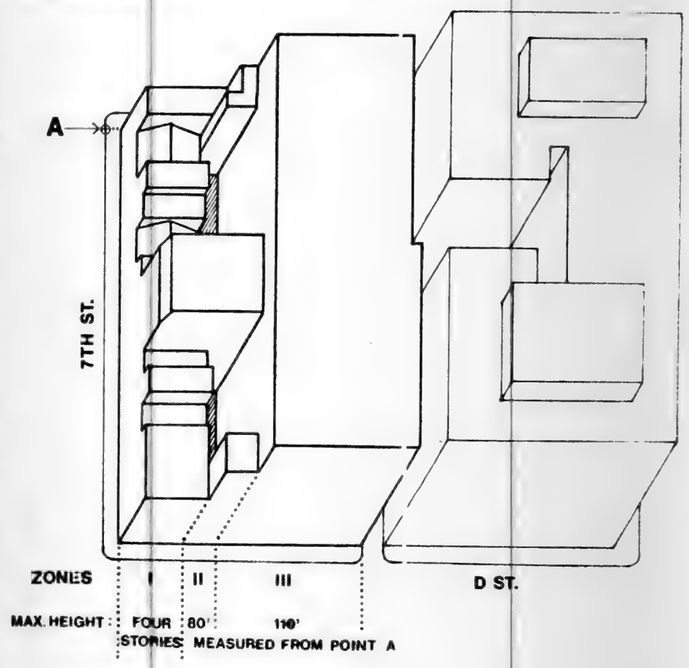

Diagram 4

Height of Development

§ 922.26 Required controls and standards: Mandatory court.

(a) *Development* on Parcel C is required to provide two courts within Zone II of the following minimum dimensions (see Diagram 3) and the requirements described in paragraphs (b) through (f) of this section apply to these mandatory courts.

(1) A court, adjacent to Parcel A, shall extend southward not less than 111.5 feet from the southern lot line of Lot 36, and shall be at least 30 feet wide.

(2) A court, adjacent to Parcel B, shall extend northward not less than 115 feet from the northern lot line of Lot 822, and shall be at least 30 feet wide.

(b) A court shall be open to the sky providing light and air for *development* on adjacent *development parcels*.

(c) The level within a court located in Zone II shall be within the range of specific topographic elevations set forth below, based on Vertical Datum of the District of Columbia Department of Transportation Datum:

(1) The court adjoining Parcel A—elevation 22 feet and elevation 27 feet;

(2) The court adjoining Parcel B—elevation 30 feet and elevation 40 feet.

(d) A court shall be landscaped and architecturally treated in an attractive manner and shall not be penetrated, receive exhaust, or otherwise be intruded into by ventilation grates or fans, stairways to subsurface parking and loading, mechanical equipment related to operation of a *development*, or the like; except that restricted access from subsurface space is permitted where (1) the access point occupies only a minimal portion of the court area, (2) the access point is designed in a manner complementary to and compatible with the landscaping and architectural treatment of the court, and (3) access through this point is for a special purpose which cannot be satisfied by other access points to the subsurface space within a *development*.

(e) Any *development* on Parcels A, B, or D shall have access to the mandatory court adjacent to that *development*, and shall have a right to use that court or a portion thereof under the terms of an agreement negotiated with the developer of Parcel C. The developer of Parcel C may not unreasonably withhold consent to use of the mandatory courts by adjacent *development parcels*, or otherwise impair negotiation of an agreement for use of the mandatory courts. The mandatory court shall be used for day and evening activities which are compatible with the uses in each *development* adjoining that court.

(f) The court adjacent to Parcel A shall have a direct connection to D Street, NW, and the court adjacent to Parcel B shall have a direct connection to E Street, NW.

(g) Upon completion of all *developments* on the western half of the Square, vehicular use is prohibited in every court.

(h) All surfaces fronting on any court shall be of a high quality design in order to create an attractive and pleasant court area, and to provide light and air to interior spaces of any adjoining *development*.

§ 922.27 Required controls and standards: Pedestrian features.

(a) All retail spaces on the ground level fronting on a street shall be made directly accessible from the adjacent sidewalk.

(b) When ground floor pedestrian features are provided in more than one *development*, such features shall be designed to allow free flowing pedestrian movement between *developments*.

§ 922.28 Required controls and standards: Uses.

(a) Parcel C shall be primarily devoted to residential use above the ground level, and not less than 350 dwelling units shall be provided.

(b) It is not intended that Parcels A and B be primarily devoted to residential use, but residential use is permitted on Parcels A and B.

(c) In the event the Mayer Building (Parcel D) is *rehabilitated*, it shall be devoted to residential use, or activity generating uses such as theatre, exhibits, retail, or a mixture thereof, but office use shall be prohibited.

(d) The ground floor of the western half of Square 457 shall be primarily devoted to a mix of retail, entertainment, restaurant, and exhibition uses that will encourage lively activities at the street level throughout the day, evening, and weekend. The ground floor of that portion of *development* in Zones II and III may also be devoted to uses that provide services related to residential use, such as nursery, grocery store, drug store, dry cleaner, etc.

§ 922.29 Required controls and standards: Rooftop uses.

(a) In Zone I, rooftop uses are prohibited except that, when residential uses are provided in any *development* in Zone I, rooftop uses are permitted, but such uses are limited to those which satisfy the requirement for "residential recreation space" specified in subsection 5302.2 of the District of Columbia Zoning Regulations.

(b) In Zones II and III, cafes, restaurants, and recreational uses including gardens and playgrounds are permitted on roof areas.

§ 922.30 Required controls and standards: Curb-cuts.

(a) No curb-cut shall be permitted along any portion of 7th, D, or E Streets, NW., adjoining Zones I or II.

(b) In Zone III, a single curb cut is permitted on D Street, N.W., and a single curb cut is permitted on E Street, N.W.

§ 922.31 Required controls and standards: Off-street parking.

(a) Off-street parking as a principal use is prohibited. Off-street parking as an accessory use in a *development* is permitted.

(b) All parking spaces shall be located below grade level.

(c) When an off-street parking facility is provided as part of a *development*, it shall be designed and constructed so as to permit its consolidation with off-street parking facilities of other *developments* on the western half of the Square. Upon completion of all *developments* on the western half of Square 457, all ingress and egress to parking facilities shall be on Parcel C.

(d) The maximum number of parking spaces for a *development* shall not exceed the aggregate of the number of parking spaces allowed for each use within the *development*, except that the number of parking spaces allocated to one *development parcel* may be increased by transferring the unused allocation of parking spaces from another *development parcel* on the western half of Square 457. If such allocation is transferred, the parking facility shall be designed to provide access to the parking facility from the *development* that transferred the unused parking allocation. The schedule of limitations for parking spaces is as follows:

(1) Hotel: one parking space for each four sleeping rooms or suites;

(2) Places of public assemblage other than hotels (i.e., arena, armory, theater, auditorium, community center, convention center, concert hall, etc.): One parking space for each ten seats of occupancy capacity for the first 10,000 seats, plus one for each 20 seats above 10,000; *Provided*, That where seats are not fixed, each seven square feet of gross floor area usable for seating shall be considered one seat;

(3) Retail, trade, and service establishments: one parking space for each 750 square feet of gross floor area;

(4) Residential: One parking space for each 1.2 units;

(5) Offices: One parking space for each 1,800 square feet of gross floor area.

§ 922.32 Required controls and standards: Off-street loading.

(a) Any off-street loading facility shall comply with Article 73 of the Zoning Regulations of the District of Columbia.

(b) A consolidated off-street loading facility located on Parcel C shall service all *development parcels* on the western half of Square 457.

(c) The off-street loading and servicing for Parcels A, B, and D shall be below grade and shall be designed and constructed for final integration with the off-street loading/servicing facility in Parcel C. *Development* on Parcel C shall be designed and constructed to accommodate off-street loading and servicing for Parcels A, B, and D.

(d) All ingress and egress for off-street loading facilities shall be from the north-south public alley.

(e) No off-street loading shall abut any sidewalk.

(f) Until a *development* takes place on Parcel C, loading access for Parcels A, B, and D shall be from existing alleys at grade level.

V 44 172 SEP 79 UMI

V 4 4 / 1 7 2 S E 4 7 9 UMI

§ 922.33 Required controls and standards: Provisions for the handicapped.

Each *development* shall be designed and constructed to incorporate features that will make the *development* readily accessible by the physically handicapped. The specifications published by the American National Standards Institute, Inc. (ANSI A117.1 Revised 1971) titled "Specifications for Making Buildings and Facilities Accessible to, and Usable by, the Physically Handicapped" should be used as guidelines.

§ 922.34 Required controls and standards: Historic preservation.

(a) The historic preservation aspects of the *development* shall be implemented in accordance with the Historic Preservation Plan of the Pennsylvania Avenue Development Corporation. The streetfronts in Zone I in Square 457 will become part of a larger "Historic Preservation Zone" consisting of existing buildings and facades relocated and *replicated* building facades, and new building designs. The Historical Preservation Zone will recreate the visual quality and character of the typical 19th Century commercial street in areas along Pennsylvania Avenue and 7th Street. However, the overall effect desired is not that of a museum, but an eclectic street frontage which expresses the growth and change of the city.

(b) The following buildings and/or their facades located in the western half of Square 457 shall be preserved as part of Program II of the Historic Preservation Plan (see Diagram 5):

(1) Program IIA: Preservation in Place

401–407 7th Street, NW. (Crandell Building), Lots 815, 846, and 853; 417 7th Street, NW., Lot 820; and 443 7th Street, NW., Lot 826

(2) Program IIB: Building Facade Relocations

Note.—These buildings may be considered for relocation within any area of the Historical Preservation Zone.

629 D Street, NW. (Central Armature Works), Lot 864 and

415 7th Street, NW. (Union Clothing & Furniture), Lot 819

(3) Program IIC: Salvage and Re-Use of Architectural Elements

626 E Street, NW., Lot 827

(c) Buildings and/or their facades or elements may be relocated to the western half of Square 457 from other sites in the development area as specified in Program IIB and IIC of the Historic Preservation Plan.

(d) Because of the scale and character of the historic buildings on and near Square 457, it is especially important to apply sensitive treatment to massing and facade design for all *rehabilitation* projects and new *developments*.

(e) *Restoration, rehabilitation,* and *replication* shall be carried out in consultation with the Pennsylvania Avenue Development Corporation, and on the basis of the "Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings" issued by the Technical Preservation Services Division, Heritage Conservation and Recreation Service, U.S. Department of Interior.

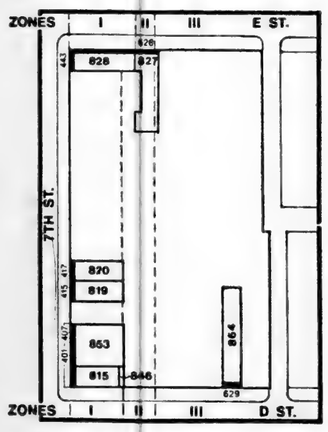

Diagram 5
Historic Preservation

§ 922.35 Required controls and standards: Streetfront design.

In order to create the Historical Preservation Zone described in the Historic Preservation Plan, the street frontage along 7th Street, NW., on the western half of Square 457 shall consist of a combination of the following building elements and facades to be approved by the Corporation:

(a) Buildings or facades to be preserved in place;

(b) Relocated buildings or facades not exceeding four stories;

(c) *Replicated* facades which previously existed or now exist in the development area using a combination of new materials and/or salvaged architectural elements;

(d) Contemporary building designs which consider the following design elements of the adjacent historic buildings:

(1) Height;
(2) Scale;
(3) Proportion of building;
(4) Rhythm of solids and voids in fenestration;
(5) Vertical and horizontal articulation of the facade composition;
(6) Rhythm of entrances, recesses, and show windows of the street frontage;
(7) Materials;
(8) Textures;
(9) Color;
(10) Architectural Detail; and
(11) Signs.

§ 922.36 Required controls and standards: Storefront design.

(a) Any *storefront* located in Zones I and II shall be no more than the width of one *structural bay*. Except in the Mayer Building where a storefront will be limited to no more than two structural bays.

(b) *Storefront* designs can be either *replications* of period *storefronts*, new designs which reflect some of the historic qualities of the upper floors, or contemporary designs which juxtapose the new with the old in a complementary manner.

§ 922.37 Required controls and standards: Fire and life safety.

Any *development* on the western half of Square 457 shall be so designed as to provide fire and life safety egress only to adjoining streets or to the north-south public alley bisecting the Square.

Subpart C—Recommended Planning and Design Controls and Standards

§ 922.50 Recommended controls and standards: Development parcels.

If the Mayer Building is *rehabilitated*, it is recommended that Parcel D not be developed independently, but that Parcel C and Parcel D be developed together in order to appropriately integrate the two *development parcels*.

§ 922.51 Recommended controls and standards: Uses.

(a) Along the ground level frontages of 7th Street, NW., uses which generate a low level of activities or engage in business for a limited period of time during the day such as banks, airline ticket offices, travel bureaus, etc., are discouraged.

(b) It is highly recommended that there be residential use on Parcels A, B, and D.

(c) It is highly recommended that al *developments* on the western half of Square 457 provide, in the aggregate, 400 dwelling units.

§ 922.52 Recommended controls and standards: Court.

(a) It is recommended that the mandatory courts in Zone II be larger than the minimum dimensions prescribed in § 922.26(a).

(b) It is recommended that there be well designed pedestrian connections between the mandatory courts and D and E Streets.

§ 922.53 Recommended controls and standards: Energy conservation.

All new buildings should be designed to be economical in energy consumption. The conservation standards of ASHRAE 90–75 should be used as guidelines.

§ 922.54 Recommended controls and standards: Access for off-street parking and loading.

(a) It is highly recommended that ingress and egress for consolidated off-street parking on the western half of Square 457, be through the north-south public alley bisecting Square 457.

(b) It is recommended that points of ingress and egress for consolidated off-street parking facilities be provided directly adjacent to the north-south public alley, in case such access cannot be provided through the alley as recommended in paragraph (a) of this section.

§ 922.55 Recommended controls and standards: Historic preservation.

(a) It is recommended that streetfronts in Zone II in Square 457 become part of a larger "Historical Preservation Zone" consisting of existing buildings and facades, relocated building facades, and complementary new building designs.

(b) Buildings and/or their facades may be relocated to the western half of Square 457 from sites outside the development area with the approval of the Corporation.

(c) Along 7th Street, NW, existing buildings or facades not specified herein may be considered for preservation in place. If a building or facade not specified herein is approved for preservation in place, it shall be *restored, rehabilitated,* or *replicated* in accordance with the provisions of § 922.34(e).

§ 922.56 Recommended controls and standards: Fire and life safety.

It is highly recommended that all buildings in the western half of Square 457 meet the NFPA Code for fire safety and that all buildings of six or more stories be equipped with a sprinkler system.

Issued in Washington, D.C.
Dated: August 28, 1979.

Joseph B. Danzansky,
Chairman.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[FRL 1311-5; OPP-260033A]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Editorial Amendments; Correction

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Correction.

SUMMARY: This document corrects a final rule that appeared on Editorial Amendments at page 37918 in the **Federal Register** of Friday, June 29, 1979 (FR Doc. 79–20095). The document is corrected by deleting extraneous pesticide chemicals from the Alphabetical Listing of Pesticide Chemicals and including pesticide chemicals that were omitted from the Alphabetical Listing of Pesticide Chemicals.

EFFECTIVE DATE: September 4, 1979.

FOR FURTHER INFORMATION, CONTACT: Mr. Edward Gross, Office of Toxic Substances (TS–793), EPA, 401 M Street, S.W., Washington, D.C. 20460 (202/426–1800).

SUPPLEMENTARY INFORMATION: In FR Doc. 79–20095 appearing at page 37918 in the issue of June 29, 1979, the following corrections are made in item 12, which begins at the bottom of the middle column on page 37919:

1. In item 12a. in the table, "2,4-Bis(isopropylamino)-methylthio-S-triazine * * *" is deleted from the Alphabetical Listing of Pesticide Chemicals.

2. In item 12b. in the table, "2-(Sec-butylamino-4-ethylamino-6-methoxy-S-triazine * * *" and "2-Tert-butylamino-4-ethylamino-6-methoxy-S-triazine * * *" are deleted from the Alphabetical Listing of Pesticide Chemicals.

3. Item 12c. is corrected to read as follows:

12. * * * * *

c. The 15 pesticide chemicals after the pesticide chemical Chlordimeform are alphabetically relisted to read as follows:

Alphabetical Listing of Pesticide Chemicals

Name	Section No.
* * * * *	
2-Chloroallyl Diethyldithiocarbamate	180.247
2-Chloro-N,N-Diallylacetamide	180.282
2-Chloro-1-(2,4-Dichlorophenyl) Vinyl Diethyl Phosphate	180.322
2-((4-Chloro-6-Ethylamino)-S-Triazin-2-YL) Amino-2-Methylpropionitrile	180.307
2-Chloro-N-Isopropylacetanilide	180.211
Chloroneb	180.257
1-Chloro-2-Nitropropene	180.286
P-Chlorophenoxyacetic Acid	180.202
2-(M-Chlorophenoxy) Propionic Acid	180.325
P-Chlorophenyl-2,4,5-Trichlorophenyl Sulfide	180.256
6-Chloropicolinic Acid	180.350
Chloropropylate	180.218
Chlorosulfamic Acid	180.201
2-Chloro-1-(2,4,5-Trichlorophenyl) Vinyl Dimethyl Phosphate	180.252
Chlorothalonil	180.275
* * * * *	

4. In item 12g., the 11 pesticide chemicals in the table after the pesticide chemical Ethoprop are alphabetically relisted to read as follows:

Alphabetical Listing of Pesticide chemicals

Name	Section No.
* * * * *	
2-Ethoxy-2,3-Dihydro-3,3-Dimethyl-5-Benzofuranyl Methanesulfonate	180.345
Ethoxyquin	180.178
5-Ethoxy-3-Trichloromethyl-1,2,4-Thiadiazole	180.370
S-Ethyl Cyclohexylethylthiocarbamate	180.212
Ethyl 4,4'-Dichlorobenziliate	180.109
S-Ethyl Diisobutylthiocarbamate	180.232
S-Ethyl Dipropylthiocarbamate	180.117
Ethylene Oxide	180.151
S-Ethyl Hexahydro-1H-Azepine-1-Carbothioate	180.228
Ethyl 3-Methyl-4-(Methylthio) Phenyl (1-Methylethyl) Phosphoramidate	180.349
O-Ethyl S-Phenyl Ethylphosphonodithioate	180.221
* * * * *

GENERAL SERVICES ADMINISTRATION

41 CFR Part 105-65

[ADM 7900.7 CHGE 2]

Membership on State Historical Records Advisory Boards

AGENCY: National Archives and Records Service, General Services Administration.

ACTION: Final rule.

SUMMARY: This change to the General Services Administration Property Management Regulations deletes the requirement that the National Historical Publications and Records Commission approve the membership of State Historical Records Advisory Boards. It also modifies the qualifications for

membership to include experience in administration of archives instead of the present factor—experience in a field of research using historical records. This change will simplify the appointment of Board members and more effectively provide the professional knowledge and technical expertise necessary for the Boards to carry out their responsibilities.

EFFECTIVE DATE: September 4, 1979.

FOR FURTHER INFORMATION CONTACT: Frank G. Burke, Executive Director, National Historical Publications and Records Commission (202–724–1083).

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this regulation will not impose unnecessary burdens on the economy or on individuals and, therefore, is not significant for the purposes of Executive Order 12044.

PART 105–65—NATIONAL HISTORICAL PUBLICATIONS AND RECORDS COMMISSION

Subpart 105–65.2—National Historical Records Program

Section 105–65.203–2(a) is revised to read as follows:

§ 105–65.203–2 State Historical Records Advisory Board.

(a) The Governor of each State desiring to participate in the program shall appoint a State Historical Records Advisory Board (Board) consisting of at least seven members, including the State Historical Records Coordinator, who chairs the Board. A majority of the members shall have recognized experience in administration of historical records or archives. The Board shall be as broadly representative as possible of the public and private archival and research institutions and organizations in the State. Board members receive no Federal compensation for their service on the Board. They are appointed for 3 years with the possibility of renewal; terms are staggered so that one-third of the Board is newly appointed or reappointed each year.

BILLING CODE 6820–26–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FI 5690]

List of Communities Eligible for the Sale of Insurance Under the National Flood Insurance Program

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATE: The date listed in the fourth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone: (800) 638–6620.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street, SW., Washington, DC 20410.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Federal Insurance Administrator has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553 (b) are impracticable and unnecessary.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

§ 64.6 List of eligible communities.

State	County	Location	Community No.	Effective dates of authorization/ cancellation of sale of flood insurance in community	Special flood hazard area identified
Iowa	Jackson	Unincorporated areas	190879–A	Aug. 17, 1979, emergency.	May 24, 1977.

BILLING CODE 4210-23-M

44 CFR Part 67

[Docket No. FI-5691]

National Flood Insurance Program; Final Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FIA.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the nation.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the community.

ADDRESS: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872 (In Alaska and Hawaii Call Toll Free (800) 424–9080), Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determination of flood elevations for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR Part 67.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

The final base (100-year) flood elevations for selected locations are:

Final Base (100-Year) Flood Elevations

State	City/town/county	Source of flooding	Location	# Depth in feet above ground. *Elevation in feet (NGVD)

BILLING CODE 4210-23-M

44 CFR Part 67

[Docket No. FI-5692]

National Flood Insurance Program; Final Flood Elevation Determinations

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the nation.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program. (202) 755–5581 or Toll Free Line (800) 424–8872 (In Alaska and Hawaii call Toll Free (800) 424–9080), Room 5270, 451 Seventh Street, SW, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determinations of flood elevations for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR Part 67.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

The final base (100-year) flood elevations for selected locations are:

Final Base (100-Year) Flood Elevations

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
California	Irvine (City), Orange County (Docket No. FI-5148).	Bonita Creek	New McArthur Boulevard at centerline	*36
			Coyote Canyon Road—50 feet downstream from centerline	*164
			Coyote Canyon Road—20 feet upstream from centerline	*173
		Coyote Canyon Wash	Coyote Canyon Road—40 feet upstream from centerline	*181
		Laguna Road Wash	San Diego Freeway Culvert—50 feet upstream from centerline	*184
			Laguna Freeway—at centerline	*222
		Sand Canyon Wash	University Drive—100 feet upstream from centerline	*24
			Ridgeline Drive—50 feet upstream from centerline	*58
			At Sand Canyon Reservoir	*187

BILLING CODE 4210-23-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 79-01; Notice 3]

Federal Motor Vehicle Safety Standards; New Pneumatic Tires for Passenger Cars

AGENCY: National Highway Traffic Safety Administration, Department of Transportation.

ACTION: Final rule.

SUMMARY: Pursuant to petitions by the Rubber Manufacturers Association (RMA), and Dunlop Tire and Rubber Corporation (Dunlop), this notice amends Federal Motor Vehicle Safety Standard No. 109, *New Pneumatic Tires—Passenger Cars*, by adding certain tire size designations to Appendix A of that standard. This amendment permits the introduction into interstate commerce of the new tire sizes.

EFFECTIVE DATE: October 4, 1979 if objections are not received before that date.

ADDRESS: Comments should refer to Docket No. 79-01 and be submitted to Docket Section, Room 5108, 400 Seventh Street, SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: John Diehl, Office of Automotive Ratings, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590 (202-426-1714).

SUPPLEMENTARY INFORMATION: According to agency practice, the National Highway Traffic Safety Administration (NHTSA) responds to petitions for adding new tire sizes to Table I of Appendix A of Standard No. 109 by quarterly issuing final rules under an abbreviated rulemaking procedure for expediting such routine amendments. Guidelines for this procedure were published at 33 FR 14964, October 5, 1968, and amended at 36 FR 8298, May 4, 1971; 36 FR 13601, July 22, 1971; and 39 FR 28980, August 13, 1974. These guidelines provide that these final rules become effective 30 days after their date

of publication if no comments objecting to them are received by NHTSA during this 30-day period. If objections are received, regular rulemaking procedures for issuing and amending motor vehicle safety standards are initiated.

On March 22, 1979, RMA petitioned for the addition of a new tire size to an existing table within Table I of Appendix A of Standard No. 109. RMA also petitioned on March 28, June 4, June 19, and June 28, 1979, for the addition of five other tire sizes to existing tables in Table I. Dunlop petitioned on April 6, 1979, for the addition of a new table to Table I, and for a new tire size to be included in that table. The bases for accepting or denying requests to add new tire size designations are set forth in the introductory guidelines to Appendix A. Briefly, the tests are the appropriateness of the information submitted for inclusion in the tire tables, and the appropriateness of the requested location within the tables of the requested tire sizes. The seven new tire size designations requested to be added to Standard No. 109 appear to meet these criteria. Accordingly, the Dunlop and RMA, petitions are granted, and seven new tire sizes are added to Table I of Appendix A of the standard pursuant to the abbreviated rulemaking procedure.

In consideration of the foregoing, 49 CFR 571.109 is amended as specified below, subject to the 30-day comment period outlined above:

§ 571.109 New Pneumatic Tires—Passenger Cars [Appendix amended]

1. In Tables I–S, I–JJ, I–KK, I–LL, and I–VV, the following new tire size designations and corresponding values are added:

1/ The letters "D" for diagonal and "B" for bias belted may be used in place of the "R."

2/ Actual section width and overall width shall not exceed the specified width by more than the amount specified in S4.2.2.2.

2. A new table, Table I-UU, is added to Table I of Appendix A to read as set forth below:

TABLE I - UU

TIRE LOAD RATING, TEST RIMS, MINIMUM SIZE FACTORS AND SECTION WIDTHS FOR 'P/75' SERIES ISO TYPE TIRES FOR DL MILLIMETRIC RIMS

Tire size 2/ designation	Maximum tire loads (kilograms) at various cold inflation pressures (kPa) 1/									Test rim width (inches)	Minimum size factor (mm)	Section 3/ width (mm)
	120	140	160	180	200	220	240	260	280			
195/75R370	465	500	535	565	595	625	655					

1/ The designated cold inflation pressures may be increased to a maximum of 300 kPa to meet special vehicle performance requirements with no increase in load.

2/ The letters "D" for diagonal and "B" for bias belted may be used in place of the "R."

3/ Actual section width and overall width shall not exceed the specified section width by more than the amount specified in Sec. 4.2.2.2.

1/ The letters "D" for diagonal and "B" for bias belted may be used in place of the "R."

2/ Actual section width and overall width shall not exceed the specified width by more than the amount specified in S4.2.2.2.

BILLING CODE 4910-59-C

Interested persons are invited to submit comments on these additions. Comments must be limited so as not to exceed 15 pages in length. Necessary attachments may be appended without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a succinct and concise fashion.

Note.—The agency has reviewed the impacts of this rule and determined that they are minimal and that this is not a significant regulation within the meaning of Executive Order 12044.

The program official and attorney principally responsible for the development of this rule are John Diehl and Stephen Kratzke, respectively.

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1033

[Rev. S. O. 1317-A]

Car Service: Brandon Corp. Authorized To Operate Over Tracks Formerly Operated by South Omaha Terminal Railway Co.

AGENCY: Interstate Commerce Commission.

ACTION: Revised Service Order No. 1317-A.

SUMMARY: Since an emergency no longer exists, Revised Service Order No. 1317 is vacated effective 11:59 p.m., August 27, 1979.

FOR FURTHER INFORMATION CONTACT: J. Kenneth Carter (202) 275-7840.

Decided August 27, 1979.

Upon further consideration of Revised Service Order No. 1317 (43 FR 35718 and 44 FR 12041), and good cause appearing therefore:

It is ordered: § *1033.1317 Revised Service Order No. 1317* Brandon Corporation authorized to operate over tracks formerly operated by South Omaha Terminal Railway Company is vacated effective 11:59 p.m., August 27, 1979.

(49 U.S.C. (10304-10305 and 11121-11126))

A copy of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael. Member Robert S. Turkington, not participating.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

49 CFR Part 1033

[Service Order No. 1395]

Car Service; Chicago, Milwaukee, St. Paul and Pacific Railroad Co., Authorize to Operate Over Tracks of Indiana Harbor Belt Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Service Order No. 1395.

SUMMARY: Service Order No. 1395 authorizes the Chicago, Milwaukee, St. Paul and Pacific Railroad Company to operate over tracks of Indiana Harbor Belt Railroad Company between North Harvey, Illinois, and Gibson, Indiana.

EFFECTIVE DATE: 12:01 a.m., September 1, 1979, until further order of this Commission.

FOR FURTHER INFORMATION CONTACT: J. Kenneth Carter, (202) 275-7840.

Decided: August 27, 1979.

The Chicago, Milwaukee, St. Paul and Pacific Railroad Company (MILW) is authorized by Service Order No. 1390 to operate over Consolidated Rail Corporation (CR) tracks between Gibson, Indiana, and Terre Haute, Indiana. MILW has been authorized to operate between North Harvey, Illinois, and Gibson, Indiana, over Indiana Harbor Belt Railroad Company (IHB) tracks under trackage rights granted by the Commission. Since MILW has not used all of these trackage rights, there is a question as to the present status of these rights.

MILW needs to operate over IHB tracks between North Harvey and Gibson in order to gain access to CR tracks at Gibson. Use of these IHB tracks by MILW will permit MILW to perform operations authorized by Service Order No. 1390.

MILW will enter into a new trackage rights agreement with IHB between North Harvey and Gibson. IHB has agreed to use of these tracks by MILW. The MILW will use these trackage rights only as bridge rights except that MILW is permitted to pick up and set out Truck-Rail-Truck traffic at Gibson Yard on tracks specified by IHB. MILW will file an application with the Commission for permanent operating authority over these tracks.

It is the opinion of the Commission that an emergency exists requiring

operation of MILW trains over these tracks of IHB in the interest of the public; that notice and public procedure are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

§ 1033.1395 Service Order No. 1395.

(a) *Chicago, Milwaukee, St. Paul and Pacific Railroad Company authorized to operate over tracks of Indiana Harbor Belt Railroad Company.* The Chicago, Milwaukee, St. Paul and Pacific Railroad Company (MILW) is authorized to operate over tracks of Indiana Harbor Belt Railroad Company (IHB) between North Harvey, Illinois, IHB milepost 13.7, and Gibson, Indiana, Consolidated Rail Corporation milepost 4.3, a distance of approximately 11.7 miles.

MILW will be permitted to use these trackage rights as bridge rights only except MILW is permitted to pick up and set out Truck-Rail-Truck traffic at Gibson Yard on tracks specified by IHB.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) *Rates applicable.* Inasmuch as this operation by MILW over tracks operated by IHB is due to MILW's disability, the rates applicable to traffic moved over these lines shall be the rates applicable to traffic routed to, from, or via these lines which were formerly in effect on such traffic when routed via MILW until tariffs naming rates and routes specifically applicable via trackage rights authorized by this service order become effective.

(d) In transporting traffic over these lines MILW and all other common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(e) Nothing herein shall be considered as a prejudgment of the application of MILW seeking authority to operate over these tracks.

(f) *Effective date.* This order shall become effective at 12:01 a.m., September 1, 1979.

(g) *Expiration date.* The provisions of this order shall remain in effect until modified or vacated by order of this Commission.

(49 U.S.C. (10304–10305 and 11121–11126))

This order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael. Member Robert S. Turkington not participating.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 280

Pacific Tuna Fisheries; Miscellaneous Amendments

SUMMARY: National Oceanic and Atmospheric Administration/ Commerce.

ACTION: Final regulations.

SUMMARY: This document extends the 1978 regulations for the 1979 fishing season and changes landing percentages for long trips of small seiners. Certain dates are also changed in order to conform to the 1979 fishing season. These regulations are published by the National Oceanic and Atmospheric Administration to implement conservation measures of the Inter-American Tropical Tuna Commission.

EFFECTIVE DATE: August 28, 1979.

FOR FURTHER INFORMATION CONTACT: J. Gary Smith, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731, Telephone: (213) 548–2518.

SUPPLEMENTARY INFORMATION: The proposed rulemaking of July 30, 1979 (44 FR 44577), noted that the Commission's Resolution for 1979 proposed no changes in the conservation program for the 1979 fishing season. In considering the Commission's Resolution, the National Marine Fisheries Service proposed only to change dates in order to conform to the 1979 fishing season.

A public hearing was held at the Southwest Regional Office, National Marine Fisheries Service, Terminal Island, California, on July 25, 1979, to discuss the proposed final regulations.

It was proposed by the National Marine Fisheries Service that the dates "1977" and "1978" be removed and the dates "1978" and "1979" be substituted as appropriate wherever those dates appear in Sections 280.6 and 280.10(c). These technical and conforming changes were unopposed and are adopted for 1979.

In addition, one spokesman suggested that it would be less confusing if the amount of tuna that could be landed from extended trips be made identical for vessels of 300 short tons carrying capacity and for vessels of 301–400 short tons carrying capacity. This will have no impact on the management of the small boat allotment and the suggestion is adopted for 1979. Therefore, any vessel of 301–400 short tons carrying capacity that is on a fishing voyage longer than 70 days and any vessel of 300 short tons carrying capacity or less that is on a fishing voyage longer than 50 days may land 25 percent yellowfin tuna by round weight of its short ton carrying capacity.

These amendments are issued under the authority contained in subsection (c) of Section 6 of the Tuna Conventions Act of 1950, as amended 16 USC 995(c), as modified by Reorganization Plan No. 4 effective October 3, 1970 (35 FR 15627).

The Assistant Administrator, National Oceanic and Atmospheric Administration finds that because (1) fishing resulting in incidental catch of yellowfin tuna has begun, and (2) fishermen are familiar with the contents of these regulations, there is good cause to make these regulations effective immediately.

Signed at Washington, D.C. this 22nd day of August, 1979.

Winfred H. Meibohm,

Executive Director, National Marine Fisheries Service.

(16 U.S.C. 951–961)

Title 50 is amended by revising Part 280 to read as follows:

§§ 280.6, 280.10 [Amended]

1. Strike "1977" and "1978" and substitute "1978" and "1979" as appropriate wherever those dates appear in §§ 280.6 and 280.10(c).

2. Section 280.7 is amended by revising paragraphs (a)(2)(ii) and (iii)

§ 280.7 Provisions for fishing inside CYRA on closed season trips.

(a) * * *

(1) * * *

(2) * * *

(ii) Any vessel of 301–400 short tons carrying capacity shall not be permitted

to land yellowfin tuna in excess of 50 percent by round weight of its total catch; except, that any such vessel which is on a fishing voyage longer than 70 days may land 25 percent yellowfin tuna by round weight of its established short ton carrying capacity.

(iii) Any purse seiner of 300 short tons carrying capacity or less shall not be permitted to land yellowfin in excess of 70 percent by round weight of its total catch; except, that any such vessel that is at sea longer than 50 days may land 25 percent yellowfin tuna by round weight of its established short ton carrying capacity.

V 44 / 172 SEP 79 UMI

Proposed Rules

Federal Register
Vol. 44, No. 172
Tuesday, September 4, 1979

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 123]

[Amdt. 16]

Conforming to Presidential Declarations in Areas Declared Major Disaster Areas

AGENCY: Small Business Administration.

ACTION: Proposed rule.

SUMMARY: SBA publishes a declaration of disaster areas in which loans are available to eligible disaster victims. If the same area is declared or has been declared a major disaster area by the President, SBA will adopt all provisions of the Presidential declaration and amendments thereto which are within the parameters of SBA's legislative authority. SBA will also use the same incident date as is contained in the Presidential declaration except when the SBA incident date is prior to that of the Presidential declaration.

DATES: Comments on this proposed rule are invited and should be submitted on or before November 5, 1979.

ADDRESS: Peter F. McNeish, Acting Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street, N.W., Room 800, Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: John E. Moore, Director, Office of Disaster Loans, Small Business Administration, 1441 L Street N.W., 8th Floor, Washington, D.C. 20416 (653–6879)

SUPPLEMENTARY INFORMATION: This proposed regulation would formalize current policy and procedures developed between the Federal Emergency Management Agency and the Small Business Administration and is published primarily as a statement of such agreement. It confirms the policy that SBA declarations will contain all provisions of a Presidential disaster declaration which are within the parameters of SBA's Legislative authority. If SBA has published its declaration first, it will be amended if necessary to conform to the Presidential declaration and any subsequent amendments to such Presidential declaration. An exception to such amendment procedure by SBA will be made in the event that the SBA incident date is prior to the date of the Presidential declaration. This could happen because of the greater damage required for a Presidential declaration which might not have occurred before the SBA declaration was made. SBA would, in such case, retain the earlier date since assistance might already have been made available for damage dating from the earlier date.

AUTHORITY: Pursuant to the authority of sections 5(b)(6) (15 USC 634(b)) and 7(b)(1) (15 USC 636(b)) of the Small Business Act, as amended, it is proposed to amend Part 123 of Chapter I, Title 13 of the Code of Federal Regulations by adding to § 123.1(a) a new paragraph (a)(5) as follows:

§ 123.1 General

(a) *Disaster loan authority.* * * *

(5) When the President has declared that a major disaster has occurred, the SBA disaster declaration will contain all provisions of the Presidential declaration and subsequent amendments which are within the parameters of SBA's Legislative authority. An exception will be made if SBA has published its declaration first and its incident date is prior to the date of the Presidential declaration; however, should an amendment to the Presidential declaration establish an incident date prior to the SBA incident date, the SBA declaration will be amended to include the earlier incident date. The SBA declaration will also list the political subdivisions in which disaster victims are eligible to apply for SBA Loans.

(Catalog of Federal Domestic Assistance 59.008, Physical Disaster Loans.)

Dated: August 9, 1979.

William H. Mauk, Jr.,

Acting Administrator.

BILLING CODE 8025–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 79–SW–28]

Designation of Alternate Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate alternate airway V–13W between Palacios, Tex., and Humble, Tex., and alternate airway V–198S between Eagle Lake, Tex., and Sabine Pass, Tex. These new airways would improve air traffic flow by providing charted routes in areas where traffic is normally radar vectored.

DATES: Comments must be received on or before October 3, 1979.

ADDRESSES: Send comments on the proposal in triplicate to:

Director, FAA Southwest Region, Attention: Chief, Air Traffic Division, Docket No. 79–SW–28, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101.

The official docket may be examined at the following location:

FAA Office of the Chief Counsel, Rules Docket (AGC–24), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Mr. Lewis W. Still, Airspace Regulations Branch (AAT–230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–8525.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southwest Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101. All communications received on or before October 3, 1979, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy fo this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the docket number of this NPRM. Persons intersted in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart C of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that would designate alternate vector V–13W from Palacios, Tex., to Humble, Tex., and alternate airway V–198S from Eagle Lake, Tex., to Sabine Pass, Tex. Presently aircraft proceeding to these terminal areas are enrouted via radials, or vectored in order to conform to arrival/departure routes. These alternate airways would provide charted routes that conform to the traffic flow thereby aiding flight planning and reducing controller workload. Subpart C or Part 71 was republished in the **Federal Register** on January 2, 1979 (44 FR 307).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of the Federal Aviation Regulations (14 CFR Part 71) as republished (44 FR 307) as follows:

Under V–13

"Humble, Tex., Lufkin, Tex.," is deleted and "Humble, Tex., included a west alternate via INT Palacios 016° and Humble 240° Humble; Lufkin, Tex.;" is substituted therefor.

Under V–198

"Sabine Pass; White Lake, La.;" is deleted and "Sabine Pass including a south alternate from Eagle Lake via INT Eagle Lake 115° and Scholes 272°, Scholes thence via Scholes 066° and Sabine Pass 247° radials; Sabine Pass; White Lake, La.;" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65).

The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation and a comment period of less than 45 days is appropriate.

Issued in Washington, D.C., on August 28, 1979.

William E. Broadwater,

Chief, Airspace and Air Traffic Rules Division.

[FR Doc. 79–27401 Filed 8–31–79; 8:45 am]

BILLING CODE 4910–13–M

[14 CFR Part 75]

[Airspace Docket No. 79–WA–8]

Alteration of Jet Route

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter Jet Route No. 524 by eliminating the segment more than 55 miles south of Montreal, Canada. This 48-mile segment south of the BUGSY intersection is not used and can no longer be justified as an assignment of airspace.

DATES: Comments must be received on or before October 3, 1979.

ADDRESSES: Send comments on the proposal in triplicate to:

Director, FAA New England Region, Attention: Chief, Air Traffic Division, Docket No. 79–WA–8, Federal Aviation Administration, 12 New England Executive Park, Burlington, Mass. 01803.

The official docket may be examined at the following location:

FAA Office of the Chief Counsel, Rules Docket (AGC–24), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Mr. Everett L. McKisson, Airspace Regulations Branch (AAT–230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–3715.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, New England Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 12 New England Executive Park, Burlington, Mass. 01803. All communications received on or before October 3, 1979, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular 11–2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Part 75 of the Federal Aviation Regulations (14 CFR Part 75) that would alter J–524 to extend from Montreal via the Montreal 188°T(203°M) radial to the intersection of the Albany, N.Y., 353°T(006°M) rather than to the Albany 343°T(356°M) radial. This action would eliminate an unused segment of J–524 which can no longer be justified as an assignment of airspace. Chart clutter would also be reduced in this area.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 75.100 of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) as republished (44 FR 722) as follows:

Under Jet Route No. 524 "Albany, N.Y., 343°" is deleted and "[Albany, N.Y., 353°" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation and a comment period of less than 45 days is appropriate.

Issued in Washington, D.C., on August 27, 1979.

William E. Broadwater,

Chief, Airspace and Air Traffic Rules Division.

BILLING CODE 4910-13-M

[14 CFR Chap. I]

Informal Airspace Meeting

AGENCY: Federal Aviation Administration/DOT.

ACTION: Notice of Informal Airspace Meeting.

SUMMARY: The Federal Aviation Administration (FAA) will hold an Informal Airspace Meeting in Louisville, Kentucky, for the purpose of discussing a plan by the FAA to establish a Group II Terminal Control Area (TCA) for the Standiford Field Airport.

DATE: October 25, 1979, 7:00 p.m. (local time).

ADDRESS: Jefferson Community College, Downtown Campus, Room LV-301, Corner of Chestnut and 2nd Streets, Louisville, Kentucky.

FOR FURTHER INFORMATION CALL: Mr. Clifford C. Monteau, FAA Southern Region, telephone (A/C 404) 763-7866 or Mr. Wilburn T. Mowdy, Standiford ATC Tower, telephone (A/C 502) 368-1611.

SUPPLEMENTARY INFORMATION: The purpose of this Informal Airspace Meeting is to offer all persons likely to be affected by the proposed TCA the opportunity to present their views, and to assist the FAA in the preparation of an airspace docket that will accomplish the improved safety objectives with the least possible impact on the airspace users.

No formal minutes or transcripts will be taken; however, anyone may submit written comments before or during the meeting which will be made a matter of record if they so desire. This action will not prevent interested persons from submitting comments later in response to a Notice of Proposed Rulemaking (NPRM) in the event the item is formally proposed.

Issued in Atlanta, Georgia, on August 22, 1979.

Dorsey A. Adle,

Acting Chief, Air Traffic Division, Southern Region.

BILLING CODE 4910-13-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[18 CFR Part 284]

[Docket No. RM79-74]

Interstate Pipeline Transportation on Behalf of Other Interstate Pipelines; Proposed Rulemaking and Public Hearing

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Energy Regulatory Commission (FERC) gives notice of a proposed rule which would permit interstate pipelines to transport natural gas for delivery to other interstate pipelines. A blanket certificate procedure would authorize such transportation without prior FERC approval of each individual transaction.

DATES: Request to participate at public hearing due by September 18, 1979. Public hearing on September 24, 1979. Written comments by September 24, 1979.

ADDRESS: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, Northeast, Washington, D.C. 20426 (Reference Docket No. RM79-74).

FOR FURTHER INFORMATION CONTACT: Robert C. Platt, Office of the General Counsel, 825 North Capitol Street, Northeast, Washington, D.C. 20426 (202) 357-8450.

I. Background

Section 311(a)(1) of the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. 3371(a)(1), enables the Commission to authorize transportation by an interstate pipeline on behalf of any intrastate pipeline or local distribution company. However, transportation by an interstate pipeline on behalf of a second interstate pipeline is beyond the scope of Section 311 of the NGPA. Such transportation arrangements require certificates of public convenience and necessity pursuant to Section 7(c) of the Natural Gas Act.

This gap in the Commission's section 311 authority has placed interstate pipelines at a competitive disadvantage in attaching short-term supplies. Unlike Section 311 authorizations which can be implemented on a self-executing basis (See 18 CFR 284.100 *et. seq*), certificates under Section 7(c) of the Natural Gas Act are issued only after a case by case review. Hence, under Section 311 an intrastate pipeline or local distribution company seeking to attach short term supplies through interstate pipeline transportation may implement such a transaction without prior Commission approval. However, if an interstate pipeline sought the same supply for its customers, the transaction would require the Commission to issue at least a temporary certificate before a second interstate pipeline could transport the natural gas to the purchasing interstate pipeline.

Similarly, when attaching long term supplies, and intrastate pipeline or a local distribution company may use Subpart B of Part 284 to commence service while an application for long term authorization is pending before the Commission. The lack of a blanket certificate procedure places interstate pipelines at a competitive disadvantage in attaching such long term supplies as well. In view of the Commission's desire to increase system supplies available to interstate pipelines as well as to reduce the regulatory burden on the transporting interstate pipelines, the Commission has determined that case-by-case review of such transportation arrangements is inconsistent with the public interest at this time.

In place of individual applications directed to a single transportation arrangement, the proposed rule would allow the transporting interstate pipeline to apply for a one time blanket certificate which would authorize all transportation services on behalf of other interstate pipelines for periods of up to two years. Although such transportation would remain subject to the Commission's Natural Gas Act jurisdiction, the terms and conditions attached to the certificate would be identical to those imposed by Subpart B of Part 284.

The construction of facilities incidental to transactions authorized under blanket certificates is authorized by § 157.7(b)(4) of this chapter.

II. Public Convenience and Necessity

The Commission proposes to find that the transportation authorized by these blanket certificates is required by the present or future public convenience and necessity.[1] Several factors underlie this finding. First, the natural gas will enter the general system supplies of an interstate pipeline, rather than benefiting specific end-users. Second, the natural gas will be subject to end-use allocation under Commission approved curtailment plans. Third, individual transactions under the blanket certificate are short-term (of two years or less) and would not result in a disruption of markets upon which interstate pipelines have traditionally relied. Fourth, permitting these transactions on a self-implementing basis will eliminate a competitive disadvantage which interstate pipelines face when attempting to attach short-term supplies.

[1] Similar blanket transportation certificates have been issued in the past, High Island Offshore System and U-T Offshore System, Docket Nos. CP75-104 and CP76-116, order issued June 12, 1978.

III. Section by Section Analysis

Proposed paragraph (a) clarifies the relationship between the blanket certificate and the self-executing authorizations in Subpart B of Part 284, *i.e.* the blanket certificate covers only natural gas transported by interstate pipelines for the system supplies of other interstate pipelines. Neither long term transportation arrangements nor the transportation of the interstate pipeline's own natural gas are covered by the blanket certificate.

Proposed paragraph (b) indicates the limited nature of the blanket certificate. Although the certificate is of indefinite duration, individual transactions authorized under it are limited to two years under § 284.102, subject to extension under § 284.105.

Proposed paragraph (c) prescribes an abbreviated application procedure. Because data on individual transactions will be filed within thirty days of the commencement of each transaction, detailed data is not required for the blanket certificate application.

Proposed paragraph (d) incorporates the conditions set forth in Subpart B of Part 284 by reference as amended from time to time.

Proposed paragraph (e) frees the holder of the blanket certificate from any service obligation after each underlying transportation contract expires. This pregranted abandonment places the holder of the blanket certificate in an equivalent position to a transporter authorized under Section 311(a)(1) of the NGPA.

Proposed paragraph (f) makes clear that interstate pipelines which elect to not obtain a blanket certificate may still obtain Section 7(c) authorization on a case-by-case basis.

IV. Written Comment Procedure

Interested persons are invited to submit written comments, data, views or arguments with respect to this proposal. An original and 14 copies should be filed with the Secretary of the Commission. All comments received prior to 4:30 p.m., EDT., September 24, 1979, will be considered by the Commission prior to the promulgation of final regulations. All written submissions will be placed in the Commission's public file and will be available for public inspection in the Commission's Office of Public Information, 825 North Capitol Street, NW., Washington, D.C., during regular business hours. Comments should be submitted to the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, and should reference Docket No. RM79-74.

V. Public Hearing Procedures

A public hearing concerning this proposal will be held in Washington, D.C. on September 24, 1979, beginning at 9:30 a.m. and will continue if necessary on the following day. Any person interested in this proceeding or representing a group or class of persons interested in this proceeding may make a presentation at the hearing provided a written request to participate is received by the Secretary of the Commission prior to 4:30 p.m., E.S.T., on September 18, 1979.

Request to participate in the hearing should include a reference to Docket No. RM79-74 as well as a concise summary of the proposed oral presentation and a number where the person making the request may be reached by telephone. Prior to the hearing, each person filing a request to participate will be contacted by the presiding officer or his designee for scheduling purposes. At least five copies of the statement shall be submitted to the Secretary of the Commission prior to 4:00 p.m. on September 21, 1979. The presiding officer is authorized to limit oral presentation at the public hearing both as to length and as to substance. Persons participating in the public hearing should, if possible, bring 100 copies of their testimony to the hearing.

The hearing will not be a judicial or evidentiary-type hearing. There will be no cross-examination of persons presenting statements. However, the panel may question such persons and any interested person may submit questions to the presiding officer to be asked of persons making statements. The presiding officer will determine whether the question is relevant and whether the time limitations permit it to be presented. If time permits, at the conclusion of the initial oral statements, persons who have made oral statements will be given the opportunity to make a rebuttal statement.

Any further procedural rules will be announced by the presiding officer at the hearing. A transcript of the hearing will be made available at the Commission's Office of Public Information.

(Natural Gas Act, 15 U.S.C. 717 *et seq*; Department of Energy Organization Act, Pub. L. 95-91; E.O. 12009, 42 FR 46267)

In consideration of the foregoing, the Commission proposes to add a new Subpart G to Part 284, Subchapter I, Chapter I of Title 18, Code of Federal Regulations, as set forth below.

By direction of the Commission.

Kenneth F. Plumb,

Secretary.

1. The table of sections for Part 284 is amended by the addition of a new Subpart G, to consist of §§ 282.220 and 282.221:

Subpart G—Blanket Certificates Authorizing Transactions in Accordance With Subparts B Through D.

Sec.
284.220 [Reserved]
284.221 Transportation on behalf of interstate pipelines.

2. Part 284 is amended by the addition of new sections 284.220 and 284.221, to read as follows:

§ 284.220 [Reserved]

§ 284.221 Transportation on behalf of interstate pipelines.

(a) *Applicability.* This section applies to the transportation of natural gas by an interstate pipeline on behalf of any other interstate pipeline. Transportation of natural gas on behalf of an intrastate pipeline or a local distribution company is authorized by Subparts B, C, and F of this part.

(b) *Blanket certificate.* Upon application therefor, the Commission will conduct a hearing pursuant to section 7(c) of the Natural Gas Act and § 157.11 of this chapter to determine whether the proposed service is required by public convenience and necessity. The Commission will issue to an interstate pipeline to which this section is applicable, a blanket certificate authorizing such pipeline company to transport natural gas for the system supply of any other interstate pipeline, to the same extent and in the same manner as transportation on behalf of intrastate pipelines is authorized by Subpart B of this part.

(c) *Application procedure.* Applications for blanket certificates shall state:

(1) The name of the applicant, and

(2) A statement that the applicant will comply with the conditions in paragraph (d) of this section.

V 4 4 / 1 7 2 S E 4 7 9 UMI

(d) *General conditions.* (1) Any transaction authorized under a blanket certificate shall be subject to the same terms and conditions that would apply if the transaction were authorized by Subpart B of this part (as such may be amended from time to time).

(2) Any filings made with the Commission reporting individual transactions shall reference the docket number of the proceeding in which the blanket certificate was granted.

(e) *Pregrant abandonment.* Abandonment of transportation services pursuant to section 7(b) of the Natural Gas Act is authorized upon the expiration of the contractual term of each individual transportation arrangement.

(f) *Interstate pipelines without blanket certificates.* An interstate pipeline which does not obtain a blanket certificate may apply for a separate certificate of public convenience and necessity for each transportation service provided to any other interstate pipeline.

[FR Doc. 79-27439 Filed 8-31-79; 8:45 am]
BILLING CODE 6450-01-M

Coast Guard

[33 CFR Part 110]

[CGD 77-227]

Anchorage Grounds, Los Angeles and Long Beach Harbors, Calif.

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: The Coast Guard proposes to revise the Anchorage Regulations for Los Angeles and Long Beach Harbors, California. Changes proposed for the existing regulations were so numerous that an in-depth study revealed a total revision was necessary. The present Anchorage Grounds can not accomodate the size, type, and volume of vessels common to the two harbors. The use designations for certain types of operations conducted in the various anchorages (i.e. bunkering, lightering, extended anchoring) are either nonexistent or inadequate. It is anticipated that the number and size of vessels using the harbors will further increase thereby increasing the probability of a major accident that could result in complete closure of either of the harbors. This proposal is intended to reduce the possibility of accidents occuring by providing for additional anchorage space and safer vessel operations in the area.

DATES: Comments must be received on or before October 15, 1979.

ADDRESSES: Comments should be submitted to and are available for examination at Commander (m), (CGD 77-227), Eleventh Coast Guard District, 400 Oceangate, Long Beach, California 90822.

FOR FURTHER INFORMATION CONTACT: Mr. Daniel W. Ziegfeld, Office of Marine Environment and Systems (GWLE/73), United States Coast Guard, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590, Phone Number (202) 426-1934.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Each person submitting a comment should include the writer's name and address, identify this notice (CGD 77-227), and give the reasons for the comment. Persons desiring acknowledgement that their comment has been received should enclose a stamped self-addressed post card or envelope.

All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned but one may be held at a time and place to be set in a later notice in the **Federal Register** if requested in writing by an interested person raising a genuine issue and desiring to comment orally at a public hearing.

DRAFTING INFORMATION: The principal persons involved in drafting this proposal are Mr. Daniel W. Ziegfeld, Project Manager, Office of Marine Envrionment and Systems and Lt. J. W. Salter, Project Counsel, Office of Chief Counsel.

Discussion of the Proposal Regulation

Although there have been very few major accidents in the anchorage grounds of Los Angeles and Long Beach Harbors, it has become evident that the current anchorages do not meet present needs. Increases in the size and number of vessels utilizing the harbors has resulted in overcrowding of existing anchorages. This problem is compounded by the enormous growth of vessels arriving solely for the purpose of bunkering and/or lightering operations which are often conducted at anchorage. Additionally, as a result of the overcrowded anchorages, numerous vessels have anchored outside of the federal breakwater. However, this practice has created a potential for obstruction of the entrances to the harbors. It is anticipated that the size and number of vessels utilizing the harbors will further increase, thereby increasing the possiblity of accidents. This poses a threat to the safety of the harbors and the environment.

In view of the overcrowded anchorages and related problems the Coast Guard has determined a total reorganization of the current regulations is needed. Restructuring the anchorages and revising the regulations governing them would provide safer vessel operations in the area.

The proposed revision would reorganize the area available for anchoring vessels. It would create more anchorage space, designate use or preferred use for each anchorage, incorporate areas where anchoring formerly was restricted, organize long term anchoring for vessels so as to allow for minimal encounters with marine traffic, and ensure safe access corridors between Traffic Separation Schemes and harbor entrances. New regulations are proposed which prescribe changed or new time limits on anchoring, requirements for anchoring, and other operational considerations.

Several new anchorages are proposed by this revision, two of which are outside of the breakwater. Although these two are somewhat irregular in shape, this allows clear access corridors between internationally adopted Traffic Separation Schemes and harbor entrances. While vessels presently may anchor in unregulated areas, under this proposal, a vessel will either be in a maintained channel or an anchorage. This would insure control over abandoned or derlict vessels which create navigation and pollution hazards. The Corps of Engineers has the authority to remove obstructions in maintained channels and the Captain of the Port will supervise anchoring practices within anchorages.

Two of the present anchorages will be expanded to include areas previously used for other purposes. One would incorporate an area previously designated a "Restricted Area" under 33 CFR 207.616. The "Restricted Area" was established for a U.S. Navy degaussing range, that has recently been disestablished. The other anchorage would incorporate an old (previously disestablished) Quarantine Anchorage. These areas constitute valuable anchorage space and are currently used extensively.

The proposed anchorages all have a primary use designation such as commercial, naval, general, etc.; however this does not prohibit use of the anchorage by other types of vessels. The designations are intended to notify mariners as to the type of vessels that will predominately use these areas.

A number of the proposed anchorages also carry restrictions on bunkering operations and lightering operations. For the purpose of these regulations, bunkering is taking on fuel for a vessel's operaton while lightering is the transfer of fuel to storage or bulk transport. The restrictions are proposed to ensure these operations will be conducted in areas where a minimum threat is posed to the environment. Lightering carries an inherent hazard because volumes of flammable and explosive vapor can accumulate. During both bunkering and lightering operations the possibility of an oil discharge is subtantially increased. Records indicate oil spills occur most frequently during these transfer operations. Under this proposal lightering will be kept as far away from population centers as possible and bunkering will be allowed where a spill would pose the least threat of environmental damage.

The current general regulation allowing vessels to anchor for 10 days without obtaining specific permission from the Captain of the Port has been supplemented by placing shorter time limits on some areas where bunkering and lightering operations are allowed. This will allow more efficient use of the areas while still providing sufficient time to complete these operations.

Presently the U.S. Navy does not require as large an anchorage area as previously designated for their use only. The size of the current naval anchorage will be reduced and a new small naval anchorage will be established close to the U.S. Navy Shipyard to meet their requirements. Naval Vessels may still use other anchorages.

Because of the limited present day usage, one of the two explosive anchorages would be disestablished. The other, originally designed to accomodate two vessels, will be expanded and configured to handle one. The regulations governing the area will prohibit anchoring by other vessels when explosives are being handled. These changes reflect new Navy safety standards and should significantly reduce the hazard to anchored vessels during explosive transfer operations. The Navy estimates that explosives will be handled in the anchorage approximately forty days per year.

To further efforts towards efficient use of anchorages, the proposal designates preferential use of certain portions of the anchorages for deep draft vessels. Water that can accomodate these vessels is very limited and it is inefficient to allow draft vessels to occupy deep water anchorages.

The regulations governing general use of the anchorages would also be expanded and revised to include the following concepts and rules as well as those spelled out in the present regulation:

(a) Proper amounts of anchor chain,

(b) Anchoring away from fixed structures,

(c) Use of tug assistance for anchoring of certain large vessels (to add to safety factor for large vessel operations),

(d) Requiring notification to the Captain of the Port when a vessel anchors, weighs anchor, or is unable to get under way promptly,

(e) Establishment of new anchorage outside the breakwater,

(f) Prohibiting all anchoring not within the anchorages, and

(g) Requiring notification to the Captain of the Port when lightering and bunkering operations are conducted.

Prior to drafting this revision, many groups were consulted. These included both harbor authorities, pilots from both harbors, environmental groups, the U.S. Navy, and several professional shipping organizations and individuals as well as state and local governments.

The Coast Guard defines and establishes an anchorage ground under the authority of the Anchorage Grounds Act (33 U.S.C. 471). This statute contains authority for adopting and enforcing regulations dealing with the use of anchorages as well. However, existing regulations also contain provisions for regulating certain anchorages under the Ports and Waterways Safety Act of 1972 (PWSA 1972) (33 U.S.C. 1221 et. seq.). The purpose of the PWSA 1972 was to prevent damage to vessels and structures and damage to the environment resulting from vessel or structure damage. To accomplish this purpose the PWSA 1972 authorized (among other things) control over vessel movement and entry into congested areas, restrictions on vessel operation during hazardous conditions, and direction of anchoring, mooring or movement of vessels to prevent damage. In certain areas the volume of vessel traffic, the number of vessels using an anchorage and the navigational problems on the waters in question create a situation where the risk of vessel or structure damage is greatly increased. In such a situation the Coast Guard regulated the anchorage under the PWSA 1972 because the $10,000 penalty for violations was a more effective deterrent against hazardous violations than the $100 penalty of the Anchorage Grounds Act. This gave the Coast Guard a more effective enforcement tool in areas where the risk was greater and allowed the Coast Guard to fulfill its responsibilities under both Acts. The Coast Guard considered adding the anchorages described in 33 CFR 110.214 Los Angeles and Long Beach Harbors, California to the list of anchorages regulated under the authority of the PWSA 1972.

Section 2 of the Port and Tanker Safety Act of 1978 (Pub. L. 95-474) superseded the Ports and Waterways Safety Act of 1972 and revised the title of the Ports and Waterways Safety Act (PWSA). Section 4(b) of the PWSA allows (among other things) an order to be issued to any vessel in a port or place subject to the jurisdiction of the United States or in the navigable waters of the United States to operate or anchor as directed, if certain conditions exist. One of the conditions listed is that if there is reasonable cause to believe that a vessel does not comply with regulations issued under the Act or other applicable laws and treaties. Failure to comply with anchorage regulations could be the basis of an order to operate or anchor as directed, so as to comply with the applicable anchorage regulation. The more effective penalty provisions of the PWSA, which were increased to $25,000, would be directly applicable to a vessel which failed to comply with the order. Thus, there is now no need to regulate the Los Angeles and Long Beach Anchorages under the PWSA, since any anchorage regulation may be enforced by appropriate orders issued under the PWSA.

A detailed description follows which indicates how all the above proposed changes would be reflected in the regulations and the purpose for each change.

Detailed Description

The following changes, additions, and/or deletions are proposed to the Anchorage Regulations for the Los Angeles and Long Beach Harbors.

1. The Anchorage Grounds (§ 110.214(a))

(a) Paragraph (a)(1)—*Commercial Anchorage A*—The area has been restructured to include an "old" quarantine anchorage which was disestablished. The entire area is presently being utilized as an anchorage ground. Commercial Anchorage A has been primarily designated for bunkering operations. This is its predominate use at the present time as it is the most sheltered area within the harbor. A twenty-four hour time limitation (paragraph (a)(1) (iii)) has been proposed to ensure the maximum use of this prime bunkering area. Most bunkering operations can be completed within this time frame, and the Captain of the Port may grant extensions if necessary. Lightering will be prohibited since such operations are inherently more dangerous than bunkering. It is considered unwise to allow such

V 4 4 / 1 7 2 S E 4 7 9 UMI

operations in close proximity to populated areas. The present paragraph (a)(1)(ii) will be eliminated as the Captain of the Port will designate an appropriate area for use by quarantine, customs, or immigration authorities as the need arises. Any anchorage ground in the entire harbor may be so designated depending on the circumstances. The present paragraph (a)(1)(iii) will be eliminated as it is considered unnecessary. Other regulations (Corps of Engineers and U.S. Coast Guard) are applicable to the placement of moorings. The present paragraph (a)(1)(iv) will be eliminated as the U.S. Navy has no significant requirement for anchorage areas within the harbor at the present time.

(b) The present paragraph (a)(2) is reserved. Proposed regulations for *Commercial Anchorage B* will be contained in paragraph (a)(2). The area encompassed by proposed Anchorage B is the northern portion of present Anchorage C, the Navy Restricted Area which was disestablished, and the previously unregulated area between Reservation Point and Fish Harbor Channel. Regulations controlling the use of this anchorage ground are proposed as follows:

(i) The area is designated for use by commercial vessels and bunkering may be conducted.

(ii) Lightering will be prohibited as the area is considered unsafe for lightering operations due to its close proximity to populated areas and the U.S. Navy Base and Ship Yard.

(iii) The area may be utilized by vessels anchoring for an extended period when authorized by the Captain of the Port.

(iv) This paragraph ensures that navigation to and from Fish Harbor Channel is not impaired.

(c) Paragraph (a)(3) *Commercial Anchorage C* will be realigned. the northern portion becomes part of Commercial Anchorage B and the northeastern portion becomes Navy Anchorage J. Commercial use will have priority. Bunkering and lightering will be permitted. The eastern portion of the anchorage area encompassed by the 18m. (59 ft.) depth curve will be reserved for the anchoring of deep draft vessels with a forty-eight hour time limit imposed. These two requirements are proposed to insure that this area, the deepest in the harbor, is utilized to the maximum extent possible by vessels requiring deep water. Present paragraph (a)(3)(ii) will be eliminated as it is considered unnecessary. Other regulations (Corps of Engineers and U.S. Coast Guard) are applicable to the placement of moorings. The present paragraph (a)(3)(ii) will be eliminated as the U.S. Navy has no significant requirement for anchorage areas within the harbor at the present time. The present paragraph (a)(3)(iv) will be eliminated as explosive anchorage No. 1 will be disestablished and eliminated from the regulations as it is no longer required by the U.S. Navy or commercial users.

(d) Paragraph (a)(4) *Commercial Anchorage D* will be realigned to include the southwestern portion of the present Naval Anchorage E. The U.S. Navy no longer needs the entire area encompassed by the present Naval Anchorage E. In Commercial Anchorage D, requirements of ships 244m. (approximately 800 ft.) in length and 12m. (approximately 39 ft.) in draft or greater shall predominate. Bunkering and lightering will be permitted. Present paragraph (a)(4)(ii) will be eliminated as it is considered unnecessary. Other regulations (Corps of Engineers and U.S. Coast Guard) are applicable to the placement of moorings. The present paragraph (a)(4)(iii) will be eliminated as the U.S. Navy has no significant requirement for anchorage areas within the harbor at the present time.

(e) Paragraph (a)(5) *Commercial Anchorage E.* A portion of the present Naval Anchorage E (paragraph (a)(5)) will be redesignated Commercial Anchorage E. Commercial vessels will have priority in this area. Bunkering and lightering operations are prohibited due to the anchorages close proximity to shore.

(f) Paragraph (a)(6) *Commercial Anchorage F* is a proposed new anchorage ground. This area would be designated an anchorage to provide an area outside the breakwater where anchoring will be permitted in an organized manner. The lack of present regulations outside the breakwater allows the random anchoring of vessels. Therefore, an arriving vessel can expect to, and often will, encounter vessels anchored in the approaches to Los Angeles or Long Beach Harbors. In all areas outside the breakwaters encompassed by the internationally approved Los Angeles-Long Beach Precautionary Area, within three miles, with the exception of newly designated Anchorages F and G, anchoring will be prohibited. Bunkering and lightering operations are prohibited for safety and environmental reasons. Also, this area will be primarily designated for use by vessels 244m. (approximately 800 ft.) or greater in length or with drafts of 12m. (approximately 39 ft.) or more.

(g) Paragraph (a)(7) *Commercial Anchorage G* is a proposed new anchorage ground. The same comments noted in paragraph (f) just above apply except that commercial vessels of any size may anchor in the area.

(h) Paragraph (a)(8) *Naval Anchorage I* is a proposed new naval anchorage ground designated for Long Beach Naval Shipyard use. this will accommodate naval requirements for a small anchorage ground as close to the shipyard as possible. This area is presently utilized for this purpose but current regulations do not give priority to naval anchoring. The area is used to perform work on naval vessels during periods when dockside space is unavailable in the shipyard.

(i) Paragraph (a)(9) *Naval Anchorage K.* A portion of the present Naval Anchorage E (paragraph (a)(5)) will be redesignated "K". This will meet the reduced requirements of the U.S. Navy. The present paragraph (a)(5)(ii) will be eliminated as it is considered unnecessary. Other regulations, (Corps of Engineers and U.S. Coast Guard) are applicable to the placement of moorings.

(j) Paragraph (a)(10) *General Anchorage N.* The present Nonanchorage Area H (paragraph (a)(8)) will be designated General Anchorage N to provide continuity in the anchorage lettering system. No appreciable changes will be made to its geographic description. The regulations have been changed to permit anchoring.

(k) Paragraph (a)(11) *General Anchorage O.* this is a proposed new anchorage ground. This area will be designated as an anchorage ground which may be used with COTP permission. It will also be used for storage of vessels under the custody of the United States.

(l) Paragraph (a)(12) *General Anchorage P.* The present Nonanchorage Area F (paragraph (a)(6) will be designated General Anchorage P to provide continuity in the anchorage lettering system. Its geographic description will be changed slightly to reflect the harbor improvements, mainly the Queen Mary mooring facilities, which have occurred in the vicinity since the description was last updated. The regulations have been changed to permit anchoring.

(m) Paragraph (a)(13) *General Anchorage Q.* This is a proposed new anchorage ground. This area will be designated as an anchorage ground to accommodate the growing need for anchorage space.

(n) Paragraph (a)(14) *Nonanchorage U.* The present Nonanchorage Area G (paragraph (a)(7)) will be redesignated "U" to provide continuity in the anchorage lettering system. No appreciable changes will be made to its geographic description or in the regulations presently found in § 110.214(a)(7).

(o) Paragraph (a)(15) *Nonanchorage W.* The present Nonanchorage Area I (paragraph (a)(13)) will be redesignated "W" to provide continuity in the anchoring lettering system. No changes will be made to its geographic description and no appreciable changes will be made to the regulations as presently found in § 110.214(a)(13) with the exception of eliminating the present paragraph (a)(13)(ii). This portion is considered unnecessary and redundant as the Captain of the Port has enforcement authority over all anchorage regulations unless otherwise delegated.

(p) Paragraph (a)(16) *Explosives Anchorage.* Existing § 110.214(a) (9), (10), (11), and (12) will be eliminated. A new § 110.214(a)(16) will define the only area in which vessels carrying explosives may anchor. The maximum amount of explosives which may be aboard a vessel anchored within this anchorage has been limited to 680 metric tons (approximately 749 tons) to ensure the safety of the property and personnel on oil islands Freeman and Chaffee. Each vessel which utilizes the Explosives Anchorage will be required to demonstrate its status by displaying a red flag. While the anchorage is occupied by vessels carrying explosives no other vessel may anchor within 1,745m. (approximately 5,725 ft.) of the center of the anchorage. This area will include all of Anchorage K and portions of Anchorages D, E, F, and Q. Vessels anchored within this area will be required to relocate when the Explosives Anchorage is activated.

2. *Regulations [§ 110.214(b)].* (a) Section 110.214(b)(1) combines pertinent parts of present § 110.214(b) (1) and (3). Other portions were eliminated or included in subsequent regulations as appropriate.

(b) Section 110.214(b)(2) is a new regulation which requires certain large vessels in port to anchor with an adequate amount of chain. This eliminates the necessity for the Captain of the Port having to impose requirements on vessels on an individual basis.

(c) Section 110.214(b)(3) which is presently part of § 110.214(b)(5) has not been changed.

(d) Section 110.214(b)(4) is a new regulation that requires vessels unable to get underway within 4 hours to inform the Captain of the Port and take suitable precautions to ensure the safety of structures and other vessels in the area. This will ensure the Captain of the Port is aware of vessels that are unable to move promptly during adverse weather or when the explosives anchorage is to be activated.

(e) Section 110.214(b)(5) and (b)(6) are new regulations requiring all vessels to notify the Captain of the Port upon anchoring and upon departure to facilitate efficient use of the anchorage grounds.

(f) Section 110.214(b)(7) is a new regulations requiring large vessels to use tug assistance when anchoring inside the breakwater to ensure their reaching a safe anchorage. The size of these vessels and their poor maneuvering characteristics, the possibility of equipment failure, and the geography of the harbors demand that these vessels use tug assistance. This practice is being followed at the present time.

(g) Section 110.214(b)(8) which is presently § 110.214(b)(13) has not been changed.

(h) Section 110.214(b)(9) which is presently included in § 110.214(b)(4) has not been changed.

(i) Section 110.214(b)(10) is a new regulation which will prevent anchoring anywhere in the Precautionary Area except in Anchorages F and G. This requirement is considered necessary to ensure vessels do not hazard navigation by obstructing the entrances to the harbor or hinder vessels traversing the area.

(j) Section 110.214(b)(11) has undergone minor changes to clarify the fact that the 10 day requirement for anchorages does not apply to Commercial Anchorages F and G (outside the breakwaters), and notes additional restrictions for Commercial Anchorages A and C.

(k) Section 110.214(b)(12) which is presently § 110.214(b)(7) has undergone minor editorial changes.

(l) Section 110.214(b)(13) is a new regulation added to ensure compliance with dictates of prudent seamanship.

(m) Section 110.214(b)(14) is a new regulation added to ensure no vessel hazards itself or the port by anchoring too close to the oil islands, breakwaters, shorelines, or other fixed objects.

(n) Section 110.214(b)(15) which is presently § 110.214(b)(2) has undergone minor editorial changes. This regulation is not intended to prohibit a vessel from anchoring in a position from which the vessel may swing across the boundaries between Commercial Anchorage B and C, Commercial Anchorage D and E, Commercial Anchorage D and E and Naval Anchorage K, and Commercial Anchorage B and C and Naval Anchorage J.

(o) Section 110.214b(16) which is presently § 110.214(b)(12) has undergone minor changes for clarification.

(p) Section 110.214(b)(17) is a new regulation requiring that the Captain of the Port is kept informed when lightering operations are being conducted. This will provide the COTP with information for preplanning for discharge response and efficient scheduling and utilization of manpower and equipment.

(q) Section 110.214(b)(18) is a new regulation requiring that the Captain of the Port is kept informed when bunkering operations are being conducted. The same comments noted in paragraph (p) apply.

(r) Section 110.214(b)(19) which is presently § 110.214(b)(15) has undergone minor wording changes to include additional dangerous cargoes other than "explosives" which the Captain of the Port must be cognizant of. In order to fulfill his responsibilities as Captain of the Port, the COTP must be aware of operations conducted within the Anchorage that are potentially hazardous.

(s) Section 110.214(b)(20) which is presently § 110.214(b) (6) and (10) has undergone minor wording changes to allow one paragraph to encompass both of the present paragraphs of the regulations.

An Environmental Assessment was completed in April 1978 which resulted in a negative declaration indicating no forseeable significant impact on the quality of the human environment.

The Coast Guard has determined that, in accordance with DOT "Regulatory Policies and Procedures," (44 FR 11034) these amendments are not significant. A draft evaluation has been prepared and is available for public inspection at the Commander, Eleventh Coast Guard District address indicated above.

In consideration of the foregoing, it is proposed to amend Part 110 of Title 33, Code of Federal Regulations as follows:

(1) By revising § 110.214 to read as follows:

§ 110.214 Los Angeles and Long Beach Harbors, California.

(a) *The anchorage grounds*—(1) *Commercial Anchorage A (Los Angeles Harbor).* An area north of the San Pedro Breakwater; west of a line bearing 302° from Los Angeles Light, latitude 33°42'30.8" N., longitude 118°15'02.3" W.; south of the southern edge of the Deep Channel Fairway, which edge is described as follows:

Latitude	Longitude
33°42'50.2" N	118°15'40.0" W
33°42'45.0" N	118°16'03.2" W
33°42'37.5" N	118°16'08.0" W
33°42'45.0" N	118°16'25.2" W
33°42'35.5" N	118°16'18.8" W
33°42'37.8" N	118°16'23.0" W
33°42'50.8" N	118°16'35.8" W
33°42'48.6" N	118°16'38.4" W

thence along a line bearing 163° which is the eastern boundary of General Anchorage N to the San Pedro Breakwater at latitude 33°42'26.8" N., longitude 118°16'30.9" W.; thence southeasterly and easterly along the San Pedro Breakwater to the beginning point.

(i) In this anchorage the requirements of commercial ships conducting bunkering operations shall predominate.

(ii) Lightering operations are prohibited in this anchorage.

(iii) No vessel may anchor in this anchorage for longer than 24 hours without permission from the Captain of the Port.

(2) *Commercial Anchorage B (Los Angeles and Long Beach Harbors).* Beginning at the Southwestern corner of Reservation Point at latitude 33°43'18.0" N., longitude 118°16'00.2" W.; thence east southeasterly to latitude 33°43'13.8" N., longitude 118°15'51.4" W.; thence northeasterly to latitude 33°44'01.0" N., longitude 118°13'11.2" W.; thence northwesterly to the southern edge of the eastern extension of the NAVAL BASE MOLE at latitude 33°44'32.3" N., longitude 118°13'24.3" W.; thence southwesterly along the NAVAL BASE MOLE to NAVAL BASE MOLE light 2 at latitude 33°44'25.5" N., longitude 118°13'49.0" W.; thence southwesterly to latitude 33°43'50.7" N., longitude 118°15'41.7" W.; thence west southwesterly to Fish Harbor Channel Light 3 at latitude 33°43'48.8" N., longitude 118°15'52.7" W.; thence west southwesterly along the southern edge of Fish Harbor west jetty until it intersects Reservation Point; thence along the eastern and southern shoreline of Reservation Point to the beginning point.

(i) In this anchorage the requirements of commercial vessels shall predominate.

(ii) Bunkering operations are permitted in this anchorage.

(iii) Lightering operations are prohibited in this anchorage.

(iv) Anchorage B may be used by any vessel granted an extended anchorage permit in accordance with paragraph (b)(11) of this section.

(v) Each vessel in this anchorage shall be anchored in such a position as not to interfere with the free navigation of the Fish Harbor Channel.

(3) *Commercial Anchorage C (Los Angeles and Long Beach Harbors).* Beginning at Los Angeles Main channel Light 2, latitude 33°42'38.8" N., longitude 118°14'37.5" W.; thence northwesterly to the southernmost point of Commercial Anchorage B, latitude 33°43'13.8" N., longitude 118°15'51.4" W.; thence northeasterly to latitude 33°44'12.1" N., longitude 118°12'32.3" W.; thence southeasterly to Long Beach Channel Entrance Light, latitude 33°43'23.5" N., longitude 118°11'09.4" W.; thence westerly along the Middle Breakwater to the beginning point.

(i) In this anchorage the requirements of commercial vessels shall predominate. In the eastern portion of this anchorage, within the area defined by the 18m (approximately 59 ft.) depth curve, the requirements of vessels over 244m (approximately 800 ft.) in length overall or having a draft over 12m (approximately 39 ft.) shall predominate. Each lesser draft vessel shall anchor away from this deeper portion of the anchorage so as not to interfere with the anchoring of vessels having a draft over 12m (approximately 39 ft.)

(ii) Bunkering and lightering operations are permitted in this anchorage.

(iii) In the eastern portion of this anchorage, within the area defined by the 18m (approximately 59 ft.) depth curve, no vessel may anchor for longer than 48 hours without permission from the Captain of the Port.

(4) *Commercial Anchorage D (Long Beach Harbor).* Beginning at Long Beach Channel Entrance Light 2 at latitude 33°43'23.5" N., longitude 118°10'46.9" W.; thence northwesterly to the southwestern point of Pier J at latitude 33°44'18.9" N., longitude 118°12'11.8" W.; thence easterly to the Southwest Lighted Marker on Island Freeman; thence southerly to the Long Beach Breakwater at latitude 33°43'23.5" N., longitude 118°09'46.4" W.; thence westerly to the beginning point.

(i) In this anchorage the requirements of commercial ships over 244m (approximately 800 ft.) shall predominate.

(ii) Bunkering and lightering operations are permitted in this anchorage.

Note.—A portion of this anchorage is within the Explosive Anchorage Area when the explosive anchorage is activated by the Captain of the Port. See § 110.214 (a)(16).

(5) *Commercial Anchorage E (Long Beach Harbor).* Beginning at the southwestern point of Pier J at latitude 33°44'18.9" N., longitude 118°12'11.8" W.; thence easterly and northerly along the edge of Pier J to the breakwater off the stern of the Queen Mary; thence along the breakwater off the stern of the Queen Mary to the northeast corner of the breakwater at latitude 33°45'10.0" N., longitude 118°11'12.0" W.; thence northerly to latitude 33°45'22.0" N., longitude 118°11'12.0 W.; thence northerly to latitude 33°45'34.1" N., longitude 118°10'39.5" W.; thence easterly along a line 460m (1,509.186 ft.) from and parallel to the Long Beach shoreline to latitude 33°44'56.1" N., longitude 118°08'10.1" W.; thence southerly to latitude 33°44'19.0" N., longitude 118°08'10.1" W.; thence westerly to the Southwest Lighted Marker on Island Chaffee; thence westerly to the Southeast Lighted Marker on Island Freeman; thence along the south shore to the Southwest Lighted Marker on Island Freeman; thence westerly to the beginning point.

(i) In this anchorage the requirements of commercial ships shall predominate.

(ii) Bunkering and lightering operations are prohibited in this anchorage.

Note.—A portion of this Anchorage is within the Explosive Anchorage Area when the explosive anchorage is activated by the Captain of the Port. See § 110.214(a)(16).

(6) *Commercial Anchorage F (Outside of Long Beach Breakwater).* The area southeast of the breakwater beginning at latitude 33°43'05.1" N., longitude 118°07'56.2" W.; thence westerly to latitude 33°43'05.1" N., longitude 118°10'33.5" W.; thence southeasterly to latitude 33°40'23.3" N., longitude 118°08'32.5" W.; thence easterly to latitude 33°40'23.3" N., longitude 118°06'00.0" W.; thence to the beginning point.

(i) In this anchorage the requirements of commercial ships over 244m (approximately 800 ft.) in length overall or having a draft over 12 meters (approximately 39 ft.) shall predominate.

(ii) Bunkering and lightering operations are prohibited in this anchorage.

Note.—A portion of this anchorage is within the Explosive Anchorage Area when the explosive anchorage is activated by the Captain of the Port. See § 110.214(a)(16).

(7) *Commercial Anchorage G (Outside of Los Angeles Long Beach Middle Breakwater).* The area south of the breakwater beginning at latitude 33°43'05.3" N., longitude 118°11'15.3" W.; thence westerly to latitude 33°43'05.3" N., longitude 118°12'15.7" W.; thence southwesterly parallel to the breakwater to latitude 33°42'25.9" N., longitude 118°14'16.0" W.; thence southeasterly to latitude 33°41'40.5" N., longitude 118°13'02.0" W.; thence northeasterly to latitude 33°42'08.6" N., longitude 118°11'33.8" W.; thence to the beginning point.

(i) In this anchorage the requirements of commercial ships shall predominate.

(ii) Bunkering and lightering operations are prohibited in this anchorage.

(iii) No vessel may enter this anchorage ground unless it is destined for an assigned berth in this anchorage ground.

(8) *Naval Anchorage J (Long Beach Harbor).* Beginning at *NAVAL BASE MOLE* Light 5, latitude, 33°44'40.0" N., longitude, 118°12'59.8" W.; thence west southwest along the southerly edge of the *NAVAL BASE MOLE* to latitude 33°44'32.3" N., longitude 118°13'24.3" W.; thence southeasterly along a line perpendicular to the *NAVAL BASE MOLE* which is the eastern boundary of Commercial Anchorage B to the northern boundary of Commercial Anchorage C; thence northeasterly along the northern boundary of Commercial Anchorage C, until that line intersects the western edge of the Long Beach Channel; thence northwesterly along the western edge of the Long Beach Channel to the beginning point.

(i) In this anchorage the requirements of the U.S. Navy shall predominate.

(ii) No recreational or commercial vessel may anchor in this anchorage without first obtaining permission from the Captain of the Port.

(iii) Bunkering and lightering operations are prohibited in this anchorage.

(9) *Naval Anchorage K (Long Beach Harbor).* Beginning at Long Beach Breakwater East End Light, latitude 33°43'23.5" N., longitude 118°08'10.0" W.; thence northerly to latitude 33°44'19.0" N., longitude 118°08'10.1" W.; thence westerly to the Southwest Lighted Marker on Island Chaffee; thence westerly to the Southeast Lighted Marker on Island Freeman; thence along the southern shore to the Southwest Lighted Marker on Island Freeman; thence southerly to the Long Beach Breakwater at latitude 33°43'23.5" N.; longitude 118°09'46.4" W.; thence easterly to the beginning point.

(i) In this anchorage the requirements of U.S. Navy shall predominate.

(ii) No recreational or commercial vessel may anchor in this anchorage without first obtaining permission from the Captain of the Port. The requirements of vessels over 244m (approximately 800 ft.) in length overall shall predominate.

(iii) Bunkering operations are permitted in this anchorage.

(iv) Lightering operations are prohibited in this anchorage.

(v) This anchorage may be designated an explosive anchorage. See § 110.214(a)(16).

(10) *General Anchorage N (Los Angeles Harbor).* An area known as Cabrillo Beach, west of a line beginning at latitude 33°43'04.0" N.; longitude 118°16'44.4" W.; thence to the San Pedro Breakwater at latitude 33°42'26.8" N., longitude 118°16'30.9" W.; thence along the shoreline to the beginning point.

(i) In this anchorage the requirements of recreational and other small craft shall predominate.

(ii) Achoring, mooring, and recreational boating activities conforming to applicable City of Los Angeles ordinances and regulations adopted pursuant thereto are allowed in this anchorage.

(11) *General Anchorage O (Los Angeles and Long Beach Harbor).* Beginning at the NAVAL BASE MOLE Light 2, latitude 33°44'25.5" N., longitude 118°13'49. O" W.; southwesterly along the northern boundary of Commercial Anchorage B to latitude 33°43'50.7" N., longitude 118°15'41.7" W.; thence along the shore line to the beginning point.

(i) No recreational or commercial vessel may anchor in this anchorage without first obtaining permission from the Captain of the Port.

(ii) Bunkering and lightering operations are prohibited in this anchorage.

(iii) When necessary, this anchorage shall be reserved for vessels under the custody of the United States.

Note.—Nonanchorage U in § 110.214(a)(14) is within the boundaries of this anchorage.

(12) *General Anchorage P (Long Beach Harbor).* Mouth of the Los Angeles River. The water area extending westward and northward to the head of navigaton from a line drawn northward to the shore from the northeasterly corner of Pier J at latitude 33°45'10.1" N., longitude 118°11'12.0" W.

(i) In this anchorage the requirements of recreations and other small craft shall predominate.

(ii) Anchoring, moorings, and recreational boating activities conforming to applicable City of Long Beach ordinances and regulations adopted pursuant thereto are allowed in this anchorage.

(iii) A 140m (approximately 495 ft.) fairway channel from the easterly boundary of this anchorage to the Navy and Marina shall be maintained free of moorings and other obstructions at all times.

The boundaries of the fairway are as follows:

Latitude	Longitude
33°45'10.0" N	118°11'12.0" W
33°45'15.9" N	118°11'12.0" W
33°45'40.8" N	118°11'54.6" W
33°45'47.2" N	118°12'08.0" W

(13) *General Anchorage Q (Long Beach Harbor/Alamitos Bay/Anaheim Bay).* Beginning at Long Beach Breakwater East End Light, latitude 33°43'23.5" N., longitude 118°08'10.1" W; thence northerly to the northeastern corner of Commercial Anchorage E at latitude 33°44'56.1" N., longitude 118°10'10.1" W.; thence southeasterly to a point, latitude 33°44'20.6" N., longitude 118°07'28.5" W., which is the northwestern corner of Nonanchorage W; thence along the northern boundary of Nonanchorage W to Alamitos Bay East Jetty Light, 2, at latitude 33°44'11.3" N., longitude 118°07'09.8" W.; thence northeasterly along the eastern edge of the Alamitos Bay East Jetty 460m (1,509.186 ft.) to latitude 33°44'23.9" N., longitude 118°07'01.1" W.; thence easterly to the southern most point of the east bank of the San Gabriel River at latitude 33°44'22.8" N., longitude 118°06'53.7" W.; thence along the southern shoreline of Seal Beach until the shoreline intersects the Anaheim Bay West Jetty; thence along the western edge of the Anaheim Bay West Jetty to the Anaheim Bay Light 5 at latitude 33°43'39.1" N., longitude 118°06'03.3" W.; thence westerly to the beginning point.

(1) Bunkering and lightering operations are prohibited in this anchorage.

Note:—(1) Nonanchorage W in § 110.214(a)(15) is within the boundaries of this anchorage.

(2) A portion of this anchorage is within the Explosive Anchorage Area when the explosive anchorage is activated by the Captain of the Port. See § 110.214(a)(16).

(14) *Nonanchorage U (Los Angeles Harbor.)* An area extending 580m (approximately 1,903 ft.) south from the shoreline and 90m (approximately 295 ft.) each side of Ferry Street centerline extended.

(i) No vessel may anchor or moor in this area.

(ii) Dragging, seining, fishing operations, and other activities which might foul underwater installations within this area are prohibited.

Note.—This nonanchorage is established protection of the submerged outfall of a sewer pipeline.

(15) *Nonanchorage W (Mouth of Entrance Channel to Alamitos Bay).* Nonanchorage Area W is a semicircle with a 460m (1,509 ft.) radius that is centered at midchannel on a line between Alamitos Bay West Jetty Light 1 and Alamitos Bay Jetty Light 2 and which extends seaward from that line.

(i) No vessel may anchor or moor in this area.

(16) *Explosives Anchorage (Long Beach Harbor).* A circular area with its center at latitude 33°43'37.0" N., longitude 118°09'02.5" W., and a radius of 1.745m (approximately 5,725 ft.)

(i) No vessel containing more than 680 metric tons (approximately 749 tons) of explosives may anchor in this anchorage.

V 44 / 172 SE 4 79 UMI

V 4 4 / 1 7 2 S E 4 7 9 UMI

(ii) Each anchored vessel loading, unloading, or laden with explosives, must display a red flag at least 1.2 square meters (approximately 16 square feet) in size by day, and by night the same red flag illuminated by spotlight.

(iii) When a vessel displaying the signal required by § 110.214(a)(16)(ii) occupies the Explosives Anchorage, no other vessel may anchor within the Explosives Anchorage.

Note.—When the Explosives Anchorage is activated Anchorage K and portions of Anchorage D, E, F, and Q are encompassed by the Explosives Anchorage.

(b) *General Regulations.* (1) Within Los Angeles and Long Beach Harbors, anchoring is prohibited outside established anchorages except in cases of emergency. If it becomes necessary, in an emergency, to anchor a vessel outside of the anchorages, the vessel shall anchor so that it does not interfere with or endanger any facility or other vessel. The vessel shall notify the Captain of the Port of the location of and reason for emergency anchoring by the most expeditious means and shall move clear as soon as the emergency is over.

Note.—The Captain of the Port guards VHF–FM Channel 16 (156.8 MHz).

(2) Each vessel 1600 gross tons or over shall use a minimum of four shots of chain (360 feet) at the water's edge in all Commercial and Naval anchorages; except that within Anchorage A, a minimum of three shots of chain (270 feet) may be used.

(3) The Captain of the Port may require a vessel in an anchorage to moor with two or more anchors.

(4) Each anchored vessel unable to get under way within 4 hours shall:

(i) Notify the Captain of the Port by the most expeditious means, and

(ii) Have a second anchor backed out and ready for use.

(5) Each vessel upon anchoring shall notify the Captain of the Port of its location by the most expeditious means.

(6) Each vessel shall notify the Captain of the Port when it departs from an anchorage.

(7) Each vessel over 244m (approximately 800 ft.) in length overall or having a draft over 12m (approximately 39 ft.) shall use tug assistance when anchoring inside of the breakwater.

(8) The Captain of the Port may require a vessel in an anchorage to have a watchman aboard at all times.

(9) The maneuvering of a vessel by means of a dragged anchor, except within an established anchorage, or in stress of weather, or to avoid collision or grounding, is prohibited.

(10) Commercial Anchorages F and G are the only portions of the navigable waters of the United States within the Los Angeles-Long Beach Precautionary Area in which any vessel may anchor, except when unforeseen circumstances create conditions of imminent peril or when specific permission is obtained from the Captain of the Port.

(11) Except as otherwise prescribed in this section, no vessel may occupy an anchorage inside of the breakwater for more than 10 consecutive days unless an extended anchorage permit is granted by the Captain of the Port.

Note.—Commercial Anchorages A and C have additional time restrictions. See § 110.214(a)(1)(iii) and § 110.214(a)(3)(iii).

(12) The Captain of the Port may permit vessels to anchor in channels. Permission is not necessary for vessels engaged on works of river and harbor improvement under the supervision of the District Engineer, Corps of Engineers, if the District Engineer has notified the Captain of the Port in advance of all such proposed work.

(13) No vessel may anchor in any anchorage in such a manner as to interfere with the use of an authorized mooring buoy.

(14) No vessel may anchor so that it will swing within 60m (approximately 197 ft.) of any permanent improvements except when unforeseen circumstances create conditions of imminent peril.

(15) No anchor may be placed outside the anchorages, nor may any vessel be so anchored that any portion of its hull or rigging extends outside the boundaries of the anchorages.

(16) No vessel being dismantled or undergoing major alterations may anchor in an anchorage without permission from the Captain of the Port.

(17) Each vessel to be lightered shall notify the Captain of the Port when the lightering vessel arrives alongside and again when the lightering vessel departs.

(18) Each vessel to be bunkered shall notify the Captain of the Port when the supply vessel arrives alongside and again when the supply vessel departs.

(19) No vessel while carrying, loading, or unloading explosives, under 46 CFR 146.29–13 or 49 CFR 176.100, oxidizers or blasting agents requiring a special permit under 49 CFR 176.415, or cargoes of particular hazard as listed in § 124.14(b) of this chapter, may anchor in an anchorage without permission from the Captain of the Port.

Note.—In granting such permission, the Captain of the Port will be guided by the current and future activities in the harbor and safety problems relating to such anchorage. Captain of the Port will advise Port of Long Beach and the Port of Los Angeles of any such anchorage assignments under the following conditions:

(i) Explosives, Class "A" (as defined in 49 CFR 173.53), any amount.

(ii) Explosives, Class "B" (as defined in 49 CFR 173.88), in excess of 1 net ton at any one time.

(iii) Explosives, Class "C" (as defined in 49 CFR 173.100), in excess of 10 net tons at any one time.

(iv) Military explosives (as defined in 46 CFR 146.29–11), any amount.

(v) Oxidizers requiring a special permit (as defined in 49 CFR 176.415), any amount.

(vi) Cargoes of particular hazard, in amounts specified by § 124.14(b)(1) of this chapter.

(20) Nothing in this section may be construed as relieving any vessel from the penalties of law for obstructing navigation or for not complying with the navigation laws or any other laws or regulations.

(Sec. 7, 38 Stat 1053, as amended, (33 USC 471); Sec. 6(g)(1)(A), 80 Stat. 937, (49 USC 1655(g)(1)(A)); 49 CFR 1.46(c)(1)).

Dated: August 22, 1979.

J. B. Hayes,

Admiral, U.S. Coast Guard Commandant.

BILLING CODE 4910–14–M

[33 CFR Part 164]

[CGD 77–183]

Amendments to Navigation Safety Regulations

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to amend the Navigation Safety Regulations as they apply to vessels navigating on the Great Lakes. The proposal would ease some testing requirements and eliminate the depth finder recorder requirement. Experience with the rules has shown that certain requirements for testing could result in unsafe practices under some circumstances existing on the Great Lakes, and that a depth finder recorder is being required in areas where it is not needed. This proposal would correct these problems.

DATES: Comments must be received on or before: October 17, 1979.

ADDRESSES: Comments should be submitted to Commandant (G–CMC/81) (CGD 77–183), U.S. Coast Guard, Washington, DC 20590. Comments will be available for examination at the Marine Safety Council (G–CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT: Mr. Timothy E. Foley, Rules of the Road Branch, Office of Marine Environment and Systems, Room 7315, Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Washington, DC 20590. (202) 426–4958.

SUPPLEMENTAL INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Each comment should include the name and address of the person submitting the comment, reference the docket number (CGD 77–183), identify the specific section of the proposal to which each comment applies, and give the reasons for the comment. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned but one may be held at a time and place to be set in a later notice in the **Federal Register** if requested in writing by an interested person raising a genuine issue and desiring to comment orally at a public hearing.

Drafting Information

The principle persons involved in drafting this proposal are: Mr. Timothy E. Foley, Project Manager, Office of Marine Environment and Systems, and Lieutenant G. S. Karavitis, Project Counsel, Office of the Chief Counsel.

Discussion of Proposed Regulations

The Navigation Safety Regulations (33 CFR Part 164) became effective on June 1, 1977. Experience with the rules since then has shown that some of these requirements are impractical or unnecessary in certain circumstances. These amendments are necessary to prevent accidental vessel collisions and groundings which may result from testing of critical navigational equipment in confined waters and to provide relief to vessels navigating on the Great Lakes from the unnecessary requirement to be equipped with a continuous depth sounding recorder. The impact of these requirements on vessels navigating on the Great Lakes was not considered at the time of promulgation of the original regulations. Adoption of these amendments will result in increased safety of vessel traffic in the St. Lawrence River and eliminate unnecessary expense to the Great Lakes shipping industry while preserving the economic and environmental benefits intended by the original Navigation Safety regulations.

Section 164.25 requires vessels to perform equipment tests of the primary and secondary steering as well as ahead and astern propulsion not more than 12 hours before entering or getting underway on the Navigable waters of the United States. Strict compliance with this requirement is unrealistic for vessels navigating on the Great Lakes because frequent crossing of the international boundary during most voyages would require repeated testing when the intention was that only an initial test be conducted. Vessels entering the Great Lakes via the St. Lawrence Seaway commonly perform certain equipment tests before transiting the Seaway. Transit time to the Great Lakes is usually more than 12 hours and strict compliance would require a retest 12 hours prior to entering the Great Lakes. The resultant duplication of these tests is not considered necessary. Additionally, imposition of test requirements during passage of the Seaway could create am immecessaru hazard to the vessel in those confined waters. Testing of a ships steering system involves moving the rudder from one side to the other within its design limits. This test causes a departure from the vessels intended course and could cause loss of control and grounding. Testing of astern propulsion similarly causes a temporary diminishing of rudder control and may result in a deviation from the vessels intended course. The purpose of the required tests is to detect any system failures which may exist. By operationally testing equipment in confined waters, the vessel is exposed to an increased risk if failure of an essential system occurs at a time when its proper functioning is particularly critical for safe navigation.

Therefore, the Coast Guard is proposing to amend this section to allow vessels navigating on the Great Lakes to satisfy the equipment test requirements at the beginning of the voyage without additional re-testing during the voyage. Vessels entering the Great Lakes from the St. Lawrence Seaway will not be required to re-test equipment that has been tested preparatory to entering the Seaway and will be allowed to complete the remaining equipment tests upon entering the relatively open waters of Lake Ontario.

Section 164.35 requires vessels navigating on the Great Lakes to have a device that can continuously record the depth readings of the vessel's echo depth sounding device. The requirement for a continuous depth sounding recorder was included in the original regulations to insure that the device would be available as a valuable navigational aid. Navigational charts of the Great Lakes however, do not exhibit depth contours for depths greater than thirty (30) feet. The absence of charted depth contours considerably reduces the effectiveness of the equipment in question for position fixing purposes. Also, since vessels subject to these regulations are required to employ a licensed pilot familiar with the route when underway on the Great Lakes the need for such a device is further reduced.

The Coast Guard therefore is proposing to amend this section by deleting the requirement that vessels operating on the Great Lakes have on board a device that can continuously record the depth readings of the vessel's echo depth sounding device.

In recognition of the problems which the current regulations pose for vessels on the Great Lakes, the Coast Guard has temporarily waived the requirements discussed above, pending the outcome of this rulemaking action.

The Coast Guard has evaluated this proposal under the Department of Transportation policies for Improving Government Regulations published on February 26, 1979 (44 FR 11034). It has been determined that the expected impact of this proposal is so minimal that a full Regulatory Evaluation is not warranted. This is because it merely provides relief from minor aspects of the Navigation Safety rules, which are either unnecessary or unreasonable on the Great Lakes.

In consideration of the foregoing, it is proposed that Chapter I of Title 33, Code of Federal Regulations, be amended to read as follows:

1. Section 164.25 would be amended to read as follows:

§ 164.25 Tests before entering or getting underway.

(a) Except as provided in paragraphs (b) and (c) of this section no person may cause a vessel to enter into or get underway on the navigable waters of the United States unless no more than 12 hours before entering or getting underway, the following equipment has been tested:

(1) Primary and secondary steering gear.

(2) All internal vessel control communications and vessel control alarms.

(3) Standby or emergency generator, for as long as necessary to show proper functioning, including steady state temperature and pressure readings.

(4) Storage batteries for emergency lighting and power systems in vessel control and propulsion machinery spaces.

(5) Main propulsion machinery, ahead and astern.

(b) Vessels navigating on the Great Lakes and their connecting and tributary

V 4 4 / 1 7 2 S E 4 7 9 UMI

waters, having once completed the test requirements of this sub-part, are considered to remain in compliance until arriving at the next port of call on the Great Lakes.

(c) Vessels entering the Great Lakes from the St. Lawrence Seaway are considered to be in compliance with this sub-part if the required tests are conducted preparatory to or during the passage of the St. Lawrence Seaway or within one hour of passing Wolfe Island.

2. Section 164.35(i) would be amended to read as follows:

§ 164.35 Equipment: All vessels.

Each vessel must have the following:

* * * * *

(i) A device that can continuously record the depth readings of the vessel's echo depth sounding device, except when operating on the Great Lakes and their connecting and tributary waters.

* * * * *

(92 Stat. 1471 (33 U.S.C. 1221 et. seq.); 49 CFR 1.46(n)(4)).

Dated: August 14, 1979.

R. H. Scarborough,

Vice Admiral, U.S. Coast Guard, Acting Commandant.

[33 CFR Part 164]

[CGD 76-051]

Minimum Net Bottom Clearance

AGENCY: Coast Guard, DOT.

ACTION: Withdrawal of advance notice of proposed rulemaking.

SUMMARY: The Coast Guard has decided to discontinue its attempt to arrive at a national standard for minimum bottom clearance and to redirect its efforts to the development of local standards where required. Any future rulemaking actions on this subject will be locally initiated and published for comment in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Mr. Fred Schwer, Project Manager, Office of Marine Environment and Systems (G-WLE-4/73), Room 7315, Department of Transportation, 400 Seventh Street, S.W., Washington, D.C. 20590. Telephone (202) 426-4958.

SUPPLEMENTARY INFORMATION: The Coast Guard, on May 6, 1976, published in the **Federal Register** an advance notice of proposed rulemaking concerning Minimum Net Bottom Clearance (41 FR 18771). The proposal (CGD 76-051) drew 75 letters of comment, only 3 of which were supportive. In almost every case, the proposal was challenged on the basis of cost vs. benefit. Depending on the degree of restriction, commenters contended that costs of lighterage and demurrage or loss of cargo capacity appeared to outweigh any potential benefits.

While cost vs. benefit is not the only consideration in issuing regulations, particularly those concerned with safety, the number and substance of the comments caused the Coast Guard to reexamine its approach. Studies of shallow water maneuvering characteristics of vessels were performed. Various ports were examined and pilots and other mariners interviewed.

Some investigations are still in progress, but even now it is apparent that bottom clearance regulation is better handled on an individual port basis. This permits more precise consideration of local variables, such as bottom type, tidal range, wave action and surge, channel configuration, port geography and traffic mix. Therefore, the Coast Guard has decided to continue its evaluation of minimum net bottom clearance requirements on a port-to-port instead of a national basis.

In consideration of the foregoing, the proposal published in the **Federal Register** (41 FR 18771) on May 6, 1976, entitled "Minimum Net Bottom Clearance" (CGD 76-051) is hereby withdrawn.

Drafting Information

The principal persons involved in drafting this document are: Mr. Fred Schwer, Project Manager, Office of Marine Environment and Systems, and Mr. Stanley M. Colby, Project Attorney, Office of Chief Counsel.

[33 CFR Part 164]

[CGD 76-025]

Tug Assistance in Confined Waters

AGENCY: Coast Guard, DOT.

ACTION: Withdrawal of advance notice of proposed rulemaking.

SUMMARY: The Coast Guard is withdrawing the advance notice of proposed rulemaking concerning Tug Assistance in Confined Waters published on May 6, 1976 (41 FR 18770). Letters of comment and subsequent investigations, some still in progress, indicate that a single regulation would not be sufficiently flexible to ensure vessel safety and that locally initiated directives, tailored to the geography, climate and traffic in specific port areas, would better serve the mariner and the public. Future actions are being considered to address specific problems in limited areas. Should rulemaking follow, comments will be solicited.

FOR FURTHER INFORMATION CONTACT: Mr. Fred Schwer, Project Manager, Office of Marine Environment and Systems (G-WLE-4/73), Room 7315, Department of Transportation, 400 Seventh Street S.W., Washington, D.C. 20590. Telephone (202) 426-4958.

SUPPLEMENTARY INFORMATION: The May 6, 1976 advance notice of proposed rulemaking concerning Tug Assistance in Confined Waters (41 FR 18770) drew 64 responses. Thirty commenters remarked that only experienced personnel on-scene can integrate adequately all of the factors concerning the need for tug assistance. Twenty-five stated that no table or combination of tables could account for all of the variables without being so cumbersome as to be unusable. Seventeen other commenters offered various additional objections to the proposal. There were no favorable comments.

Faced with this negative response, the Coast Guard reevaluated its approach. Studies and inquiries were undertaken and pilots and other mariners in various ports were interviewed. Investigations are still in progress, but it is already evident that the concept envisioned in the advance notice requires modification. That notice proposed a "Factor Table" that would rate a vessel numerically and a "Tug Assistance Requirement Table" that would convert the vessel rating to a minimum tug requirement. Although the two tables provide an excellent theoretical approach and ultimately may prove to have value, they have not yet reached a useable form.

The Coast Guard does not reject the concept of mandatory tug escort or assistance where it can be useful. It is shelving instead the "blanket regulation" approach in favor of locally initiated rules, designed to respond to the needs of a particular port area. Several areas are being examined with this in mind and rulemaking action may be initiated and comments solicited when that level of development is reached.

In consideration of the foregoing, the proposal published in the **Federal Register** (41 FR 18770) on May 6, 1976, entitled "Tug Assistance in Confined Waters" (CGD 76-025) is hereby withdrawn.

BILLING CODE 4910-14-M

National Highway Traffic Safety Administration

[49 CFR Part 571]

[Docket No. 79-16; Notice 1]

Federal Motor Vehicle Safety Standards; Child Safety and Motor Vehicles

AGENCY: National Highway Traffic Safety Administration (NHTSA).

ACTION: Notice of public meeting and invitation for application for financial assistance in preparation of comments.

SUMMARY: This notice is issued in an effort to broaden the agency's knowledge of the hazards vehicles pose to children and to determine possible regulatory and other means of reducing those hazards. NHTSA will hold a meeting on December 12, 1979, so that the public can present its ideas and views on ways of improving protection for children involved in vehicle collisions either as occupants or pedestrians or cyclists.

DATES: The public meeting will be held on December 12, 1979, and run from 1:00 p.m. to about 6:00 p.m. Persons and organizations wishing to speak at the meeting must submit a copy of their presentations to NHTSA not later than December 1, 1979. Persons and organizations who wish to supplement their oral presentations at the meeting and those who wish to comment but cannot attend the meeting may submit written comments. These comments must be received no later than January 10, 1980. Application for financial assistance should be submitted in writing by September 24, 1979.

ADDRESSES: The public meeting will be held in the Sheraton Park Hotel, 2660 Woodley Road, N.W., Washington, D.C.

Copies of oral presentations to be delivered at the meeting and written comments should refer to the docket number set forth above and be addressed to: Docket Section, NHTSA, Room 5108, 400 Seventh Street, S.W., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT: Applications for financial assistance and questions concerning the meeting should be submitted to: Ms. Ann Mitchell, Public Participation and Consumer Affairs, NHTSA, 400 Seventh Street, S.W., Room 5232, Washington, D.C. 20590 (202-426-0870).

SUPPLEMENTARY INFORMATION:

Background

About one fourth of the total U.S. population, approximately 52.5 million people, are children under 15-years-old. Each year approximately 4,200 of these children are killed and several hundred thousand are seriously injured in motor vehicle accidents. Motor vehicle accidents are now the number one killer of 1-14 year old children in this country.

Data on children who die in motor vehicle accidents show that 50 percent of the children are killed as occupants of automobiles, 38 percent as pedestrians and 12 percent as cyclists. The death of an unrestrained child in a motor vehicle typically occurs when he or she becomes a missile during a crash, and is either hurled against the vehicle's interior or is ejected from the vehicle. One of the typical ways in which child pedestrians or cyclists can be killed or permanently disfigured is through being hit by a vehicle with sharp frontal or side protrusions.

Currently, effective restraints are available for protection of children under the age of 5-years-old. Last year, NHTSA proposed to upgrade its safety standard on child restraints by making it applicable to all types of child restraint devices and by requiring that they be dynamically tested in conditions approximating real world accidents (43 FR 21470; May 18, 1978). This standard will be published this fall. There is ample evidence in the form of accident data, studies and laboratory tests that indicate that child restraints which comply with the Federal standard and which are used properly, provide excellent protection for children under 5 years of age traveling in motor vehicles.

The 28 million children in the age bracket from 5-12 years are usually too big to fit into child restraints and many may be too small to use adult shoulder restraints effectively. While the use of a lap belt provides these children substantial protection, there may be even better ways of protecting these children from crash injuries.

Another serious problem is that available restraints are very infrequently used. For example, the latest surveys indicate that about 86 percent of front seat occupants, both children and adults, do not use safety belts and between 93 and 96 percent of the children riding in motor vehicles are not in child restraints. Consequently, a large segment of the child population is being transported unrestrained in motor vehicles.

As noted above, a leading cause of death and injury to unrestrained or improperly restrained children in a collision is contact with the vehicle's interior during a sudden stop or collision. Objects such as the backs of seats, steering wheels, instrument panels, and other portions of the vehicle can become lethal weapons when a child is hurled against them in even a moderate speed crash. Knowing this, the agency is interested in improving the protection provided in a vehicle's interior by eliminating or modifying those unyielding aggressive surfaces and protrusions that cause injury. One survey indicates that the surfaces most often contacted by children in a crash are the lower instrument panel, and the lower rear surface of the front seatback.

Pedestrian safety represents another area where additional work is needed to reduce the number of children killed and injured. Child fatalities and injuries account for 20 percent of the total U.S. pedestrian deaths and injuries. The head-neck-face areas receive approximately one half of the injuries occurring to children in pedestrian/vehicle crashes. Approximately one half of those injuries are caused by contacts with the vehicle's grill and hood edges, while the remaining injuries are due to contacts with the ground.

During the last several years, the NHTSA has conducted a number of experimental programs aimed toward developing softer, more energy absorbant materials to use on vehicle front ends to reduce pedestrian injuries. The most successful approach involved the elimination of sharp protrusions and use of a soft, deep form material covering the bumper and front of the vehicle. The performance of a modified vehicle using this approach has proved to be promising in comparison with an unmodified vehicle. Through tests in which instrumented test dummies simulating pedestrians were struck at 25 mph by modified and unmodified vehicles, the modified vehicles were shown to reduce substantially the forces to which the dummies were subjected.

Information Sought

To aid the agency in determining whether to commence rulemaking, NHTSA is seeking the public's views, data, and information on ways to reduce death and injuries among children in accidents involving passenger cars, vans, trucks and other motor vehicles.

V 4 4 / 1 7 2 S E 4 7 9 UMI

The agency is particularly, but not exclusively, seeking comments on ways of reducing deaths and injuries caused by impacts against the vehicle's interior and caused by impacts with pedestrians and cyclists by the front ends and sides of motor vehicles. (In view of the recent opportunity to comment on the child restraint notice of proposed rulemaking, the agency is not seeking comment on issues relating to that subject unless commenters have previously unsubmitted data or arguments to offer.)

Regarding protection for children riding in motor vehicles, information is sought on the following items:

1. Data collected by medical, safety and other organizations on the portions of the vehicle's interior most often impacted and objects, protrusions, and surfaces causing the most serious injury.

2. The desirability and benefits of using energy-absorbing materials on the lower surface of the instrument panel and limiting protrusions on all parts of the instrument panel.

3. The desirability and benefits of using energy-absorbing materials on the entire rear seatback area, and limiting protrusions in that area.

4. The desirability and benefits of countermeasures to protect children who are transported in the rear of station wagons and hatchbacks.

5. Recommendations are also solicited on other means of improving the safety of the vehicle's interior.

Regarding child pedestrian and cyclist/vehicle impacts, information is sought on the following items:

1. Data collected by medical, safety or other organizations on the portions or components of motor vehicles most often impacting pedestrian children and most often causing serious injuries and fatalities.

2. The desriability and benefits of using energy-absorbing materials on bumpers, grills, and hood edges in order to reduce pedestrain fatalities and injuries.

3. The desirability and benefits of eliminating other protrusions on motor vehicles to reduce pedestrain fatalities and injuries.

4. Recommendations are also solicited on other means of improving the safety of the vehicle's exterior.

Oral and Written Public Comments

Individuals and organizations are invited to testify at the meeting. Presentations made at the meeting and written comments should attempt to include a discussion of the potential regulatory and other solutions for the problems mentioned above, identify other possible solutions and provide information on the benefits, costs and other impacts of the possible solutions.

The amount of time available to each speaker will depend largely on the number of participants. The agency anticipates that not more than 10 minutes will be available for each speaker. Interested persons unable to attend the meeting should note that they can participate by submitting written comments.

Agenda of Speakers

After the requests to speak are received by NHTSA, a list of the order of appearance of speakers at the public meeting on December 12, 1979, will be made available in NHTSA's Office of Public Affairs and Consumer Participation. The list will be available about December 5, 1979.

Applications for Financial Assistance

The NHTSA invites all qualified individuals, organizations and other parties financially unable to participate in the proceeding to apply for financial assistance. The agency is particularly interested in applications that will innovatively address the problems of improving children survival in automobile accidents either as passengers of automobiles or as pedestrians or cyclists being hit by motor vehicles. All applications submitted before the deadline specified at the board, composed of NHTSA and other Department of Transportation officials, to determine whether each applicant is eligible to receive funding. Consideration of late application is at the discretion of the evaluation board.

In general, an applicant is eligible if its participation would contribute substantially to a full and fair determination of the issues involved in the proceeding, taking into consideration the novelty, complexity, and significance of the ideas advanced and the ability of the applicant to represent the interests it espouses competently. Additionally, it must be demonstrated that the applicant does not have sufficient resources available to participate effectively in the proceeding in the absence of an award under this program.

If more than one applicant representing the same or similar interest is deemed eligible, the board will either select the applicant which can make the strongest presentation or select more than one applicant if justified. Compensation is to the extent the agency's budget for this purpose will permit. Payment is made as soon as possible after the selected applicant has completed its work and submitted a claim, but not later than 60 days after a completed claim is submitted.

Each applicant should specify in its application which rulemaking actions and issues it proposes to address if its application for funding is approved, and the nature of its proposed work product. Applicants must submit as part of their application all information required by § 5.49 of the recently revised DOT regulations governing this financial assistance program (44 FR 4675; January 23, 1979). Failure to submit the required information may result in delays in evaluation and possible disqualification of the application.

All comments must be limited not to exceed 15 pages in length. Necessary attachments may be appended to these submissions without regard to the 15 page limit. This limitation is intended to encourage commenters to detail their primary arguments in a succinct and concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. Any claim of confidentiality must be supported by a statement demonstrating that the information falls within 5 U.S.C. section 552(b)(4), and that disclosure of the information is likely to result in substantial competitive damage; specifying the period during which the information must be withheld to avoid that damage; and showing that earlier disclosure would result in that damage. In addition, the commenter or, in the case of a corporation, a responsible corporate official authorized to speak for the corporation must certify in writing that each item for which confidential treatment is requested is in fact confidential within the meaning of section 552(b)(4) and that a diligent search has been conducted by the commenter or its employees to assure that none of the specified items has previously been disclosed or otherwise become available to the public.

Availability of Comments

All comments, presentations and a transcript of the public meeting will be available for public viewing at: Docket Section, NHTSA, Room 5108, 400 Seventh Street, S.W., Washington, D.C. 20590.

(Sec. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegatons of authority at 49 CFR 1.50 and 501.8)

Issued on August 30, 1979.

A. C. Malliaris,

Acting Associate Administator for Rulemaking.

Notices

Federal Register
Vol. 44, No. 172
Tuesday, September 4, 1979

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

Frederick Training Facility, Frederick, Md.; Issuance of Negative Declaration

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of Availability of Environmental Assessment and Negative Declaration.

SUMMARY: This gives notice that the Animal and Plant Health Inspection Service is not preparing an environmental impact statement concerning the consolidation of two Plant Protection and Quarantine training staffs from Battle Creek, Michigan, and Hyattsville, Maryland, to a new facility located in the Amber Meadows Business Park on the north side of Frederick, Maryland. The environmental assessment of this action indicates that the existing facilities have not caused significant adverse local, regional, or national impacts on the environment in the past. There are no adverse environmental impacts anticipated in the future for this new facility. No significant controversy has been associated with this project. As a result of these findings, it has been determined that the preparation and review of an environmental impact statement is not needed for this action.

ADDRESSES: Requests for copies of the environmental assessment should be addressed to the Energy and Environmental Staff, Architectural Engineering Branch, Administrative Services Division, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 271, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

FOR FURTHER INFORMATION: Contact Kenneth J. Dunn, Energy and Environmental Staff, (301) 436-8237.

SUPPLEMENTARY INFORMATION: Animal and Plant Health Inspection Service is responsible for operating plant import stations and quarantine facilities that inspect imported plants which may be diseased or carry insect vectors. The proposed Frederick, Maryland, facility will train about 150-200 new and experienced plant inspectors and/or quarantine personnel per year to ensure that they have the technical competencies necessary to accomplish program objectives. The new one story facility of 10,600 square feet will contain classrooms, a training laboratory, a library, office spaces and other related rooms.

No administrative action will be taken until 15 days after date of this publication.

This notice has been reviewed under the U.S. Department of Agriculture criteria established to implement the EO 12044, Improving Government Regulations. A determination has been made that this notice should not be classified significant under those criteria. The environmental assessment referred to in the notice meets the requirements of EO 12044 and Secretary's Memorandum 1955 for an impact analysis statement. The environmental assessment is available from the Energy and Environmental Staff, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Hyattsville, MD 20782.

Done at Washington, D.C., this 29th day of August 1979.

Larry B. Slagle,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-M

Food and Nutrition Service

Food Stamp Workfare Demonstration Project; Reopening of Opportunity for Applications

AGENCY: Food and Nutrition Service, USDA.

ACTION: Reopening of Opportunity for Applications.

SUMMARY: On November 28, 1978, 43 FR 55334, the Department published in the **Federal Register** final rulemaking and a Notice of Intent for the Food Stamp Workfare Demonstration Project (originally published in the **Federal Register** Docket Number 78-33376) which is mandated by Subsection 17(b)(2) of the Food Stamp Act of 1977. Under this project, food stamp work registrants will be required to perform work in a public service capacity in exchange for the coupon allotment to which their household is otherwise normally entitled. The Notice of Intent announced the intention of the Departments of Agriculture and Labor to jointly conduct the project and sought proposals for project operation from eligible political subdivision or groupings thereof wishing to take part in the project. We are hereby reopening the opportunity to reconsider applications on file and those received in response to this Notice for a period of 10 working days from the date of publication of this Notice in the **Federal Register**. This action has been judged to be necessary by the Departments in order to provide further opportunity for interested jurisdictions, especially urban sites as defined in the Notice of Intent, to participate in this demonstration project. Interested jurisdictions should forward a letter of intent no later than September 18, 1979 to Ms. Alberta Frost, Acting Deputy Administrator, Food and Nutrition Service, Food Stamp Program, USDA, Washington, D.C. 20250.

DATE: The due date for letters of intent is reopened for a period of 10 working days from the publication date of this Notice in the **Federal Register** or no later than September 18, 1979.

FOR FURTHER INFORMATION CONTACT: Ms. Claire Lipsman, Director, Program Development Division, U.S. Department of Agriculture, Room 658, 500 12th St. S.W., Washington, D.C. 20250 telephone (202) 447-8325.

Carol Tucker Foreman,

Assistant Secretary for Food and Consumer Services.

Ernest G. Green,

Assistant Secretary for Employment and Training Administration.

August 27, 1979.

BILLING CODE 3410-30-M

Food Safety and Quality Service

Organization, Functions, and Delegation of Authority

Pursuant to the authority of the Administrator, Food Safety and Quality

Service, appearing at 7 CFR 2.7, and 2.92, the following Statement of Organization, Functions, and Delegations of Authority of Food Safety and Quality Service is made:

Organization and Functions

Section 1. *General.* Food Safety and Quality Service, hereinafter referred to as FSQS was created by the Secretary of Agriculture on March 14, 1977 (42 FR 20165: April 18, 1977).

Section 2. *Central Office.* The central office of FSQS is located at Washington, D.C., and consists of the Office of the Administrator, Associate Administrator, and five Deputy Administrators as follows:

Office of the Administrator

Information and Legislative Affairs.
Policy Studies and Public Participation.
Equal Employment Opportunity.

Associate Administrator

Deputy Administrator, Commodity Services.
Deputy Administrator, Science.
Deputy Administrator, Meat and Poultry Inspection.
Deputy Administrator, Compliance.
Deputy Administrator, Administrative Management.

Section 3. *Field Organization.* The location of principal field offices is as follows for each major program:

Meat and Poultry Inspection

Regions

North Central: Room 419, United States Courthouse Building, East 1st and Walnut Streets, Des Moines, IA 50309.
Northeastern: 7th Floor, 1421 Cherry Street, Philadelphia, PA 19102.
Southeastern: Room 216, 1718 Peachtree Street, NW., Atlanta, GA 30309.
Southwestern: Room 5–F41, 1100 Commerce Street, Dallas, TX 75242.
Western: Room 102, Building 2–C, 620 Central Avenue, Alameda, CA 94501.

Science

Multidisciplinary Laboratories

Western: U.S. Appraisers Building, 630 Sansome Street (Mail: P.O. Box 2433), San Francisco, CA 94126.
Midwestern: Room 704, Federal Building, 405 South 12th Street, St. Louis, MO 63102.
Eastern: Russel Research Station Road (Mail: P.O. Box 6085), Athens, GA 30604.

Midwestern Associated Laboratories

National Residue: 1815 N. University Street, Peoria, IL 61604.
Kansas City: 417 Federal Building, Kansas City, KS 66101.

Staff Laboratories

Special Projects, Room 612, Agriculture Annex Building, 12th and C Streets, SW., Washington, DC 20250.
Agricultural Research Center, Beltsville, MD 20705; Methods Development, Building 318, Compounds, Building 306, Microbiology, Building 319, Pathology, Building 318, Epidemiology, Building 318C.

Commodity Services

Regions

Fresh Fruit and Vegetable Operations

Central: Room 1012, 610 South Canal Street, Chicago, IL 60607.
Eastern: Room 2052, South Building, 14th and Independence Avenue, SW., Washington, DC 20250.
Western: Room 739, Appraisers Building, 630 Sansome Street, San Francisco, CA 94111.

Processed Fruit and Vegetable Operations

Central: Room 1014, U.S. Custom House, 610 South Canal Street, Chicago, IL 60607.
Southeast: Federal Building, 3rd Street and Avenue A., SW (For Mail: P.O. Box 860), Winter Haven, FL 33880.
Western: Suite 416, 111 West St. John Street, San Jose, CA 95113.

Dairy Operations

Room 754, Appraisers Building, 630 Sansome Street, San Francisco, CA 94111.
Room 803, 610 South Canal Street, Chicago, IL 60607.
Room 242, Federal Building, 110 South 4th Street, Minneapolis, MN 55401.
Room 1205, U.S. Courthouse and Federal Building, 100 South Clinton Street, Syracuse, NY 13260.

Poultry Operations

Eastern: 469 Hospital Drive, Gastonia, NC 28052.
East Midwest: No. 1 Natural Resources Drive, Room 1109, Little Rock, AR 72205.
West Midwest: Room 777, 210 Walnut Street, Des Moines, IA 50309.
Western: Room 219, Federal Building, 401 North San Joaquin Street, Stockton, CA 95202.

Laboratories

Poultry Laboratory, 469 Hospital Drive, Gastonia, NC 28052.
Dairy Grading Laboratory, Room 666, 610 South Canal Street, Chicago, IL 60607.

Main Stations

Meat Grading Operations

Building 7, Section A, 4747 Eastern Avenue, Bell, CA 90201.
Post Office Building, 815 Court Street, Martinez, CA 94553.
206 Livestock Exchange Building, 47th and Lafayette, Denver, CO 80216.
Room 204, 1718 Peachtree Street, NW., Atlanta, GA 30309.
Room 203, 4101 South Halsted Street, Chicage, IL 60609.
Room 225, Livestock Exchange Building, 800 South Chambers Street, Sioux City IA 51107.
Post Office Building (For Mail: P.O. Box 27), South St. Paul, MN 55075.
Room 760, Livestock Exchange Building, Kansas City, MO 64102.
Room 723, Livestock Exchange Building, Omaha, NE 68107.
1101 State Road, Building E., Princeton, NJ 08540.
Amarillo Livestock Exchange, Auction Building, 101 Manhattan Street (For Mail: P.O. Box 30217), Amarillo, TX 79120.

Compliance

Evaluation and Enforcement Division, Review Activities

804 West 24th Street, Lawrence, KS 66044.

Enforcement Activities

North Central: 965 Federal Building, 210 Walnut Street, Des Moines, IA 50309.
Southwestern: Room 5–F–33, 1100 Commerce Street, Dallas, TX 75242.
Northeastern: Blazon II Building, 505 South Lenola Road, Moorestown, NJ 08057.
Southeastern: Room 431, 1720 Peachtree Street, NW., North Tower, Atlanta, GA 30309.
Western: Room 111, Building 2-F, 620 Central Avenue, Alameda, CA 94501.

Administrative Management

Field Office Branches

Program Services Branch.
Personnel Operations Branch.
The above field offices are located at 123 E. Grant Street, Minneapolis, MN 55403.

Section 4. *The Office of the Administrator.*

(a) *The Administrator.* The Administrator of FSQS, under the direction of the Assistant Secretary for Food and Consumer Services, formulates, directs, and supervises the execution of FSQS policies, programs, and activities. The Administrator is authorized to take any action, execute any document, authorize any expenditure, promulgate any rule, regulation, order, or instruction, required by or authorized by law and deemed by the Administrator to be necessary and proper to the discharge of the functions assigned to FSQS, and to delegate and provide for redelegation of authority to appropriate officers and employees consistent with, and with due regard to the continuing responsibility for the proper discharge of delegations made by the Administrator. Delegations and provisions for redelegation are stated in Sections 13, 14, 15, 16, 17, 18, and 19.

(b) *The Associate Administrator.* The Associate Administrator shares overall responsibility with the Administrator for the general direction and supervision of the programs and activities assigned to FSQS, and is authorized to act for the Administrator in performing all functions for which the Administrator is responsible.

(c) *Deputy Administrator, Commodity Services.* The Deputy Administrator, Commodity Services, is responsible for:

(1) Participating with the Administrator and other Agency officials in the planning, formulation, and review of all policies, programs, procedures, and activities of FSQS.

(2) Planning, providing leadership, formulating and coordinating policies, developing regulations pursuant to laws, and directing the administration of Commodity Services programs and activities. These programs and activities include the standardization and quality inspection and grading of dairy products, fresh and processed fruits and vegetables, meat, poultry, poultry products, shell eggs, egg products, rabbits, and miscellaneous commodities, under the Agricultural Marketing Act of 1946 and other laws. Also included are the administration of the Egg Products Inspection Act, the Government-wide Quality Assurance Program, the commodities purchase services under Section 6 of the National School Lunch Act of 1946, Section 32 of the Act of August 24, 1935, and other authorities. In conjunction with Compliance, recommendations are made to withdraw services, and prosecute or take other enforcement actions where indicated.

(3) Providing leadership, guidance, expertise, assistance and coordination in the implementation of the Equal Employment Opportunity Program.

These activities are carried out by three commodity and one functional units: the Fruit and Vegetable Quality Division, the Meat Quality Division, the Poultry and Dairy Quality Division, and the Food Quality Assurance Division.

(d) *Deputy Administrator, Science.* The Deputy Administrator, Science, is responsible for:

(1) Participating with the Administrator and other Agency officials in the planning, formulation, and review of all policies, programs, procedures, and activities of FSQS.

(2) Planning, providing leadership, formulating and coordinating policies, assisting in the development of regulations pursuant to laws, and directing the administration of Science programs and activities. These programs and activities include developing and maintaining a food-borne hazard reporting system, and a residue monitoring and surveillance program for meat and poultry products. Also included is the establishment of Agency nutritional policies (including the use of food additives in meat and poultry), and the operation of regulatory field service laboratories. In addition to maintaining liaison with national and international laboratories, the program identifies, recommends, and coordinates the initiation and conduct of appropriate scientific projects, to support Meat and Poultry Inpsection, Compliance, and Commodity Services, wherever appropriate.

(3) Providing leadership, guidance, expertise, assistance, and coordination in the implementation of the Equal Employment Opportunity Program.

These activities are carried out by seven functional units: the Chemistry Division, the Field Service Laboratories Division, the Food Ingredient Assessment Division, the Mathematics and Statistics Division, the Microbiology Division, the Pathology and Epidemiology Division, and the Residue Evaluation and Surveillance Division.

(e) *Deputy Administrator, Meat and Poultry Inspection.* The Deputy Administrator, Meat and Poultry Inspection, is responsible for:

(1) Participating with the Administrator and other Agency officials in the planning, formulation, and review of all policies, programs, procedures, and activities of FSQS.

(2) Planning, providing leadership, formulating and coordinating policies, developing and implementing regulations pursuant to laws, and directing the administration of Meat and Poultry Inspection programs and activities to assure that meat, poultry, and their products, which move in foreign and interstate commerce, are wholesome, properly labeled, and not adulterated. These programs and activities include the development of methods and the conduct of ante-mortem and post-mortem inspection, and the monitoring of State inspection programs approved as equal to Federal inspection. The program determines acceptable methods for humane slaughter of animals, and provides a check on compliance with these methods. In conjunction with Compliance, plants, facilities, and individuals are monitored; recommendations are made for the withdrawal of services, prosecution, or other enforcement actions where indicated.

(3) Establishing operating requirements and criteria for facilities, equipment, sanitation, environmental, employee safety conditions; approves the physical plant and equipment for meat and poultry plants subject to regulatory control. The program coordinates the establishment of regulatory criteria for disposition of meat, poultry, and their carcasses, and develops procedures to maintain product security and control of condemned and inedible materials. Foreign inspection systems and plants exporting to the United States are evaluated, and surveillance is maintained for compliance with an approved inspection plan.

(4) Providing leadership, guidance, expertise, assistance, and coordination in the implementation of the Equal Employment Opportunity Program.

These activities are carried out by the functional units of Technical Services and Field Operations.

(f) *Deputy Administrator, Compliance.* The Deputy Administrator, Compliance, is responsible for:

(1) Participating with the Administrator and other Agency officials in the planning, formulation, and review of all policies, programs, procedures, and activities of FSQS.

(2) Planning, providing leadership, formulating and coordinating policies, developing regulations pursuant to laws, and directing the administration of Compliance programs and activities. These programs and activities assure that actions necessary for legal and regulatory compliance are effective, fair, and applied uniformly. An audit program is conducted to measure results of these efforts and to recommend corrections for existing or potential problems. The development of meat and poultry product standards and FSQS regulations is coordinated, and liaison is maintained with the departmental Office of the Inspector General and the General Accounting Office. Using compliance, surveillance, and enforcement programs, Agency actions are coordinated to withdraw grading and inspection service, to prosecute, or to take other enforcement actions where indicated.

(3) Developing, implementing, and reviewing labeling policy and food packaging systems to eliminate fraudulent practices.

(4) Preparing subpoenas for issuance by the Administrator in matters relating to the efficient administration and enforcement of the Federal Meat Inspection Act, as amended, the Poultry Products Inspection Act, as amended, and the Egg Products Inspection Act, pursuant to 15 U.S.C. 49 as authorized by 21 U.S.C. 677 and 21 U.S.C. 467d, and the Agricultural Marketing Act of 1946.

(5) Providing leadership, guidance, expertise, assistance, and coordination in the implementation of the Equal Employment Opportunity Program.

These activities are carried out by four functional units: the Evaluation and Enforcement Division, the Planning and Analysis Division, the Meat and Poultry Standards and Labeling Division, and the Regulations Coordination Division.

(g) *Deputy Administrator, Administrative Management.* The Deputy Administrator, Administrative Management, is responsible for:

(1) Participating with the Administrator and other Agency officials in the planning, formulation, and review of all policies, programs, procedures, and activities of FSQS.

V 44 / 172 SEP 4 79 UMI

(2) Planning, providing leadership, formulating and coordinating policies, and directing the administration of Administrative Management services to be provided for all organizational segments of FSQS. These services include budget formulation, presentation, and execution, financial analysis, personnel administration, and resources management. Also included are the management of material procurement, real and personal property, and office services. Management improvement initiatives are undertaken, and control of Agency information access is maintained.

(3) Coordinating the development of cooperative and service agreements, master Memoranda of Understanding and all agreements between FSQS and other agencies.

(4) Providing leadership, guidance, expertise, assistance, and coordination in the implementation of the Equal Employment Opportunity Program.

These activities are carried out by six functional units: the Executive Secretariat, Administrative Services Division, Budget, Planning and Evaluation Division, Finance Division, Management Improvement Division, and Personnel Division.

Section 5. *Information and Legislative Affairs.* Information and Legislative Affairs, under the direction and supervision of the Administrator, is responsible for:

(1) Developing and disseminating information to apprise and educate the public regarding the services provided by FSQS and the means by which the public may obtain these services. Additionally, information on food safety, nutrition, labeling, and quality, will be provided to assist consumers in obtaining maximum food value.

(2) Advising and assisting the Administrator and other Agency officials on all matters relating to legislative bills, proposals, and correspondence. Liaison will be maintained with the Office of Governmental and Public Affairs and with the appropriate congressional committees.

Section 6. *Policy Studies and Public Participation.* Policy Studies and Public Participation, under the direction and supervision of the Administrator, is responsible for:

(1) Developing, recommending, and advising on policy options relating to overall FSQS programs. In addition, an assessment of economic and program ramifications of alternative strategies and possible courses of action will be made.

(2) Actively pursuing and obtaining public participation in the rulemaking process. The establishment of advisory committees for ideas, comments, review, and recommendations will be based on balanced representation from all potentially interested groups.

(3) Coordinating the handling of citizen complaints and working with the Office of Governmental and Public Affairs to identify problems which impact the public.

Section 7. *Equal Employment Opportunity Staff.* Equal Employment Opportunity Staff, under the direction and supervision of the Administrator, is responsible for:

(1) Developing and implementing the Agency's EEO Program by reviewing proposed changes in Agency policies which impact on the employment of minorities and women, preparing directives and regulations on EEO, and developing projects for special emphasis in selected EEO areas.

(2) Informing the Administrator and top Agency officials about EEO progress and problems after evaluation of subordinate organizational levels (i.e., regions, States, offices, divisions). This staff will coordinate matters of EEO policy with the Department's Office of Equal Employment Opportunity.

(3) Implementing the Agency Upward Mobility Programs by developing formal career opportunities and disseminating relevant information to all eligible employees.

(4) Assuring that officials designated to receive or take action on formal EEO complaints do so within the required time limits.

Section 8. *Commodity Services.* The Food Quality Assurance; Fruit and Vegetable Quality; Meat Quality; and the Poultry and Dairy Quality Divisions, under direction of the Deputy Administrator for Commodity Services are responsible as follows:

(a) *Food Quality Assurance Division.* The Food Quality Assurance Division is responsible for:

(1) Coordinating the development of specifications for meat, poultry, dairy, fruits and vegetables, and approving all specifications used in Federal procurement programs.

(2) Coordinating research in food specifications, monitoring amendments to the commodity specifications portion of food purchase contracts, and serving as Federal liaison on food specifications matters.

(b) *Fruit and Vegetable Quality Division.* The Fruit and Vegetable Quality Division is responsible for:

(1) Development, establishment, and revision of U.S. Grade Standards, and the voluntary quality inspection programs for fresh and processed fruits and vegetables, edible nuts, and miscellaneous assigned commodities authorized by the Agricultural Marketing Act of 1946.

(2) Diversion, purchase, and export programs authorized by Section 32 of the Act of August 24, 1935; Section 6 of the National School Lunch Act and other authorities, as they pertain to fruits and vegetables.

(3) Representing the Agency and the Department with U.S. Interagency and State groups or agencies and other national and international organizations relative to fruit and vegetable quality program matters.

(4) Recommending the withdrawal of commodity services or other enforcement actions where indicated.

(c) *Meat Quality Division.* The Meat Quality Division is responsible for:

(1) Development, establishment, and revision of U.S. Grade standards and the grading, examination, and certification service on meat and meat products in accordance with Federal grade and class standards, and applicable specifications.

(2) Diversion, purchase, and export programs authorized by Section 32 of the Act of August 24, 1935; Section 6 of the National School Lunch Act and other authorities for meat and meat products.

(3) Representing the Agency and the Department with U.S. Interagency and State groups or agencies and other national and international organizations relative to meat and meat products quality program matters.

(4) Recommending the withdrawal of commodity services or other enforcement actions where indicated.

(d) *Poultry and Dairy Quality Division.* The Poultry and Dairy Quality Division is responsible for:

(1) Development, establishment, and revision of U.S. Grade standards, and the voluntary inspection of egg products, the voluntary grading of dairy, poultry, rabbits, shell eggs and related products authorized by the Agricultural Marketing Act of 1946, and the Processed and Renovated Butter Act.

(2) Mandatory continuous inspection of egg products and the surveillance inspection of shell egg handlers and hatcheries authorized by the Egg Products Inspection Act of 1970.

(3) Diversion, purchase, and export programs authorized by Section 32 of the Act of August 24, 1935; Section 6 of the National School Lunch Act and other authorities for poultry and poultry products.

(4) Representing the Agency and the Department with U.S. Interagency and State groups or agencies and other national and international organizations relative to poultry and dairy products quality program matters.

(5) Recommending the withdrawal of commodity services or other enforcement activities where indicated.

Section 9. *Science.* The Chemistry; Mathematics and Statistics; Microbiology; Pathology and Epidemiology; Field Service Laboratories; Residue Evaluation and Surveillance; and Food Ingredient Assessment Divisions, under direction of the Deputy Administrator for Science, are responsible as follows:

(a) *Chemistry Division.* The Chemistry Division is responsible for:

(1) Conducting applied research and special studies to meet Agency needs and to develop analytic methods suitable for the regulatory programs.

(2) Maintaining a quality assurance program and carrying out interlaboratory collaborative studies to ensure valid chemical data throughout the Agency.

(3) Developing and managing the certified and recognized laboratory programs with non-Federal government laboratories for analyses of official Agency samples.

(b) *Mathematics and Statistics Division.* The Mathematics and Statistics Division is responsible for:

(1) Design of acceptance sampling systems.

(2) Design of studies, analysis, and specification of the limits of warranted inference for data of interest to the Agency.

(3) Design and analysis of studies from which standards and specifications are developed or revised.

(4) Assisting in the development of residue monitoring and surveillance systems.

(5) Development and implementation, in cooperation with other staffs, of statistical training for Agency personnel.

(6) Statistical evaluation of proposed plant quality control systems.

(7) Scientific computer support necessary to carry out the responsibilities of Science.

(c) *Microbiology Division.* The Microbiology Division is responsible for:

(1) Conducting a general food microbiology program to analyze canned products under the regulatory responsibility of the Agency; identifying pathogens, toxins, extraneous material and species of animal tissues found in food processed under the Agency's control, and operating an antibiotic residue identification program.

(2) Conducting field investigations of sanitation to develop microbiological criteria for wholesome food.

(3) Developing guidelines and policies concerning thermal processing of food products.

(d) *Pathology and Epidemiology Division.* The Pathology and Epidemiology Division is responsible for:

(1) Contributing to the development of criteria for ante-mortem and post-mortem inspection of animals and poultry.

(2) Investigating emerging conditions involving human or animal health; operating a foodborne hazard control center; and maintaining liaison with State and Federal health agencies.

(3) Operating a national diagnostic pathology program; assisting in developing and presenting training programs in pathology and epidemiology for field personnel; conducting studies of infectious agents associated with food.

(4) Developing serological testing systems for detecting infectious and toxic agents in foods.

(e) *Field Service Laboratories Division.* The Field Service Laboratories Division is responsible for:

(1) Operating a laboratory program which provides services in the disciplines of chemistry, microbiology, and pathology to conduct analyses for economic fraud, food additives, and nutrition; to diagnose diseases, parasites, and similar pathogens in animal tissues; and to determine levels of drug, pesticide, and chemical residues in meat and poultry.

(2) Assuring the quality and integrity of nongovernment laboratories endorsed by the Agency to perform similar analyses on a commercial basis.

(f) *Residue Evaluation and Surveillance Division.* The Residue Evaluation and Surveillance Division is responsible for:

(1) Planning and evaluating a residue program to detect and determine the extent of antibiotic, drug, or chemical residues in food products under Agency jurisdiction, and to prevent residue adulterated food products from entering commerce.

(2) Assisting in the evaluation of industry quality assurance programs related to residue program.

(3) Conducting toxicological studies and evaluation of substances in food of potential adverse significance to human health.

(g) *Food Ingredient Assessment Division.* The Food Ingredient Assessment Division is responsible for:

(1) Coordinating the establishment of Agency nutritional policies and developing recommendations for documents needed to implement nutritional standards.

(2) Evaluating and recommending research on the methods used to assess nutrient levels for meat and poultry products; evaluating profiles of fabricated foods to determine if expected nutrient levels are present in proportions usual to meat and poultry products.

(3) Developing guidelines and policies for the use of fortified nonmeat and nonpoultry ingredients (such as vegetable protein) in preparing finished meat and poultry products.

(4) Evaluating, approving, disapproving the safety and use of food additives in meat and poultry products.

(5) Determining the safety of compounds and packages used by industry during the processing of food products.

Section 10. *Meat and Poultry Inspection.* Technical Services and Field Operations, under direction of the Deputy Administrator for Meat and Poultry Inspection are responsible as follows:

(a) *Technical Services.* Technical Services is responsible for:

(1) Assessing the food safety and public health implications of emerging agricultural practices and technology.

(2) Determining acceptable methods for humane slaughter, and developing procedures for inspecting livestock, poultry, and their processed products.

(3) Developing procedures for maintaining product security and the control of condemned and inedible materials; coordinating the establishment of regulatory criteria for the wholesomeness of processed product, and the disposition of livestock, poultry, and their carcasses.

(4) Coordinating and developing facility, equipment, sanitation, and operating requirements for meat and poultry regulatory programs.

(5) Preparing environmental considerations; approving new construction, plant modifications, and equipment in plants subject to regulatory control.

(6) Developing and modifying inspection work standards, and conducting technical training for inspection personnel.

(b) *Field Operations.* Field Operations is responsible for:

(1) Conducting ante-mortem and post-mortem inspection of meat animals, meat products, poultry, and poultry products intended for human consumption, including compliance with the Humane Slaughter Act, and monitoring the accuracy of product labels.

(2) Monitoring plants, other facilities, and individuals for compliance with legal orders and monitoring equal-to inspection programs of States.

(3) Administering the requirements of Section 20 of the Federal Meat Inspection Act and Section 17 of the

Poultry Products Inspection Act with respect to imported meat and poultry; conducting activities for import inspection, and the inspection and certification of meat and poultry proposed for export; providing guidance to regional and area offices concerning import and export activities.

(4) Coordinating with the State Department and the Foreign Agricultural Service regarding the impact of program actions on foreign trade interests.

(5) Receiving and referring to Compliance recommendations to withdraw inspection services.

(6) Directing regional offices as follows:

(i) Planning, providing leadership, and coordinating Field Operations programs and activities within the region for all activities related to inspection of meat, poultry, and related products.

(ii) Granting, refusing, suspending, and recommending withdrawal of inspection services to meat and poultry establishments in accordance with applicable regulations.

(iii) Providing voluntary inspection services relating to wholesomeness of meat and poultry products used as food for dogs, cats, and other carnivora.

(iv) Directing, coordinating, and integrating the activities of subordinate area offices.

Section 11. *Compliance.* The Evaluation and Enforcement, Planning and Analysis, Regulations Coordination, and the Meat and Poultry Standards and Labeling Divisions, under direction of the Deputy Administrator for Compliance are responsible as follows:

(a) *Evaluation and Enforcement Division.* The Evaluation and Enforcement Division is responsible for:

(1) Providing systematic nationwide monitoring of the effectiveness of inspection and grading programs through periodic reviews and special studies.

(2) Providing systematic nationwide monitoring of businesses engaged in interstate food marketing and distribution; detecting and documenting statutory violations; assuring that appropriate remedies or sanctions are effected.

(3) Controlling violative products through detentions, civil seizures, and voluntary recalls.

(4) Cooperating with States in the development of compliance programs for intrastate products and businesses; monitoring State compliance programs to assure they meet Federal specifications.

(5) Issuing letters of warning; referring reports and recommendations to the Office of the General Counsel, Justice Department, or other appropriate officials for criminal/civil/administrative action.

(6) Developing and maintaining contacts with appropriate enforcement groups.

(b) *Planning and Analysis Division.* The Planning and Analysis Division is responsible for:

(1) Planning and implementing compliance policy and programs to promote the effectiveness, fairness, and uniformity of compliance actions.

(2) Providing information systems to support evaluation, enforcement, regulations, standards and labeling functions.

(3) Identifying and providing advice on regulatory, legal, and administrative compliance problems.

(4) Developing and maintaining liaison with the Office of Inspector General, the General Accounting Office, and other groups with enforcement, evaluation, and related responsibilities.

(c) *Regulaitons Coordination Division.* The Regulations Coordination Division is responsible for:

(1) Coordinating, clearance, and developing as appropriate all FSQS proposed and final regulations and issuances, and coordinating the review of all existing FSQS regulations and issuances.

(2) Coordinating and maintaining the Administrative Record for all FSQS regulations.

(3) Maintaining clearance and publication systems for regulations, bulletins, notices, and instructions.

(d) *Meat and Poultry Standards and Labeling Division.* The Meat and Poultry Standards and Labeling Division is responsible for:

(1) Developing meat and poultry product standards.

(2) Developing labeling policy for meat, poultry, and their processed products; reviewing all labels for approval or disapproval.

(3) Reviewing food packaging systems to eliminate fraudulent practices.

Section 12. *Administrative Management.* The Executive Secretariat; Administrative Services; Budget, Planning and Evaluation; Finance; Management Improvement; and Personnel Divisions, under direction of the Deputy Administrator for Administrative Management, are responsible as follows:

(a) *Executive Secretariat.* The Executive Secretariat is responsible for:

(1) Coordinating the review and clearances of all proposed FSQS issuances including directives, Federal Register dockets, and cooperative agreements for conformance to administrative procedure.

(2) Developing policy and procedures for handling the disposition of requests made under the Freedom of Information Act and Privacy Act and maintaining proper identification and safeguards of files coming within the scope of the Privacy Act.

(3) Tracking and reporting the status of all priority items and assignments for FSQS.

(4) Managing and operating the FSQS Information Processing Center and preparing recurring Agency reports of program goals and accomplishments.

(5) Developing correspondence control procedures for the Office of the Administrator.

(b) *Budget, Planning and Evaluation Division.* The Budget, Planning and Evaluation Division is responsible for:

(1) Coordinating the formulation of the overall budget and assisting in establishing program goals, milestones, and annual budget targets.

(2) Coordinating the development of annual Agency work plans, travel and other operational plans.

(3) Tracking and reporting on program progress to identify trends and problems.

(c) *Finance Division.* The Finance Division is responsible for:

(1) Administering fiscal and related management programs.

(2) Developing the accounting and related financial systems and procedures.

(d) *Administrative Services Division.* The Administrative Services Division is responsible for providing staff leadership and operatng administrative services and assistance to FSQS managers in the area of:

(1) Real and personal property.

(2) Procurement of supplies and equipment.

(3) Forms and reports.

(4) Records management and disposition.

(5) Design and construction of FSQS facilities.

(6) Printing and distribution services.

(7) Contract agreement.

(e) *Management Improvement Division.* The Management Improvement Division is responsible for:

(1) Planning, providing staff leadership, and operating administrative services assistance to service managers and program leaders in the areas of management system design and improvement, and automated data processing systems.

(2) Reviewing and recommending approval (or disapproval) of the acquisition of all electronic data processing equipment or word processing equipment proposed for use within FSQS prior to purchase or lease.

(f) *Personnel Division.* The Personnel Division is responsible for:

(1) Providing staff leadership and coordination for the development and evaluation of programs and systems for implementing and executing an overall personnel program.

(2) Planning, providing staff leadership, and operating personnel management services and assistance to FSQS managers and program leaders in the areas of:

(i) position management;

(ii) position classification;

(iii) salary and wage administration;

(iv) employee development, training, and related activities;

(v) recruitment and placement;

(vi) safety;

(vii) employee relations; and

(viii) labor management relations.

Delegations of Authority

Section 13. *Associate Administrator.* The Associate Administrator is hereby delegated the authority to perform all the duties and to exercise all the functions and powers which are now, or which many hereafter be vested in the Administrator, including the power of redelegation, except when prohibited, and including authority reserved to the Administrator outlined in Section 22 below. He is also authorized to act for the Administrator in his absence or from time to time when the Administrator is not available.

Section 14. *Authority to Serve as Acting Administrator.* (a) When the Administrator and Associate Administrator plan to be absent or unable to perform the duties of the Administrator, the Administrator will make a specific designation in writing, of an Acting Administrator.

(b) When the Administrator and Associate Administrator are absent or unable to perform the duties of the Administrator and a specific designation has not been made, the Deputy Administrators, in the order named, are designated to serve as Acting Administrator:

(1) Deputy Administrator, Compliance.

(2) Deputy Administrator, Meat and Poultry Inspection.

(3) Deputy Administrator, Commodity Services.

(4) Deputy Administrator, Science.

(5) Deputy Administrator, Administrative Management.

(c) In the event of extreme emergency that prevents the Administrator, Associate, and the Deputy Administrators from assuming the duties of the Administrator, Assistant Deputy Administrators are designated to serve as Acting Administrator, in the same order as Deputy Administrators named above, until such time as the Administrator or one of the above-designated alernates is capable of serving as Administrator.

Section 15. *Deputy Administrators.* The Deputy Administrator, Commodity Services; the Deputy Administrator, Science; the Deputy Administrator, Meat and Poultry Inspection; the Deputy Administrator, Compliance; the Deputy Administrator, Administrative Management; and the officers they designate—with prior specific approval of the Administrator—to act for them, are hereby delegated the authority, severally, to perform all the duties and to exercise all the functions and powers which are now, or which may hereafter be vested in the Administrator (including the power of redelegation except when prohibited), except such authority as is reserved to the Administrator or as provided in Section 4(f)(4). Each Deputy Administrator shall be primarily responsible for the programs and activities of the Food Safety and Quality Service herein or hereafter assigned to him/her.

Section 16. *Director, Information and Legislative Affairs.* The Director, Information and Legislative Affairs is hereby delegated authority in connection with the respective functions herein assigned to him/her, to perform all the duties and to exercise all the functions and powers which are now, or which may hereafter be vested in the Administrator (including the power of redelegation except when prohibited), except such authority as is reserved to the Administrator.

Section 17. *Director, Policy Studies and Public Participation.* The Director, Policy Studies and Public Participation, is hereby delegated authority in connection with the respective functions herein assigned to him/her to perform all the duties and to exercise all the functions and powers which are now, or which may hereafter be vested in the Administrator (including the power of redelegation except when prohibited), except such authority as is reserved to the Administrator.

Section 18. *Director, Equal Employment Opportunity.* The Director, Equal Employment Opportunity, is hereby delegated authority in connection with the respective functions herein assigned to him/her to perform all the duties and to exercise all the functions and powers which are now, or which may hereafter be vested in the Administrator (including the power of redelegation except when prohibited), except such authority as is reserved to the Administrator.

Section 19. *Division and Staff Directors, Commodity Services, Science, Meat and Poultry Inspection, Compliance, and Administrative Management,* are hereby delegated authority in connection with the respective functions herein assigned to each of them, to perform all the duties and to exercise all the functions and powers which are now, or which may hereafter be vested in the Administrator, except the authorities reserved to the Administrator and Deputy Administrators.

Section 20. *Concurrent Authority and Responsibility to the Administrator.* No delegation or authorization prescribed herein shall preclude the Administrator, or each Deputy Administrator, from exercising any of the powers or functions, or from performing any of the duties conferred upon them herein, and any such delegation or authorization is subject at all times to withdrawal or amendment by the Administrator, and in their respective fields, by each Deputy Administrator.

Section 21. *Prior Authorizations and Delegations.* All prior delegations and redelegations of authority relating to any functions, program, or activity covered by the Statement of Organization, Functions, and Delegations of Authority, shall remain in effect, except as they are inconsistent herewith or are hereafter amended or revoked. Nothing herein shall affect the validity of any action heretofore taken under prior delegations or redelegations of authority or assignments of functions.

Reservation of Authority

Section 22. *Reservation of Authority.* There is hereby reserved to the Administrator, or to the individual designated to act in his/her stead, the following:

(a) The initiation, change, or discontinuance of major program activities.

(b) The issuance of regulations pursuant to law.

(c) The transfer of functions between Deputy Administrators.

(d) The reprogramming of the use of appropriated funds among Deputy Administrators.

(e) The transfer of funds between work projects within each Deputy Administrator's area, except those not exceeding 10 percent of base funds, or $50,000 in either work project, whichever is less.

(f) The approval of any change in the formal organization, including a section, its equivalent, or higher level.

(g) The making of recommendations to the Department concerning establishment, consolidation, change in

V 44 / 172 SEP 79 UMI

location, or abolishment of (1) regional, State, area, and other field headquarters offices, and (2) any region or other program area that involves two or more States, or that crosses State lines, except inspection and grading circuits which are adjusted by the respective Deputy Administrators.

(h) Authority to establish, consolidate, or change a location, or abolish any field office, or change program area boundaries not included in (g) above.

(i) Approval of all appointments, promotions, and reassignments in GS–14 and above.

(j) Approval of all appointments, promotions, and reassignments of employees to foreign countries.

(k) Approval of budget estimates for submission to the office of the Secretary, Office of Management and Budget, and the Congress.

Section 23. *Availability of Information and Records.* Any person desiring information or to make submittals or requests with respect to programs and functions of the Agency should address his request to the appropriate Deputy Administrator, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, DC 20250.

Note.—This notice has been reviewed under the USDA criteria to implement Executive order 12044, and has not been designated "significant." Further, this delegation of authority is for Agency management purposes only and does not require preparation of an impact analysis under the aforementioned criteria.

Accordingly, this notice is effective September 4, 1979.

Done at Washington, D.C., this 28th day of August 1979.

Thomas P. Grumbly,

Acting Administrator, Food Safety and Quality Service.

BILLING CODE 3410-37-M

Rural Electrification Administration Intent To Prepare a Draft Environmental Impact Statement and Notice of Time and Place for a Public Scoping Meeting

Notice is hereby given that the Rural Electrification Administration (REA) as lead agency intends to prepare a Draft Environmental Impact Statement in order to fulfill its requirements under the National Environmental Policy Act of 1969 in connection with a possible loan guarantee commitment to the Central Iowa Power Cooperative (CIPCO) of Cedar Rapids, Iowa 52406, for its planned 150 MW ownership share in the construction of a 650 MW coal-fired electric generation power plant and related transmission facilities. Three other utilities, namely, Iowa Electric Light and Power Company, Interstate Power Company, and Iowa Power and Light Company, having respective ownership share interests of 250 MW, 150 MW, and 100 MW, plan to participate in this project.

The utilities tentatively propose that the generating facilities be located in Guthrie County, Iowa, after investigating 15 other potential sites in Iowa, of which Harrison and Mills Counties were proposed as prime alternatives to the Guthrie County site.

Alternatives to be considered by REA and the borrower are described in REA Bulletin 20–21:320–21 and may include (a) no project, (b) conservation measures, (c) purchase power from other utilities, (d) alternative sites for the generating plant and transmission lines, (e) alternative fuels, and (f) alternative methods of generation.

Accordingly, notice is given that a meeting is hereby scheduled for 7:00 p.m., CDT, Tuesday, October 2, 1979, at Veterans Auditorium, 115 West Main Street, Panora, Iowa.

All agencies, groups and individuals having an interest are invited to attend this meeting and to participate in the scoping process to be conducted by REA. Interested parties are invited to submit written comments to REA prior to, at the scoping meeting, or within 30 days of the scoping meeting. Time will be made available at the scoping meeting of interested parties to make brief presentations.

For additional information on this notice, all inquiries should be addressed to the Assistant Administrator-Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Any REA loan guarantee commitment to CIPCO for participation in this project will be subject to, and release of funds thereunder will be contingent upon, REA's arriving at satisfactory conclusions with respect to environmental effects and final action will be taken only after compliance with environmental impact statement procedures required by the National Environmental Policy Act of 1969.

Dated at Washington, D.C., this 27th day of August 1979.

Robert W. Feragen,

Administrator, Rural Electrification Administration.

DEPARTMENT OF COMMERCE

Industry and Trade Administration

President's Export Council Subcommittee on GATT and Multilateral Trade Agreements; Open Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976) notice is hereby given that a meeting of the Subcommittee on GATT and Multilateral Trade Agreements of the President's Export Council will be held on Monday, September 17, at 10:00 a.m. in Room 4830 in the Department of Commerce, 14th and Constitution Ave., NW., Washington, D.C. The Council was initially established by Executive Order 11753 of December 20, 1973, subsequently extended by Executive Order 11827 of January 4, 1975, Executive Order 11948 of December 20, 1976, and Executive Order 12100 of December 28, 1978. The Council was reconstituted by Executive Order 12131 of May 4, 1979, to advise the President on matters relating to United States export trade, including implementation of the President's National Export Policy.

The Subcommittee has been formed to give information and recommendations to the Council regarding matters relating to the General Agreement on Tariffs and Trade and implementation of the Multilateral Trade Negotiations. It is composed solely of members from the Council.

The agenda for the meeting will be as follows:

1. Opening remarks by the Chairman.
2. Reorganization of the Federal Government's trade functions.
3. Implementation of the results of the Multilateral Trade Negotiations (MTN).
4. MTN topics still under discussion.
5. Emerging trade policy issues.
6. Organization of the Subcommittee's future work.

A limited number of seats at the meeting will be available to the public

on a first-come basis. The public may file written statements with the Subcommittee before or after each meeting. Oral statements may be presented at the end of the meeting to the extent that time is available.

Copies of the minutes of the meeting will be made available on written request, addressed to the Freedom of Information Officer, Industry and Trade Administration, Records Inspection Facility, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

Further information concerning the President's Export Council may be obtained from Ms. Wendy Haimes, Industry and Trade Administration, U.S. Department of Commerce, Washington, D.C., 20230, telephone (202) 377–5719.

Dated: August 28, 1979.

Abraham Katz,

Deputy Assistant Secretary for International Economic Policy and Research.

BILLING CODE 3510–25–M

Subcommittee on Export Expansion of the President's Export Council; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the Subcommittee on Export Expansion of the President's Export Council will be held on Monday, September 17, 1979, at 2:00 p.m. in Room 4830, Main Commerce Building, 14th Street and Constitution Avenue, NW., Washington, D.C.

The President's Export Council (PEC) was established by Executive Order 11753 of December 20, 1973, extended by Executive Order 11827 of January 4, 1975, Executive Order 11948 of December 20, 1976 and Executive Order 12110 of December 28, 1978. The PEC was reconstituted by Executive Order 12131 of May 4, 1979, to advise the President on matters relating to United States export trade, including the implementation of the President's National Export Policy. The Subcommittee has been formed to make recommendations to the PEC on matters related to U.S. policies, practices and procedures which assist or inhibit the expansion of U.S. exports in the areas of finance, taxation, disincentives, transportation and documentation, as well as broader economic policies affecting the competitiveness of U.S. exports. The Subcommittee is composed solely of members of the Council.

The Subcommittee meeting agenda is as follows:

1. Opening remarks of the Chairman.

2. Determination of priority export tax, finance and other issues to be included in the Subcommittee's work program.

3. Organization of Working Groups to carry out the program, if necessary.

The meeting is open to the public at which a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

For further information, contact Mr. Brant W. Free, PEC Subcommittee on Export Expansion, Room 4312, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 377–3575.

Dated: August 28, 1979.

Abraham Katz,

Deputy Assistant Secretary for International Economic Policy and Research, Department of Commerce.

BILLING CODE 3510–25–M

Subcommittee on East-West Trade of the President's Export Council; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976) notice is hereby given that a meeting of the Subcommittee on East-West Trade of the President's Export Council will be held on Wednesday, September 19, at 4:00 p.m. in Room 4830 of the U.S. Department of Commerce, Fourteenth Street and Constitution Avenue, NW., Washington, D.C. 20230. The Council was initially established by Executive Order 11753 of December 20, 1973, subsequently extended by Executive Order 11827 of January 4, 1975, Executive Order 11948 of December 20, 1976, and Executive Order 12100 of December 28, 1978. The Council was reconstituted by Executive Order 12131 of May 4, 1979, to advise the President on matters relating to United States export trade, including the implementation of the President's National Export Policy. The Subcommittee on East-West Trade has been formed to analyze trade relations with the Soviet Union, the People's Republic of China and other communist countries, and to make recommendations on any aspect of East-West trade policy it deems important.

The agenda for the meeting is as follows:

Introductory remarks by Subcommittee chairman.

Results of solicitation of views from bilateral business councils and District Export Councils.

Discussion of subcommittee position on "critical" issues.

Subcommittee approval of issue position paper.

Status report on trade agreements with China and the Soviet Union.

Other organizational business; plans for next meeting.

A limited number of seats at the meeting will be available to the public on a first-come basis. The public may file written statements with the subcommittee before or after each meeting. Oral statements may be presented at the end of the meeting to the extent that time is available.

Copies of the minutes of the meeting will be made available on written request addressed to the Freedom of Information Officer, Industry and Trade Administration, Records Inspection Facility, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

Further information concerning the Subcommittee on East-West Trade may be obtained from Ms. Wendy Haimes, Industry and Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 377–5719.

Dated: August 28, 1979.

Kempton B. Jenkins,

Deputy Assistant Secretary for East-West Trade.

BILLING CODE 3510–22–M

Receipt of Application for Permit

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:

a. Name: Louis Scarpuzzi Enterprises, Inc.

b. Address: 339 Riverside Drive, Fort Myers, Florida 33905.

2. Type of Permit: Public Display.

3. Name and Number of Animals: Atlantic bottlenose dolphins (*Tursiops truncatus*), 3.

4. Type of Take: To capture and maintain permanently in a facility.

5. Location of Activity: West Coast of Florida.

6. Period of Activity: 2 years.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the **Federal Register** the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, on or before October 4, 1979. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

Dated: August 28, 1979.

R. B. Brumsted,

Acting Director, Office of Marine Mammals/ Endangered Species, National Marine Fisheries Service.

BILLING CODE 3510–22–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Amending Import Restraint Levels for Certain Cotton Textile Products from Pakistan; Correction

August 29, 1979.

On August 17, 1979, there was published in the **Federal Register** (44 FR 48314) a letter dated August 14, 1979 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs amending the levels of restraint for certain specified categories of cotton textile products, including Category 369, produced or manufactured in Pakistan and exported to the United States during the twelve month period which began on January 1, 1979 and extends through December 31, 1979. The level of restraint designated for cotton textile products in Category 369 should have included the following qualifying footnote, as footnote 2:

[2] In Category 369, all T.S.U.S.A. numbers except 366.1855.

The letter published below corrects the directive of August 14, 1979 to the Commissioner of Customs.

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

August 29, 1979.

Committee for the Implementation of Textile Agreements

Commissioner of Customs
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: To facilitate implementation of the Bilateral Cotton Textile Agreement of January 4 and 9, 1978, as amended, between the Governments of the United States and Pakistan, it would be appreciated if you would correct the level of restraint established for Category 369 in paragraph 1, page 2 of the directive of August 14, 1979, to include the following qualifying footnote, as footnote 2:

[2] In Category 369, all T.S.U.S.A. numbers except 366.1855.

This letter will be published in the **Federal Register.**

Sincerely,

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 79–27366 Filed 8–31–79; 8:45 am]

BILLING CODE 3510–25–M

Announcing Additional Import Controls on Certain Cotton Textile Products from Mexico

August 29, 1979.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Controlling other cotton apparel in Category 359, such as coveralls and other items at the level of 543,478 pounds during the twelve-month period which began on January 1, 1979.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773), September 5, 1978 (43 FR 39408), January 2, 1979 (44 FR 94), March 22, 1979 (44 FR 17545), and April 12, 1979 (44 FR 21843)).

SUMMARY: Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 26, 1979, between the Governments of the United States and Mexico, the United States Government has decided to control imports of cotton textile products in Category 359 produced or manufactured in Mexico and exported to the United States during the twelve-month period which began on January 1, 1979, in addition to those categories previously designated. (See 44 FR 20240).

EFFECTIVE DATE: September 4, 1979.

FOR FURTHER INFORMATION CONTACT: William J. Boyd, international Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-5423).

SUPPLEMENTARY INFORMATION: On April 4, 1979, there was published in the **Federal Register** (44 FR 20240) a letter dated March 29, 1979 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs which established levels of restraint for certain specified categories of cotton and man-made fiber textile products, produced or manufactured in Mexico, which may be entered into the United States for consumption or withdrawn from warehouse for consumption during the twelve-month period which began on January 1, 1979 and extends through December 31, 1979. In accordance with the terms of the bilateral agreement, the United States Government has decided also to control imports of cotton textile products in Category 359, produced or manufactured in Mexico and exported to the United States during the twelve-month period which began on January 1, 1979. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs, effective on September 4, 1979, to prohibit entry for consumption or withdrawal from warehouse for consumption of cotton textile products in Category 359, produced or manufactured in Mexico and exported to the United States on and after January 1, 1979.

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

August 29, 1979.

Committee for the Implementation of Textile Agreements

Commissioner of Customs
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on March 29, 1979 by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton and man-made fiber textile products, produced or manufactured in Mexico.

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Agreement of February 26, 1979, between the Governments of the United States and Mexico; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on September 4, 1979, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Category 359, produced or manufactured in Mexico and exported on and after January 1, 1979, in excess of 543,478 pounds. [1]

Cotton textile products in Category 359 which have been exported to the United States prior to January 1, 1979 shall not be subject to this directive.

Cotton textile products in Category 359 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448 (b) or 1484 (a) (1) (A) prior to the effective date of this directive shall not be denied entry under this directive.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773), September 5, 1978 (43 FR 39408), January 2, 1979 (44 FR 94), March 22, 1979 (44 FR 17545), and April 12, 1979 (44 FR 21843).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Mexico and with respect to imports of cotton textile products from Mexico have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register.**

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 79-27365 Filed 8-31-79; 8:45 am]

BILLING CODE 3510-25-M

[1] The level of restraint has not been adjusted to reflect any imports after December 31, 1978. Imports during the period, January thru June 1979, amounted to 233,665 pounds.

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

National Waterways Study; Environmental Aspects; Open Meeting

The U.S. Army Corps of Engineers, Institute for Water Resources, will conduct a public meeting on the National Waterways Study (NWS). The meeting's purpose is to provide an overview of the NWS and obtain input from interested persons regarding environmental factors that may be considered during the course of the study.

The meeting will be from 9 a.m. to 12 a.m., September 19, 1979 in the Board of Engineers for Rivers and Harbors Hearing Room, Kingman Building (Telegraph and Leaf Roads) Fort Belvoir, Virginia 22060.

Written statements, to be made part of the minutes, may be submitted prior to, or up to 7 days following, the meeting.

Persons planning to attend or desiring further information should contact Ms. Arlene L. Dietz, Study Manager, Institute for Water Resources, Kingman Building, Fort Belvoir, Virginia 22020, telephone number (202) 325-7141.

By authority of the secretary of the army:

Dated: August 29, 1979.

George A. Bailey,

Colonel, U.S. Army, Director, Administrative Management, TAGCEN.

BILLING CODE 3710-92-M

DEPARTMENT OF ENERGY

Voluntary Agreement and Plan of Action To Implement the International Energy Program; Meetings

In accordance with Section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (Pub. L. 94-163), notice is hereby provided of the following meetings:

I. A meeting of Subcommittee A of the Industry Advisory Board (IAB) to the International Energy Agency (IEA) will be held on September 11, 1979, at the offices of Exxon Corporation, 1251 Avenue of the Americas, New York, New York, beginning at 9:30 a.m. The agenda is as follows:

1. Openings remarks.
2. Base Period Final Consumption (BFPC)—seasonality—demand change, etc. effects on trigger.
3. Seasonality in reallocation of oil in an emergency.
4. IEA and European Economic Community (EEC) emergency sharing interface.
5. Lessons to be learned from present supply crisis.
6. Consumer stocks.
7. Questionnaires A and B:
A. Quality of data.
B. Need for ongoing submission.
C. Range of oil and oil products covered by Questionnaire A and B.
8. Preparation for the third allocation systems test (AST-3).
9. Emergency reserves—outstanding points for 1980 and role of Subcommittee B.
10. Standard format for voluntary offers.
11. Simplified sharing mechanism short of formal 7 percent trigger.

II. A meeting of Subcommittee C of the Industry Advisory Board to the International Energy Agency (IEA) will be held on September 12, 1979, at the offices of Exxon Corporation, 1251 Avenue of the Americas, New York, New York, beginning at 9:30 a.m. The agenda is as follows:

1. Openings remarks.
2. Pricing in an emergency.
3. Extraordinary costs.
4. Dispute Settlement Center.
5. Legal Clearances:
A. Survey of IEA countries.
B. U.S. Voluntary Agreement.
C. EEC Commission and interface with IEA.
6. Future work program.

III. A meeting of the Industry Advisory Board to the International Energy Agency (IEA) will be held on September 13, 1979, at the offices of Texaco, Incorporated, 2000 Westchester Drive, White Plains, New York, beginning at 9:30 a.m. The agenda is as follows:

1. Openings remarks.
2. Communications to and from IEA and Reporting Companies.
3. Matters arising from record note of IAB meeting of June 25, 1979.
4. Report on Standing Group on Emergency Questions (SEQ) meeting of June 25, 1979 and joint meeting of SEQ and the Standing Group on the Oil Market (SOM) on June 26, 1979.
5. Report by IEA on worldwide supply outlook and current situation in IEA member countries.
6. Implications of Tokyo summit for IEA and IAB.
7. Report by IEA on refining flexibility study.
8. Subcommittee C Report.
A. Disputes Settlement Center.
B. Legal Clearances.
1. Survey of IEA countries
2. U.S. Voluntary Agreement extension and Plan of Action
3. EEC Commission and interface with IEA.
9. Subcommittee A Report.
A. Base period final consumption—seasonality, demand change, etc., effects on trigger.
B. Review; of IEA study on seasonalization and proposed change to Emergency Management Manual (EMM).
C. Quality of Questionnaire A and B data and need for ongoing submission.
D. Consumer stock survey by IEA and future action.
E. Review of IEA study of lessons learned from current supply crisis, including summary of major issues and possible changes to the IEA emergency system.
F. Technical aspects of IEA and EEC interface.
G. Timing and work plan for third allocation systems test.
H. Automatic voluntary offer submission system.
I. Future work program.
10. Industry Supply Advisory Group (ISAG) Manager's Report.
A. ISAG staffing and assignments.
B. ISAG Secretariat Operations Manual (ISOM) status.
11. Future work program.
12. Dates, venues and plans of future meetings of the IAB, its subcommittees, SEQ and SEQ/SOM.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, these meetings will not be open to the public.

Issued in Washington, D.C., August 24, 1979.

Robert C. Goodwin, Jr.,

Assistant General Counsel, International Trade & Emergency Preparedness.

Office of Hearings and Appeals

Cases Filed Week of June 29, 1979 through July 6, 1979

Notice is hereby given that during the week of June 6, 1979 through July 6, 1979 the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the DOE action sought in such cases may file with the DOE written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

Melvin Goldstein,

Director, Office of Hearings and Appeals.

August 27, 1979.

List of Cases Received by the Office of Hearings and Appeals

[Week of June 29, 1979 through July 6, 1979]

Date	Name and location of applicant	Case No.	Type of submission
June 29, 1979	Arizona Fuels Corporation, Salt Lake City, Utah	DEE-6984	Exception to the entitlements program. If Granted: Arizona Fuels Corporation would receive an exception to the provisions of 10 CFR 211.67 regarding its entitlements purchase obligations.
June 29, 1979	Champlin Petroleum Company, Fort Worth, Texas	DEX-0185	Supplemental Order. If granted: Champlin Petroleum Company would be permitted to implement the relief found to be appropriate in a Decision and Order (Case Number FXA-1313) issued to the firm on December 8, 1978 permitting the sale of a portion of crude oil produced from the Wilmington Field, Long Beach, California at upper tier ceiling prices.
June 29, 1979	Consumers Union of United States, Inc., Washington, D.C.	DEX-0187	Supplemental Order. If granted: Consumers Union of United States, Inc. would receive reimbursement of expenses and reasonable attorneys' fees in connection with the proceedings of the Decision and Order issued on March 17, 1977 (Case Number FEX-0129).

V 44 / 172 SE 4 79 UMI

List of Cases Received by the Office of Hearings and Appeals—Continued

[Week of June 29, 1979 through July 6, 1979]

Date	Name and location of applicant	Case No.	Type of submission
June 29, 1979	Port Petroleum Incorporated, Shreveport, Louisiana.	DEE-6994; DEN-6994.	Applications for Temporary Exception and Exception to the Buy/Sell Program. If granted: Port Petroleum Incorporated would receive an exception from the provisions of 10 CFR 211.65 with respect to its obligations under the Buy/Sell Program.
June 29, 1979	Texaco Incorporated, Houston, Texas	DXE-6974	Request for extension of exception relief. If granted: Texaco Inc. would be permitted to continue to sell the crude oil produced at the V.F. Semiak "C" Lease located in Crook County, Wyoming, at upper tier ceiling prices.
July 2, 1979	Albert Grasso Chevron Service, Orange, California	DRW-0019	Interim Remedial Order for Immediate Compliance. If granted: An Interim Remedial Order for Immediate Compliance issued to Albert Grasso Chevron Service on March 23, 1979, would be issued as a Final Remedial Order for Immediate Compliance.
July 2, 1979	BP Oil, Inc., Cleveland, Ohio	DEA-0488	Appeal of ERA Regional Assignment Order. If granted: The Assignment Order issued March 31, 1979 by the Economic Regulatory Administration Region II regarding BP Oil, Inc.'s supply obligations to Petroleum Combestion International, Inc. would be modified.
July 2, 1979	Brock Exploration Corporation, New Orleans, Louisiana.	DFA-0486	Appeal of Information Request Denial. If granted: The June 1, 1979 Information Request Denial issued by the DOE Office of FOI and Privacy Acts Activities would be rescinded and Brock Exploration Corporation would receive access to certain DOE documents.
July 2, 1979	Burk Royalty Co., Wichita Falls, Texas	DEE-7074	Exception from Energy Information Administration reporting requirements. If granted: Burk Royalty Co. would receive an extension for filing Form EIA-23, Part II "Annual Survey of Domestic Crude Oil and Gas Reserves."
July 2, 1979	The Coleman Company, Inc., Wichita, Kansas	DEE-6485	Exception to Energy Conservation Program for Consumer Appliances. If granted: The Coleman Company, Inc. would receive an exception to the provisions of 10 CFR 430, Appendix N permitting the firm to modify the energy efficiency test procedures applicable to the sealed combustion gas furnaces which it manufactures.
July 2, 1979	Demetriou, Del Guercio & Lovejoy, Los Angeles, California.	DFA-0485	Appeal of Information Request Denial. If granted: The April 2, 1979 Information Request Denial issued by the DOE Office of FOI and Privacy Acts Activities to Demetriou, Del Guercio & Lovejoy would be rescinded, and the firm would be granted access to certain DOE documents.
July 2, 1979	General Motors Corporation, Washington, D.C.	DEA-0490	Appeal of ERA Assignment Order. If granted: The June 1, 1979 synthetic natural gas feedstock Assignment Order issued to Northern Illinois Gas Company by the Economic Regulatory Administration would be rescinded.
July 2, 1979	H. R. Stasney & Sons Co., Albany, Texas	DEE-7075	Exception from Energy Information Administration reporting requirements. If granted: H. R. Stasney & Sons Co. would receive an extension for filing Form EIA-23, Part II "Annual Survey of Domestic Oil and Gas Reserves."
July 2, 1979	Marathon Oil Company, Findlay, Ohio	DEA-0492; DES-0492, DST-0492.	Appeal of ERA Assignment Orders, Request for Stay, and Request for Temporary Stay. If granted: The four Assignment Orders issued by Region IV of the Economic Regulatory Administration on May 18, 1979 which require Marathon Oil Company to supply branded jobbers of American Petrofina would be rescinded.
July 2, 1979	N. C. Gunther, Houston, Texas	DEE-6968	Exception from Energy Information Administration reporting requirements. If granted: N. C. Gunther would receive an extension for filing Form EIA-23, Part II "Annual Survey of Domestic Oil and Gas Reserves."
July 2, 1979	Petro-Lewis Corp., Denver, Colorado	DEE-7073	Extension to Energy Information Administration reporting requirements. If granted: Petro-Lewis Corporation would receive an extension for filing Form EIA-23, Part II "Annual Survey of Domestic Oil and Gas Reserves."
July 3, 1979	City and County of Honolulu, Honolulu, Hawaii	DEE-7067	Price Exception (Section 212.93). If granted: Jobbers in the City and County of Honolulu would be permitted to include local fuel tax increases in the distributor's selling price of liquid fuel.
July 3, 1979	Dunaway, McCarthy & Dye, P. C., Washington, D.C.	DFA-0487	Appeal of Information Request Denial. If granted: The May 16, 1979 Information Request Denial issued by the DOE Office of FOI and Privacy Acts Activities would be rescinded and Dunaway, McCarthy & Dye, P. C. would receive access to certain DOE documents.
July 3, 1979	F. L. Roberts & Company, Inc., Springfield, Massachusetts.	DEA-0491, DST-0491	Appeal and Request for Temporary Stay. If granted: F. L. Roberts and Company, Inc. would be assigned a temporary supplier of eight retail stations pending determination of its Request for Assignment filed with Region I of the Economic Regulatory Administration.
July 3, 1979	Texaco, Inc., Los Angeles, California	DEX-0184	Supplemental Order. If granted: Texaco, Inc. would be permitted to include certain expenditures that it incurs in performing an emergency well workover as an operating expense in calculating the level of exception relief under the *Great Southern* standard.
July 5, 1979	Amoco Oil Company, Kansas City, Missouri	DED-2179	Motion for Discovery. If granted: Discovery would be granted to Amoco Oil Co. in regard to its Statement of Objections to the Proposed Decision and Order (Case Number DEE-2179) issued May 9, 1979 to American Agri-Fuels Corporation.
July 5, 1979	Derby Refining Company, Wichita, Kansas	DEN-0002, DES-0225, DST-0225	Request for Interim Order, Request for Stay, and Request for Temporary Stay. If granted: Derby Refining Company would receive exception relief from the provisions of 10 CFR 212 to permit Derby Refining Company to recover its costs of blending gasohol in its sales of gasohol.
July 5, 1979	Fields Field Company, Houston, Texas	DEN-0003	Request for Interim Order. If granted: Interim exception relief would be granted to Fields Field Company permitting the firm to use shrinkage costs in calculating natural gas liquids prices pending a final determination on its Application for Exception (Case No. DEE-3706).
July 5, 1979	Husky Oil Company, Denver, Colorado	DEA-0489	Appeal of Assignment Order. If granted: The May 24, 1979, Assignment Order issued by Region VIII of the Economic Regulatory Administration with respect to Husky Oil Company's supply obligations to Waite Oil Company would be rescinded.
July 5, 1979	Kansas City Star, Kansas City, Missouri	DFA-0484	Appeal of Information Request Denial. If Granted: The Information Request Denial issued by DOE Region VII would be rescinded, and the Kansas City Star would be granted access to certain DOE documents.
July 5, 1979	Petrochemical Energy Group, Washington, D.C.	DEA-0520	Appeal of ERA Assignment Order. If granted: The June 1, 1979, synthetic natural gas feedstock Assignment Order issued by the Economic Regulatory Administration to Northern Illinois Gas Company would be rescinded.
July 5, 1979	St. Louis County Police Department, St. Louis, Missouri.	DEX-0183	Supplemental Order. If granted: A supplier would be named to provide motor gasoline in bulk volume to the St. Louis County Police Department to replace gasoline which the Departent had previously purchased on a retail basis.
July 5, 1979	Southern Colorado Agri-Fuel Company, Pueblo, Colorado.	DEE-7079	Allocation Exception. If granted: Southern Colorado Agri-Fuel Company would be assigned a supplier of unleaded gasoline for the purpose of blending gasohol.
July 5, 1979	Southwestern Refining Company, Inc., Washington, D.C..	DES-0224	Request for Stay. If granted: Southwestern Refining Company, Inc. would receive a Stay of the provisions of 10 CFR 211.67, with respect to its entitlements purchase obligation.
July 5, 1979	Texaco, Inc., Houston, Texas	DES-0223	Request for Stay. If granted: Texaco, Inc. would be granted a Stay of the Redirection Order issued by Region IV of the Economic Regulatory Administration on May 30, 1979 regarding Texaco's supply obligation to Hardy Brothers, Oil Company, Inc.

List of Cases Received by the Office of Hearings and Appeals—Continued

[Week of June 29, 1979 through July 6, 1979]

Date	Name and location of applicant	Case No.	Type of submission
July 5, 1979	Tyson Oil Co., Savannah, Georgia	DEE-7082	Allocation Exception (Section 211.103). If granted: Tyson Oil Company would receive an exception permitting the firm to receive increased allocations of unleaded gasoline for the purpose of blending gasohol.
July 6, 1979	Citadel Corporation, Washington, D.C.	DRS-0258, DRS-0260; DRT-0258, DRT-0260.	Requests for Stay and Requests for Temporary Stay of Interim Remedial Orders. If granted: Citadel Corporation would receive a Stay and Temporary Stay of the three (3) Interim Remedial Orders for Immediate Compliance issued to Citadel Corporation by the Economic Regulatory Administration on June 29, 1979 regarding reduction of Citadel's motor gasoline prices.
July 6, 1979	Crown Central Petroleum Corporation, Baltimore Maryland.	DEA-0493	Appeal of ERA Temporary Assignment Order. If granted: The Temporary Assignment Order issued by Region II of the Economic Regulatory Administration on May 31, 1979 to Crown Central Petroleum Corporation regarding Crown's supply obligations to Petroleum Combustion International, Inc. would be modified.
July 6, 1979	Koch Industries, Inc., Dallas, Texas	DRT-0060	Request for Temporary Stay. If granted: Koch Industries, Inc. would receive a Temporary Stay of the Interim Remedial Order for Immediate Compliance issued on July 3, 1979, regarding the firm's supply obligation to Petroleum Company, Inc.
July 6, 1979	National Association of Texaco Wholesalers, Inc., Atlanta, Georgia.	DEN-0004	Request for Temporary Exception. If granted: The National Association of Texaco Wholesalers, Inc., would receive a temporary exception from the provisions of 10 CFR 211, permitting Texaco wholesalers the option of using adjusted 1972 volumes as a base period, pending a decision in an Application for Exception filed by the Association on June 7, 1979 (Case No. DEE-6543).
July 6, 1979	Sun Oil Company, Philadelphia, Pennsylvania	DST-0226; DES-0226.	Request for Stay and Request for Temporary Stay. If granted: The Sun Oil Company would receive a Stay and Temporary Stay of the Temporary Assignment Order issued by the Economic Regulatory Administration Region V on June 21, 1979 regarding Sun Oil Company supply obligations to Landmark, Inc.

BILLING CODE 6450-01-M

Cases Filed Week of June 15, 1979 Through June 22, 1979

Notice is hereby given that during the week of June 15, 1979 through June 22, 1979 the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the DOE action sought in such cases may file with the DOE written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 29461.

Melvin Goldstein,

Director, Office of Hearings and Appeals.

August 27, 1979.

Date	Name and location of applicant	Case No.	Type of submission
June 15, 1979	Heller, Glenn Martin, Boston, Massachusetts	DRX-0180	Supplemental Order. If granted: Discovery would be granted to Glenn Martin Heller in connection with his Statement of Objections to a Proposed Remedial Order (Case Nos. DRO-0184 and DRD-0184).
June 15, 1979	Highlander Center, Rocky Mount, Virginia	DEE-6560	Change of Supplier Exception. If granted: Highlander Center would be granted a new supplier of motor gasoline to replace its present supplier, Webb's Oil Corporation.
June 15, 1979	Lunday-Thagard Oil Company, Washington, D. C.	DFA-0458	Appeal of Information Request Denial. If granted: The DOE's May 31, 1979 Information Request Denial would be rescinded and Lunday-Thagard Oil Company would receive access to certain DOE data.
June 18, 1979	Amoco Oil Company, Chicago, Illinois	DES-0218	Request for Stay. If granted: Amoco Oil Company would receive a Stay of an ERA Region V Order requiring it to supply U.S. Oil Company with motor gasoline.
June 18, 1979	Amoco Oil Company, Chicago, Illinois	DEA-0462	Appeal of Emergency Allocation Under Crude Oil Buy/Sell Program. If granted: ERA's Decision and Order regarding Amoco Oil Company's crude oil supply obligations to CRA, Inc.'s Coffeyville, Kansas refinery would be modified.
June 18, 1979	Quad Refining Corporation, Los Angeles, California	DEA-0461	Appeal of ERA Decision and Order. If granted: The ERA's May 17, 1979 Decision and Order would be rescinded and Quad Refining Corporation would be permitted to participate in the Crude Oil Buy/Sell Program.
June 18, 1979	Shell Company (Puerto Rico), Washington, D. C.	DEH-2245 and DED-2245.	Motion for Discovery; Motion for Evidentiary Hearing. If granted: An evidentiary hearing would be convened and discovery would be granted in connection with the Statement of Objections submitted by Shell Company (Puerto Rico) to a Proposed Decision and Order (Case No. DEE-2245) issued to Commonwealth Oil Refining Company.
June 18, 1979	Total Petroleum, Inc., Alma, Michigan	DEA-0457 and DST-0457.	Appeal of Temporary Assignment Order; Request for Temporary Stay. If granted: ERA's June 6, 1979 Temporary Assignment Order regarding Total Petroleum, Inc.'s motor gasoline supply obligations to U. S. Oil Company would be modified.
June 18, 1979	Wall, Earl E., New Orleans, Louisiana	DRH-0188	Motion for Evidentiary Hearing. If granted: An evidentiary hearing would be convened in connection with Earl E. Wall's Statement of Objections to a Proposed Remedial Order (Case No. 640C00295) issued to Wall on March 19, 1979.
June 19, 1979	Amerada Hess Corporation, New York, New York	DEA-0463, DES-0463 and DST-0463.	Appeal of Temporary Assignment Order; Request for Stay; Request for Temporary Stay. If granted: The ERA's May 31, 1979 Temporary Assignment Order regarding Amerada Hess Corporation's motor gasoline supply obligations to Petroleum Combustion International, Inc. would be rescinded. Amerada Hess Corporation would receive a temporary stay and stay of the Order pending a determination on the Appeal.
June 19, 1979	Ashland Oil Company, Ashland, Kentucky	DRA-0465 and DRS-0465.	Appeal of Ancillary Order; Request for Stay. If granted: The Ancillary Order which the ERA issued to Ashland Oil Company on May 31, 1979, in connection with a Consent Order signed by Meason Operating Company, would be rescinded. The Ancillary Order would be stayed pending a determination on the Appeal.
June 19, 1979	O'Connor & Hannan, Washington, D.C.	DFA-0464	Appeal of Information Request Denial. If granted: The DOE's June 7, 1979 Information Request Denial would be rescinded and O'Connor and Hannan would be granted access to certain DOE data.

Date	Name and location of applicant	Case No.	Type of submission
June 19, 1979	Uni Refining, Inc., Houston, Texas	DEE-6664 and DES-6664.	Request for Stay; Exception to Buy/Sell Program. If granted: Uni Refining, Inc. would receive exception relief from the provisions of the Crude Oil Buy/Sell Program. Uni Refining, Inc. would receive a stay pending a final determination on its Application for Exception.
June 20, 1979	Marathon Oil Company, Findlay, Ohio	DMR-0057	Request for Rescission. If granted: The Decision and Order (Case No. DES-3174) issued to U.S. Oil Company would be rescinded.
June 20, 1979	MacMillan Ring-Free Oil Company, Inc., New York, New York.	DRS-0221	Request for Stay. If granted: MacMillan Ring-Free Oil Company, Inc. would be granted a stay of the Remedial Order (Case No. RTN F00401) which the ERA issued to Tenneco Oil Company on May 24, 1979.
June 20, 1979	Murphy Oil Corporation, El Dorado, Arkansas	DMR-0058	Request for Rescission. If granted: The Decision and Order (Case No. DES-3174) issued to U.S. Oil Company would be rescinded.
June 20, 1979	National Distillers and Chemical Corporation, Washington, D.C..	DFA-0467	Appeal of Information Request Denial. If granted: The DOE's May 10, 1979 Information Request Denial would be rescinded and National Distillers and Chemical Corporation would receive access to certain DOE documents.
June 20, 1979	Vinson & Elkins, Washington, D.C.	DFA-0468	Appeal of Information Request Denial. If granted: The DOE's May 18, 1979 Information Request Denial would be rescinded and Vinson & Elkins would receive access to certain DOE data.
June 21, 1979	American Natural Gas Production Company, Washington, D.C..	DEE-6730	Price Exception. If granted: American Natural Gas Production Company would be permitted to purchase and resell propane and butane in accordance with Subpart F rather than Subpart K of the DOE Mandatory Petroleum Price Regulations.
June 21, 1979	Cooper, Hal D., Cleveland, Ohio	DFA-0470	Appeal of Information Request Denial. If granted: The DOE's Information Request Denial dated June 13, 1979 would be rescinded and Hal D. Cooper would receive access to certain DOE documents.
June 21, 1979	Great Southern Oil and Gas Co., Inc. Saint Martin Parish, La..	DXE-6729	Extension of Relief granted in *Great Southern Oil and Gas Company, Inc.*, 3 DOE par. —— (April 23, 1979. If granted: Great Southern Oil and Gas Company, Inc. would continue to receive price exception relief for crude oil produced from its St. Martin Bank and Trust Company No. 1 Well located in St. Martin Parish, Louisiana.
June 21, 1979	Marathon Oil Company, Murphy Oil Corporation, Washington, D.C.	DEA-0478, DEA-0479, DES-0478, DES-0479, DST-0478 and DST-0479.	Request for Stay; Request for Temporary Stay; Appeal of ERA's Temporary Assignment Order. If granted: The ERA's June 6, 1979 Temporary Assignment Order regarding Marathon Oil Company's and Murphy Oil Corporation's supply obligations to U.S. Oil Company would be rescinded. Marathon Oil Company and Murphy Oil Corporation would receive a temporary stay and stay of the Temporary Assignment Order pending a final determination of the Appeals.
June 21, 1979	Marathon Oil Company (Lawrence & Sons Oil Co., et al.), Atlanta, Georgia.	DES-0474 thru 0477 DEA-0474 thru 0477 DST-0474 thru 0477.	Request for Stay; Request for Temporary Stay; Appeal of ERA Assignment Orders. If granted: Four ERA Assignment Orders which were issued on May 18, 1979 and which pertain to Marathon Oil Company's supply obligations to Lawrence & Sons Oil Co., Roberts Oil Co., Tri-Country Oil Co. and Teague Oil Co. would be modified. Marathon Oil Company would receive a temporary stay and stay of the four Assignment Orders pending a determination on its Appeal.
June 21, 1979	Robert E. Brain and Cooper and Brain, Inc., Washington, D.C..	DSG-0056	Petition for Special Redress. If granted: Robert E. Brain and Cooper and Brain would be reimbursed for fees charged by the DOE in connection with a Freedom of Information request submitted by Brain and Cooper & Brain.
June 21, 1979	Texaco, Inc., Moffat County, Colorado	DXE-6727 and DXE-6728.	Request for Extension of Relief Granted in *Texaco, Inc.*, 3 DOE Par. —— (February 22, 1979). If granted: Texaco, Inc. would be permitted to continue to sell the crude oil produced from the Wyoming "G" Lease located in Johnson County, Wyoming and the J. Sweeney Lease located in Moffat County, Wyoming at upper tier ceiling prices.
June 22, 1979	Chevron U.S.A., Inc., Santa Barbara County, California.	DEN-1953	Request for Interim Order. If granted: Chevron U.S.A., Inc. (Case No. DEE-1953) would be granted price exception relief on an interim basis for crude oil produced from the Tognazzini Lease located in Santa Barbara County, California.

BILLING CODE 6450-01-M

Cases Filed; Week of June 22, 1979 through June 29, 1979

Notice is hereby given that during the week of June 22, 1979 through June 29, 1979 the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in such cases may file with the DOE written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

Melvin Goldstein,

Director, Office of Hearings and Appeals.

August 27, 1979.

V 4 4 / 1 7 2 S E 4 7 9 UMI

Date	Name and location of applicant	Case No.	Type of submission
June 22, 1979	Marathon Oil Company, Findlay, Ohio	DEA-0471, DES-0471 and DST-0471.	Appeal of Temporary Assignment Order; Requests for Stay and Temporary Stay. If granted: The ERA's May 24, 1979 Temporary Assignment Order would be modified concerning Marathon Oil Company's supply obligations to Lucky Stores. Marathon Oil Company would receive a stay and temporary stay of the Temporary Assignment Order pending a final determination on its Appeal.
June 22, 1979	Nevada Refining Company, Tonopah, Nevada	DSG-0057	Petition for Special Redress. If granted: The DOE would authorize the sale of federal royalty oil to Nevada Refining Company on an interim basis.
June 22, 1979	Office of Enforcement (Forgotson), Louisiana	DFF-0005	Petition for Implementation of Special Refund Procedures. If granted: The Office of Hearings and Appeals would implement Special Refund Procedures pursuant to 10 C.F.R., Part 205, Subpart V, in connection with a Proposed Remedial Order which the DOE issued to James M. Forgotson.
June 25, 1979	James Baller, Washington, D.C.	DFA-0472	Appeal of Information Request Denial. If granted: The DOE's May 25, 1979 Information Request Denial would be rescinded and James Baller would receive access to certain DOE data.
June 25, 1979	Marathon Oil Company, Findlay, Ohio	DEA-0473, DES-0473 and DST-0473	Appeal or Order; Requests for Stay and Temporary Stay. If granted: DOE Region IV's May 25, 1979 Order concerning Marathon Oil Company's supply obligations to Cone Oil Company, Inc. would be modified. Marathon Oil Company would receive a stay and temporary stay of the Order pending a determination on its Appeal.
June 26, 1979	Amalgamated Bonanza Petroleum Ltd., Houston, Texas.	DEE-6806	Exception from Reporting Requirements. If granted: Amalgamated Bonanza Petroleum Ltd. would be granted an extension of time to file DOE Form EIA-23.
June 26, 1979	Robert L. Blattenberger, Chambersburg, Pennsylvania.	DRW-0016	Interim Remedial Order for Immediate Compliance for which no objection has been filed. If granted: An Interim Remedial Order for Immediate Compliance issued to Robert L. Blattenberger on June 1, 1979 would be issued as a final Remedial Order for Immediate Compliance.
June 26, 1979	Burke's Mobil Service Center, West Chester, Pennsylvania.	DRW-0015	Interim Remedial Order for Immediate Compliance for which no objection has been filed. If granted: An Interim Remedial Order for Immediate Compliance issued to Burke's Mobil Service Center on May 2, 1979 would be issued as a final Remedial Order for Immediate Compliance.
June 26, 1979	Diamond Shamrock Corporation, Amarillo, Texas	DEA-0469	Appeal of Assignment Order. If granted: ERA Region VIII's Assignment Order regarding Diamond Shamrock Corporation's supply obligations to Royal Petroleum would be modified.
June 26, 1979	Eaton's Gulf Service, Parkersbug, West Virginia	DRW-0017	Interim Remedial Order for Immediate Compliance for which no objection has been filed. If granted: An Interim Remedial Order for Immediate Compliance issued to Eaton's Gulf Service on May 31, 1979 would be issued as a final Remedial Order for Immediate Compliance.
June 26, 1979	Highway Oil, Inc., Topeka, Kansas	DEE-6872	Allocation Exception. If granted: Highway Oil, Inc. would receive an exception from various provisions of 10 C.F.R., Part 211 in order to facilitate gasohol production and distribution.
June 26, 1979	IU International Corporation, Washington, D.C.	DEE-6871	Exception from Reporting Requirements. If granted: IU International Corporation would be granted an extension of time to file Form EIA-23.
June 26, 1979	Land O'Lakes, Washington, D.C.	DEX-0182	Supplemental Order. If granted: Land O'Lakes would be granted a protective order regarding confidential information contained in the firm's Applications for Stay, Temporary Stay, and Exception (Case Nos. DEE, DES, DST-5972).
June 26, 1979	Marathon Oil Company, Findlay, Ohio	DEA-0481, DES-0481 and DST-0481	Appeal of Assignment Order; Request for Stay; Request for Temporary Stay. If granted: DOE Region IV's Assignment Order regarding Marathon Oil Company's supply obligations to McGregor Oil Company would be modified. A temporary stay and stay of the Assignment Order would be granted pending a determination on the Appeal.
June 26, 1979	Navajo Refining Company, Dallas, Texas	DMR-0060	Request for Modification. If granted: The DOE's May 16, 1979 Decision and Order granting entitlements exception relief to Navajo Refining Company would be modified.
June 26, 1979	S & S Arco, Philadelphia, Pennsylvania	DRW-0014	Interim Remedial Order for Immediate Compliance for which no objection has been filed. If granted: An Interim Remedial Order for Immediate Compliance issued to S & S Arco on May 30, 1979 would be issued as a final Remedial Order for Immediate Compliance.
June 26, 1979	Ted's Exxon, Bradley, West Virginia	DRW-0018	Interim Remedial Order for Immediate Compliance for which no objection has been filed. If granted: An Interim Remedial Order for Immediate Compliance issued to Ted's Exxon on May 31, 1979 would be issued as a final Remedial Order for Immediate Compliance.
June 27, 1979	Crown Central Petroleum Corporation, Baltimore, Maryland.	DMR-0059	Request for Modification. If granted: The Assignment Order which the ERA issued to Certified Transport, Inc. on April 19, 1979 would be modified.
June 27, 1979	Hartford Electric Light Company, Hartford, Connecticut.	DED-0446	Motion for Discovery. If granted: The Hartford Electric Light Company would receive access to documents relating to the DOE's rescission of ESECA Prohibition Orders.
June 27, 1979	Fairman Drilling Company, Dubois, Pennsylvania	DEE-6874	Exception from Reporting Requirements. If granted: Fairman Drilling Company would be granted an extension of time to file Form EIA-23.
June 27, 1979	Mallard Resources, Midland, Texas	DEE-6873	Exception from Reporting Requirement. If granted: Mallard Resources would be granted an extension of time to file Form EIA-23, Part II.
June 27, 1979	Vickers Petroleum Corporation, Washington, D.C.	DEA-0480, DST-0480 and DES-0480	Request for Stay; Request for Temporary Stay; Appeal of Redirection Order. If granted: The ERA's June 18, 1979 Redirection Order regarding Vickers Petroleum Corporation's supply obligations to Gibble Oil Company would be modified.
June 28, 1979	Kansas-Nebraska Natural Gas Company, Inc., Hastings, Nebraska.	DEE-6970	Price Exception (212.165). If granted: Kansas-Nebraska Natural Gas Company, Inc would receive price relief from the provisions of 10 C.F.R., Part 212, Subpart K.
June 28, 1979	Texaco, Inc., White Plains, New York	DEN-6985 and DEE-6985	Request for Interim Order. If granted: Texaco, Inc. would be granted a supply of motor gasoline for its van pool vehicles on an interim basis pending a final determination on its Application for Exception.

Notices of Objection Received

[Week of June 22, 1979 to June 29, 1979]

Date	Name and location of applicant	Case No.
June 25, 1979	Phillips Petroleum Oklahoma, Bartlesville, Oklahoma	DXE-2171
June 26, 1979	Lutwyche's Shell and Triangle Shell, Towson, Maryland	DEO-0244 and DEO-0245

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Project Nos. 2913, 2918]

Alabama Electric Cooperative Inc. and Municipal Electric Authority of Georgia; Applications for Preliminary Permit

August 23, 1979.

Take notice that Alabama Electric Cooperative, Incorporated (AEC) and the Municipal Electric Authority of Georgia (MEAG), filed on March 7, 1979, and March 16, 1979, respectively, competing applications [pursuant to the Federal Power Act, 16 U.S.C. § 791(a)–§ 825(r) (1976)] for preliminary permits for proposed hydroelectric power projects, each to be known as the George W. Andrews Lock and Dam Project (FERC Project Nos. 2913 and 2918, respectively), located on the Chattahoochee River. Project No. 2913 would be located in Early County, Georgia and Houston County, Alabama.[1] Project No. 2918 would be located in Early County, Georgia. The proposed projects would be located on a navigable waterway of the United States; occupy in whole, or in part, lands of the United States; and use the water power from the Corps of Engineers' George W. Andrews dam.

Correspondence with Alabama Electric Cooperative, Incorporated should be directed to: Mr. Charles Lowman, General Manager, Alabama Electric Cooperative, Inc., P.O. Box 550, Andalusia, Alabama 36420.

Correspondence with the Municipal Electric Authority of Georgia should be directed to: Mr. Donald L. Stokely, General Manager, Municipal Electric Authority of Georgia, 800 Peachtree Center—South Tower, 225 Peachtree Street, Atlanta, Georgia 30303 and Mr. L. Clifford Adams, Jr., General Counsel, 66 Luckie Street, N.W.—Suite 520, Atlanta, Georgia 30303.

Project Description—AEC's proposed project would consist of: (1) a powerhouse constructed as an integral part of the spillway section of the U.S. dam; (2) a single horizontal-axis turbine-generator with an estimated (preliminary) installed capacity of 10,000 kW at a rated head of 16 feet; and (3) appurtenant facilities. The estimated annual output of the proposed project is 60,000,000 kWh. The project would be operated in coordination with the Corps of Engineers' Walter F. George Powerplant, which is located 28 miles upstream, to reregulate the erratic inflows caused by peaking power operations of the Walter F. George powerhouse.

MEAG's proposed project would consist of: (1) a powerhouse constructed as an integral part of the U.S. dam and adjacent to the navigation lock; (2) hydroelectric generating units (number, size and type to be determined in the course of the study) with a total estimated (preliminary) installed capacity of 30,000 kW, operating at an average head of 24 feet; (3) step-up transformers; (4) approximately one mile of double-circuit 115-kV transmission line to connect with the existing electric distribution system; and (5) appurtenant facilities. The estimated annual output of the proposed project is 86,724,000 kWh.

Purpose Of Project—Project energy will be utilized in meeting power requirements of the customers for whose power supply the Applicants are responsible.

Proposed Scope And Cost Of Studies Under Permit—AEC and MEAG each seek the issuance of a preliminary permit for a period of 36 months, during which time the Applicants propose to study the feasibility of installing hydroelectric generating units at the existing George W. Andrews Lock and Dam of the U.S. Army Corps of Engineers. AEC estimates the cost of studies under the permit would be $95,000. MEAG estimates the cost of studies under the permit would be $58,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other necessary information for inclusion in an application for a license. In this instance, Applicants each seek a 36-month permit.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described applications for preliminary permit. (A copy of the applications may be obtained directly from the respective Applicants.) Comments should be confined to substantive issues relevant to the issuance of a permit in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have to comments.

Protests and Petitions to Intervene—Anyone desiring to be heard or to make any protest about either application

[1] Maps filed as part of the original document.

should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR, § 1.8 or 1.10 (1978). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules.

Any protest, petition to intervene, or agency comments must be filed on or before October 29, 1979. The Commission's address is: 825 North Capitol Street, N.E., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. CP79-430]

Natural Gas Pipeline Company of America; Application

August 24, 1979

Take notice that on August 6, 1979, Natural Gas Pipeline Company of America (Natural), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP79-430 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing a change prior to November 1, 1979, in the time period that Natural's presently effective Rate Schedule AOR-1 (Authorized Over-Run) Service is offered to Natural's present jurisdictional purchasers from the current seven-month period (April through October) to a twelve-month period, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Natural pursuant to its FERC Gas Rate Schedule AOR-1, has offered natural gas volumes available (over-run gas) on its system that in Natural's judgment are not required to meet its current entitlements and company requirements to its nine presently curtailed participating customers.[1] These over-run gas deliveries would be subject to curtailment or interruption at any time when in Natural's sole judgment such over-run gas is not available for delivery. Natural seeks authorization to have the ability to offer this service at any time during the year as opposed to only during the April through October period.

Natural requests that the Commission issue the authorization requested herein prior to November 1, 1979, so that it would be able to continue to offer the AOR-1 Service for the ensuing winter period and for twelve month periods thereafter.

Natural's charge for gas delivered under Rate Schedule AOR-1 is based on the commodity rate component level of its Rate Schedule DMQ-1. The effective rate for Rate Schedule AOR-1 is 163.10 cents per Mcf and is effective subject to refund pending the outcome of Natural's rate increase filing pending in Docket No. RP78-78.

Natural states that by extending its AOR-1 service to a full twelve-month period Natural would acquire greater flexibility in matching its available gas supply with its customers' requirements. No new or additional facilities would be required to effectuate the proposal herein requested as this service is subject to the availability of gas supply to Natural and Natural's ability to transport and deliver available AOR-1 gas to participating customers.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 19, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed with the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 79-27380 filed 8-31-79; 8:45 am]

BILLING CODE 6450-01-M

[1] Rate Schedule AOR-1 is available to any of Natural's DMQ-1 or G-1 customers. However, said rate schedule also provides that during any month when Natural is curtailing its customers, Natural is required to offer this over-run service first to its curtailed customers to the extent of such curtailment. Natural does not foresee offering any over-run gas volumes in excess of its curtailment in any month, and only its nine curtailed customers have participated in this service to date.

[Docket No. CP79-432]

Northern Natural Gas Co.; Application

August 22, 1979

Take notice that on August 7, 1979, Northern Natural Gas Company (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP79-432 an application pursuant to Section 7 of the Natural Gas Act for permission and approval to abandon and remove two 1,080 horsepower compressor units from its Redfield, Iowa, Storage Field and further, for a certificate of public convenience and necessity authorizing the construction and operation of certain interconnecting and compression facilities located in Calcasieu Parish, Louisiana, and in Pecos County, Texas, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Northern requests authorization to construct and operate a pipeline interconnection and compressor station between the facilities of Transcontinental Gas Pipe Line Corporation (Transco) and Texas Eastern Transmission Corporation (Texas Eastern) to be located near Starks, Calcasieu Parish, Louisiana, and to construct and operate a pipeline interconnection and compressor station between the facilities of Oasis Pipe Line Company (Oasis) and Northern near Fort Stockton, Pecos County, Texas.

Northern states that it has obtained a commitment of reserves from twelve producers having interest in 7 blocks in the High Island area, offshore Texas, and the West Cameron area, offshore Louisiana.

In July 1979, the application indicates, an estimated 85,000 Mcf per day would

V 4 4 / 1 7 2 SE 4 7 9 UMI

be available to Northern from certain of the blocks and it is anticipated that in November 1979 the deliverability from the gas reserves attributable to Northern's interest in the blocks would be 130,000 Mcf per day. Such gas would be transported from various points in the High Island and West Cameron areas to a point in West Cameron Block 167, offshore Louisiana, by High Island Offshore System (HIOS), pursuant to a transportation agreement dated February 15, 1978 as amended, between HIOS and Northern. At the northern terminus of the HIOS system in West Cameron Block 167, U–T Offshore System (U–TOS) would take delivery of Northern's gas and would transport such gas to a point of interconnection onshore with the existing facilities of Transco near Johnson's Bayou, Cameron Parish, Louisiana, pursuant to a transportation agreement dated May 1, 1978, as amended, between U–TOS and Northern.

Pursuant to a gas transportation agreement between Transco and Northern dated June 14, 1979, Transco would transport up to 150,000 Mcf per day of Northern's offshore gas received at the terminus of the U–TOS system north through its pipeline system to the point of interconnection, near Starks. The gas would then be compressed and delivered into an existing 30-inch pipeline owned by Texas Eastern. The transportation of gas by Transco for Northern's account would be on a best efforts basis until certain facilities are installed on Transco's Southwest Louisiana Gathering System and the facilities proposed are installed and operating. The agreement also provides for the transportation and delivery on a best efforts basis, of up to 150,000 Mcf per day for Northern's account to an existing interconnection between the pipeline facilities of Transco and Texas Eastern near Ragley, Louisiana.

By agreement dated June 7, 1979, between Texas Eastern and Northern, Texas Eastern would transport up to 100,000 Mcf per day on a firm basis and 50,000 Mcf per day on a best efforts basis of Northern's offshore gas received at the Starks Interconnection and deliver such to Houston Pipe Line Company (Houston) and the Mont Belvieu Interconnection between Texas Eastern and Houston located in Chambers County, Texas and/or at an interconnection located near Mauriceville, Orange County, Texas. Pending completion of Transco's facilities and the Starks Interconnection, Texas Eastern would take delivery of gas from Transco, for Northern's account at the Ragley Interconnection for further transportation and delivery to Houston.

Northern proposes to construct and operate the following facilities:

(1) An interconnection and compressor station between the pipeline facilities of transco and Texas Eastern near Starks, Calcasieu Parish, Louisiana. The facilities would consist of three 3,100 horsepower turbine driven compressor units (Starks Compressor Station), approximately 0.8 mile of 16-inch pipeline extending from the discharge of the proposed compressor station to Texas Eastern's existing 30-inch pipeline and measurement facilities (Starks Interconnection). One of the units installed at the proposed Starks Compressor Station would serve as a standby unit. Texas Eastern would operate the proposed pipeline and measurement facilities, as agent for Northern.

(2) Minor facilities to reconnect an existing emergency interconnection between the facilities of Oasis and Northern located in, Pecos County, Texas (Oasis Delivery Point).

(3) Two 1,080 horsepower turbine drive compressor units (Gomez #2 Compressor Station) at the oasis Delivery Point located in Pecos County, Texas.

The compressor facilities which Northern requests authorization to construct and operate are necessary to effectuate the delivery of gas to Texas Eastern at the Starks Interconnection and the receipt of such gas volumes from Oasis in Pecos County, Texas, it is asserted.

The estimated cost of the proposed facilities is $10,633,500, and would be financed from cash on hand.

Northern presently has six compressor units with a total of 9,160 compressor horsepower installed at its Redfield, Iowa, Storage Field. It has been determined that as a result of operating changes at Redfield, two 1,080 horsepower turbine drive compressor units are no longer required at the Redfield Storage Field.

Northern can maintain the desired injection and withdrawal volumes with less horsepower than is presently installed. Under present and proposed operating conditions, Northern has 2,160 horsepower in excess of the 7,000 horsepower required to compress the volumes to be injected into and withdrawn from the Redfield Storage Field.

Northern plans to utilize the surplus Redfield Storage Field units at the proposed Gomez #2 Compressor Station. The estimated cost of removing the Redfield units is $60,000 which would be financed from cash on hand.

Therefore, Northern requests permission and approval to abandon and remove two 1,080 horsepower turbine driven compressor units from its Redfield, Iowa, Storage Field.

The proposed facilities would materially assist Northern in meeting its customer's requirements during the 1979–80 heating season by enabling it to deliver new gas supplies to Texas Eastern and to ultimately receive back such volumes on a reliable basis from Oasis.

Northern plans to commence construction of the proposed Starks Interconnection in September 1979 with a projected completion date of December 15, 1979, it is asserted.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 17, 1979, filed with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment and a grant of the certificate are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Northern to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket Nos. ER79–456; ER79–458]

Ohio Power Co., et al.; Order Accepting Termination of Rate Schedules for Filing, Suspending Termination, Consolidating Dockets and Establishing Procedures

Issued August 24, 1979.

On June 25, 1979, Ohio Power Company (Ohio) and The Dayton Power and Light Company (Dayton) jointly tendered for filing a Notice of Termination of Supplement No. 1 to Supplement No. 16 to Ohio's Rate Schedule FERC No. 36, and Supplement No. 1 to Supplement No. 3 to Dayton's Rate schedule FERC No. 31—Service Schedule I—Fuel Conservation Power and Energy. Ohio and Dayton state that under the Schedule no service is to be provided after December 31, 1974. Therefore, they request the Commission to order that the notice of termination become effective at any time after December 31, 1974 as provided in § 35.15 of the Commission's Rules of Practice and Procedure. Ohio and Dayton have not filed a superseding fuel conservation service rate schedule.

Notice of the filing was issued on July 3, 1979 with comments, protests or petitions to intervene due on or before July 23, 1979. No comments, protests or petitions to intervene were filed.

On June 25, 1979, Indiana & Michigan Electric Company (I&M) and Central Illinois Public Service Company (CIPSCO) jointly tendered for filing a Notice of Termination of I&M's Rate Schedule FERC No. 67 and CIPSCO's Rate Schedule FERC No. 76—Service Schedule H—Fuel Conservation Power and Energy. I&M and CIPSCO state that under the schedule no service is to be provided after December 31, 1974. Therefore, they request the Commission to order that the notice of termination become effective at any time after December 31, 1974 as provided in Section 35.15 of the Commission's Rules of Practice and Procedure. I&M and CIPSCO have not filed a superseding fuel conservation service rate schedule.

Notice of the filing was issued on July 3, 1979 with comments, protests or petitions to intervene due on or before July 24, 1979. No comments, protests and petitions to intervene were filed.

In a recent order, we consolidated proceedings in a number of dockets, all regarding conservation energy rates, for the purpose of establishing "comprehensible and comprehensive interchange arrangements under which crisis-related transactions should take place." [1] Our concern that rates used during emergency situations be just and reasonable prompted our investigation into such transactions occurring during the coal strike of 1977–1978.[2] We also are considering this subject in rulemakings regarding emergency interchange energy rates [3] and percentage adders on energy rates.[4]

Taking seriously the possibility of fuel emergencies in the future similar to the oil embargo of 1973 and to the coal strike of 1977–1978, we believe it desirable that appropriate rates be on file for fuel conservation service. We are troubled that the two proposed termination described above are not filed with superseding fuel conservation service rate schedules. In particular, we note that the proposed cancellations, if granted, might leave the parties without an appropriate rate schedule to employ in certain kinds of emergencies. Yet it is not clear from the filings that the utilities involved would not intend to provide such service if an emergency arose. Therefore, our review of the filings indicates that the proposed terminations have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or otherwise unlawful.[5] Accordingly, we shall accept the proposed terminations for filing and suspend them for five months, to become effective January 25, 1980, subject to refund, pending the outcome of a decision thereon. We shall convene a hearing to decide the justness and reasonableness of the proposed cancellations and to fix, just and reasonable conservation service rates for the parties if it is first determined that the proposed cancellations are not just and reasonable. Since common issues of law and fact exist in the two filings, we shall consolidate the two dockets.

The Commission orders: (A) Due to the existence of common issues of law and fact in the proposed terminations, Docket Nos. ER79–456 and ER79–458 are hereby consolidated.

(B) The proposed joint termination of Ohio's Rate Schedule FERC No. 36 and Dayton's Service Schedule I are accepted for filing and suspended for five months to become effective January 25, 1980, subject to refund.

(C) The proposed joint termination of I&M's Rate Schedule FERC N0. 67 and CIPSCO's Service Schedule H are accepted for filing and suspended for five months to become effective January 25, 1980, subject to refund.

(D) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, as amended, and pursuant to the Commission's Rules of Practice and Procedure and the Regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held under sections 205 and 206 of the Federal Power Act concerning the justness and reasonableness of the services changes proposed by the four companies who are the parties in this proceeding and, if necessary, to set a just and reasonable rate for conservation service between the parties.

(E) An Administrative Law Judge shall be designated by the Chief Administrative Law Judge for purposes of convening a conference in this proceeding. Such conference shall be held within 30 days of issuance of this order in a hearing room of the Federal Energy Regulatory Commission, 825 North Capital Street, NE., Washington, D.C. 20426. The Presiding Law Judge is authorized to establish all procedural dates and to rule upon all motions (except motions to consolidate and sever and motions to dismiss), as provided for in the Commission's Rules of Practice and Procedure.

(F) The Secretary shall cause prompt publication of this order to be made in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

John B. Randazza; Filing

August 24, 1979

Take notice that on August 16, 1979, John B. Randazza (Applicant), filed an application pursuant to section 305(b) of the Federal Power Act to hold the following positions:

Position, Name of Corporation and *Classification*

Vice Pres., Central Maine Power Co., Public Utility.
Director, Connecticut Yankee Atomic Power Co., Public Utility.
Director, Main Yankee Atomic Power Co., Public Utility.
Vice Pres., Main Yankee Atomic Power Co., Public Utility.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 10, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[FR Doc. 79-27381 Filed 8-31-79, 8:45 am]
BILLING CODE 6450-01-M

[Docket No. EF79-3051]

Southeastern Power Administration; Order Approving Extension of Short-Term Rates

Issued August 24, 1979.

The Assistant Secretary for Resource Appplications (RA) of the Department of Energy, on behalf of the Southeastern Power Administration (SEPA) on March 5, 1979, tendered for filing, for the Commission's confirmation and approval on a final basis, an extension of short-term rates for the sale of hydroelectric power from the Corps of Engineers' Laurel project to East Kentucky Power Cooperative, Inc. (East Kentucky) for the period April 1 through June 30, 1979.[1]

The Laurel project began operation as a hydroelectirc generating facility on October 25, 1977. SEPA originally intended to sell one half of the project's output to East Kentucky and to sell the other half to eight municipal customers in Kentucky (municipals). The power proposed for sale to the municipals was to be transmitted over the transmission facilities of East Kentucky and the Kentucky Utilities Company (KU) SEPA and KU, however, failed prior to the initial operation of Laurel project to agree on a wheeling contract for power allocated to the municipals. While negotiations for a wheeling contract continued, SEPA entered into a temporary contract for sale of the entire project output to East Kentucky. SEPA and KU still have not completed a wheeling agreement.

SEPA has been selling power to East Kentucky under short-term rates that went into effect on November 1, 1977, and after several extensions, are effective until March 31, 1979.[2] In this docket, RA requests further extensions of these short-term rates through June 30, 1979. Subsequent to filing this request for extension, RA has filed long-term rates with the Commission to take effect on June 1, 1979.[3]

Public notice of this filing was published in the **Federal Register** on May 4, 1979. Protests and petitions to intervene were due on or before May 16, 1979.

A petition to intervene was filed jointly on May 16, 1979 by the Cities of Barbourville, Corbin, Falmouth and the Electric and Water Plant Board of the City of Frankfort, Kentucky (Cities), all municipal customers of SEPA. In their petition to intervene, the Cities do not protest the level of SEPA's proposed short-term rates, but they do request that terms and conditions be attached to these rates in order to protect their rights to their share of the Laurel project output. The Cities allege that KU "unlawfully and unreasonably refuses to agree" on provisions of a wheeling agreement with SEPA because the Laurel project power that SEPA originally intended to sell the Cities would replace power the Cities presently buy from KU. To encourage KU to complete a wheeling contract with SEPA, the Cities request that the proposed short-term rate schedule incorporate a banking provision that will reserve Cities' allocated share from the Laurel project (dating back to October, 1977, and continuing until satisfactory transmission agreements are completed between KU and SEPA) to be deliyered to Cities at a later date.

We find that the level of the proposed short-term rates meets the statutory requirements. The Cities' request to attach terms and conditions to the proposed rates raises the issue of whether the Commission has authority to grant the relief requested. The Commission shares jurisdiction over power sales by Federal power producers, such as SEPA, with the Department of Energy under Section 5 of the Flood Control Act of 1944; under Section 302 of the Department of Energy Organization Act, and under Section 2 of the Secretarial Delegation Order No. 0204-33, as follows:

Section 5, Flood Control Act of 1944

Electric power and energy generated at reservoir projects under the control of the War Department and in the opinion of the Secretary of War not required in the operation of such projects shall be delivered to the Secretary of the Interior, who shall transmit and dispose of such power and energy in such manner as to encourage the most widespread use thereof at the lowest possible rates to consumers consistent with sound business principles, the rate schedules to become effective upon confirmation and approval by the Federal Power Commission. Rate schedules shall be drawn having regard to the recovery (upon the basis of the application of such rate schedules to the capacity of the electric facilities of the projects) of the cost of producing and transmitting such electric energy, including the amortization of the capital investment allocated to power over a reasonable period of years * * *

Section 302(a)(1), Department of Energy Organization Act

There are hereby transferred to, and invested in, the Secretary all functions of the Secretary of the Interior under Section 5 of the Flood Control Act of 1944 * * *

Section 2 of Secretarial Delegation Order 0204-33

2. There is hereby delegated and assigned to the Federal Energy Regulatory Commission (FERC) the authority to confirm and approve on a final basis, or to disapprove, rates developed by the Assistant Secretary under Section 1 * * *

All seen above, the law provides that authority over the allocation of power generated at SEPA's Laurel project lies with the Secretary of DOE. The FERC has final authority over the rate level of power sold by SEPA. Even if the Commission has authority to reject the rate filing on the condition that the requested banking arrangement be inserted in the proposed rate schedule, such authority should not be exercised in that the rate level is not contested and the most appropriate forum for the controversy is before the Assistant Secretary for Resource Applications or SEPA, the entities responsible for the allocation of the power.

The Commission orders: (A) The extension of the short-term rates developed by the Assistant Secretary for Resource Applications of the Department of Energy for the Laurel project, as described above, is hereby confirmed and approved.

(B) The Cities' are hereby permitted to intervene in this proceeding subject to the Rules and Regulations of the Commission; *Provided, however,* That the participation of these intervenors shall be limited to matters set forth in their petition to intervene; and *Provided, further* That the admission of these intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders by the Commission entered in this proceeding.

(C) The Cities' request to restrict and condition our approval and extension of the Laurel project short-term rates is hereby denied.

(D) The Secretary shall cause prompt publication of this order to be made in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,
Secretary.

[FR Doc. 79-27382 Filed 8-31-79, 8:45 am]
BILLING CODE 6450-01-M

[1] The filing was made pursuant to the provision of Section 5 of the Flood Control Act of 1944, the Energy Organization Act, PL 95-91, and the Department of Energy Secretarial Delegation Order No. 0204-33.

[2] The short-term rate are as follows: $56,000 per declared calendar month for capacity plus 10 mills per KWH declared and made available.

[3] Docket No. EF79-3052 filed April 17, 1979.

[Docket No. RP73-64 (PGA79-2) (DCA79-2)]

Southern Natural Gas Co.; Order Granting Rehearing for Purpose of Further Consideration

Issued August 24, 1979.

The Commission has before it an application for rehearing of a June 29, 1979 order in the above-captioned docket. The application was filed by Southern Natural Gas Company and requests rehearing of that portion of the order that makes the effectiveness of Southern's PGA filing subject to the condition that pipeline affiliate producer costs be collected subject to refund and subject to Commission action on that issue in final Natural Gas Policy Act regulations (on rehearing).

The Commission has not yet concluded its deliberations on the issue raised in the application for rehearing. It is therefore appropriate in the administration of both the Natural Gas Act and the Natural Gas Policy Act and in the public interest to grant rehearing of the June 29, 1979 order to afford time for additional consideration of this issue.

The Commission Orders: The application for rehearing filed by Southern Natural Gas Company on July 27, 1979, is hereby granted for the limited purpose of further consideration. As provided by Section 1.34(d) of the Commission's Regulations, no answers to the application will be entertained by the Commission since this order does not grant rehearing on any substantive issues.

By the Commission.

Kenneth F. Plumb,
Secretary.

[FR Doc. 79-27383 Filed 8-31-79, 8:45 am]
BILLING CODE 6450-01-M

Southern Natural Gas Co., et al.; Notice of Determinations By Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

August 24, 1979.

The Federal Energy Regulatory Commission received notices from the jurisdictional agencies listed below of determinations pursuant to 18 CFR 274.104 and applicable to the indicated wells pursuant to the Natural Gas Policy Act of 1978.

Alabama Oil and Gas Board

1. Control number (FERC/State)
2. API well number
3. Section of NGPA
4. Operator
5. Well name
6. Field or OCS area name
7. County, State or block No.
8. Estimated annual volume
9. Date received at FERC
10. Purchaser(s)

BILLING CODE 6450–01–M

[Docket No. E–9565]

Town of Massena, New York v. Niagara Mohawk Power Corporation and The Power Authority of the State of New York; Order Denying Request for Emergency Relief

Issued August 23, 1979.

On August 6, 1979, the Town of Massena (Massena) filed a "Motion For Immediate Clarification of Order Granting Request For Summary Disposition In Part, Denying Request For Summary Disposition In Part And Establishing Expedited Hearing Procedures And For Other Emergency Relief." In this motion, Massena does not, in fact, request "clarification" of the Commission's August 1, 1979 Order but rather requests the Commission to (a) order Niagara Mohawk Power Corporation (Niagara Mohawk) to provide emergency transmission service to Massena under the terms and conditions of Niagara Contract NS–1 between Niagara Mohawk and the Power Authority of the State of New York (PASNY) and (b) order PASNY to commence delivery of power and energy to Massena pursuant to PASNY's October 17, 1978 contract with Messena. We have determined that the Commission lacks the authority to grant the relief requested. Accordingly, Massena's request for immediate interim relief pending completion of the expedited hearing procedures in this docket is denied.

Background

The procedural history and facts surrounding this docket have been described in our August 1, 1979 order. In this motion, Massena offers no facts which were not before the Commission on August 1, 1979.

In support of its motion, Massena relies, in large part, on the following recent developments in its anti-trust proceeding against Niagara Mohawk in the Federal District Court for the Northern District of New York.[1] On July 6, 1979 that Court denied Massena's motion for a preliminary injunction requiring Niagara Mohawk to transmit PASNY power to Massena. Massena has since renewed that motion. On July 30, 1979, the Court entered a temporary restraining order enjoining Massena from taking physical possession of the condemned distribution system and operating the system pending a hearing upon Niagara Mohawk's motion for preliminary injunction. The temporary restraining order was extended for ten days on August 9, 1979. Niagara Mohawk filed an answer on August 8, 1979, contending that this Commission lacked the authority under 202(c) to order emergency transmission and, alternatively, that there was no emergency.

[1] *Town of Massena, New York* v. *Niagara Mohawk Power Corporation*, 79 CV 163.

Discussion

In support of the requested relief, Massena asserts that if the District Court denies the motions of both Massena and Niagara Mohawk for preliminary injunction and allows the temporary restraining order to lapse, Massena "will take physical possession of the condemned facilities and commence operating the system as of that time unless some other complication develops in the interim." (Motion at 4). Given Niagara Mohawk's continued refusal to provide transmission service to the town, Massena claims that its possession of the distribution system under the circumstances described above will constitute an emergency which entitles it to emergency transmission relief under Section 202(c) of the Federal Power Act. Without commenting on the merits of Massena's application for emergency transmission relief, we find that the Commission lacks the authority to grant such relief.

Pursuant to section 402 of the Department of Energy Organization Act,[2] 42 U.S.C. § 7172, certain functions of the Federal Power Commission were transferred to this Commission including:

> The establishment, review, and enforcement of rates and charges for the transmission or sale of electric energy, including determinations on construction work in progress, under part II of the Federal Power Act, and the interconnection, under Section 202(b) of such Act, of facilities for the generation, transmission, and sale of electric energy (*other than emergency interconnection*) (*Emphasis supplied*).

While the language of the statute refers only to the Commission's lack of authority with respect to "emergency interconnection," we feel that the statute was intended to vest in the Secretary emergency management authority not only under section 202(c) of the Federal Power Act but also under the Natural Gas Act[3] and the Emergency Petroleum Allocation Act of 1973.[4] Thus, the Secretary has authority with respect to the ordering of emergency temporary interconnection of facilities *and* also "such generation, delivery, interchange, or transmission of electric energy as in its judgment will best meet the emergency and serve the public interest," pursuant to section 202(c).[5] To permit the Commission to retain the authority to order emergency transmission service while transferring the authority to order emergency interconnection to another agency would frustrate the purposes of the emergency relief provision of the Federal Power Act and seriously compromise the ability of the Secretary to deal with fuel shortages such as those which occurred in the natural gas shortage of the winter of 1976–1977, the coal strike in 1978 and the petroleum product shortage in 1979. A reading of the statute which divides between two administrative bodies the section 202(c) authority to order emergency interconnection, transmission and sale of electric energy would make it difficult, if not impossible, for prompt, efficient and complete regulatory relief in the kind of emergencies described in section 202(c).

The Commission's view of the division of authority under the DOE Act is reinforced by the provisions of the Department of Energy Delegation Order No. 0204–4, effective October 1, 1977, which delegates to the Administrator of the Economic Regulatory Administration (ERA) the authority to order *all* emergency relief contemplated in section 202(c). The order states that "there is hereby delegated to the Administrator of the ERA the authority to adopt rules, issue orders, licenses, and allocations, collect fees, and take such other action as may be necessary and appropriate to administer the following function:

To order the temporary connections of facilities, during times of war or national emergency, for the generation or transmission of electric energy and such generation, delivery, interchange, or transmission of electric energy as in the Administrator's judgment will best meet the emergency and serve the public interest, pursuant to the provisions of section 202(c) of the Federal Power Act.

Our finding that we lack jurisdiction to act on Massena's request for emergency transmission service under section 202(c) is also consistent with our treatment of such applications in the past. See *Illinois Power Company*, Docket No. EL78–6 (issued February 1, 1978).

Of course, when and if the ERA exercises its authority under section 202(c) to order emergency interconnection, sales and wheeling, this Commission would set the rates and charges for such sales and service in accordance with this section of the Act. The DOE Act specifically gave the Commission authority to establish all "rates and charges . . . under Part II of the Federal Power Act."[6] We therefore do not read the DOE Act, *Illinois Power, supra*, or Delegation Order No. 0204–4 as limiting in any way the Commission's general ratemaking authority under part II, including the authority to set rates under section 202(c).[7]

Massena has also requested the Commission to order PASNY to commence delivery of power to Massena as of August 9, 1979, in fulfillment of PASNY's pre-existing contractual obligations.

To the extent that Massena is requesting this Commission to require PASNY to *sell* power to Massena, such a request is premature. Massena's current motion and earlier pleadings filed in this docket give no indication that PASNY will not comply with its contractual and license obligations with respect to sales of Niagara Project power to Massena. To the extent that Massena is requesting an order requiring PASNY to fulfill its statutory and license obligation to provide transmission service to Massena, the Commission has, in its August 1, 1979 order, recognized that such an obligation exists. We indicated however that the determination as to the most efficient and economic method of meeting that obligation must await further development of the factual record in this docket. This request for relief, therefore, must await the resolution of factual

[2] Pub. L. No. 95–91 Stat. 565 (1977), 42 U.S.C. 7101 et seq.

[3] Section 402(a)(1)(E).

[4] Section 402(c)(2).

[5] Apparently recognizing this Commission's lack of authority to order relief under section 202(c), on August 7, 1979 Massena filed an application for emergency relief under section 202(c) with the Economic Regulatory Administration. (Docket EC 79–1). On August 15, 1979, the application was denied.

[6] See "Notice of Proposed Rulemaking Governing Interchange Energy Rates During Section 202(c) Emergencies," Docket No. RM79–28, issued April 4, 1979.

[7] The Commission's retention of the ratemaking authority under 202(c) is not inconsistent with the vesting on ERA of authority to order emergency interconnection and wheeling. As specified in the Federal Power Act, the rates and terms of 202(c) emergency service may be prescribed *after* such emergency relief has been ordered. ERA has all necessary authority to provide prompt and adequate relief in an emergency, leaving to subsequent proceedings before the Commission any auxiliary decisions as to compensation or reimbursement.

issues in the expedited hearing in this docket.

The Commission orders:

(A) The Town of Massena's "Motion For Immediate Clarification Of Order Granting Request For Summary Disposition In Part, Denying Request For Summary Disposition In Part And Establishing Expedited Hearing Procedures And For Other Emergency Relief" is denied in its entirety.

(B) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6450-01-M

[Docket No. RP71-29 and RP71-120 (Phase II)]

United Gas Pipeline Co.; Motion Denying Motion To Shorten Date for Responses

August 23, 1979.

On August 17, 1979, United Gas Pipeline Company filed a motion to establish procedures for consideration of settlement proposal, petition for waiver of rules and to shorten the time to file responses to the motion. The motion for shortened time states that the 15-day established time period set forth in § 1.12(c) of the Rules of Practice and Procedure (18 CFR 1.12) for responding to motions interferes with the timely expedition of the settlement proceeding. The motion raises a number of issues which will require careful deliberation by the Commission and the participants in this case.

Upon consideration, notice is hereby given that the motion to shorten dates for responses in the above-referenced proceeding is denied. Responses are due on September 4, 1979, pursuant to § 1.12(c) of the Commission's Rules of Practice and Procedure.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450–01–M

[Docket No. RM78–12; Order No. 31A]

Determination of Incentive Rate of Return, Tariff and Related Issues; Order Regarding Tariff Provisions Related to Costs of Conditioning Prudhoe Bay Gas to Pipeline Quality Standards

Issued August 24, 1979.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Order rejecting portion of *pro forma* tariff.

SUMMARY: Under Docket No. RM78–12, *pro forma* tariffs were submitted to the Federal Energy Regulatory Commission (the Commission). Among the provisions of these tariffs were sections dealing with responsibility as to conditioning natural gas for transport through the Alaska Natural Gas Transportation System. These provisions were not addressed in Order 31 issued June 8, 1979 under Docket No. RM78–12. Given the Issuance this date of Order No. 45 in Docket No. RM79–19, the Commission now acts on the reserved question of conditioning costs raised by the *pro forma* tariffs of Docket No. RM78–12 and rejects the same to the extent they contravene the policy issued under Order No. 45.

DATES: Effective date October 23, 1979; petitions for rehearing September 24, 1979.

ADDRESSES: All petitions should reference Docket No. RM78–12, Order No. 31A and should be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: John Adger, Director, Alaska Natural Gas Project Office, Federal Energy Regulatory Commission, 941 North Capitol Street, N.E., Washington, D.C. 20426 (202) 275–3827.

The Commission, in Order No. 31,[1] stated that a supplemental order would be issued regarding those portions of the *pro forma* tariffs tendered in Docket No. RM78–12 [2] that affect the issue of cost responsibility for conditioning Prudhoe Bay gas to pipeline quality standards. As explained on page 152 of Order No. 31, the Notice of Proposed Rulemaking in Docket No. RM79–19 [3] specified that the cost responsibility issue would be decided in that proceeding, and that, accordingly, a Commission decision on the affected portions of the *pro forma* tariffs tendered in Docket No. RM78–12 would have to await resolution of the cost responsibility issue in Docket No. RM79–19. Commission resolution of the cost responsibility issue has been achieved by the issuance this same day of Order No. 45 in Docket No. RM79–19. Consistent with the policy set forth in that Order, and Section 2.101 of the Commission's regulations, the Commission will not approve any tariff provisions which would permit the imposition by the transporters of any gas conditioning costs other than those costs explicitly provided for by Order No. 45.

Under the Commission policy set forth in Order No. 45, the Commission will not approve any provision in a transporter's tariff which would permit the transporter to impose upon any shipper which is an interstate gas pipeline company any costs associated with conditioning gas to be transported through the Alaska Natural Gas Transportation System (ANGTS), except those costs attributable to removing carbon dioxide from a level of three percent by volume of gas to a level of less than three percent, absent rebuttal of a presumption that such costs were imprudently incurred. The rationale for this policy is fully explained in Order No. 45.

Of particular relevance to this Order is Section 5.3 of the General Terms and Conditions of the *pro forma* tariffs tendered under Docket No. RM78–12 by Alaskan Northwest Natural Gas Transportation Company and Northern Border Pipeline Company. This section of each tariff states:

§ 5.3 *Failure to conform.*

If gas delivered by Shipper does not comply with quality specifications set out in subsection 5.1 hereof, Company shall have the right, in addition to all other remedies available to it by law, to refuse to accept any such gas. Company may, at its option and upon notice to Shipper, accept receipt of gas not complying with the quality specifications set out in Subsection 5.1 hereof provided Company, at the expense of such Shipper, makes all changes necessary to bring such gas into compliance with such a specification. Any change in the gross heating value of gas treated by Company pursuant to this Subsection 5.3 shall, for purposes of Section 13 hereof, be appropriately reflected in the total Btu content of gas received by Company from Shipper whose gas is so treated.[4]

In accordance with the Commission policy regarding conditioning costs for Prudhoe Bay gas as set forth in Order No. 45, the transporters are hereby notified that to the extent the above proposed tariff provision (or any other tariff provision) is intended to permit the transporters to include any costs of conditioning the gas, in their charges to shippers who are interstate gas pipeline companies, beyond those costs which are allowed pursuant to the policy statement in Order No. 45, there is a rebutable presumption that such costs would be imprudently incurred, and that such a tariff provision is inconsistent with Commission policy and must be rejected. The substantive determination of the cost responsibility issue was based upon the record in Docket No. RM79–19.

In order to facilitate synchronization of this Order with Order No. 45 in Docket No. RM79–19 for purposes of administrative review and, if necessary, judicial review, the Commission will afford all parties an opportunity to file petitions for rehearing within 30 days of the date of issuance of this Order and will stay the effective date of this Order for 60 days from its date of issuance.

The Commission Finds

(1) For the reasons set forth above, it is necessary and appropriate and in the public interest, in administering the Natural Gas Act, the Natural Gas Policy Act, and the Alaska Natural Gas Transportation Act, to require that the tariffs of Alaskan Northwest Natural Gas Transportation Company and Northern Border Pipeline Company conform to the policy regarding cost responsibility for conditioning Prudhoe Bay gas as set forth in Order No. 45, issued August 24, 1979, in Docket No. RM79–19.

(2) To the extent that Section 5.3, or any other provision, of the *pro forma* tariffs tendered by Alaskan Northwest Natural Gas Transportation Company and Northern Border Pipeline Company is intended to permit the inclusion, in charges to shippers which are interstate gas pipeline companies, any costs for conditioning Prudhoe Bay gas other than those costs explicitly provided for in Order No. 45, issued August 24, 1979, in Docket No. RM79–19, there is a rebuttable presumption that such a provision is inconsistent with Commission policy and must be rejected.

The Commission Orders

(A) Any tariffs tendered by Alaskan Northwest Natural Gas Transportation Company and Northern Border Pipeline Company shall conform with the requirements set forth in this Order, and comply with the policy set forth in Order No. 45, issued this same day in Docket No. RM79–19 and incorporated into Section 2.101 of the Commission's regulations.

(B) This order shall become effective 60 days after the date of its issuance. Parties to Docket No. RM78–12 may file petitions for rehearing of this Order within 30 days of the date of its issuance, pursuant to the procedures set forth in § 1.34 of the Commission's rules of practice and procedure.

By the Commission. Commissioner Sheldon was present and not voting.

Kenneth F. Plumb,

Secretary.

[FRL 1310–5]

Ambient Air Monitoring Reference Method Designation; Philips Model PW9762/02 NO/NO_2/NO_x Analyzer

Notice is hereby given that EPA, in accordance with 40 CFR Part 53 (40 FR 7044, 41 FR 11252, 41 FR 52694), has designated another reference method for the measurement of ambient concentrations of nitrogen dioxide. The new reference method is an automated method (analyzer) which uses the gas phase chemiluminescence measurement principle specified for NO_2 reference methods in Appendix F of 40 CFR Part 50 (as amended on December 1, 1976—41 FR 52688). The method is described as:

RFNA–0879–040, "Philips Model PW9762/02 NO/NO_2/NO_x Analyzer," consisting of the following components:
PW9762/02 Basic Analyzer
PW 9729/00 Converter Cartridge
PQ9731/00 Sampler or PW9731/20 Dust Filter and operated on a range of 0–0.5 ppm, with or without any of the following accessories:
PW9752/00 Air Sample (Manifold)

W9732/00 Sample Line Heater
PW9011/00 Remote Control Set

This method is available from Philips Electronic Instruments, Inc., 85 McKee Drive, Mahwah, New Jersey 07430.

A notice of receipt of application for this method appeared in the **Federal Register,** Volume 44, February 7, 1979, page 7806.

A test analyzer representative of this method has been tested by the applicant in accordance with the test procedures specified in 40 CFR Part 53. After reviewing the results of these tests and other information submitted by the applicant, EPA has determined, in accordance with Part 53, that this method should be designated as a reference method.

The information submitted by the applicant will be kept on file at the address shown below and will be available for inspection to the extent consistent with 40 CFR Part 2 (EPA's regulations implementing the Freedom of Information Act).

As a reference method, this method is acceptable for use by States and other control agencies for purposes of 40 CFR Part 58, Ambient Air Quality Surveillance (44 FR 27571, May 10, 1979). For such use, the method must be operated in strict accordance with the operation or instruction manual provided with the method and subject to any limitations (e.g., operating range) specified in the applicable designation (see description of the method above). Vendor modifications of a designated method used for purposes of Part 58 are permitted only with prior approval of EPA, as provided in Part 53. Provisions concerning modification of such methods by users are specified under Section 2.8 of Appendix C to Part 58 (44 FR 27585).

Part 53 requires that sellers of designated methods comply with certain conditions. These conditions are given in 40 CFR 53.9 and are summarized below:

(1) A copy of the approved operation or instruction manual must accompany the analyzer when it is delivered to the ultimate purchaser.

(2) The analyzer must not generate any unreasonable hazard to operators or to the environment.

(3) The analyzer must function within the limits of the performance specifications given in Table B–1 of Part 53 for at least 1 year after delivery when maintained and operated in accordance with the operation manual.

(4) Any analyzer offered for sale as a reference or equivalent method must bear a label or sticker indicating that it has been designated as a reference or equivalent method in accordance with Part 53.

(5) If such an analyzer has one or more selectable ranges, the label or sticker must be placed in close proximity to the range selector and must indicate which range or ranges have been included in the reference or equivalent method designation.

(6) An applicant who offers analyzers for sale as reference or equivalent methods is required to maintain a list of ultimate purchasers of such analyzers and to notify them within 30 days if a reference or equivalent method designation applicable to the analyzer has been cancelled or if adjustment of the analyzers is necessary under 40 CFR 53.11(b) to avoid a cancellation.

(7) An applicant who modifies an analyzer previously designated as a reference or equivalent method is not permitted to sell the analyzer (as modified) as a reference or equivalent method (although he may choose to sell it without such representation), nor to attach a label or sticker to the analyzer (as modified) under the provisions described above, until he has received notice under 40 CFR 53.14(c) that the original designation or a new designation applies to the method as modified or until he has applied for and received notice of a new reference or equivalent method designation for the analyzer as modified.

Aside from occasional breakdowns or malfunctions, consistent or repeated non-compliance with any of these conditions should be reported to: Director, Environmental Monitoring Systems Laboratory, Department E (MD–77), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Designation of this reference method will provide assistance to the States in establishing and operating their air quality surveillance systems under Part 58. Additional information concerning this action may be obtained by writing to the address given above.

Stephen J. Gage,

Assistant Administrator for Research and Development.

August 8, 1979.

BILLING CODE 6560-01-M

[FRL 1310–4]

Environment and Conservation in Non-Nuclear Energy Research and Development; Public Hearing

The Environmental Protection Agency (EPA) announces a Public Hearing on Environment and Conservation in the Federal Non nuclear Energy Research and Development Program to be held at the Office of Personnel Management Auditorium, 1900 E Street, NW, Washington, DC, from 9:00 am to 5:00 pm, October 3–5, 1979. The public is invited to attend.

Section 11 of the Federal Non nuclear Energy Research and Development Act of 1974 (Pub. L. 93–577), directs the responsible agency (formerly the Council on Environmental Quality, currently EPA) to carry out a continuing analysis of the Federal non nuclear energy research and development program to evaluate the adequacy of attention to (1) energy conservation methods and environmental protection and (2) environmental consequences of the application of non nuclear energy technologies. The 1979 hearing will focus on the adequacy of attention to environmental profection and energy conservation measures within the Department of Energy (DOE) research, development and demonstration management system.

Aspects of that system to be discussed include:

- Use of technical and scientific information in decision-making,
- Communication of the rationale for technology development decisions.
- Integration of technology development and environmental research planning systems.

Under the direction of the Act, annual public hearings are held to provide the opportunity for interested individuals or groups to testify. The October public hearings have been preceded by a series of Section 11 regional workshops held during July in Atlanta, Denver, San Francisco, and Pittsburgh. These workshops provided an opportunity for public evaluation of the DOE management system at the regional level and its effect on projects which are being developed locally.

A Report to Congress to be available in January, 1980 will summarize the 1979 Section 11 program. The results of the October hearing will be a principal part of the Report. The Report will also include results of four regional workshops already completed, and additional detailed analysis.

Further information about this hearing may be obtained by phoning Paul Schwengels (202)–426–2683 or Francine Jacoff (202)–755–0324.

Individuals or organizations wishing to testify should submit, by September 15, 1979, a brief summary of their intended testimony to: Section 11 Coordinator (RD–681), Office of Environmental Engineering and Technology, Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460.

Witnesses may submit written testimony and/or deliver an oral statement of up to ten (10) minutes in length. Additional time will be reserved for questions and comments from a panel of experts. An open period will be provided each day for unscheduled public testimony or questions. Transcripts of the October hearing will be available to the public.

Steven R. Reznek,

Deputy Assistant Administrator for Environmental Engineering and Technology, U.S. Environmental Protection Agency.

August 29, 1979.

Federal Insecticide, Fungicide, and Rodenticide Act Scientific Advisory Panel; Open Meeting

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Notice of open meeting.

SUMMARY: There will be a two-day meeting of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel from 9:00 a.m. to 5:00 p.m. daily on Thursday, and Friday, September 20 and 21, 1979. The meeting will be held in Salon F. Crystal, City Marriott Hotel, 1999 Jefferson Davis Highway, Arlington, Va., and will be open to the public.

FOR FURTHER INFORMATION CONTACT: Dr. H. Wade, Fowler, Jr., Executive Secretary, FIFRA Scientific Advisory Panel, Office of Pesticide Programs (TS–766), EPA, Room 803, Crystal Mall, Building No. 2, 1921 Jefferson Davis Highway, Arlington, Va. 20460, Telephone: 703/557–7560.

SUPPLEMENTARY INFORMATION: In accordance with section 25(d) of the amended FIFRA, the Scientific Advisory Panel will comment on the impact of regulatory actions under sections 6(b) and 25(a) on health and the environment prior to implementation. The agenda for this meeting will include the following topics:

1. Review of the Agency's proposed regulatory action to conclude the Rebuttable Presumption against Registration (RPRA) of trifluralin (Treflan);

2. Conclusion of unfinished business from the meeting held on August 15–16, 1979; and

3. In addition, the Agency may present status reports on other ongoing programs of the Office of Pesticide Programs.

Copies of draft documents may be obtained by contacting Ms. Marcia Williams, Director, Special Pesticide Review Division (TS–791), Room: 724, Crystal Mall, Building No. 2, at the address given above, Telephone: 703/557–7438.

Any member of the public wishing to attend or submit a paper should contact Dr. H. Wade Fowler, Jr., at the address or phone listed above to be sure that the meeting is still scheduled and to conform that the Panel will review all of the agenda items. Interested persons are permitted to file written statements before or after the meeting, and may, upon advance notice to the Executive Secretary, present oral statements to the extent that time permits. Written or oral statements will be taken into consideration by the Panel in formulating comments or in deciding to waive comments. Persons desirous of making oral statements must notify the Executive Secretary and submit the required number of copies of a summary no later than September 10, 1979.

Individuals who wish to file written statements are advised to contact the Executive Secretary in a timely manner to be instructed on the format and the number of copies of submit to ensure appropriate consideration by the Panel.

The tentative date for the next Scientific Advisory Panel meeting is October 9–10, 1979.

(Section 25(d) of FIFRA, amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136) and Sec. 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 86 Stat. 770).).

Dated: August 28, 1979.

James M. Conlon,

Acting Deputy Assistant Administrator for Pesticide Programs.

BILLING CODE 6560–01–M

[FRL 1311–7; OPP–180355]

Florida Department of Agriculture and Consumer Services; Issuance of Specific Exemption To Use Permethrin To Control Vegetable Leafminer on Celery

AGENCY: Environmental Protection Agency (EPA), Office of Pesticide Programs.

ACTION: Issuance of specific exemption.

SUMMARY: EPA has granted a specific exemption to the Florida Department of Agriculture and Consumer Services (hereafter referred to as the "Applicant") to use permethrin for control of the vegetable leafminer on 11,000 acres of celery in four counties in Florida. The specific exemption expires on June 30, 1980.

FOR FURTHER INFORMATION CONTACT: Emergency Response Section, Registration Division (TS–767), Office of Pesticide Programs, EPA, 401 M Street, S.W., Room: E–124, Washington, D.C. 20460, Telephone: 202/426–0223. It is suggested that interested persons telephone before visiting EPA Headquarters, so that the appropriate files may be made conveniently available for review purposes.

SUPPLEMENTARY INFORMATION: Leafminers have periodically plagued Florida celery since the late 1940's. Although normally present in moderate numbers, epidemic population levels have been reached in the late 1940's, early 1960's, and early 1970's. During the 1977–1978 growing season, populations of the pest were not controlled by applications of the registered pesticides. Effective control was achieved, however, with a permethrin control program which was authorized by a specific exemption similar to the one described here, according to the Applicant.

Leafminer damage to the celery results in reduced quality and leaf death; ultimately, the plant branches die. This damage necessitates stripping, trimming, and culling which drastically reduce yield and quality. According to the Applicant, complete fields may be lost or marketed only as a salvage operation.

The following insecticides are registered for leafminer control: Cygon, Dibron, Diazinon, Orthene, and Vydate. According to the Applicant, the registered alternatives are ineffective to the extent necessary to control the insect due to the leafminer's developed resistance to these pesticides. Pest management programs not requiring chemical controls are under study, but as yet are not sufficiently effective to handle the current emergency. Therefore, the Applicant claimed, chemical control is the only effective means available to control the leafminer. The Applicant estimates that without the use of an effective pesticide, losses of up to $15 million could be incurred by the Florida celery industry.

The Applicant proposed to use permethrin, manufactured by ICI Americas, Inc. as Ambush, and by FMC Corp. as Pounce, at a rate of 0.05 to 0.20 pound active ingredient (a.i.) per acre. Applications will be made by qualified growers or State-certified commercial applicators using ground or air equipment in the following areas: Zellwood in Orange County; Belle Glade, Pahokee, and South Bay in Palm Beach County; Sanford and Oviedo in Seminole County; and Sarasota in Sarasota County.

Residues of permethrin in or on celery are not expected to exceed 5 parts per million (ppm) as a result of this program. This residue level has been judged by EPA to be adequate to protect the public health.

Environmental problems associated with permethrin's extreme toxicity to aquatic organisms should be reduced by the restrictions imposed by EPA. These restrictions should also minimize danger to two endangered species, the Everglade Kite and Southern Bald Eagle, both of which feed on aquatic organisms. The proposed use is not expected to pose an unreasonable hazard to the environment.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of leafminers on celery has occurred; (b) there is no pesticide presently registered and available for use which gives effective control of this pest in Florida; (c) there is no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the leafminers are not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above to the extent and in the manner set forth in the application until June 30, 1980. The specific exemption is also subject to the following conditions:

1. The products Ambush (EPA Reg. No. 10182–3) and Pounce 3.2 EC (EPA Reg. No. 2791–3014) are authorized;

2. Applications may be made to celery fields in the areas named above;

3. Total acreage treated may not exceed 11,000 acres;

4. Permethrin will be applied at a rate of 0.05 to 0.20 pound a.i. per acre per application. A maximum of 3 pounds a.i. per acre will be applied;

5. Applications may be made at five- to fourteen-day intervals. There is no preharvest interval;

6. A maximum of 33,000 pounds a.i. may be applied;

7. Applications of permethrin may be made by ground or air equipment;

8. Permethrin spray mixture volumes of 40 to 50 gallons of water per acre will be made by ground application, and 3 to 8 gallons of water per acre will be made by aerial application;

9. All applications will be made by qualified growers or by State-certified commercial applicators. A 60-day crop rotation restriction is imposed;

10. Permethrin should not be applied any closer to fish-bearing waters than indicated in the chart below:

Application method	Aerial			Ground		
Application height	10 feet			2 feet		
Application rate (lbs. A.I.)	.05	0.1	0.2	0.005	0.1	0.2
Fresh water (distance in feet)	585	990	1,600	117	198	320
Salt water (distance in feet)	1,847	2,779	3,950	369	556	790

The Applicant is warned that applications closer than those allowed in the above chart may result in fish and/or aquatic invertebrate kills;

11. Precautions must be taken to avoid or minimize spray drift to non-target areas;

12. This product is highly toxic to bees exposed to direct treatment or to residues on crops or weeds. It must not be applied, or allowed to drift to weeds in bloom on which an economically significant number of bees is actively foraging. Protective information may be obtained from the State Cooperative Agriculture Extension Service;

13. Permethrin is extremely toxic to fish and aquatic invertebrates. Care must be taken to prevent contamination of lakes, streams, ponds, tidal marshes and estuaries by cleaning equipment or disposing waste;

14. Celery treated according to the above provisions is not expected to have residues of permethrin in excess of 5.0 ppm. Celery with residues not exceeding this level may enter interstate commerce. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;

15. All applicable directions, restrictions, and precautions on the product label must be followed;

16. Two endangered species, the Florida Everglade Kite and the Southern Bald Eagle, are endemic to regions in the treatment area. Application of the pesticide according to the above instructions and directions is expected to minimize the risk to these animals. Permethrin should not be applied in areas where spray drift could possibly impact aquatic ecosystems containing endangered or threatened species. Liaison should be established between the Applicant and the Florida Fresh Water Fish and Game Commission in order to protect fish and wildlife;

17. The EPA shall be informed immediately of any adverse effects resulting from this use of permethrin; and

18. The Applicant shall be responsible for assuring that all of the provisions of this specific exemption are met and must submit a report summarizing the results of this program by September 1, 1980.

(Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).).

Dated: August 28, 1979.

James M. Conlon,

Acting Deputy Assistant Administrator for Pesticide Programs.

Fourth Report of the Interagency Testing Committee; Receipt of the Report and Requests for Comments; Correction

In FR Doc. 79–16820 appearing at page 31866 in the issue of Friday, June 1, 1979,

the Interagency Testing Committee's recommendation that epidemiological studies of the possible adverse health effects of hexachlorocyclopentadiene be undertaken was inadvertently omitted. The list under the heading RECOMMENDED STUDIES in the second column on page 31882 is corrected to include epidemiological studies. Epidemiological studies of this chemical are correctly included in Table II of the report on page 31869.

Dated: August 28, 1979.

Steven D. Jellinek,

Assistant Administrator for Toxic Substances.

Region VII; Approval of PSD Permit to Iowa-Illinois Gas & Electric Co.

Notice is hereby given that on August 7, 1979, the Environmental Protection Agency (EPA) issued a Prevention of Significant Deterioration (PSD) permit to Iowa-Illinois Gas and Electric Company for approval to construct a new 650-megawatt coal-fired steam electric generating station in Louisa County, Iowa. This permit has been issued under EPA's Prevention of Significant Air Quality Deterioration regulations (40 CFR 52.21) applicable to the new facility subject to certain conditions stated in the permit.

The PSD permit is reviewable under section 307(b)(1) of the Clean Air Act only in the Eighth Circuit Court of Appeals. A petition for review must be filed on or before November 5, 1979.

Copies of the permit are available for public inspection upon request at the following locations:

Auditor's Office, County Court House, Third and Walnut Streets, Muscatine, Iowa.
Iowa Department of Environmental Quality, Air and Land Quality Division, Henry A. Wallace Building, 900 East Grand, Des Moines, Iowa.
U. S. Environmental Protection Agency, Air and Hazardous Materials Division, 324 East 11th Street, Kansas City, Missouri.

Dated: August 24, 1979.

Science Advisory Board Environmental Health Committee; Postponement of Meeting

Under Pub. L. 92-463, notice is hereby given that the meeting of the Environmental Health Committee of the Science Advisory Board scheduled for 9:00 a.m. on September 12, 1979 in Room 3906-08, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D. C. will not be held. The meeting referred to was announced in the **Federal Register** on August 22, 1979 (44 FR 49303). The meeting will be rescheduled and appropriately announced in the **Federal Register**.

Any member of the public wishing further information regarding this postponement should contact the Secretariat, Science Advisory Board (A-101), U.S. Environmental Protection Agency, Washington, D.C. 20460. Please ask for Mr. Kenneth B. Goggin. The telephone number is (202) 472-9444.

Ernst Linde,

Acting Staff Director, Science Advisory Board.

GENERAL ACCOUNTING OFFICE

Regulatory Reports Review; Notice of Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on August 24, 1979 (NRC), and August 27, 1979 (ICC). See 44 U.S.C. 3512(c) and (d). The purpose of publishing this notice in the **Federal Register** is to inform the public of such receipts.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed ICC and NRC requests are invited from all interested persons, organizations public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before September 24, 1979, and should be addressed to Mr. John M. Lovelady, Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5106, 441 G Street, NW, Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

Nuclear Regulatory Commission

The NRC requests clearance of a new single-time survey concerning the Development of Radiological Transportation Emergency Response Guidance to be completed on a voluntary basis by all 50 States and Puerto Rico. The NRC Office of Standards Development, Transportation and Products Standards Branch, is currently involved in a program directed toward providing guidance for transportation related emergency response. The goal of the program is to increase the expertise of the State and local governments in managing transportation related nuclear incidents and to decrease their dependence on Federal assistance in this area. The program has 3 phases: (1) to conduct a survey of current State response capabilities; (2) to develop a model State radiological emergency response program to provide the maximum effective emergency response in all areas of transportation; and (3) to recommend an optimum emergency response program to the States based on a task force evaluation of (1) and (2) and a cost-benefit analysis.

The survey is broken down into two questionnaires. The first questionnaire addresses those questions not likely to be found in existing State plans. The second questionnaire contains those questions which can most likely be answered by reference to existing State plans. The questions in the second questionnaire will be asked of State and local officials only if the information is not available in existing State plans. The NRC will send copies of the questionnaires to approximately three officials in each State and Puerto Rico and then will conduct a telephone interview with each official to obtain answers to the questionnaires. The NRC estimates that burden will average 16 hours for each State.

Interstate Commerce Commission

The ICC requests an extension without change clearance of Annual Report, Form MP-2, required to be filed by approximately 1,100 Class II and III motor carriers of passengers having annual operating revenues of less than $3 million pursuant to order of the Interstate Commerce Commission, 49 CFR 1249.6. Data collected by Form MP-2 are used for economic regulatory purposes. Reports are mandatory and available for use by the public. The ICC estimates reporting burden for carriers will average 2½ hours per report.

Norman F. Heyl,

Regulatory Reports Review Officer.

GENERAL SERVICES ADMINISTRATION

[Intervention Notice 98; Case Nos. ER-80-48 and ER-80-49]

Kansas City Power and Light Co., Public Utility Commissions of Missouri and Kansas; Proposed Intervention in Electric Rate Increase Proceeding

The General Services Administration seeks to intervene in a proceeding before the Public Utility Commissions of Missouri and Kansas concerning the application of the Kansas City Power and Light Company for an increase in electric rates. GSA represents the interest of the executive agencies of the U.S. Government as users of utility services.

Persons desiring to make inquiries to GSA concerning this case should submit them in writing to Spence W. Perry, Assistant General Counsel, Regulatory Law Division, General Services Administration, 18th & F Streets, N.W., Washington, DC (mailing address: General Services Administration (LT), Washington, DC 20405), telephone 202-566-0750, on or before October 4, 1979, and refer to this notice number.

Persons making inquiries are put on notice that the making of an inquiry shall not serve to make any persons parties of record in the proceeding.

(Sec. 201(a)(4), Federal Property and Administrative Services Act, (40 U.S.C. 481(a)(4)))

Dated: August 23, 1979.

R. G. Freeman III,

Administrator of General Services.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service

Preventing Disease, Promoting Health: Objectives for the Nation; Announcement of Availability of Draft National Prevention Objectives for Review and Comment

The Department of Health, Education, and Welfare convened a conference June 13 and 14, 1979, in Atlanta, Georgia, in a joint effort of the Center for Disease Control and the Health Resources Administration, in coordination with the Office of Disease Prevention and Health Promotion of the Office of the Assistant Secretary for Health. Participants in the conference workgroups discussed a series of specific and measurable objectives in disease prevention and health promotion and produced a draft set of national prevention objectives to be achieved by 1990 in key prevention areas.

The Department invites review and public comment on the draft national prevention objectives. Copies of the draft objectives will be available September 4, 1979. The closing date for comments will be November 2, 1979.

For individual copies of the draft national prevention objectives contact: J. Michael McGinnis, M.D. Acting Deputy Assistant Secretary for Health, Disease Prevention and Health Promotion, P.O. Box 15002, Atlanta, Georgia 30333; Telephone: FTS 236-3631 Commercial: 404/329-3631.

Dated: July 13, 1979.

BILLING CODE 4110-85-M

Social Security Administration

Changes in the Rate of Federal Participation and the Ceiling Limitations on Federal Funds for Guam, Puerto Rico, and the Virgin Islands

AGENCY: Social Security Administration, HEW.

ACTION: Notice.

SUMMARY: This notice reflects amendments to the Social Security Act made by section 802 of Pub. L. 95-600.

For fiscal year 1979, the dollar ceilings for Puerto Rico, Guam, and the Virgin Islands under section 1108(a) of the Social Security Act are as follows:

Puerto Rico	$72,000,000
Guam	3,300,000
Virgin Islands	2,400,000

These ceilings are the maximum amounts of Federal funds available for the programs under Titles I, IV-A, X, XIV, and XVI (AABD) of the Social Security Act. They apply both to assistance and administrative costs under these programs.

In addition, the Federal Medical Assistance Percentage (FMAP) for Puerto Rico, Guam, and the Virgin Islands under section 1118 of the Social Security Act is 75 percent for fiscal year 1979. Section 1118 permits a State that has an approved Title XIX plan in effect to elect to use the FMAP rate in lieu of the matching rate under Titles I, IV-A, X, XIV, and XVI (AABD). In the event that Puerto Rico, Guam, or the Virgin Islands makes this election, Federal matching at 75 percent is available in assistance payments to individuals (subject to the dollar ceilings).

DATES: These changes will be effective only for fiscal year 1979 beginning October 1, 1978, and ending September 30, 1979.

FOR FURTHER INFORMATION CONTACT: C. George LeBoff, Director, Employability and Fiscal Policy Division, Office of Policy, Office of Family Assistance, Social Security Administration, Washington, D.C. 20201, (202) 245-0500.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-361A and 50-362A]

Southern California Edison Co., et al; Receipt of Additional Antitrust Information: Time for Submission of Views on Antitrust Matters

Southern California Edison Company, pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, has filed information requested by the Attorney General for Antitrust Review as required by 10 CFR Part 50, Appendix L. This information concerns two proposed additional ownership participants, the City of Riverside and the City of Anaheim, for the San Onofre Nuclear Generating Station, Units 2 and 3. The current holders of the construction permits are Southern California Edison Company and San Diego Gas and Electric Company.

The information was filed in connection with the application by Southern California Edison Company and San Diego Gas and Electric Company for construction permits and operating licenses for two pressurized water reactors. Construction was authorized on October 18, 1973 at the San Onofre site located in San Diego County, California.

The original application was dated May 28, 1970, and the Notice of Receipt of Application for Construction Permits and Facility Licenses and Availability of Applicant's Environmental Report; Time for Submission of Views on Antitrust Matters was published in the **Federal Register** on February 20, 1971 (36 FR 3278). The Notice of Receipt of Application for Facility Operating Licenses; Notice of Availability of Environmental Report; and the Notice of Consideration of Issuance of Facility Operating Licenses and Notice of

Opportunity for Hearing was published in the **Federal Register** on April 7, 1977 (42 FR 18460). Subsequently, the Notice of Hearing was published in the **Federal Register** on October 26, 1977 (42 FR 57575).

A copy of the above documents are available for public examination and copying for a fee at the Commission's Public Document Room, 1717 H Street N.W., Washington, D.C. 20555 and at the Mission Viejo Branch Library, 24851 Chrisanta Drive, Mission Viejo, California.

Any person who wishes to have his views on the antitrust matters with respect to the City of Riverside and the City of Anaheim presented to the Attorney General for consideration or who desires additional information regarding the matters covered by this notice, should submit such views or requests for additional information to the U. S. Nuclear Regulatory Commission, Washington, D. C., 20555, Attention: Chief, Antitrust and Indemnity Group, Office of Nuclear Reactor Regulation, on or before October 26, 1979.

Dated at Bethesda, Maryland, this 13th day of August, 1979.

For the Nuclear Regulatory Commission.
I06Robert L. Baer,
Chief, Light Water Reactors Branch No. 2, Division of Project Management.

BILLING CODE 7590-01-M

OFFICE OF MANAGEMENT AND BUDGET

Agency Forms Under Review

August 29, 1979

Background

When executive departments and agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Federal Reports Act (44 USC, Chapter 35). Departments and agencies use a number of techniques including public hearings to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibility under the Act also considers comments on the forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

Every Monday and Thursday OMB publishes a list of the agency forms received for review since the last list was published. The list has all the entries for one agency together and grouped into new forms, revisions, extensions, or reinstatements. Each entry contains the following information:

The name and telephone number of the agency clearance officer;

The office of the agency issuing this form;

The title of the form;

The agency form number, if applicable;

How often the form must be filled out;

Who will be required or asked to report;

An estimate of the number of forms that will be filled out;

An estimate of the total number of hours needed to fill out the forms; and

The name and telephone number of the person or office responsible for OMB review.

Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. In addition, most repetitive reporting requirements or forms that require one half hour or less to complete and a total of 20,000 hours or less annually will be approved ten business days after this notice is published unless specific issues are raised; such forms are identified in the list by an asterisk(*).

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained from the agency clearance officer whose name and telephone number appear under the agency name. Comments and questions about the items on this list should be directed to the OMB reviewer or office listed at the end of each entry.

If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer of your intent as early as possible.

The timing and format of this notice have been changed to make the publication of the notice predictable and to give a clearer explanation of this process to the public. If you have comments and suggestions for further improvements to this notice, please send them to Stanley E. Morris, Deputy Associate Director for Regulatory Policy and Reports Management, Office of Management and Budget, 726 Jackson Place, Northwest, Washington, D.C. 20503.

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

Color Televison Receivers and Certain Subassemblies thereof; Adjusted Restraint Levels under the Orderly Marketing Agreement with Taiwan

Below is a letter to the Commissioner of Customs adjusting the restraint levels for the first period (February 1979–June 1979) as authorized by Presidential Proclamation 4634 of January 26, 1979.

Stephen L. Lande,
Assistant Special Trade Representative.

The Honorable Robert Chasen,
Commissioner, U.S. Customs Service, Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Chasen: In accordance with paragraph (5)(a) of Presidential Proclamation 4634 of January 26, 1979, we have maintained monthly import statistics on color television receivers and certain subassemblies thereof exported from Taiwan.

Exports of color television receivers from Taiwan during the "pipeline" period specified in paragraph 2(a) of the orderly marketing agreement (July 1, 1978–January 31, 1979) were 26,368 units less than the 368,000 units allotted under the agreement. To carry out the terms of the agreement, it will be necessary to add the shortfall to Taiwan's Period I (February 1979–June 1979) total of 127,000 units.

Accordingly, pursuant to operative paragraphs (6) and (7) of Presidential Proclamation 4634 of January 26, 1979, you are hereby requested to increase the first period restraint levels applicable to color television receivers entered under TSUS Item No. 923.74 by 26,368 items. The adjusted restraint level, therefore, will be 153,368.

This letter will be published in the **Federal Register.**

Sincerely,

Robert S. Strauss.

BILLING CODE 3190-01-M

SMALL BUSINESS ADMINISTRATION

[Proposed License No. 04/04-5178]

Diaz Capital Corp.; Application for License To Operate as a Small business Investment Company

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 *et seq.*), has been filed by Diaz Capital Corporation (applicant), with the Small Business Administration (SBA), pursuant to 13 CFR 107.102 (1979).

The officers and directors of the applicant are as follows:

Frank L. Diaz, 2901 S. Bayshore Drive, Apt. 17F, Coconut Grove, Florida 33133, Chairman of the Board and Secretary.
Frank Diaz, 235 S.W. 22nd Road, Miami, Florida 33145, President, Treasurer and Director.
Iraida Valdez, 9447 S.W. 38th Street, Miami, Florida 33165, Director.

The applicant will maintain its offices at 3126 Coral Way, Miami, Florida 33145.

It will begin operations with $500,000 of private capital derived from the sale of 1,000 shares of common stock to Mr. Frank L. Diaz.

The applicant will conduct its operations principally in Dade, Broward, Monroe and Palm Beach counties of Florida.

As a small business investment company under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the applicant

V 44 / 172 SE 4 79

under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than September 19, 1979, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Acting Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Miami, Florida.

(Catalog of Federal Domestic Assistance Program No. 59.011 Small Business Investment Companies)

Dated: August 28, 1979.

Peter F. McNeish,

Acting Associate Administrator for Finance and Investment.

[Proposed License No. 01/01-0304]

Morris Capital Corp.; Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an Application has been filed with the Small Business Administration, pursuant to § 107.102 of the regulations governing small business investment companies (13 CFR 107.102 (1979)), under the name of Morris Capital Corporation (Applicant), for a License to operate as a Small Business Investment Company under the provisions of the Small Business Investment Act of 1958, as amended (Act) and the rules and regulations promulgated thereunder.

The Applicant is incorporated under the laws of the State of New Jersey and it will commence operations with a capitalization of $503,156, which amount will be raised through the private sale of shares of the Applicant's Common Stock, No Par Value, to a limited number of investors.

The Applicant will have its principal place of business at 163 Washington Street, Morristown, New Jersey 07960, and it intends to conduct operations primarily in the States of New Jersey, New York and Pennsylvania.

The Officers, Directors and those who will be the owners of ten percent or more of the Applicant's Common Stock upon completion of the private offering are:

Name, Address, and Title or Relationship to Applicant

O. David Fischer, 5 Yardley Road, Mendham, NJ, President, Treasurer Director and Shareholder.
Robert L. Tuchman, 249 Long Hill Drive, Short Hills, NJ, Vice President, Secretary and Director.
William R. Johnston, Shalebrook Drive, Morristown, NJ, Director and Shareholder.
Christina Fischer, 5 Yardley Road, Mendham, NJ, Shareholder.
RLT Enterprises, Inc., 163 Washington St., Morristown, NJ, Shareholder.

Robert L. Tuchman is the principal stockholder (60%) of RLT Enterprises, Inc., a recently formed corporation which is also a ten percent owner of, and the Investment Advisor/Manager to, ESLO Capital Corporation, a Small Business Investment Company located at 163 Washington Street, Morristown, New Jersey 07960.

In the event, the private sale of the Applicant's Common Stock results in additional investors owning ten percent or more of such stock, their identify will be published in the **Federal Register,** and the newspaper mentioned below.

Matters involved in SBA's consideration of the Applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the Applicant under their management, including adequate profitability and financial soundness in accordance with the Act and SBA regulations.

Notice is hereby given that any person may, on or before September 19, 1979, submit written comments on the Applicant to the Acting Associate Administrator for Finance and Investment, Small Business Administration, 1441 L St., NW., Washinton, D.C. 20416

A copy of this Notice shall be published by the Applicant in a newspaper of general circulation in Morristown, New Jersey.

BILLING CODE 8025-01-M

[Proposed License No. 02/02-0375]

Sherwood Business Capital Corp.; Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to § 107.102 of the regulations governing small business investment companies (13 CFR 107.102 (1978)), under the name of Sherwood Business Capital Corporation (Applicant), for a license to operate as a Small Business Investment Company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended, and the Rules and Regulations promulgated thereunder.

The Applicant was incorporated under the laws of the State of New York, and it will commence operations with a capitalization of $504,000. The capitalization will result from a purchase by Sherwood Diversified Services, Inc., of all the outstanding stock of the applicant.

The Applicant will have its place of business at 770 King Street, Port Chester, New York 10573, and it intends to conduct operations primarily in the State of New York.

The Officers and Directors of the Applicant will be:

Anthony R. Russo, 770 King Street, Port Chester, New York 10573—Chairman of the Board and Chief Executive Officer.
Lewis R. Eisner, 188 Rock Creek Lane, Scarsdale, New York 10583—President.
Irwin Naitove, 1440 Stevenson Road, Hewlett, New York 11557—Executive Vice President.
Carole A. Russo, 770 King Street, Port Chester, New York 10573—Secretary.
Lewis R. Eisner & Co., Inc., 230 Park Avenue, New York, New York 10017—Manager/Adviser.
Sherwood Diversified Services, Inc., 770 King Street, Port Chester, New York 10573—Sole Stockholder.

Mr. Russo is an officer, director and owner of 10 percent or more of the issued and outstanding stock of Sherwood Diversified Services, Inc.

Matters involved in SBA's consideration of the Application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the Applicant under their management, including adequate profitability and financial soundness in accordance with the Act and SBA Regulations.

Notice is hereby given that any person, may not later than September 19, 1979, submit written comments on the Applicant to the Acting Associate Administrator for Finance and Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of the Notice shall be published by the Applicant in a newspaper of general circulation in New York, New York.

DEPARTMENT OF STATE

Agency for International Development

Board for International Food and Agricultural Development; Meeting

Pursuant to Executive Order 11769 and the provisions of Section 10(a), (2), Pub. L. 92-463, Federal Advisory Committee Act, notice is hereby given of the thirty-first meeting of the Board for International Food and Agricultural Development (BIFAD) on September 27, 1979.

The purpose of the meeting is to: receive and discuss the progress reports of the Joint Research Committee (JRC) and the Joint Committee for Agricultural Development (JCAD); discuss the status of the Nutrition Collaborative Research Support Program (CRSP) and the less Developed Country (LDC) research sites; discuss AID's programming and contracting process, including host country contracting; and discuss the progress report of the BIFAD study of AID's Agricultural Manpower requirements.

The meeting will begin at 9:00 a.m. and adjourn at 4:00 p.m.; and will be held in Room 1406 New State Department Building, 22nd and C Streets, NW., Washington, D.C. The meeting is open to the public. Any interested person may attend, may file written statements with the Board before or after the meeting, or may present oral statements in accordance with procedures established by the Board, and to the extent the time available for the meeting permits. An escort from the "C" Street Information Desk (Diplomatic Entrance) will conduct you to the meeting room.

Dr. Erven J. Long, Director, Office of Title XII Coordination and University Relations, Development Support Bureau, A.I.D., is designated as A.I.D. Advisory Committee Representative at the meeting. It is suggested that those desiring further information write to him in care of the Agency for International Development, State Department, Washington, D.C. 20523, or telephone him at (703)-235-8929.

Dated: August 23, 1979.

Erven J. Long,

A.I.D. Advisory Committee Representative Board for International Food and Agricultural Development.

BILLING CODE 4710-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Reduction of Nonessential Federal Expenditures for the National Airport and Airway System; Request for Recommendations From Users

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of request for recommendations.

SUMMARY: This notice requests and is intended to elicit, recommendations from the users of the national airport and airway system on methods of reducing nonessential Federal expenditures for aviation. Congressional legislation requires annual consultation with the users of this system.

DATE: Recommendations should be received on or before January 2, 1980.

ADDRESS: Send recommendations in duplicate to: Federal Aviation Administration, Office of Management Systems, AMS-500, 800 Independence Avenue, S.W., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: Leonard B. Bell, Chief, Management Analysis Division (AMS-500), Federal Aviation Administration, 800 Independence Avenue, S.W., Washington, D.C. 20591, Telephone 202-426-8060.

SUPPLEMENTARY INFORMATION:

Availability of Notice of Request for Recommendations

Any person may obtain a copy of this notice of request for recommendations by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, S.W., Washington, D.C. 20591 or by calling 202-426-8058.

Discussion

Section 25 of the Airport and Airway Development Act Amendments of 1976 (49 U.S.C. 1704) provides as follows:

The Secretary of Tranportation shall, in accordance with this section, attempt to reduce, to the maximum extent practicable consistent with the highest degree of aviation safety, the capital, operating, maintenance costs of the national airport and airway system. The Secretary shall, at least annually, consult with and give due consideration to the views of users of such system on methods of reducing nonessential Federal expenditures for aviation. The Secretary shall give particular attention to any recommendations which could reduce, without adverse effects on safety, future Federal manpower requirements and costs which are required to be recouped from charges on such users.

By 1.47(f)(3) of the regulations of the Office of the Secretary of Transportation, the authority of the Secretary of Transportation in section 25 is delegated to the Administrator of the Federal Aviation Administration.

The last request for user views pursuant to section 25 was published in the **Federal Register** on October 5, 1978 (43 FR 46105). That notice drew 60 suggestions from 13 users, including two

V 44 / 172 SEP 4 79

major organized user groups. The area of principal interest shown by these users were:

The way the Federal government organizes its aviation weather gathering activity and disseminates weather data to aviation users, the hours of operation of low activity air traffic facilities, the use of the FAA air carrier inspectors, the rulemaking and certification process, the operation of the facilities maintenance program, the need to simplify the Airport Development Aid program (ADAP), the need to resolve the wake vortex problem and the need to reduce the paperwork affecting the aviation public.

The Administrator gave due consideration to all views and also advised users that the FAA has many significant activities underway that bear directly on the suggestions the users made. Some of the more significant actions included:

(1) Review of low activity control towers to determine whether any should be decommissioned.

(2) Automated terminal service.

(3) Provision for direct user access to aviation weather and flight data products to reduce personal weather briefings.

(4) Provision in the current budget for the remote maintenance monitoring of existing remote communications facilities and preparation of a contract to obtain the equipment necessary for implementation.

(5) The conduct of tests at O'Hare Airport to expedite integration of design of Low Level Wind Shear Alerting System with the Vortex Advisory System.

(6) A number of organizational changes in the Washington headquarters organization which reduces the number of organizational elements reporting to the Administrator and streamlines the Washington headquarters.

Accordingly, views and recommendations of users of the national airport and airway system are solicited on methods of reducing nonessential Federal expenditures for aviation and, in particular, of reducing, without adverse effects on safety, future Federal manpower requirements and costs which are required to be recouped from users.

(Section 25, Airport and Airway Development Act Amendments of 1976 (49 U.S.C. 1704); sec. 1.47(f)(3), Regulations of the Office of the Secretary of Transportation (49 CFR 1.47(f)(3)).

Issued in Washington, D.C. on August 27, 1979.

Elden P. Nootenboom,

Acting Director, Office of Management Systems.

BILLING CODE 4910-13-M

National Highway Traffic Safety Administration

Calendar of Meetings Open to the Public

Below is a list of NHTSA-sponsored meetings which are planned over the next 2 years and in which public interest or participation is expected. The list, which will be revised and republished periodically, is for planning. Meeting dates and places, particularly those scheduled for the second year, are subject to change.

September 18, 1979

Public hearing on safety related defects in several components of 1971–1974 and 1976–1978 Capris imported by Ford Motor Company

10:00 a.m.
DOT Headquarters Building, Room 2230, 400 Seventh Street, S.W., Washington, D.C.
Purpose: To permit Ford Motor Company and other interested parties to present data, views and arguments concerning an NHTSA determination that the front seat backs of 1971–1974 Capris, the headlight switches in 1971–1972 models, and the floor-mounted gear shift levers in 1971–1974 and 1976–1978 models equipped with manual transmissions are subject to failure, which can result in injuries, deaths and property damage.
Coordinator: JoAnn Murianka, Enforcement (NEF–01), 202–426–2850.

September 19–21, 1979

Occupant protection workshop for State officials

Seattle, Washington.
Purpose: The NHTSA manual on safety belt usage prepared to assist States to develop comprehensive Safety Belt Usage programs will be introduced to appropriate State officials.
Coordinator: James L. Nichols, Traffic Safety Programs (NTS–14), 202–426–2180.

September 24, 1979

Evaluation of feasibility of a single beam headlighting system; final contractor briefing

DOT Headquarters Building, Room 2230, Washington, D.C.
Purpose: To report results of a research study designed to determine the parameters of beam patterns for improved low beam headlamps.
Coordinator: Michael Perel, Research and Development (NRD–41), 202–755–8753.

September 26, 1979

Public hearing on Fiat Rusting Defects

DOT Headquarters Building, Room 2230, Washington, D.C.
Purpose: To determine Whether Fiat has reasonably met its obligations in carrying out a recent recall campaign for excessive rust and corrosion on the undercarriage of its 1970–1971 Model 850 Spyder vehicles. In addition, the hearing will address NHTSA's recent reinstatement of an initial determination that a safety related defect exists in 1970–1974 Fiat Model 124 vehicles due to a similar rusting problem. Interested parties, including consumers, will be given the opportunity to present testimony, data and information on both issues.
Coordinator: JoAnn Murianka, Enforcement (NEF–01), 202–426–2850.

September 27–28, 1979

National Highway Safety Advisory Committee, orientation for new members

DOT Headquarters Building, Washington, D.C.
Purpose: Orientation session on various aspects of highway safety for members of the National Highway Safety Advisory Committee and other interested individuals.
Coordinator: Robert Doherty, Executive Secretariat (NOA–11), 202–426–2872.

October 4, 1979

Public Hearing on GM jack defects.

10:00 a.m.
DOT Headquarters Building, Room 2230, Washington, D.C.
Purpose: Determination has been made that a safety related defect exists in the original equipment jack provided with certain 1975 and 1976 Chevrolet and GMC light duty trucks. This meeting has been scheduled to allow General Motors to present its data, views and arguments in the case. Interested individuals also will have the opportunity to present their views and persons who want to participate in the meeting should contact meeting coordinator before September 28 to schedule their presentations.
Coordinator: JoAnn Murianka, Enforcement (NEF–01), 202–426–2850.

October 1979–December 1980

NHTSA-Public-Industry technical meetings

EPA Environmental Laboratory Facility, Ann Arbor, Michigan.
Purpose: Technical, interpretative or procedural questions from the public and industry regarding NHTSA's bumper, vehicle safety and consumer information program will be answered. Questions may relate to the research and development, rulemaking, or enforcement (including defects) phases of these activities. Scheduled meetings for 1979: *October 10 and December 5.* In addition, four meetings are planned for 1980, to be held three months apart, alternating between Washington, D.C. and Ann Arbor, Michigan.
Coordinator: Wm. H. Marsh, Executive Secretariat (NOA–10), 202–426–2872.

October 23–25, 1979

National Highway Safety Advisory Committee meeting

DOT Headquarters Building, Washington, D.C.
Purpose: Progress reports of the Committee's task forces will be heard. Reports and recommendations for the Secretary of Transportation may be prepared.
Coordinator: Robert Doherty, Executive Secretariat (NOA–11), 202–426–2872

October 31–November 2, 1979

Fatal accident reporting system annual workshop

Phoenix, Arizona.
Purpose: To solve interpretation and operations problems and to provide a mechanism for installing system changes and updating training. This is a regularly scheduled working meeting of FARS State Analysts and NHTSA regional and headquarters technical managers.
Coordinator: Robert Schweitz, Research and Development (NRD–33), 202–426–4844.

October 31–November 2, 1979

International Conference on Automotive Fuel Economy Research

Sheraton National Hotel, Arlington, Virginia.
Purpose: This first International Conference on fuel economy will allow all interested countries to present their fuel economy research programs, exchange information, meet their counterparts and discuss mutual problem areas with the goal of improving cooperative efforts among the countries participating.
Coordinator: James C. Shively, Research and Development (NRD–10), 202–426–2957.

November 7–8, 1979

Biomechanics Advisory Committee meeting

DOT Headquarters Building, Washington, D.C.
Purpose: This Committee reviews NHTSA's procedures, programs and projects requiring the use of live and deceased humans for research in order to validate the need for such use, to minimize the risk of injury to volunteers, and to assure the rights and dignity of the subjects.
Coordinator: Kathy Hasse, Executive Secretariat (NOA–11), 202–426–2872.

November 1979

Public hearing on proposed light truck average fuel economy standard

Washington, D.C.
Purpose: Public comments on the proposed fuel economy standard for light trucks and vans will be received.
Coordinator: Frank Turpin, Rulemaking (NRM–12), 202–472–6902.

December 10–12, 1979

National Conference on Child Passenger Protection

Sheraton-Park Hotel, Washington, D.C.
Purpose: Specialists in the field of highway safety and child development will meet to exchange information on ways to increase the use of child restraints designed for motor vehicles.
Coordinator: Elaine Winestein, Traffic Safety Programs (NTS–14), 202–426–2180.

December 12–13, 1979

Side Impact Protection Conference

FAA Auditorium, Seventh and Independence Avenue, S.W., Washington, D.C.
Purpose: To provide a public forum for the exchange of information on side impact protection and to inform the public, press, and industry of the status of the NHTSA rulemaking activities in upgrading side impact protection.
Coordinator: William C. Brubaker, Rulemaking (NRM–12), 202–426–2242.

January 1980

Motorcycle accident factors research

DOT Headquarters Building, Washington, D.C.
Purpose: Results of a research study to determine the cause of motorcycle accidents, the causes of injuries, the severity of the injuries and effective methods of reducing accidents, deaths, and injuries will be reported.
Coordinator: Nicholas G. Tsongos, Research and Development (NRD–32), 202–426–4820.

January 15–17, 1980

National Highway Safety Advisory Committee Meeting

DOT Headquarters Building, Washington, D.C.
Purpose: Progress reports of the Committee's task forces will be heard. Reports and recommendations for the Secretary of Transportation may be prepared.
Coordinator: Robert Doherty, Executive Secretariat (NOA–10), 202–426–2872.

January or February 1980

Hearing on pedestrian initial impact protection rulemaking

DOT Headquarters Building, Washington, D.C.
Purpose: Government and private sector response to an NPRM on Pedestrian Safety will be received
Coordinator: Samuel Daniel, Rulemaking (NRM–12), 202–426–2264.

January or February 1980

International symposium on automobile ratings

Washington, D.C.
Purpose: To exchange information on the "state-of-the-art" of automobile ratings. The Symposium will provide a forum for an in-depth examination of the various methods used to rate crashworthiness, damageability and ease of diagnosis and repair. Experienced technical experts, rating groups, insurance and auto industry representatives and consumer representatives will present their views on current and proposed ways used to rate automobiles.
Coordinator: Jack Gillis, Rulemaking (NRM–30), 202–426–1740.

April 1980

Symposium on vehicle aggressivity and compatibility

Washington, D.C.
Purpose: Research on vehicle aggressivity and improved compatibility will be presented. Techniques for testing compliance with vehicle compatibility requirements will be discussed.
Coordinator: James R. Hackney, Research and Development (NRD–12), 202–426–4882.

June 17–19, 1980

National Highway Safety Advisory Committee meeting

DOT Headquarters Building, Washington, D.C.
Purpose: Progress reports of the Committee's task forces will be heard. Reports and recommendations for the Secretary of Transportation may be presented.
Coordinator: Robert Doherty, Executive Secretariat (NOA–11), 202–426–2872.

October 1980

Eighth international technical conference on experimental safety vehicles

Wolfsburg, West Germany
Purpose: The ESV Conferences are conducted to provide a forum for exchanging the results of integrated vehicle development. Various automobile manufacturers, as well as NHTSA Contractors, have designed and developed vehicles which incorporate advanced systems to satisfy national goals in safety, fuel economy, and vehicle emissions. This meeting will be hosted by the Federal Republic of Germany. The Governments of the Federal Republic of Germany, France, Great Britain, Italy, Japan, Sweden and the United States as well as manufacturers of those countries and others will participate.
Coordinator: James C. Shively, Research and Development (NRD–10), 202–426–2957.

October 25–27, 1980

Fatal accident reporting system annual workshop

(Location Undetermined)
Purpose: To solve interpretation and operations problems and to provide a mechanism for installing system changes and updating training. This is a regularly scheduled working meeting of FARS State Analysts and NHTSA regional and headquarters technical managers.
Coordinator: Robert Schweitz, Research and Development (NRD–33), 202–426–4844.

November 1980

Symposium on Motor Vehicle Fuel Economy Research: Contractors' Coordination Meeting

(Location Undetermined)
Purpose: Progress reports on the contracts which have been funded through the Automotive Fuel Economy Research Program will be given. How individual tasks fit into the research and rulemaking program and the thrust of the Automotive Fuel Economy Program will be explained.
Coordinator: Charles Gauthier, Research and Development (NRD–31), 202–426–0289.

UMI

April 1981

Second International Conference on automotive fuel economy

(Location Undetermined)

Purpose: Government Status Reports on Automotive Transportation Conservation Programs and reports of research in automotive technology for improved fuel economy will be presented.

Coordinator: James C. Shively, Research and Development (NRD–10), 202–426–2957.

Persons desiring additional information on a particular meeting may write or phone the coordinator indicated above at the following address: The National Highway Traffic Safety Administration, Department of Transportation, 400 Seventh Street, S.W., Washington, D.C. 20590.

Issued in Washington, D.C. on August 29, 1979.

Wm. H. Marsh,

Executive Secretary.

BILLING CODE 4910–59–M

Federal Motor Vehicle Safety Standards; Denial of Petition for Rulemaking

AGENCY: National Highway Traffic Safety Administration, (NHTSA).

ACTION: Denial of petition for rulemaking.

SUMMARY: This notice explains the denial of a petition for rulemaking submitted by Mr. Cyrus Michaels to require Pontiac Motor Division to equip its passenger cars having power steering and power brakes with mechanical steering and braking "back-up" systems. This notice is published in accordance with section 124 of the National Traffic and Motor Vehicle Safety Act which provides that the reasons for petition denials shall be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Duane Perrin, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street, S.W., Washington, D.C. 20590 (202–426–2153).

SUPPLEMENTARY INFORMATION: A petition submitted by Mr. Cyrus Michaels stated that while his wife was driving a 1974 Pontiac Grand Prix the engine stalled and caused a power loss to the steering and braking systems. The petition stated that vehicle power loss is a dangerous and common problem, and requested rulemaking to require mechanical steering and braking "back-up systems" for all Pontiac cars equipped with power steering and power brakes.

The agency agrees that power braking systems should be operable under failed-power situations. However, braking regulations currently in effect already require this capability. Safety Standard No. 105–75, *Hydraulic Brake Systems* (49 CFR 571.105–75), established a failed-power brake system requirement for all passenger cars manufactured on or after January 1, 1976. This requirement specifies that an automobile traveling 60 mph shall be capable of stopping within 456 feet under a failed-power situation, with a pedal force not to exceed 150 pounds. Unfortunately, however, the requirement was not applicable to a 1974-model Pontiac.

The NHTSA's Office of Defects Investigation and National Center for Statistics and Analysis have recently conducted a search of their Consumer Letter Complaint File and accident investigation data bank. This search failed to provide a significant number of reports from owners of 1972 through 1976 Pontiacs (or comparable General Motors models) alleging loss of steering and braking power due to vehicle engine stalling. Those complaints that were filed, however, showed the problem to be more prevalent on later model vehicles, possibly due to emission control effects on cold engine driveability (stalling).

Regarding vehicle steering systems, recent NHTSA research entitled "Power Steering Failure Study" showed that the effort required to steer a passenger car after a loss of power to the steering system is not beyond the capabilities of the average vehicle operator. (NHTSA Technical Reference Section, HS–803–032). The study showed that the "surprise factor" to the vehicle operator is the most significant result from loss of steering power.

In consideration of the foregoing, the petition by Mr. Cyrus Michaels is hereby denied. The NHTSA will continue to monitor this subject and may consider further rulemaking at some future date if the problem appears to be worsening.

(Secs. 103, 119, Pub. L. 89–563, 80 Stat. 718 (15 U.S.C. 1392, 1407); sec. 106 Pub. L. 93–492, 88 Stat. 1482 (15 U.S.C. 1410a); delegations of authority at 49 CFR 1.50 and 501.8)

Issued on August 28, 1979.

A. C. Malliaris,

Acting Associate Administrator for Rulemaking.

National Highway Safety Advisory Committee; Orientation Sessions

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C. App. I), notice is hereby given of an orientation session for members of the National Highway Safety Advisory Committee and other interested individuals. The sessions will be held at the DOT Headquarters Building in room 8334 on September 28 and 29 starting at 8:00 a.m. on both days.

The sessions will consist of an overview of highway safety programs and the interaction among the National Highway Traffic Safety Administration, the Federal Highway Administration, and the National Transportation Safety Board.

Attendance is open to the interested public but limited to the space available. This orientation session is subject to the approval of the appropriate DOT officials. Additional information may be obtained from the NHTSA Executive Secretary, Room 5221, 400 Seventh Street, S.W., (DOT Headquarters Building), Washington, D.C. 20590, telephone 202–426–2872.

Issued in Washington, D.C. on August 28, 1979.

Wm. H. Marsh,

Executive Secretary.

Research and Special Programs Administration

Applications for Exemptions

AGENCY: Materials Transportation Bureau, DOT.

ACTION: List of Applicants for Exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Regulations of the Materials Transportation Bureau has received the application described herein.

DATES: Comment period closes October 4, 1979.

ADDRESS COMMENTS TO: Dockets Branch, Information Services Division, Materials Transportation Bureau, U.S. Department of Transportation, Washington, D.C. 20590.

Comments should refer to the application number and be submitted in triplicate.

FOR FURTHER INFORMATION: Copies of the applications are available for inspection in the Dockets Branch, Room 8426, Nassif Building, 400 Seventh Street, S.W., Washington, D.C.

Each mode of transportation for which a particular exemption is requested is indicated by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft.

New Exemptions

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8260–N	Bayonne Barrel & Drum Co., Newark, N.J.	49 CFR 173.28(o), 178.118–10(a)	To authorize conversion of non-DOT specification tight head 18 gauge steel 55-gallon drums to DOT Specification 17H except for location of markings, for shipment of all commodities presently authorized in a DOT Specification 17H drum. (Modes 1, 2, 3, 4.)
8261–N	Dept. of Army, Washington, D.C.	49 CFR 173.62	To authorize shipment of nitrocellulose nitroglycerin in two-gallon capacity polyethylene jugs sealed with rubber stoppers overpacked in a DOT 15M container. (Mode 1.)
8262–N	Battelle Memorial Institute, Richland, Wash.	49 CFR 173.392(d)(1)(iv)	To authorize a one-time only shipment of part of a pressurized water reactor system generator internally contaminated with 120–180 curies of Group III and Group IV radionuclides at approximately 0.003 millicuree per square centimeter as a radioactive material, low specific activity, n.o.s. (Mode 3.)
8263–N	Hercules Inc., Wilmington, Del	49 CFR 173.93	To authorize shipment of a propellant explosive, liquid, class B in a 4 mil polyethylene bag overpacked in a DOT Specification 12H fiberboard box (BA–3000). (Mode 1.)
8264–N	Hercules Inc., Wilmington, Del	49 CFR 713.93	To authorize shipment of propellant explosives, solid, classed as either explosive B or flammable solid, in various types of inside fiber containers, overpacked in DOT–12B boxes or DOT–21C drums (BA–1709 and BA–1709A). (Modes 1, 4.)
8265–N	Hercules Inc., Wilmington, Del	49 CFR 173.93	To authorize shipment of propellant explosives, solid classed as either explosive B or flammable solid, in various types of inside fiber containers overpacked in DOT–12B boxes or DOT–21C drums (BA–3003 and 3003A). (Modes 1, 4.)

This notice of receipt of applications for new exemptions is published in accordance with Section 107 of the Hazardous Materials Transportation Act (49 CFR U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, D.C., on August 29, 1979.

J. R. Grothe,

Exemptions Branch, Office of Hazardous Materials Regulation, Materials Transportation Bureau.

[Notice No. 79–6]

Commerce in Explosives; List of Explosive Materials

Correction

In Fr Doc. 79–26655, published at page 50422, on Tuesday, August 28, 1979, the following corrections should be made:

1. On page 50423:

a. In the first column, under "E", in the sixth line, "EDGN" should be corrected to read "EGDN";

b. In the first column, under "E", in the 20th line, "Explosive mixtures containing sentitized" should be corrected to read "Explosive mixtures containing sensitized";

c. In the first column, under "F", between the sixth and seventh lines "*G*" should be placed to differentiate the Section G from Section H;

d. In the first column, under "H", in the fifth line, "Hexogen or octogene and a nitrated H-" should be corrected to read "Hexogene or octogene and a nitrated N-";

e. In the second column, under "M", in the first line "Nagnesium" should be corrected to read "Magnesium";

f. In the second column, under "M", in the ninth line "Mononitrotoluene-nitroglycer in mixture" should be corrected to read "Mononitrotoluene-nitroglycerin mixture";

g. In the second column, unde "O", in the fourth line "Organ nitramines" is corrected to read, "Organic nitramines";

h. In the second column, under "P", in the first line "[RDX and Plasticizer]" should be corrected to read "[RDX and plasticizer]";

i. In the second column, under "P", in the seventh line, "nitropentraerythrite . . ." should be corrected to read "nitropentaerythrite . . .";

j. In the third column, under "S", in the last line of the section, "Styphinc acid" should be corrected to read "Styphnic acid";

k. In the third column, under "T", in the third line, "TATB Triaminotrinitrobenzene" should be corrected to read "TATB triaminotrinitrobenzene";

2. On page 50424, in the first column, in the first line, "Signed: July 11, 1979" should be corrected to read "Signed: July 16, 1979";

3. On page 50424, in the first column, the signature "J. R. Dickerson" should be corrected to read "G. R. Dickerson".

BILLING CODE 4810-40-M

Cadmium From Japan; Antidumping; Tentative Determination To Modify or Revoke Dumping Finding

AGENCY: U.S. Treasury Department.

ACTION: Tentative Modification or Revocation of Finding of Dumping.

SUMMARY: This notice is to advise the public that it appears that cadmium from Japan is no longer being sold to the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended. Sales at less than fair value generally occur when the price of merchandise sold for exportation to the United States is less than the price of such or similar merchandise sold in the home market or to third countries. If this action is made final, imports of this merchandise from Japan on or after the effective date of this notice will no longer be liable for special dumping duties under the Antidumping Act, 1921. Interested persons are invited to comment on this action.

EFFECTIVE DATE: September 4, 1979.

FOR FURTHER INFORMATION CONTACT: Steve Garment, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202–566–5492).

SUPPLEMENTARY INFORMATION: A finding of dumping with respect to cadmium from Japan was published as Treasury Decision 72–206 in the **Federal Register** of August 4, 1972 (37 FR 15700).

After due investigation it has been determined tentatively that cadmium from Japan is no longer being, nor is likely to be, sold to the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 *et seq.*).

Statement of Reasons on Which This Tentative Determination is Based

There have been no shipments of cadmium from Japan since April 1974, and no imports of such product into the U.S. since May, 1974. Futhermore, there are no unliquidated entries of such merchandise.

Accordingly, notice is hereby given that the Department of the Treasury intends to revoke the finding of dumping on cadmium from Japan.

In accordance with § 153.40 Customs Regulations (19 CFR 153.40), interested persons may present written views or arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views. A copy of all submissions should be delivered to any counsel who has heretofore represented any parties in these proceedings.

Any requests that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 1301 Constitution Avenue, NW., Washington, D.C. 20229, in time to be received by his office not later than September 19, 1979. Such requests must be accompanied by a statement outlining the issues wished to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office not later than October 4, 1979.

This notice is published pursuant to § 153.44(4) of the Customs Regulations (19 CFR 153.44(c)).

David R. Brenner,

Acting General Counsel of the Treasury.

August 27, 1979.

BILLING CODE 4810-22-M

Portland Cement From Sweden; Antidumping; Tentative Determination To Modify or Revoke Dumping Finding

AGENCY: U.S. Treasury Department.

ACTION: Tentative Revocation of Finding of Dumping.

SUMMARY: This notice is to advise the public that it appears that portland cement, other than white, nonstaining portland cement, in bulk, from Sweden is no longer being sold to the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended. Sales at less than fair value generally occur when the price of the merchandise sold for exportation to the United States is less than the price of such or similar merchandise sold in the home market or to third countries. In addition, the sole manufacturer has given assurances that they are not, and do not intend to resume, selling portland cement, other than white, nonstaining portland cement, in bulk, from Sweden to the United States at less than fair value. Notice is hereby given that the Department of the Treasury intends to revoke this finding. If this action is made final, the finding of dumping covering the subject merchandise from Sweden will be revoked. Interested persons are invited to comment on this action.

EFFECTIVE DATE: September 4, 1979.

FOR FURTHER INFORMATION CONTACT: Al Jemmott, Trade Analysis Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202–566–5492).

SUPPLEMENTARY INFORMATION: A finding of dumping with respect to portland cement, other than white, nonstaining portland cement, in bulk, from Sweden was published as Treasury Decision 55369 in the **Federal Register** on April 14, 1961 (26 FR 3427). On August 15, 1978, the Commissioner of Customs received a petition in proper form on behalf of the Swedish firm of Cementa A.B., requesting the revocation of the dumping finding pursuant to § 153.44(a), Customs Regulations (19 CFR 153.44(a)).

After due investigation, it has been determined tentatively that portland cement, other than white, nonstaining portland cement, in bulk, from Sweden is no longer being, nor likely to be, sold to the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 *et seq.*).

Statement of Reasons on Which This Tentative Determination Is Based

The investigation indicated that there have been no sales of portland cement, other than white, nonstaining portland cement, in bulk, from Sweden to the United States since 1975, and the sole manufacturer has given assurances that they do not intend to resume sales of this merchandise to the United States at less than fair value.

Accordingly, notice is hereby given that the Department of the Treasury intends to revoke the finding of dumping with respect to portland cement, other than white, nonstaining portland cement, in bulk, from Sweden.

In accordance with § 153.40, Customs Regulations (19 CFR 153.40), interested persons may present written views or arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any requests that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 1301

Constitution Avenue, NW., Washington, D.C. 20229, in time to be received by his office not later than September 19, 1979. Requests must be accompanied by a statement outlining the issues wished to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office not later than October 4, 1979. All persons submitting views or arguments should avoid repetitious and merely cumulative material, and they are reminded of the requirement to include nonconfidential summaries or approximated presentations of all confidential material.

This notice is published pursuant to § 153.44(c) of the Customs Regulations (19 CFR 153.44(c)).

David R. Brennan,

Acting General Counsel of the Treasury.

August 27, 1979.

Motor Carrier Temporary Authority Applications

Correction

In FR Doc. 79–23657 appearing on page 45283 in the issue of Wednesday, August 1, 1979, make the following corrections:

(1) In the third column of page 45283, below the heading "Motor Carriers of Property" insert the designation "Volume No. 127".

(2) In the third column of page 45290, directly above the paragraph for MC 134289, insert the designation "Volume No. 138".

BILLING CODE 1505-01-M

[Notice No. 149]

Motor Carrier Temporary Authority Applications

August 16, 1979.

Important Notice: The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount the type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

BILLING CODE 7035-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Rehabilitation and Betterment Program, Yakima-Tieton Irrigation District, Washington; Intent To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior intends to prepare an environmental impact statement on the proposed rehabilitation and betterment of the irrigation facilities of the Yakima-Tieton Irrigation District (YTID) near Yakima, Washington.

The Yakima-Tieton Irrigation District proposes to repalace its 70-year-old open canal irrigation distribution system with a new pressure pipe distribution system. The new system would replace the existing and open canal system with over 200 miles of pipeline. The size of pipe will range from 4 inches to 90 inches in diameter. A regulating reservoir would be constructed at the head of the distribution network. The earthen dam would be approximately 46 feet high and the reservoir would inundate about 23 acres. The new system would require three booster pump stations to provide adequate water pressure to agricultural lands at higher elevation in the district. The pump station power demands would be offset by two in-line hydropower plants in the system. Their total power output of 2,000 kilowatts would more than offset the pumping power demands of the pump stations.

The environmental impact statement will consider the impact of all of the project alternatives. These alternatives include: (1) full pressure system for irrigation service, (2) full presure system modified to provide frost protection to growers willing to pay for the added costs involved, (3) full pressure system for irrigation service with added hydropower production, and (4) a program to rehabilitate portions of the existing canal and pipeline system. The more significant environmental concerns include removal of riparian habitat associated with the existing open canal distribution system and the related effects on wildlife, creation of a small equalizing reservoir to provide controlled flows within the system, impacts during construction, and potential land use changes.

Environmental studies, preparation, and processing of an environmental impact statement for this proposed project will be in accordance with provisions of the National Environmental Policy Act of 1969, and will be accomplished under the Council on Environmental Quality regulations published in the **Federal Register** on November 29, 1978. Accordingly, we are soliciting the participation of Federal, State, and local agencies, affected private groups, and individuals in the determination of significant environmental items to ba analyzed.

An environmental assessment was prepared in 1978 and distributed for review by Federal, State, and local governmental agencies, and other interested organizations. Meetings were held with concerned Federal, State, and local agencies on February 13, 1979, to discuss the scope of the environmental impact statement. Further public meetings and interagency coordination activities will be announced locally as they are scheduled. To further assure that the full range of issues related to this proposal are discussed in the environmental impact statement and all significant issues are identified, comments and suggestions are invited. Interested agencies, organizations, and individuals should write to or contact the Bureau of Reclamation at the address provided below. The contact persone will be:

Douglas J. James, Environmental Statement Coordinator, Bureau of Reclamation, Pacific Northwest Region, Box 043, 550 West Fort Street, Boise, ID 83724, Telephone: 208-384-1208.

Dated: August 24, 1979.

Orrin Ferris,

Acting Commissioner of Reclamation.

BILLING CODE 4310-09-M

Bureau of Land Management

[AA-9205-C and AA-9205-D]

Alaska Native Claims Selection; Decision of August 17, 1979, to Issue Conveyance Amended

The purpose of this decision is to amend the description of lands within Sec. 20, T. 36 S., R. 63 E., Copper River Meridian in the decision dated August 17, 1979.

The description for Sec. 20 now reads:

T. 36 S., R. 63 E., Copper River Meridian;
Sec. 20 (fractional), all.

The description is hereby corrected and amended to read as follows:

T. 36 S., R. 63 E., Copper River Meridian;
Sec. 20 (fractional), excluding Regional 14(h)(1) application AA-10505.

This decision corrects and amends only the description of lands within Sec. 20, T. 36 S., R. 63 E., Copper River Meridian. All other terms and conditions of the August 17, 1979, decision remain unchanged.

Sue Wolf,

Chief, Branch of Adjudication.

BILLING CODE 4310-84-M

Heritage Conservation and Recreation Service

National Register of Historic Places; Additions, Deletions, and Corrections

By notice in the **Federal Register** of February 6, 1979, Part II, there was published a list of the properties included in the National Register of Historic Places. Further notice is hereby given that certain amendments or revisions in the nature of additions, deletions, or corrections to the previously published list are adopted as set out below.

It is the responsibility of all Federal agencies to take cognizance of the properties included in the National Register as herein amended and revised in section with accordance 106 of the National Historic Preservation Act of 1966, 80 Stat. 16 U.S.C. 470 et seq. (1970 ed.), and the procedures of the Advisory Council on Historic Preservation, 36 CFR Part 800.

Charles A. Herrington,

Acting Keeper of the National Register.

The following list of properties has been added to the National Register of Historic Places since notice was last given in the February 6, 1979, **Federal Register.** National Historic Landmarks are designated by NHL; properties recorded by the Historic American Buildings Survey are designated by HABS; properties recorded by the Historic American Engineering Record are designated by HAER: properties receiving grants-in-aid for historic preservation are designated by G.

* * * * *

Determinations of eligibility are made in accordance with the provisions of 36 CFR 63, procedures for requesting determinations of eligibility, under the authorities in section 2(b) and 1(3) of Executive Order 11593 and section 106 of the National Historic Preservation Act of 1966, as amended, as implemented by the Advisory Council on Historic Preservation's procedures, 36 CFR Part 800. Properties determined to be eligible under section 63.3 of the procedures for requesting determinations of eligibility are designated by 63.3.

Properties which are determined to be eligible for inclusion in the National Register of Historic Places are entitled to protection pursuant to section 106 of the National Historic Preservation Act of 1966, as amended, and the procedures of the Advisory Council on Historic Preservation, 36 CFR Part 800. Agencies are advised that in accord with the procedures of the Advisory Council on Historic Preservation, before an agency of the Federal Government may undertake any project which may have an effect on an eligible property, the Advisory Council on Historic Preservation shall be given an opportunity to comment on the proposal.

The following list of additions, deletions, and corrections to the list of properties determined eligible for inclusion in the National Register is intended to supplement the cumulative version of that list published in February of each year.

DEPARTMENT OF LABOR

Office of the Secretary

Advisory Council on Employee Welfare and Pension Benefit Plans; Announcement of Vacancies; Request for Nominations

Section 512 of the Employee Retirement Income Security Act of 1974 (ERISA) 88 Stat. 895, 29 U.S.C. 1142, provides for the establishment of an "Advisory Council on Employee Welfare and Pension Benefit Plans" (the Council) which is to consist of 15 members to be appointed by the Secretary of Labor (the Secretary) as follows: Three representatives of employee organizations (at least one of whom shall be representative of an organization whose members are participants in a multiemployer plan); three representatives of employers (at least one of whom shall be representative of employers maintaining

or contributing to multiemployer plans); one representative each from the fields of insurance, corporate trust, actuarial counseling, investment counseling, investment management, and accounting; and three representatives from the general public (one of whom shall be a person representing those receiving benefits from a pension plan). Not more than eight members of the Council shall be members of the same political party.

Members shall be persons qualified to appraise the programs instituted under ERISA. Appointments are for terms of three years.

The prescribed duties of the Counsel are to advise the Secretary with respect to the carrying out of his functions under ERISA, and to submit to the Secretary recommendations with respect thereto. The Council will meet at least four times each year, and recommendations of the Council to the Secretary will be included in the Secretary's annual report to the Congress on ERISA.

The terms of five members of the Council expire on November 14, 1979. The groups or fields represented are as follows: Employee organizations (representing any organization members of which are participants in a multiemployer plan), employers, actuarial counseling, investment counseling, and the general public (representing those receiving benefits from a pension plan).

Accordingly, notice is hereby given that any person or organization desiring to recommend one or more individuals for appointment to the ERISA Advisory Council on Employee Welfare and Pension Benefit Plans to represent any of the groups or fields specified in the preceding paragraph may submit recommendations to the Secretary of Labor, New Department of Labor Building, 200 Constitution Avenue, NW., Washington, D.C. 20210.

Recommendations must be delivered or mailed by October 5, 1979.

Recommendations may be in the form of a letter, resolution, or petition, signed by the person making the recommendation, or, in the case of a recommendation by an organization, by an authorized representative of the organization. Each recommendation shall identify the candidate by name, occupation or position, and address. It shall include a brief description of the candidate's qualifications and shall specify the group or field which the candidate would represent for the purposes of section 512 of ERISA, the candidate's political party affiliation, and whether the candidate is available and would accept.

Signed at Washington, D.C. this 27th day of August 1979.

Ian D. Lanoff,

Administrator of Pension and Welfare Benefit Programs.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

Consolidation Coal Co. ("Conpaso Project")—Burnham Mine, San Juan County, N. Mex., Navajo Tribal Coal Lease No. N00–C–14–20–2190; Pending Decision to Approve Surface Mining and Reclamation Plan With Stipulations

AGENCY: Office of Surface Mining Reclamation and Enforcement.

ACTION: Notice of Pending Decision to Approve Proposed Surface Coal Mining and Reclamation Plan With Stipulations.

SUMMARY: Pursuant to Section 1506.6 of Title 40, Code of Federal Regulations, notice is hereby given that the Office of Surface Mining Reclamation and Enforcement (OSM) has completed an environmental review of the proposed mining and reclamation plan and has recommended approval of the plan with stipulations according to the Indian Coal Mining Regulations (25 CFR 177) and Section 710(c) of the Surface Mining Control and Reclamation Act of 1977. The Office has prepared a technical analysis (TA) and an environmental assessment (EA) and from these studies has determined that significant impacts that could ensue from the proposed operation have been addressed in the following impact statements (EIS's):

1. "Final Environmental Statement Navajo—El Paso/Consolidation Coal Lease and Mining Plan, Navajo Reservation, San Juan County, New Mexico (FES No. 77–13), May 11, 1977, Bureau of Indian Affairs."

2. "El Paso Coal Gasification Project, New Mexico Final Environmental Statement (FES No. 77–03), February 8, 1977, Bureau of Reclamation."

The proposed mine is located about 35 miles southwest of Farmington, New Mexico, and about 50 miles northeast of Gallup, New Mexico, within the Navajo Reservation

Location of Lands to be Affected

Applicant: Consolidation Coal Company
Mine name: Burnham
State: New Mexico
County: San Juan

Township, Range, Section

T.25N., R.16W.: 25, 36.
T.24N., R.16W.: 1, 2, 3, 10, 11, 12
T.25N., R.15W.: 28, 29, 30, 31, 32, 33
T.24N., R.15W.: 4, 5, 6, 7, 8

Office of Surface Mining Reference No.: NM 0005

The Mining and Reclamation Plan was submitted to OSM in October of 1978, and proposed coal mining in the northern portion of the Navajo lease area, and area of about 6,831 acres to be mined over a 38-year period (the total mine plan area is approximately 9,000 acres). The Burnham mining and reclamation plan does not address the remaining area of 40,287-acre Navajo lease. However, the U.S. Bureau of Indian Affairs (BIA) Final Environmental Impact Statement (FES No. 77–13) analyzed mining of 29,095 acres of the 40,287-acre lease that was proposed in a plan submitted to the USGS in 1975. In addition, the U.S. Bureau of Reclamation Final Environmental Impact Statement analyzed the effects of the proposed coal gasification plant and of the associated coal mining on the Navajo lease area.

According to the Burnham mining plan, coal is to be extracted at a rate of approximately 300,000 tons the first year, increasing to 750,000 tons, 1,000,000 tons, and 4,350,000 tons the second, third, and fourth years, respectively. Production for the fifth through the thirty-eighth year is anticipated at 6,400,000 tons per year. Total coal extraction would be approximately 244,000,000 tons during the projected life of the mine. Coal from the seams greater than three feet in thickness in four primary zones would be mined by a multiple seam dragline operation. Coal will be exported off-site by trucks using existing roads. The transportation route discussed in the plan is under evaluation by OSM.

The purpose of this notice is to inform the public that based on OSM staff review and analysis of the mining and reclamation plan, the Regional Director, Region V, Office of Surface Mining, is recommending approval of the Burnham mining plan with stipulations.

DATES: A final decision to approve or disapprove the proposed plan will be made by the Assistant Secretary, Indian Affairs, following a recommendation from the Assistant Secretary, Energy and Minerals. The Secretary's decision will consider the recommendations of OSM as well as the Navajo Tribal Council, the Bureau of Indian Affairs, the U.S. Geological Survey and any public comments received on or before September 24, 1979.

The technical analysis, environmental assessment, and proposed stipulations are available on request and for review

in the Office of Surface Mining, Region V. Any comments on the proposed approval should be submitted to the Regional Director, Region V, Office of Surface Mining, Room 217, 1823 Stout Street, Denver, Colorado 80202 no later than 20 days from the date of this notice. A public meeting with the Regional Director may be requested no later than September 24, 1979, and must include the name and address of the requestor.

FOR FURTHER INFORMATION CONTACT: Bob Starr or Mark Humphrey, Office of Surface Mining, Region V, Room 207, 1823 Stout Street, Denver, Colorado 80202.

Walter N. Heine,

Director.

BILLING CODE 4310-05-M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

National Advisory Committee on Occupational Safety and Health; Meeting

Notice is hereby given that the National Advisory Committee on Occupational Safety and Health (NACOSH) will meet on September 20-21, 1979 at the Departmental Auditorium, between 12th and 14th Streets on Constitution Avenue, NW., Washington, D.C. The meeting will begin at 9:00 a.m. The public is invited to attend.

The National Advisory Committee was established under section 7(a) of the Occupational Safety and Health Act of 1970 (Pub. L. 91-596) to advise the Secretary of Labor and the Secretary of Health, Education and Welfare on matters relating to the administration of the Act.

The morning of Thursday, September 20, will be devoted to presentations by OSHA staff members on the following subjects:

Regulatory Analysis
Voluntary Compliance, Enforcement Policy and Complaint Procedures, and Statutory Efforts To Establish Exemptions to the OSH Act

After hearig these presentations, the Committee will break up into two workgroups to discuss the issues and formulate recommendations. The workgroups will report their recommendations to the full Committee when it reconvenes on Friday.

Written data or views concerning these agenda items may be submitted to the Division of Consumer Affairs. Such documents which are received before the scheduled meeting dates, preferably with 20 copies, will be presented to the Committee and included in the official record of the proceedings.

Anyone who wishes to make oral presentation should notify the Division of Consumer Affairs before the meeting date. The request should include the amount of time desired, the capacity in which the person will appear and a brief outline of the content of the presentation. Oral presentations will be scheduled at the discretion of the chairman of the Committee to the extent which time permits.

For additional information contact: Clarence Page, Division of Consumer Affairs, Occupational Safety and Health Administration, Room N-3635, 3rd Street and Constitution Ave., NW., Washington, D.C. 20210, Telephone: 202-523-8024.

Offical records of the meetings will be available for public inspection at the Division of Consumer Affairs.

Signed at Washington, D.C., this 30th day of August 1979.

Eula Bingham,

Assistant Secretary of Labor.

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM.

TIME AND DATE: 10 a.m., Thursday, September 6, 1979.

PLACE: 20th Street and Constitution Avenue NW., Washington, D.C. 20551.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Summary Agenda

Because of their routine nature, no substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board requests that an item be moved to the discussion agenda.

1. Proposed purchase of computer equipment by the Federal Reserve Bank of San Francisco.
2. Request by the Commodity Futures Trading Commission for Board comment on the New York Futures Exchange applications to trade new futures contracts in three-month Treasury bills and long-term Treasury bonds.

Discussion Agenda

1. Proposed statement to be presented to the Subcommittee on Commerce, Consumer, and Monetary Affairs of the House Committee on Government Operations regarding advertising by financial institutions.
2. Congressional proposals relating to the Bank Holding Company Act and the Bank Merger Act.
3. Proposed 1980 Special System Objectives.
4. Any agenda items carried forward from a previously announced meeting.

Note.—This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by calling (202) 452-3684 or by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board (202) 452-3204.

Part III

Department of Health, Education, and Welfare

Food and Drug Administration

Medical Devices; Classification of Neurological Devices

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

21 CFR Part 882

[Docket No. 78N-1000]

Neurological Devices; General Provisions

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule regarding general provisions applicable to the classification of neurological devices. The preamble to this rule responds to general comments received on the proposals regarding classification of neurological devices. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of November 28, 1978 (43 FR 55640), FDA published a proposed regulation containing general provisions applicable to the classification of neurological devices. The preamble to the regulation described the development of the proposed regulaitons classifying neurological devices and the activities of the Neurological Device Classification Panel, an FDA advisory committee that makes recommendations to FDA concerning the classification of neurological devices. FDA also published in that issue of the **Federal Register** individual proposed regulations to classify 103 neurological devices. FDA provided a period of 60 days for interested persons to submit written comments on these proposals.

Exemptions for Class I Devices

FDA proposed to exempt four devices from the good manufacturing practice (GMP) regulations in Part 820 (21 CFR Part 820), including the recordkeeping and reporting requirements of Part 820. The four devices are the two-point discriminator (Docket No. 78N-1003), the esthesiometer (Docket No. 78N-1017), the tuning fork (Docket No. 78N-1018), and the percussor (Docket No. 78N-1025). Elsewhere in this issue of the **Federal Register,** the agency is publishing final rules for classification of these four devices. The final rule for each of these devices exempts the device from all parts of the GMP requirements with the exception of §§ 820.180 and 820.198 (21 CFR 820.180 and 820.198) relating to records and complaint files. The agency has determined that exemption of devices from §§ 820.180 and 820.198 of the GMP regulation would not be in the public interest. Moreover, compliance with these sections is not unduly burdensome for device manufacturers. The complaint file requirements of § 820.198 ensures that device manufacturers have adequate systems for complaint investigation and followup. The general requirements concerning records in § 820.180 ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, can determine whether the manufacturer's corrective actions are adequate, and can determine whether an exemption from other sections of the GMP regulation, if one has been granted, is still appropriate.

Comments on Classification Proposals

Elsewhere in this issue of the **Federal Register**, FDA is issuing final regulations classifying 102 individual neurological devices. FDA is responding to specific comments regarding the classification of individual neurological devices in the final regulations for these devices.

No written comments were received on proposed § 882.1 (21 CFR 882.1), which concerns general provisions for all neurological devices. Accordingly, FDA is promulgating § 882.1 without change. However, FDA received several general comments regarding the classification process and the basis for the classification proposals for neurological devices. The agency is responding to these general comments below.

1. A comment stated that FDA did not always provide a sufficient explanation for the agency's proposal to classify a device and suggested that FDA relied too heavily on Panel experience and expertise. The Comment also stated that the supplemental information placed on file in the Hearing Clerk's office is not always readily available to interested persons. The comment suggested that, in future classification proposals, FDA should be more specific in setting forth the basis for its conclusions.

FDA believes that it provided an adequate explanation of the basis for each neurological device classification proposal. FDA relied on the recommendations of the Neurological Device Classification Panel and, in many cases, adopted the reasons given by the Panel as the basis for the proposed classification. It is apparent from the statute and from the legislative history of the Medical Device Amendments of 1976 (Pub. L. 94-295; 90 Stat. 539-583) that Congress intended FDA to rely on the advice of its device classification panels in deciding how to classify devices. Indeed, the House Committee that considered the legislation recognized that "data" supporting classification of devices was not intended to be limited to results of scientific experiments but should also include less formal evidence, other scientific information, or the judgments of experts. (House Committee on Interstate and Foreign Commerce, Medical Device Amendments of 1976, H. Rept. No. 94-853, 94th Congress, 2d. Session 40 (1976).) In many cases, FDA obtained additional information relevant to the classification of a device, summarized or cited this information in the proposal, and placed a copy of the information on file in the Hearing Clerk's office.

The agency does not believe that it is necessary for a classification proposal to include an exhaustive recitation of all data available on a device. When FDA obtained and relied on information in addition to, or other than, a Panel recommendation, the summary of the information in the proposal and the availability of the information in the Hearing Clerk's office, serve to inform interested persons of the basis for the proposed classification. This supplemental information is readily available to interested parties. In addition to being on public display in the Hearing Clerk's office, virtually all of the information is from the medical or scientific literature and is available in libraries.

The legislative history shows that Congress intended that the burden of providing evidence substantiating the safety and effectiveness of a medical device rests on the manufacturer (id.). A manufacturer who is dissatisfied with the data relied on by the Panel or by FDA in the classification proposal should submit any additional information that the manufacturer believes pertinent as part of its comments on the proposal.

2. Several comments stated that some neurological devices are similar or identical to devices that have been reviewed by other classification panels. One comment suggested that FDA postpone final classification of these neurological devices until the agency has published for comment the recommendations of the other panels and the proposed regulations based on those recommendations.

FDA has attempted to do what the comment asks. Before publishing the neurological device classification proposals, FDA reviewed the recommendations from all of the classification panels to identify those devices reviewed by more than one panel. FDA found that 25 devices reviewed by the Neurological Device Classification Panel were essentially the same as devices reviewed by other classification panels. For 20 of these devices, FDA postponed publishing proposed classifications until the agency published the other panel's recommendations. For 5 neurological devices that also were reviewed by panels in addition to the Neurological Device Classification Panel, FDA published the Panels' recommendations as part of the proposals in the neurological device category.

FDA is continuing its efforts to consolidate panel recommendations concerning similar devices by attempting to identify these devices before publication of classification proposals, and by ensuring that each panel's recommendation is considered and published for comment before FDA promulgates final classification regulations for devices reviewed by more than one panel. In the **Federal Register** of March 6, 1979 (44 FR 12269), FDA published a notice of the availability of an index of classification regulations for medical devices. The index can be used by interested persons to determine the specific classification regulation for a device that was classified by more than one classification panel and to determine with which panel's classification regulations it will be published. FDA is, for instance, postponing publication of the final regulation for surgical sponges for internal use until after publication for comment of the recommendations on similar devices of the General and Plastic Surgery Device Classification Panel.

With respect to several neurological device classification proposals, FDA has changed the identification or name of the device to make clear that the regulation applies only to the neurological uses of the device. The devices are:

Electroencephalogram (ECG) telemetry system (Docket No. 78N-1031).
Powered cranial compound drill, burr, trephine, and accessories (Docket No. 78N-1050).
Powered cranial simple drill, burr, trephine and accessories (Docket No. 78N-1051).
Cranial drill handpiece (brace) (Docket No. 78N-1052).
Electric cranial drill motor (Docket No. 78N-1053.
Pneumatic cranial drill motor (Docket No. 78N-1054).
Self-retaining neurosurgical retractor (Docket No. 78N-1070).
Implanted malleable clip (Docket No. 78N-1081).

These changes should eliminate some of the ambiguity that prompted the comments.

3. A comment stated that FDA should offer a second comment period if the original proposal is substantially altered in response to comments, e.g., if the final regulation places a device in a classification category that differs from the proposed classification.

In the case of any proposed classification regulation in which FDA makes substantial changes in response to comments, FDA will consider whether a reproposal is legally required, or is desirable as a matter of policy. The agency declines to commit itself to publishing a reproposal each time the classification category into which a device is placed differs from the proposed classification. The agency will evaluate each case on its own merits. Interested persons may also petition for reclassification of a device under Subpart C of Part 860 (21 CFR Part 860), the classification procedures regulation. In view of the availablility of the reclassification process, in most cases it would be an unnecessary procedural step to republish a proposed classification regulation merely because the device in the final regulation is in a classification different from that proposed.

4. A comment expressed concern over the completeness of the list of devices reviewed by the Neurological Device Classification Panel and for which classification proposals were published and noted that there was no mention of wound drainage devices. The comment also stated that because electrosurgical devices have an important role in neurosurgery, separate classification of electrosurgical devices by the Neurological Device Classification Panel may be warranted.

This is a valid point. There may well be devices on the market that FDA is unaware of and that should have been reviewed by the Panel but were not. As these devices come to FDA's attention, the agency will refer them to the Panel for classification recommendations and publish proposed classification regulations. It should be noted, however, that many devices used in the neurological field also are used in other medical specialities. The agency will publish proposed classification regulations for many such devices later. For example, devices for wound drainage and electrosurgery are used in several surgical specialties besides neurosurgery. When the agency publishes the recommendations of the General and Plastic Surgery Device Classification Panel and a proposed classification regulation for each of these devices, the recommendations of all panels that reviewed these devices will be included. FDA realizes that the use of electrosurgical devices in neurosurgery may be somewhat different from their use in other medical specialties because of the critical and delicate nature of neurosurgery. However, FDA does not believe that the differences are sufficient to warrant separate classification.

5. A comment suggested that reusable devices (e.g., surgical instruments) that come into contact with the central nervous system be classified into class III (premarket approval), because certain viruses can be transmitted from one patient to another if the devices are not adequately sterilized between uses. The comment also suggested that implantable devices should not be reused except, perhaps, for expensive electronic neuroprostheses, for which change of the outer coating material might be made mandatory for reuse.

FDA rejects the comment. Reusable devices, such as surgical instruments, should be capable of being sterilized by the user following each use. FDA can require by general controls or standards that manufacturers assure that they are. However, it is the responsibility of the users of the devices to assure that the devices are properly sterilized before reuse, and requiring premarket approval of reuseable devices would do nothing to assure that users carry out this responsibility. With respect to implantable devices, the agency agrees that implantable devices should not be reused except in very limited circumstances. FDA is unaware of any implantable neurological device that is being marketed as reuseable. Therefore, the agency is not changing the proposed classification category for any implantable neurological device. In the future, if a manufacturer desires to market an implantable neurological device that can be reused, FDA may require that it undergo premarket approval before it is marketed.

6. A comment pointed out that FDA proposed to classify 66 neurological devices into class II (performance standards) and questioned whether standards could be generated for so many devices in a reasonable period of time.

FDA agrees that it would be difficult to promulgate individual performance

standards for 66 neurological devices in the near future. However, the agency believes that the length of time required to develop a performance standard should not prevent a device that meets the criteria for class II from being classified into this category. Classification of the device into class II signals FDA's intention eventually to promulgate standards for the device. Until the standards are promulgated for a class II device, FDA has the same degree of regulatory control over the device as it does over a class I device. Futhermore, an individual performance standard will not be necessary for each device classified into class II. For example, some devices are being classified into class II only because of concerns about electrical safety. FDA may adopt a single electrical safety standard that would apply to many devices that present such concerns. In addition, to reduce the risks presented by certain class II devices, FDA is exploring the possibility of using voluntary standards, rather than mandatory standards under section 514 of the act (21 U.S.C. 360d).

7. A comment said that FDA should consider the effect of the GMP regulation on the safety and effectiveness of devices before classifying devices in class II. The comment stated that FDA should identify, for each device to be classified in class II, the specific characteristics of the device that need to be controlled by standards because they cannot be controlled by good manufacturing practices or other general controls.

FDA agrees that the adequacy of good manufacturing practice or other general control requirements to control the safety and effectiveness of a device must be considered before classifying a device in class II. FDA attempted to do this in the case of each class II recommendation. The agency does not agree that the characteristics of a device that need to be controlled by a performance standard need to be identified in the proposal to classify the device in class II. The Panel recommendation and classification proposal advise interested persons of many of the device characteristics that a performance standard should address. However, the Panel did not, and could not, always identify all possible risks to health presented by a device. The law does not require FDA to identify specifically the risks to be controlled by a performance standard until FDA publishes a notice under section 514(c) of the act inviting interested persons to submit existing standards or offers to develop proposed standards. FDA may, for neurological devices classified in class II, identify additional risks to health, or device characteristics, that need to be addressed by performance standards in notices published under section 514(c).

List of Neurological Devices

The following is a list of neurological devices being classified in final regulations published elsewhere in this issue of **Federal Register**. The list shows the section in the Code of Federal Regulations under which the regulation classifying the device is being codified, the docket number of the classification regulation, and the classification of each device.

Subpart B—Neurological Diagnostic Devices

Section	Device	Docket No.	Class
882.1020	Rigidity analyzer	78N-1001	II
882.1030	Ataxiagraph	78N-1002	II
882.1200	Two-point discriminator	78N-1003	I
882.1240	Echoencephalograph	78N-1004	II
882.1275	Electroconductive media	78N-1005	II
882.1310	Cortical electrode	78N-1006	III
882.1320	Cutaneous electrode	78N-1007	II
882.1330	Depth electrode	78N-1008	II
882.1340	Nasopharyngeal electrode	78N-1009	III
882.1350	Needle electrode	78N-1010	III
882.1400	Electroencephalograph	78N-1011	II
882.1410	Electroencephalograph electrode/lead tester	78N-1012	II
882.1420	Electroencephalogram (EEG) signal spectrum analyzer	78N-1013	I
882.1430	Electroencephalograph test signal generator	78N-1014	I
882.1460	Nystagmograph	78N-1015	II
882.1480	Neurological endoscope	78N-1016	II
882.1500	Esthesiometer	78N-1017	I
882.1525	Tuning fork	78N-1018	I
882.1540	Galvanic skin response measurement device	78N-1019	II
882.1550	Nerve conduction velocity measurement device	78N-1020	II
882.1560	Skin potential measurement device	78N-1021	II
882.1570	Powered direct-contact temperature measurement device	78N-1022	II
882.1610	Alpha monitor	78N-1023	II
882.1620	Intracranial pressure monitoring device	78N-1024	II
882.1700	Percussor	78N-1025	I
882.1750	Pinwheel	78N-1026	I
882.1790	Ocular plethysmograph	78N-1027	III
882.1825	Rheoencephalograph	78N-1028	III
882.1835	Physiological signal amplifier	78N-1029	II
882.1845	Physiological signal conditioner	78N-1030	II
882.1855	Electroencephalogram (EEG) telemetry system	78N-1031	II
882.1870	Evoked response electrical stimulator	78N-1032	II
882.1880	Evoked response mechanical stimulator	78N-1033	II
882.1890	Evoked response photic stimulator	78N-1034	II
882.1900	Evoked response auditory stimulator	78N-1035	II
882.1925	Ultrasonic scanner calibration test block	78N-1036	I
882.1950	Tremor transducer	78N-1037	II

Subparts C-D [Reserved]

Subpart E—Neurological Surgical Devices

Section	Device	Docket No.	Class
882.4030	Skull plate anvil	78N-1038	I
882.4060	Ventricular cannula	78N-1039	I
882.4100	Ventricular catheter	78N-1040	II
882.4125	Neurosurgical chair	78N-1041	I
882.4150	Scalp clip	78N-1042	II
882.4175	Aneurysm clip applier	78N-1043	II
882.4190	Clip forming/cutting instrument	78N-1044	I
882.4200	Clip removal instrument	78N-1045	I
882.4215	Clip rack	78N-1046	I

Section	Device	Docket No.	Class
882.4250	Cryogenic surgical device	78N-1047	II
882.4275	Dowel cutting instrument	78N-1048	II
882.4300	Manual cranial drill, burr, trephine, and accessories	78N-1049	II
882.4305	Powered compound cranial drill, burr, trephine, and accessories	78N-1050	II
882.4310	Powered simple cranial drill, burr, trephine, and accessories	78N-1051	II
882.4325	Cranial drill handpiece (brace)	78N-1052	II
882.4360	Electric cranial drill motor	78N-1053	II
882.4370	Pneumatic cranial drill motor	78N-1054	II
882.4400	Radiofrequency lesion generator	78N-1055	II
882.4440	Neurosurgical headrest	78N-1057	I
882.4460	Neurosurgical head holder (skull clamp)	78N-1058	II
882.4500	Cranioplasty material forming instrument	78N-1059	I
882.4525	Microsurgical instrument	78N-1061	I
882.4535	Nonpowered neurosurgical instrument	78N-1062	I
882.4545	Shunt system implantation instrument	78N-1063	I
882.4560	Stereotaxic instrument	78N-1064	II
882.4600	Leukotome	78N-1065	I
882.4650	Neurosurgical suture needle	78N-1066	I
882.4700	Cottonoid paddle	78N-1067	II
882.4725	Radiofrequency lesion probe	78N-1068	II
882.4750	Skull punch	78N-1069	I
882.4800	Self-retaining retractor for neurosurgery	78N-1070	II
882.4840	Manual rongeur	78N-1071	II
882.4845	Powered rongeur	78N-1072	II
882.4900	Skullplate screwdriver	78N-1073	I

Subpart F—Neurological Therapeutic Devices

Section	Device	Docket No.	Class
882.5030	Methyl methacrylate for aneurysmorrhaphy	78N-1075	II
882.5050	Biofeedback device	78N-1076	II
882.5070	Bite block	78N-1077	II
882.5150	Intravascular occluding catheter	78N-1078	III
882.5175	Carotid artery clamp	78N-1079	II
882.5200	Aneurysm clip	78N-1080	II
882.5225	Implanted malleable clip	78N-1081	II
882.5235	Aversive conditioning device	78N-1082	II
882.5250	Burr hole cover	78N-1083	II
882.5275	Nerve cuff	78N-1084	II
882.5300	Methyl methacrylate for cranioplasty	78N-1085	II
882.5320	Preformed alterable cranioplasty plate	78N-1086	II
882.5330	Preformed nonalterable cranioplasty plate	78N-1087	II
882.5360	Cranioplasty plate fastener	78N-1088	II
882.5500	Legion temperature monitor	78N-1089	II
882.5550	Central nervous system fluid shunt and components	78N-1090	II
882.5800	Cranial electrotherapy stimulator	78N-1091	III
882.5810	External functional neuromuscular stimulator	78N-1092	II
882.5820	Implanted cerebellar stimulator	78N-1093	III
882.5830	Implanted diaphragmatic/phrenic nerve stimulator	78N-1094	III
882.5840	Implanted intracerebral/subcortical stimulator for pain relief	78N-1095	III
882.5850	Implanted spinal cord stimulator for bladder evacuation	78N-1096	III
882.5860	Implanted neuromuscular stimulator	78N-1097	III
882.5870	Implanted peripheral nerve stimulator for pain relief	78N-1098	II
882.5880	Implanted spinal cord stimulator for pain relief	78N-1099	II
882.5890	Transcutaneous electrical nerve stimulator for pain relief	78N-1100	II
882.5900	Preformed craniosynostosis strip	78N-1101	II
882.5910	Dura substitute	78N-1102	II
882.5940	Electroconvulsive therapy device	78N-1103	III
882.5950	Artificial embolization device	78N-1104	III
882.5960	Skull tong for traction	78N-1105	II

Patient Information

FDA is considering requiring the development and dissemination of information for patients and consumers about the uses, benefits, and risks of medical devices. For example, patient information has already been required or approved by FDA for intrauterine devices and hearing aids. In addition, the Bureau of Radiological Health is conducting a consumer education program on x-rays that includes posters on the effects of radiation during pregnancy and the distribution of x-ray record cards.

FDA believes that patient information is needed if: (1) There is a choice among alternatives of which the patient should be aware; (2) There are substantial risks or discomforts associated with the product; (3) The cost of the product is significant; (4) There is a need for the patient to strictly adhere to a specific treatment regimen; and (5) There is substantial public or professional controversy about the device or its related procedures.

FDA can require that manufacturers make medical device information available to providers for their use and the use of their patients through the premarket approval or standards setting processes as well as the general control provisions of the Federal Food, Drug, and Cosmetic Act. The mechanisms available to FDA to provide patient information for devices include: (1) Labeling for restricted and nonrestricted devices; (2) Patient package inserts and provider information; and (3) Consumer and patient education programs.

FDA has tentatively identified several neurological devices for which patient information may be required. Other neurological devices may be identified in the future, after the criteria for selection of devices needing patient information have been further refined. The devices that have been identified so far are listed below:

Device	Docket No.
Central nervous system fluid shunts and components	78N-1090
External functional neuromuscular stimulator	78N-1092
Implanted cerebellar stimulator	78N-1093
Implanted diaphragmatic/phrenic nerve stimulator	78N-1094
Implanted intracerebral/subcortical stimulator for pain relief	78N-1095
Implanted spinal cord stimulator for bladder evacuation	78N-1096
Implanted neuromuscular stimulator	78N-1097
Implanted peripheral nerve stimulator for pain relief	78N-1098
Implanted spinal cord stimulator for pain relief	78N-1099
Electroconvulsive therapy device	78N-1103

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs amends Chapter I of Title 21 of the Code of Federal Regulations by adding new Part 882, Subpart A, to read as follows:

PART 882—NEUROLOGICAL DEVICES

Subpart A—General Provisions

Sec.

882.1 Scope.

Authority: Secs. 513 and 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360C, 701(a)).

Subpart A—General Provisions

§ 882.1 Scope.

(a) This part sets forth the classification of neurological devices intended for human use.

(b) The identification of a device in a regulation in this part is not a precise description of every device that is, or will be, subject to the regulation. A manufacturer who submits a premarket notification submission for a device under Part 807 of this chapter may not show merely that the device is accurately described by the section title and identification provision of a regulation in this part, but shall state why the device is substantially equivalent to other devices, as required by § 807.87 of this chapter.

(c) To avoid duplicative listings, a neurological device that has two or more types of uses (e.g., use both as a diagnostic device and as a therapeutic device) is listed in the subpart representing one use of the device, rather than in two or more subparts.

Effective date. This regulation is effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26791 Filed 8-31-79; 8:45 am]

BILLING CODE 4110-03-M

21 CFR Part 882

[Docket No. 78N-1001]

Neurological Devices; Classification of Rigidity Analyzers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying rigidity analyzers into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55645) a proposed regulation to classify rigidity analyzers into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 by adding Subpart B and § 882.1020, to read as follows:

Subpart B—Neurological Diagnostic Devices

§ 882.1020 Rigidity analyzer.

(a) *Identification.* A rigidity analyzer is a device for quantifying the extent of the rigidity of a patient's limb to determine the effectiveness of drugs or other treatments.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26792 Filed 8-31-79; 8:45 am]

[Docket No. 78N-1002]

Neurological Devices; Classification of Ataxiagraphs

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying ataxiagraphs into class I (general controls). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55646) a proposed regulation to classify ataxiagraphs into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1030, to read as follows:

§ 882.1030 Ataxiagraph.

(a) *Identification.* An ataxiagraph is a device to determine the extent of ataxia (failure of muscular coordination) by measuring the amount of swaying of the body when the patient is standing erect and with eyes closed.

(b) *Classification.* Class I (general controls).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

---

21 CFR Part 882

[Docket No. 78N-1003]

Neurological Devices; Classification of Two-Point Discriminators

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying two-point discriminators into class I (general controls) and exempting manufacturers of the device from the good manufacturing practice regulation. The effect of this rule is to require that the device meet only the general controls applicable to all devices, except for the good manufacturing practice regulation. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55646) a proposed regulation to classify two-point discriminators into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. FDA proposed that this device be exempt from the good manufacturing practice (GMP) requirements in Part 820 (21 CFR Part 820), including the recordkeeping and reporting requirements in Part 820. FDA has determined that exemption of devices from the GMP requirements should not extend to § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, or § 820.198 (21 CFR 820.198), with respect to complaint files. The agency believes that granting exemptions from these sections would not be in the public interest, and that compliance with these sections is not unduly burdensome for device manufacturers. FDA is, however, exempting the device from all other sections of the GMP regulations. Accordingly, the proposed rule is being adopted with these changes.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1200, to read as follows:

§ 882.1200 Two-point discriminator.

(a) *Identification.* A two-point discriminator is a device with points used for testing a patient's touch discrimination.

(b) *Classification.* Class I (general controls). The device is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 882

[Docket No. 78N-1004]

Neurological Devices; Classification of Echoencephalographs

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying echoencephalographs into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55647) a proposed regulation to classify echoencephalographs into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1240, to read as follows:

§ 882.1240 Echoencephalograph.

(a) *Identification.* An echoencephalograph is an ultrasonic scanning device (including A-scan, B-scan, and doppler systems) that uses noninvasive transducers for measuring intracranial interfaces and blood flow velocity to and in the head.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

21 CFR Part 882

[Docket No. 78N-1005]

Neurological Devices; Classification of Electroconductive Media

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying electroconductive media into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55648) a proposed regulation to classify electroconductive media into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1275, to read as follows:

§ 882.1275 Electroconductive media.

(a) *Identification.* Electroconductive media are the conductive creams or gels used with external electrodes to reduce the impedance (resistance to alternating current) of the contact between the electrode surface and the skin.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79–26796 Filed 8–31–79; 8:45 am]

BILLING CODE 4110–03–M

21 CFR Part 882

[Docket No. 78N–1006]

Neurological Devices; Classification of Cortical Electrodes

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying cortical electrodes into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55649) a proposed regulation to classify cortical electrodes into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

Two comments were received. The comments suggested that any invasive device (e.g., cortical electrodes) may be capable of transmitting from patient to patient viral diseases of the central nervous system if the device is reuseable. One of the comments suggested that these devices be classified into class III (premarket approval) because of this risk.

The agency believes that the risk of transmitting central nervous system diseases from patient to patient by cortical electrodes can be avoided by requiring in a performance standard that cortical electrodes either be disposable (single-use only) or capable of being repeatedly sterilized by the user. Therefore, the agency rejects the comment to classify cortical electrodes in class III. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1310, to read as follows:

§ 882.1310 Cortical electrode.

(a) *Identification.* A cortical electrode is an electrode which is temporarily placed on the surface of the brain for stimulating the brain or recording the brain's electrical activity.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 882

[Docket No. 78N–1007]

Neurological Devices; Classification of Cutaneous Electrodes

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying cutaneous electrodes into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a

proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55650) a proposed regulation to classify cutaneous electrodes into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No comments were received that objected to classifying cutaneous electrodes into class II. However, one comment pointed out that electrodes that come into contact with abraded skin or blood (e.g., cutaneous electrodes) may transmit viral diseases and should therefore be capable of being sterilized.

As was stated in the preamble to the proposed general provisions for neurological devices (43 FR 55640), the agency recognizes that all possible risks to health presented by neurological devices may not have been identified in the classification recommendations and the proposed FDA regulations. Future regulations establishing performance standards under section 514 of the act (21 U.S.C. 360d) may identify other risks to health that are to be addressed by FDA requirements in addition to those identified in the classification recommendations and regulations. The risk of transmitting viral diseases because of electrodes that are not sterile will be considered along with other risks to health presented by cutaneous electrodes when the agency proposes to establish performance standards for cutaneous electrodes. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1320, to read as follows:

§ 882.1320 Cutaneous electrode.

(a) *Identification.* A cutaneous electrode is an electrode that is applied directly to a patient's skin either to record physiological signals (e.g., the electroencephalogram) or to apply electrical stimulation.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

[Docket No. 78N–1008]

Neurological Devices; Classification of Depth Electrodes

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying depth electrodes into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55650) a proposed regulation to classify depth electrodes into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

Two comments suggested that a depth electrode may be capable of transmitting from patient to patient viral diseases of the central nervous system if the device is reuseable. One of the comments suggested that depth electrodes be classified into class III (premarket approval) because of this risk.

The agency believes that the risk of transmitting central nervous system diseases from patient to patient by depth electrodes can be avoided by requiring in a performance standard that depth electrodes be either disposable (single-use only) or capable of being repeatedly sterilized by the user. Therefore, the agency rejects the comment to classify depth electrodes in class III. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1330, to read as follows:

§ 882.1330 Depth electrode.

(a) *Identification.* A depth electrode is an electrode used for temporary stimulation of, or recording electrical signals at, subsurface levels of the brain.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

Neurological Devices; Classification of Nasopharyngeal Electrodes

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying nasopharyngeal electrodes into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations

classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55651) a proposed regulation to classify nasopharyngeal electrodes into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No comments were received that objected to classifying nasopharyngeal electrodes into class II. However, one comment pointed out that electrodes that come into contact with abraded skin or blood (e.g., nasopharyngeal electrodes) may transmit viral disease and should therefore be capable of being sterilized.

As was stated in the preamble to the proposed general provisions for neurological devices (43 FR 55640), the agency recognizes that all possible risks to health presented by neurological devices may not have been identified in the classification recommendation and the proposed FDA regulations. Future regulations establishing performance standards under section 514 of the act (21 U.S.C. 360d) may identify other risks to health that are to be addressed by FDA requirements in addition to those identified in the classification recommendations and regulations. The risk of transmitting viral diseases because of electrodes that are not sterile will be considered along with other risks to health presented by nasopharyngeal electrodes when the agency proposes to establish performance standards for nasopharyngeal electrodes. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1340, to read as follows:

§ 882.1340 Nasopharyngeal electrode.

(a) *Identification.* A nasopharyngeal electrode is an electrode which is temporarily placed in the nasopharyngeal region for the purpose of recording electrical activity.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Neurological Devices; Classification of Needle Electrodes

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying needle electrodes into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55652) a proposed regulation to classify needle electrodes into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

Two comments suggested that a needle electrode may be capable of transmitting from patient to patient viral diseases of the central nervous system if the device is reuseable. One of the comments suggested that needle electrodes be classified into class III (premarket approval) because of this risk.

The agency believes that the risk of transmitting central nervous system diseases from patient to patient by needle electrodes can be avoided by requiring in a performance standard that needle electrodes be either disposable (single-use only) or capable of being repeatedly sterilized by the user. Therefore, the agency rejects the comment to classify needle electrodes in class III. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1350, to read as follows:

§ 882.1350 Needle electrode.

(a) *Identification.* A needle electrode is a device which is placed subcutaneously to stimulate or to record electrical signals.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

[Docket No. 78N-1011]

Neurological Devices; Classification of Electroencephalographs

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying electroencephalographs into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55653) a proposed regulation to classify electroencephalographs into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1400, to read as follows:

§ 882.1400 Electroencephalograph.

(a) *Identification.* An electroencephalograph is a device used to measure and record the electrical activity of the patient's brain obtained by placing two or more electrodes on the head.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

[Docket No. 78N-1013]

Neurological Devices; Classification of Electroencephalogram (EEG) Signal Spectrum Analyzers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying electroencephalogram (EEG) signal spectrum analyzers into class I (general controls). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55654) a proposed regulation to classify electroencephalogram (EEG) signal spectrum analyzers into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1420, to read as follows:

§ 882.1420 Electroencephalogram (EEG) signal spectrum analyzer.

(a) *Identification.* An electroencephalogram (EEG) signal spectrum analyzer is a device used to display the frequency content or power

spectral density of the electroencephalogram (EEG) signal.

(b) *Classification.* Class I (general controls).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

21 CFR Part 882

[Docket No. 78N-1014]

Neurological Devices; Classification of Electroencephalograph Test Signal Generators

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying electroencephalograph test signal generators into class I (general controls). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55655) a proposed regulation to classify electroencephalograph test signal generators into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1430, to read as follows:

§ 882.1430 Electroencephalograph test signal generator.

(a) *Identification.* An electroencephalograph test signal generator is a device used to test or calibrate an electroencephalograph.

(b) *Classification.* Class I (general controls).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

21 CFR Part 882

[Docket No. 78N-1015]

Neurological Devices; Classification of Nystagmographs

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying nystagmographs into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55655) a proposed regulation to classify nystagmographs into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1460, to read as follows:

§ 882.1460 Nystagmograph.

(a) *Identification.* A nystagmograph is a device used to measure, record, or visually display the involuntary movements (nystagmus) of the eyeball.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26806 Filed 8-31-79; 8:45 am]

BILLING CODE 4110-03-M

[Docket No. 78N-1016]

Neurological Devices; Classification of Neurological Endoscopes

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying neurological endoscopes into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55656) a proposed regulation to classify neurological endoscopes into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1480, to read as follows:

§ 882.1480 Neurological endoscope.

(a) *Identification.* A neurological endoscope is an instrument with a light source used to view the inside of the ventricles of the brain.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 882

[Docket No. 78N-1017]

Neurological Devices; Classification of Esthesiometers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying esthesiometers into class I (general controls) and exempting manufacturers of the device from the good manufacturing practice regulation.

The effect of this rule is to require that the device meet only the general controls applicable to all devices, except for the good manufacturing practice regulation. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55657) a proposed regulation to classify esthesiometers into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. FDA proposed that this device be exempt from the good manufacturing practice (GMP) requirements in Part 820 (21 CFR Part 820), including the recordkeeping and reporting requirements in Part 820. FDA has determined that exemption of devices from the GMP requirements should not extend to § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, or § 820.198 (21 CFR 820.198), with respect to complaint files. The agency believes that granting exemptions from these sections would not be in the public interest, and that compliance with these sections is not unduly burdensome for device manufacturers. FDA is, however, exempting the device from all other sections of the GMP regulations. Accordingly, the proposed rule is being adopted with these changes.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1500, to read as follows:

§ 882.1500 Esthesiometer.

(a) *Identification.* An esthesiometer is a mechanical device which usually consists of a single rod or fiber which is held in the fingers of the physician or other examiner and which is used to determine whether a patient has tactile sensitivity.

(b) *Classification.* Class I (general controls). The device is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. FDA proposed that this device be exempt from the good manufacturing practice (GMP) requirements in Part 820 (21 CFR Part 820), including the recordkeeping and reporting requirements in Part 820. FDA has determined that exemption of devices from the GMP requirements should not extend to § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, or § 820.198 (21 CFR 820.198), with respect to complaint files. The agency believes that granting exemptions from these sections would not be in the public interest, and that compliance with these sections is not unduly burdensome for device manufacturers. FDA is, however, exempting the device from all other sections of the GMP regulations. Accordingly, the proposed rule is being adopted with these changes.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1525, to read as follows:

§ 882.1525 Tuning fork.

(a) *Identification.* A tuning fork is a mechanical device which resonates at a given frequency and is used to diagnose hearing disorders and to test for vibratory sense.

(b) *Classification.* Class I (general controls). The device is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

Neurological Devices; Classification of Galvanic Skin Response Measurement Devices

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying galvanic skin response measurement devices into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulation classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55658) a proposed regulation to classify galvanic skin response measurement devices into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1540, to read as follows:

§ 882.1540 Galvanic skin response measurement device.

(a) *Identification.* A galvanic skin response measurement device is a device used to determine autonomic responses as psychological indicators by measuring the electrical resistance of the skin and the tissue path between two electrodes applied to the skin.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

[Docket No. 78N-1020]

Neurological Devices; Classification of Nerve Conduction Velocity Measurement Devices

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying nerve conduction velocity measurement devices into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55659) a proposed regulation to classify nerve conduction velocity measurement devices into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device.

Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1550, to read as follows:

§ 882.1550 Nerve conduction velocity measurement device.

(a) *Identification.* A nerve conduction velocity measurement device is a device which measures nerve conduction time by applying a stimulus, usually to a patient's peripheral nerve. This device includes the stimulator and the electronic processing equipment for measuring and displaying the nerve conduction time.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

Neurological Devices; Classification of Alpha Monitors

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying alpha monitors into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55662) a proposed regulation to classify alpha monitors into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1610, to read as follows:

§ 882.1610 Alpha monitor.

(a) *Identification.* An alpha monitor is a device with electrodes that are placed on a patient's scalp to monitor that portion of the electroencephalogram which is referred to as the alpha wave.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

BILLING CODE 4110-03-M

21 CFR Part 882

[Docket No. 78N-1024]

Neurological Devices; Classification of Intracranial Pressure Monitoring Devices

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying intracranial pressure monitoring devices into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55662) a proposed regulation to classify intracranial pressure monitoring devices into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

One comment suggested that any invasive device, such as an intracranial pressure (ICP) monitoring device, may be capable of transmitting from patient to patient viral diseases of the central nervous system if the device is reuseable. The comment suggested that these devices be classified into class III (premarket approval) because of this risk.

The agency believes that the risk of transmitting central nervous system disease from patient to patient by intracranial pressure monitoring devices can be avoided by requiring in a performance standard that intracranial pressure monitoring devices either be disposable (single-use only) or capable of being repeatedly sterilized by the user. Therefore, the agency rejects the comment to classify intracranial pressure monitoring devices in class III.

Another comment agreed with classifying intracranial pressure monitoring devices in class II but suggested that the development of a performance standard be a high priority for the devices instead of a low priority as proposed because of the increasing use of ICP monitoring and the proliferation of types of ICP monitoring devices.

On February 23, 1979, FDA referred this comment to the Neurological Section of the Respiratory and Nervous System Devices Panel (formerly the Neurological Device Classification Panel). The Panel agreed with the comment and recommended that the priority for development of performance standards for intracranial pressure monitoring devices be changed to "high." As was stated in the preamble to the proposed general provisions for neurological devices (43 FR 55640), the agency is not proposing at this time to establish priorities for development of performance standards for class II devices. At a later date, the agency will establish priorities for the development of performance standards for class II devices based on the classification panel's recommendations, available resources, and other relevant factors. Accordingly, the proposed regulation is being adopted as written.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1620, to read as follows:

§ 882.1620 Intracranial pressure monitoring device.

(a) *Identification.* An intracranial pressure monitoring device is a device used for short-term monitoring and recording of intracranial pressures and pressure trends. The devices includes the transducer, monitor, and interconnecting hardware.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

21 CFR Part 882

[Docket No. 78N-1025]

Neurological Devices: Classification of Percussors

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying percussors into class I (general controls) and exempting manufacturers of the device from the good manufacturing practice regulation. The effect of this rule is to require that the device meet only the general controls applicable to all devices, except for the good manufacturing practice regulation. This action is being taken under the Medical Device Amendment of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55664) a proposed regulation to classify percussors into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. FDA proposed that this device be exempt from the good manufacturing practice (GMP) requirements in Part 820 (21 CFR Part 820) including the recordkeeping and reporting requirements in Part 820. FDA has determined that exemption of devices from the GMP requirements should not extend to § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, or § 820.198 (21 CFR 820.198), with respect to complaint files. The agency believes that granting exemptions from these sections would not be in the public interest, and that compliance with these sections is not unduly burdensome for device manufacturers. FDA is, however, exempting the device from all other sections of the GMP regulations. Accordingly, the proposed rule is being adopted with these changes.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1700, to read as follows:

§ 882.1700 Percussor.

(a) *Identification.* A percussor is a small hammerlike device used by a physician to provide light blows to a body part. A percussor is used as a diagnostic aid during physical examinations.

(b) *Classification.* Class I (general controls). The device is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N-1026]

Neurological Devices; Classification of Pinwheels

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying pinwheels into class I (general controls). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55664) a proposed regulation to classify pinwheels into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1750, to read as follows:

§ 882.1750 Pinwheel.

(a) *Identification.* A pinwheel is a device with sharp points on a rotating wheel used for testing pain sensation.

(b) *Classification.* Class I (general controls).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

BILLING CODE 4110-03-M

21 CFR Part 882

[Docket No. 78N-1027]

Neurological Devices; Classification of Ocular Plethysmographs

AGENCY: Food and Drug Administration.

ACTION: Final rule.

V 4 / 172 SEP 4 79 UMI

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying ocular plethysmographs into class III (premarket approval). The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application that includes information concerning safety and effectiveness tests for the device. Each application must be submitted to FDA on or before May 28, 1982, or 90 days after promulgation of a separate regulation requiring premarket approval of the device, whichever occurs later. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55665) a proposed regulation to classify ocular plethysmographs into class III (premarket approval). A period of 60 days was provided for interested persons to submit written comments to FDA.

One comment was received. The comment disagreed with the reasons given for classifying ocular plethysmographs into class III. The comment asserted that the pneumoplethysmographic technique has been shown to be very effective in several recent studies and has a low incidence of complications. The comment also stated that the other techniques of ocular plethysmography are not as good as the pneumoplethysmographic technique, and that they may be difficult to apply and the results difficult to interpret. The comment also disagreed that carotid compression is a major hazard when using the pneumoplethysmographic technique because carotid compression is infrequently used and, when used, is safe if done by those experienced in its use.

FDA agrees that some of the ocular plethysmograph devices are more effective than others. The fact that a device is effective, however, is not a reason for classifying it in class I or II. As a group, ocular plethysmographs are devices that present a potential unreasonable risk of illness or injury to the patient. FDA concluded that there is insufficient information to establish a performance standard that would assure the safety and effectiveness of ocular plethysmographs and, for this reason, that the devices should be classified in class III. This conclusion does not preclude approval of a premarket approval application for a particular ocular plethysmograph device. Accordingly, the proposed rule is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1790, to read as follows:

§ 882.1790 Ocular plethysmograph.

(a) *Identification.* An ocular plethysmograph is a device used to measure or detect volume changes in the eye produced by pulsations of the artery, to diagnose carotid artery occlusive disease (restrictions on blood flow in the carotid artery).

(b) *Classification.* Class III (premarket approval).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N–1028]

Neurological Devices; Classification of Rheoencephalographs

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying rheoencephalographs into class III (premarket approval). The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application that includes information concerning safety and effectiveness tests for the device. Each application must be submitted to FDA on or before May 28, 1982 or 90 days after promulgation of a separate regulation requiring premarket approval of the device, whichever occurs later. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55666) a proposed regulation to classify rheoencephalographs into class III (premarket approval). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1825, to read as follows:

§ 882.1825 Rheoencephalograph.

(a) *Identification.* A rheoencephalograph is a device used to estimate a patient's cerebral circulation (blood flow in the brain) by electrical inpedance methods with direct electrical connections to the scalp or neck area.

(b) *Classification.* Class III (premarket approval).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

Neurological Devices; Classification of Physiological Signal Amplifiers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying physiological signal amplifiers into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55667) a proposed regulation to classify physiological signal amplifiers into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1835, to read as follows:

§ 882.1835 Physiological signal amplifier.

(a) *Identification.* A physiological signal amplifier is a general purpose device used to electrically amplify signals derived from various physiological sources (e.g., the electroencephalogram).

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Neurological Devices; Classification of Physiological Signal Conditioners

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying physiological signal conditioners into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55668) a proposed regulation to classify physiological signal conditioners into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1845, to read as follows:

§ 882.1845 Physiological signal conditioner.

(a) *Identification.* A physiological signal conditioner is a device such as an integrator or differentiator used to modify physiological signals for recording and processing.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

21 CFR Part 882

[Docket No. 78N–1031]

Neurological Devices: Classification of Electroencephalogram (EEG) Telemetry Systems

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying electroencephalogram (EEG) telemetry systems into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55668) a

proposed regulation to classify physiological signal telemetry systems into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

A comment agreed with the proposal to classify physiological signal telemetry systems into class II and pointed out the danger of inherent leakage currents that are present when telephone telemetry systems are used.

The agency agrees with the comment that electrical leakage current is a potential hazard of using telephone telemetry systems.

The agency has made minor changes to the name and identification of this device to make it clear that the rule applies to those devices used to transmit the electroencephalogram (EEG). Separate proposals have recently been published (44 FR 13358 and 13359; March 9, 1979) for telemetry transmitters and receivers used to transmit cardiovascular signals. Accordingly, the proposed regulation is being adopted with these changes.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1855, to read as follows:

§ 882.1855 Electroencephalogram (EEG) telemetry system.

(a) *Identification.* An electroencephalogram (EEG) telemetry system consists of transmitters, receivers, and other components used for remotely monitoring or measuring EEG signals by means of radio or telephone transmission systems.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N-1033]

Neurological Devices: Classification of Evoked Response Mechanical Stimulators

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying evoked response mechanical stimulators into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55670) a proposed regulation to classify evoked response mechanical stimulators into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1880, to read as follows:

§ 882.1880 Evoked response mechanical stimulator.

(a) *Identification.* An evoked response mechanical stimulator is a device used to produce a mechanical stimulus or a series of mechanical stimuli for the purpose of measuring a patient's evoked response.

(b) *Classification.* Class II (performance standards).

Effective date. This regulaton shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Neurological Devices; Classification of Evoked Response Photic Stimulators

AGENCY: Food and Drug Administration.

ACTION: Final Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying evoked response photic stimulators into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55671) a proposed regulation to classify evoked response photic stimulators into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

A comment pointed out that the identification for evoked response photic stimulators did not include the so-called "pattern-shift generator" that presents to the patient a shifting pattern on a television screen. The comment also pointed out that the pattern-shift generators used in evoked response measurements could be hazardous because the shifting pattern might evoke an epileptic seizure in some epileptic patients.

The agency agrees that minor changes should be made in the language used in the identification of the evoked response photic stimulator to make it clear that it includes the pattern-shift devices. The agency acknowledges the health hazard identified in the comment. Accordingly, the proposed regulation is adopted with the changes noted.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1890, to read as follows:

§ 882.1890 Evoked response photic stimulator.

(a) *Identification.* An evoked response photic stimulator is a device used to generate and display a shifting pattern or to apply a brief light stimulus to a patient's eye for use in evoked response measurements or for electroencephalogram (EEG) activation.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N-1035]

Neurological Devices; Classification of Evoked Response Auditory Stimulators

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying evoked response auditory stimulators into class II (performance standards). The effect of classifying a device into Class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55672) a proposed regulation to classify evoked response auditory stimulators into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1900, to read as follows:

§ 882.1900 Evoked response auditory stimulator.

(a) *Identification.* An evoked response auditory stimulator is a device that produces a sound stimulus for use in evoked response measurements or electroencephalogram activation.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

Neurological Devices; Classification of Ultrasonic Scanner Calibration Test Blocks

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying ultrasonic scanner calibration test blocks into class I (general controls). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55672) a proposed regulation to classify ultrasonic scanner calibration test blocks into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adoped without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart B by adding new § 882.1925, to read as follows:

§ 882.1925 Ultrasonic scanner calibration test block.

(a) *Identification.* An ultrasonic scanner calibration test block is a block of material with known properties used to calibrate ultrasonic scanning devices (e.g., the echoencephalograph).

(b) *Classification.* Class I (general controls).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)).)

Neurological Devices; Classification of Skull Plate Anvils

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying skull plate anvils into class I (general controls). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55674) a proposed regulation to classify skull plate anvils into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed

regulation to classifying this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 by adding new Subpart E and § 882.4030, to read as follows:

Subparts C and D—[Reserved]

Subpart E—Neurological Surgical Devices

§ 882.4030 Skull plate anvil.

(a) *Identification.* A skull plate anvil is a device used to form alterable skull plates in the proper shape to fit the curvature of a patient's skull.

(b) *Classification.* Class I (general controls).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)).)

[Docket No. 78N-1039]

Neurological Devices; Classification of Ventricular Cannulas

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying ventricular cannulas into class I (general controls). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55675) a proposed regulation to classify ventricular catheters into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

One comment was received. The comment suggested that the ventricular catheter be classified into class I because the risks to health identified for the device are the same as those identified for the ventricular cannula, which the agency proposed to classify in class I (43 FR 55674). The comment noted that the only explanation for the difference in the classification of the two devices was that the ventricular catheter may be left in the patient longer than the venticular cannula.

The agency disagrees with the comment. The agency proposed that the ventricular catheter and the ventricular cannula be classified in different classes because the characteristics of the devices that present risks to the patient are different and they require different levels of control. For instance, metal ventricular cannulas can be adequately controlled by general controls because it is relatively easy for the user to determine by inspection if the device has design or construction flaws. However, the user cannot easily determine by inspection whether a flexible catheter constructed of a polymeric substance may deteriorate while in use. The agency believes that a standard that controls the type of material used in the ventricular catheter and the performance of the device is necessary to provide reasonable assurance that the device will function properly without unnecessary risk to the patient. Accordingly, the proposed rule is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4060, to read as follows:

§ 882.4060 Ventricular cannula.

(a) *Identification.* A ventricular cannula is a device used to puncture the ventricles of the brain for aspiration or for injection. This device is frequently referred to as a ventricular needle.

(b) *Classification.* Class I (general controls).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

[Docket No. 78N-1041]

Neurological Devices; Classification of Neurosurgical Chairs

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying neurosurgical chairs into class I (general controls). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55676) a proposed regulation to classify neurosurgical chairs into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4125, to read as follows:

§ 882.4125 Neurosurgical chair.

(a) *Identification.* A neurosurgical chair is an operating room chair used to position and support a patient during neurosurgery.

(b) *Classification.* Class I (general controls).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

21 CFR Part 882

[Docket No. 78N-1042]

Neurological Devices; Classification of Scalp Clips

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying scalp clips into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55676) a proposed regulation to classify scalp clips into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

A comment suggested that the class of devices known as wound clips not be required to meet standards, as proposed for scalp clips. The comment noted that the pressure exerted by a wound clip is entirely under the control of the surgeon, and, therefore, the manufacturer cannot assure that the pressure that the clip applies to tissue is appropriate. The comment also suggested that separate standards should not be developed for wound clips and scalp clips if possible because separate standards may result in confusion, mutually exclusive requirements, and possible monetary waste.

The agency has considered publishing one regulation that would apply to both scalp clips and wound clips. However, the agency believes that devices known as scalp clips are different enough from wound clips so that a separate classification regulation is needed. A proposed classification regulation applicable to wound clips will be published separately later. The comment does not deal with scalp clips. Accordingly, the proposed regulation for scalp clips is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4150, to read as follows:

§ 882.4150 Scalp clip.

(a) *Identification.* A scalp clip is a plastic or metal clip used to stop bleeding during surgery on the scalp.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying clip removal instruments into class I (general controls). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55678) a proposed regulation to classify clip removal instruments into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed

S E 4 7 9

UMI

regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4200, to read as follows:

§ 882.4200 Clip removal instrument.

(a) *Identification.* A clip removal instrument is a device used to remove surgical clips from the patient.

(b) *Classification.* Class I (general controls).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N-1046]

Neurological Devices; Classification of Clip Racks

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying clip racks into class I (general controls). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55679) a proposed regulation to classify clip racks into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4215, to read as follows:

§ 882.4215 Clip rack.

(a) *Identification.* A clip rack is a device used to hold or store surgical clips during surgery.

(b) *Classification.* Class I (general controls).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

21 CFR Part 882

[Docket No. 78N-1047]

Neurological Devices; Classification of Cryogenic Surgical Devices

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying cryogenic surgical devices into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55680) a proposed regulation to classify cryogenic surgical devices into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4250, to read as follows:

§ 882.4250 Cryogenic surgical device.

(a) *Identification.* A cryogenic surgical device is a device used to destroy nervous tissue or produce lesions in nervous tissue by the application of extreme cold to the selected site.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

21 CFR Part 882

[Docket No. 78N-1048]

Neurological Devices; Classification of Dowel Cutting Instruments

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying dowel cutting instruments into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55680) a proposed regulation to classify dowel cutting instruments into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

One comment was received. The comment disagreed with the proposal to classify dowel cutting instruments into class I and suggested that the device be classified into class II instead. The comment noted that the cutting teeth on the device may lacerate pelvic muscle and cause hemorrhage if the device uncontrollably plunges through the inner table of the bone and strikes pelvic structures. A performance standard should address the risk of uncontrollable plunging of the device and the means used by the instrument to control the bone dowel after it has been cut so that it may be retrieved easily.

FDA agrees with the comment. On February 23, 1979, the Neurological Section of the Respiratory and Nervous Systems Devices Panel (formerly the Neurological Device Classification Panel) reviewed the comment and recommended that FDA classify dowel cutting instruments into class II because the hazards identified by the comment cannot be adequately controlled by general controls.

FDA agrees with the Panel and is changing the classification of dowel cutting instruments from class I to class II in the final rule. For the reasons stated in the general regulation on neurological devices, published elsewhere in this issue of the **Federal Register**, FDA does not believe that it is necessary to issue a new proposal concerning this decision. Persons who disagree with classifying dowel cutting instruments in class II may petition for reclassification of the device under Subpart C of Part 860 (21 CFR Part 860), the classification procedures regulation.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4275, to read as follows:

§ 882.4275 Dowel cutting instrument.

(a) *Identification.* A dowel cutting instrument is a device used to cut dowels of bone for bone grafting.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

21 CFR Part 882

[Docket No. 78N-1049]

Neurological Devices; Classification of Manual Cranial Drills, Burrs, Trephines, and Their Accessories

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying manual cranial drills burrs, trephines, and their accessories into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55681) a proposed regulation to classify manual drills, burrs, trephines, and their accessories into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

A comment objected to classifying manual drills, burrs, trephines, and their accessories into class II and suggested that these devices be classified instead into class I (general controls) because the devices are hand operated and the manufacturer has no way of controlling whether they are properly used. The comment also stated that there are now in effect for these devices standards that were developed by the International Standards Organization (ISO), and more meaningful standards cannot be established without a great deal of expense.

The agency agrees with the comment that the manufacturers cannot always prevent the device from being misused. However, the agency does not agree with and will not adopt the comment's recommendation that the device be classified into class I. The Neurological Device Classification Panel recommended that manual drills, burrs, trephines, and their accessories be classifed into class II to require the devices to have guards that will prevent the device tips from plunging into the patient's brain. The agency agrees with the panel that a performance standard is necessary for this device. The agency is unaware of any existing standards for this device that require guards to prevent the tips of the device from plunging into the patient's brain. However, the agency believes that several organizations have formed committees to work on standards that may apply to this device. If a standard that applies to this device is developed in the future, the agency will consider adopting it rather than developing a separate FDA standard.

The agency has made minor changes to the name and identification of the device to make it clear that the rule applies to those devices that are used on a patient's skull. Separate proposed regulations will be issued later for other types of manual drills and accessories (e.g., dental). Accordingly, the proposed regulation is being adopted with these changes.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by

adding new § 882.4300, to read as follows:

§ 882.4300 Manual cranial drills, burrs, trephines, and their accessories

(a) *Identification.* Manual cranial drills, burrs, trephines, and their accessories are bone cutting and drilling instruments that are used without a power source on a patient's skull.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 882

[Docket No. 78N-1050]

Neurological Devices; Classification of Powered Compound Cranial Drills, Burrs, Trephines, and Their Accessories

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying powered compound cranial drills, burrs, trephines, and their accessories into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55682) a proposed regulation to classify powered compound drills, burrs, trephines, and their accessories into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. However, the agency has made minor changes to the name and identification of the device to make it clear that the rule applies to those devices that are used on a patient's skull. Separate proposed regulations will be issued later for other types of compound drills and accessories (e.g., dental). Accordingly, the proposed regulation is being adopted with these changes.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4305, to read as follows:

§ 882.4305 Powered compound cranial drills, burrs, trephines, and their accessories.

(a) *Identification.* Powered compound cranial drills, burrs, trephines, and their accessories are bone cutting and drilling instruments used on a patient's skull. The instruments employ a clutch mechanism to disengage the tip of the instrument after penetrating the skull to prevent plunging of the tip into the brain.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55685) a proposed regulation to classify pneumatic drill motors into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. However, the agency has made minor changes to the name and identification of the device to make it clear that the rule applies to those devices that are used on a patient's skull. Separate proposed regulations will be issued later for other types of drill motors (e.g., dental). Accordingly, the proposed regulation is being adopted with these changes.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) a°ERR20°nd under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4370, to read as follows:

§ 882.4370 Pneumatic cranial drill motor.

(a) *Identification.* A pneumatic cranial drill motor is a pneumatically operated power source used with removable rotating surgical cutting tools or drill bits on a patient's skull.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N–1055]

Neurological Devices; Classification of Radiofrequency Lesion Generators

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying radiofrequency lesion generators into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55685) a proposed regulation to classify radiofrequency lesion generators into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4400, to read as follows:

§ 882.4400 Radiofrequency lesion generator.

(a) *Identification.* A radiofrequency lesion generator is a device used to produce lesions in the nervous system or other tissue by the direct application of radiofrequency currents to selected sites.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N–1057]

Neurological Devices; Classification of Neurosurgical Headrests

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying neurosurgical headrests into class I (general controls). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55686) a proposed regulation to classify neurosurgical headrests into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device.

Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4440, to read as follows:

§ 882.4440 Neurosurgical headrests.

(a) *Identification.* A neurosurgical headrest is a device used to support the patient's head during a surgical procedure.

(b) *Classification.* Class I (general controls).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55692) a proposed regulation to classify cottonoid paddies into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4700, to read as follows:

§ 882.4700 Cottonoid paddie.

(a) *Identification.* A cottonoid paddie is a cotton pad used during surgery to protect nervous tissue, absorb fluids, or stop bleeding.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a) 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N–1068]

Neurological Devices; Classification of Radiofrequency Lesion Probes

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying radiofrequency lesion probes into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safey and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55693) a proposed regulation to classify radiofrequency lesion probes into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by

adding new § 882.4725, to read as follows:

§ 882.4725 Radiofrequency lesion probe.

(a) *Identification.* A radiofrequency lesion probe is a device connected to a radiofrequency (RF) lesion generator to deliver the RF energy to the site within the nervous system where a lesion is desired.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N–1069]

Neurological Devices; Classification of Skull Punches

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying skull punches into class I (general controls). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55693) a proposed regulation to classify skull punches into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4750, to read as follows:

§ 882.4750 Skull punch.

(a) *Identification.* A skull punch is a device used to punch holes through a patient's skull to allow fixation of cranioplasty plates or bone flaps by wire or other means.

(b) *Classification.* Class I (general controls).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

21 CFR Part 882

[Docket No. 78N–1070]

Neurological Devices; Classification of Self-Retaining Retractors for Neurosurgery

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying self-retaining retractors for neurosurgery into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55694) a proposed regulation to classify self-retaining retractors into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

A comment objected to classifying self-retaining retractors into class II and suggested that the devices be classified instead into class I (general controls) because the devices are hand operated and the manufacturer has no way of controlling whether they are properly used. The comment also stated that there are now in effect for these devices standards that were developed by the International Standards Organization (ISO) and more meaningful standards cannot be established without a great deal of expense.

Although the agency agrees with the comment that the manufacturer cannot always prevent self-retaining retractors from being misused, the agency does not agree with and will not adopt the comment's recommendation that the device be classified into class I. The Neurological Device Classification Panel recommended that self-retaining retractors used in neurosurgery be classified into class II to protect against injuring the patient by sudden movement caused by failure of the locking mechanism on the device. The Panel did not believe that general controls would provide adequate control of this potential hazard. The agency agrees with the Panel that a performance standard is necessary for this device. If a standard that applies to this device is now in existence or is developed in the future, the agency will consider adopting it rather than developing a separate FDA standard.

The agency has made minor changes to the name of the device to make it clear that the rule applies to those self-retaining retractors that are used in neurosurgery. Separate proposed regulations that apply to other uses of self-retaining retractors will be issued later. Accordingly, the proposed regulation is being adopted with this change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by

V 4 / 172 SE 4 79 UMI

adding new § 882.4800, to read as follows:

§ 882.4800 Self-retaining retractor for neurosurgery.

(a) *Identification.* A self-retaining retractor for neurosurgery is a self-locking device used to hold the edges of a wound open during neurosurgery.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

---

21 CFR Part 882

[Docket No. 78N-1071]

Neurological Devices; Classification of Manual Rongeurs

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying manual rongeurs into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55695) a proposed regulation to classify manual rongeurs into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

A comment objected to classifying manual rongeurs into class II and suggested that the device be classified instead into class I (general controls) because manual rongeurs are hand operated and the manufacturer has no way of controlling whether they are properly used. The comment also stated that there are now in effect for these devices standards that were developed by the International Standards Organization (ISO), and more meaningful standards cannot be established without a great deal of expense.

Although the agency agrees with the comment that manufacturers cannot always prevent the device from being misused, the agency does not agree with and will not adopt the comment's recommendation that the device be classified into class I. The Neurological Device Classification Panel recommended that manual rongeurs be classified into class II because of the need to control the device to avoid breakage of the rongeur jaws. The Panel believes that performance standards are necessary to assure that the thickness of the rongeur jaws and the material used in the construction of the device is sufficient to prevent the jaws from breaking. The Panel does not believe that general controls will provide adequate control of these characteristics of manual rongeurs. The agency agrees with the Panel that a performance standard is necessary for this device. If a standard that applies to this device is in existence or is developed in the future, however, the agency will consider adopting it rather than developing a separate FDA standard.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4840, to read as follows:

§ 882.4840 Manual rongeur.

(a) *Identification.* A manual rongeur is a manually operated instrument used for cutting or biting bone during surgery involving the skull or spinal column.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26860 Filed 8-31-79; 8:45 am]

21 CFR Part 882

[Docket No. 78N-1073]

Neurological Devices; Classification of Skullplate Screwdrivers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying skuliplate screwdrivers into class I (general controls). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55696) a proposed regulation to classify skullplate screwdrivers into class I (general controls). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart E by adding new § 882.4900, to read as follows:

§ 882.4900 Skullplate screwdriver.

(a) *Identification.* A skullplate screwdriver is a tool used by the surgeon to fasten cranioplasty plates or skullplate to a patient's skull by screws.

(b) *Classification.* Class I (general controls).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26862 Filed 8-31-79; 8:45 am]

BILLING CODE 4110-03-M

---

21 CFR Part 882

[Docket No. 78N-1075]

Neurological Devices; Classification of Methyl Methacrylate for Aneurysmorrhaphy

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying methyl methacrylate for aneurysmorrhaphy into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55697) a proposed regulation to classify methyl methacrylate for aneurysmorrhaphy into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

A comment objected to classifying methyl methacrylate for aneurysmorrhaphy into class II and recommended that instead it be classified in class III. The comment pointed out that methyl methacrylate bone cement for orthopedic application has been regulated as a prescription drug and is a class III transitional device under section 520(1) of the act (21 U.S.C. 360j(l)). The comment stated that because the formulation of methyl methacrylate for aneurysmorrhaphy is identical to that of methyl methacrylate bone cement, the two devices should be regulated in the same manner.

FDA rejects the comment. Methyl methacrylate bone cement for orthopedic applications is a transitional device under section 520(1) of the act because it was subject to an approved new drug application on file with FDA prior to passage of the Medical Device Amendments of 1976. FDA disagrees that other uses of methyl methacrylate must be classified in the same manner as methyl methacrylate bone cement. Methyl methacrylate for aneurysmorrhaphy has been marketed for many years and was not regulated as a prescription drug prior to passage of the Medical Device Amendments of 1976. FDA considers methyl methacrylate for aneurysmorrhaphy to be a pre-enactment device and is classifying it into class II under section 513 of the act (21 U.S.C. 360c).

Two comments objected to the proposal to classify methyl methacrylate for aneurysmorrhaphy into class II because there is not sufficient information to establish a performance standard. One comment referred to discussions held by the Neurological Device Classification Panel during its deliberations on this device and noted that there were differences of opinion among the Panel members about the safety and effectiveness of the device. Both comments stated that the device should be classified into class III because insufficient information exists to establish a performance standard.

FDA disagrees with the comments. On May 29, 1979, the Neurological Section of the Respiratory and Nervous System Devices Panel (formerly the Neurological Device Classification Panel) met to consider all comments received on the proposal to classify methyl methacrylate for

V 4 4 / 1 7 2 S E 4 7 9 UMI

aneurysmorrhaphy into class II. At the meeting, representatives of Howmedica, Inc., and the Health Research Group appeared before the Panel to present their views that methyl methacrylate for aneurysmorrhaphy should be classified into class III rather than class II as proposed. Representatives of the L. D. Caulk Co. and a representative of the Joint Committee on Materials, Devices, and Drugs of the American Association of Neurological Surgeons appeared before the Panel to support FDA's proposal to classify methyl methacrylate for aneurysmorrhaphy in class II.

After considering the comments and the additional testimony presented to the Panel, the Panel concluded that there is sufficient information available to establish a performance standard for the device and recommended that the classification of the device be class II as proposed. FDA agrees with the Panel and is adopting the proposed regulation without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5030, to read as follows:

§ 882.5030 Methyl methacrylate for aneurysmorrhaphy.

(a) *Identification.* Methyl methacrylate for aneurysmorrhaphy (repair of aneurysms, which are balloonlike sacs formed on blood vessels) is a self-curing acrylic used to encase and reinforce intracranial aneurysms that are not amenable to conservative management, removal, or obliteration by aneurysm clip.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

---

21 CFR Part 882

[Docket No. 78N-1076]

Neurological Devices; Classification of Biofeedback Devices

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying biofeedback devices into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55699) a proposed regulation to classify biofeedback devices into class II (performance stanadards). A period of 60 days was provided for interested persons to submit written comments to FDA.

A comment questioned whether clinical psychologists would be able to use biofeedback devices if the devices were sold only to physicians or other licensed practitioners. In particular, the comment was concerned that psychologists not be excluded from the definition of a "licensed practitioner."

Clinical psychologists are included in the definition of "licensed practitioner" because they are now licensed in all States and the District of Columbia. Unless specifically excluded by provisions of their State licenses, clinical psychologists may, therefore, purchase and use biofeedback devices.

No comments disagreed with the proposal to classify biofeedback devices in class II. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 by adding new Subpart F and § 882.5050, to read as follows:

Subpart F—Neurological Therapeutic Devices

§ 882.5050 Biofeedback device.

(a) *Identification.* A biofeedback device is an instrument that provides a visual or auditory signal corresponding to the status of one or more of a patient's physiological parameters (e.g., brain alpha wave activity, muscle activity, skin temperature, etc.) so that the patient can control voluntarily these physiological parameters.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N-1077]

Neurological Devices; Classification of Bite Blocks

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying bite blocks into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55700) a proposed regulation to classify bite blocks into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5070, to read as follows:

§ 882.5070 Bite block.

(a) *Identification.* A bite block is a device inserted into a patient's mouth to protect the tongue and teeth while the patient is having convulsions.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 882

[Docket No. 78N-1078]

Neurological Devices; Classification of Intravascular Occluding Catheters

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying intravascular occluding catheters into class III (premarket approval). The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application that includes information concerning safety and effectiveness tests for the device. Each application must be submitted to FDA on or before May 28, 1982, or 90 days after promulgation of a separate regulation requiring premarket approval of the device, whichever occurs later. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55700) a proposed regulation to classify intravascular occluding catheters into class III (premarket approval). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5150, to read as follows:

§ 882.5150 Intravascular occluding catheter.

(a) *Identification.* An intravascular occluding catheter is a catheter with an inflatable or detachable balloon tip that is used to block a blood vessel to treat malformations, e.g., aneurysms (balloonlike sacs formed on blood vessels) of intracranial blood vessels.

(b) *Classification.* Class III (premarket approval).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 882

[Docket No. 78N-1079]

Neurological Devices; Classification of Carotid Artery Clamps

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying carotid artery clamps into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55701) a proposed regulation to classify carotid artery clamps into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5175, to read as follows:

§ 882.5175 Carotid artery clamp.

(a) *Identification.* A carotid artery clamp is a device that is surgically placed around a patient's carotid artery (the principal artery in the neck that supplies blood to the brain) and has a removable adjusting mechanism that protrudes through the skin of the patient's neck. The clamp is used to occlude the patient's carotid artery to treat intracranial aneurysms (balloonlike sacs formed on blood vessels) or other intracranial vascular malformations that are difficult to attach directly by reducing the blood pressure and blood flow to the aneurysm or malformation.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 882

[Docket No. 78N–1080]

Neurological Devices; Classification of Aneurysm Clips

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying aneurysm clips into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55703) a proposed regulation to classify aneurysm clips into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

A comment from a manufacturer suggested that aneurysm clips be classified in class III (premarket approval) instead of class II (performance standards) as proposed. The comment stated that aneurysm clips are critical, life-sustaining devices and that simple performance standards are not sufficient for these types of instruments.

The agency disagrees with this comment. The comment supplied no additional data or documentation that was not considered by the agency before publishing the proposal to classify aneurysm clips into class II. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5200, to read as follows:

§ 882.5200 Aneurysm clip.

(a) *Identification.* An aneurysm clip is a device used to occlude an intracranial aneurysm (a balloonlike sac formed on a blood vessel) to prevent it from bleeding or bursting.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 882

[Docket No. 78N–1081]

Neurological Devices; Classification of Implanted Malleable Clips

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying implanted malleable clips into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55704) a proposed regulation to classify implanted malleable clips into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

One comment agreed with the proposal to classify implanted malleable clips in class II. The comment also agreed with the recommendation of the Neurological Device Classification Panel that sterling silver not be used in implanted malleable clips. The comment suggested that a performance standard should exclude the use of sterling silver as a material for implanted malleable clips.

The agency agrees that a performance standard should exclude the use of sterling silver as a material for implanted malleable clips. At a future date, the agency will initiate proceedings to adopt performance standards for this device, as well as for other devices that are classified in class II.

A comment from a manufacturer suggested that implanted malleable clips be classified in class III (premarket approval) instead of class II (performance standards) as proposed. The comment stated that these clips are critical, life-sustaining devices and simple performance standards are not sufficient for these types of devices.

The agency disagrees with the comment to classify implanted malleable clips in class III. The comment supplied no additional data or documentation that was not considered by the agency before publishing the proposal to classify the device in class II.

The agency has made minor changes to the identification of the device to make it clear that the rule applies to those implanted malleable clips intended primarily for intracranial use. Accordingly, the proposed regulation is being adopted with this change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5225, to read as follows:

§ 882.5225 Implanted malleable clip.

(a) *Identification.* An implanted malleable clip is a bent wire or staple that is forcibly closed with a special instrument to occlude an intracranial blood vessel or aneurysm (a balloonlike sac formed on a blood vessel), stop bleeding, or hold tissue or a mechanical device in place in a patient.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79–26869 Filed 8–31–79; 8:45 am]

[Docket No. 78N–1082]

Neurological Devices; Classification of Aversive Conditioning Devices

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying aversive conditioning devices into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55705) a proposed regulation to classify aversive conditioning devices into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5235, to read as follows:

§ 882.5235 Aversive conditioning device.

(a) *Identification.* An aversive conditioning device is an instrument used to administer an electrical shock or other noxious stimulus to a patient to modify undesirable behavioral characteristics.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

[Docket No. 78N–1083]

Neurological Devices; Classification of Burr Hole Covers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying burr hole covers into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55706) a proposed regulation to classify burr hole covers into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5250, to read as follows:

§ 882.5250 Burr hole cover.

(a) *Identification.* A burr hole cover is a plastic or metal device used to cover or plug holes drilled into the skull during surgery and to reattach cranial bone removed during surgery.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

21 CFR Part 882

[Docket No. 78N–1084]

Neurological Devices; Classification of Nerve Cuffs

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying nerve cuffs into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken

under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55707) a proposed regulation to classify nerve cuffs into class III (premarket approval). A period of 60 days was provided for interested persons to submit written comments to FDA.

Three comments were received. The comments disagreed with classifying nerve cuffs in class III. Two of the comments were from physicians, who described their successful experiences with the device in repairing nerves and in capping the ends of nerves to prevent and treat painful neuromas (tumors). Both physicians stated that the nerve cuff is useful in protecting severed nerves in patients who have wounds with massive scarring, e.g., wounds due to gunshot wounds, and in treating and preventing the occurrence of neuromas on nerves in extremities that have been amputated. One of the physicians cited a recent study (Swanson, et al., *The Journal of Hand Surgery*, 2:70–78, 1977) of the effectiveness of nerve capping in the treatment and prevention of amputation neuromas. The study reported on the results of capping 38 nerves in the upper extremities of 18 patients and 9 nerves in the lower extremities of 8 patients. One patient required a second operation to recap a nerve for successful relief of pain, and two patients were considered failures.

A comment from Dow Corning Corporation (DOW), a manufacturer of the nerve cuff, included an extensive bibliography of references relative to the use of the nerve cuff in humans and in animals, including the study by Swanson mentioned above. The comment argued that the proposal to classify nerve cuffs in class III relied too heavily on one journal article (Szal and Miller, *Archives of Otolaryngology*, 101:160–165, 1975) that showed negative results when nerve cuffs were used to protect nerve repair sites in rabbits. The comment noted that many other investigators have consistently reported that nerve cuffs are effective and that the Szal study was not relevant to the clinical use of the nerve cuff because the wrong size nerve cuffs were used on the facial nerves of rabbits.

On February 23, 1979, the Neurological Section of the Respiratory and Nervous System Devices Panel (formerly the Neurological Device Classification Panel) met to review the comments received on the proposal to classify nerve cuffs in class III. At the meeting, representatives of Dow presented a brief history of the device and described the manner in which it is currently being used. They stated that the nerve cuff has been used extensively to treat war injuries, but that it was only being marketed on a small scale today. They noted that neuromas were prevented in all but about 5 percent of the cases reported by Swanson in his study. The firm also noted that neuromas normally occur in 30 percent of such cases. The Dow representative asked the Panel to recommend that the device be classified in class II because of its long history of use without adverse reports.

During the Panel discussion, one of the Panel members pointed out that the literature from the 1960's pertaining to the nerve cuff was enthusiastic, but that the use of the device has largely been displaced by improvements in surgical technique. The member also pointed out that the effectiveness of nerve cuffs in nerve repair was not always good and that the results were sometimes disappointing. Although several Panel members disagreed with classifying nerve cuffs in class II because the device is of questionable effectiveness when used as a sheath in repairing nerves, the majority of the Panel members voted to recommend that the classification of nerve cuffs be changed to class II. Those Panel members favoring class II noted that the data showed that the device is effective in capping the ends of nerves to prevent neuromas and that the device could be beneficial in the absence of microsurgical techniques.

FDA has carefully considered the Panel's recommendation and the additional information and data submitted on this device. FDA agrees with the Panel and is changing the classification of nerve cuffs in the final rule to class II rather than class III as proposed. The agency realizes that the nerve cuff may not be as effective in repairing nerves as newer techniques involving microsurgery. However, the data appear to demonstrate the effectiveness of the device as a nerve cap in preventing neuromas and its usefulness as a sheath to protect the nerve during nerve repair when the recommended size nerve cuff is used. Accordingly, the final regulation is being changed to classify the device in class II. For the reasons stated in the general regulation on neurological devices, published elsewhere in this issue of the **Federal Register**, FDA does not believe that it is necessary to issue a new proposal concerning this decision. Persons who disagree with classifying nerve cuffs in class II may petition for reclassification of the device under Subpart C of Part 860, the classification procedures regulation.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5275, to read as follows:

§ 882.5275 Nerve cuff.

(a) *Identification.* A nerve cuff is a tubular silicone rubber sheath used to encase a nerve for aid in repairing the nerve (e.g., to prevent ingrowth of scar tissue) and for capping the end of the nerve to prevent the formation of neuroma (tumors).

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 882

[Docket No. 78N–1085]

Neurological Devices; Classification of Methyl Methacrylate for Cranioplasty

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying methyl methacrylate for cranioplasty into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55708) a proposed regulation to classify methyl methacrylate for cranioplasty into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

A comment objected to classifying methyl methacrylate for cranioplasty into class II and recommended that instead it be classified into class III. The comment pointed out that methyl methacrylate bone cement for orthopedic applications has been regulated as a prescription drug and is a class III transitional device under section 520(1) of the act (21 U.S.C. 360[(l)). The comment stated that because the formulation of methyl methacrylate for cranioplasty is identical to that of methyl methacrylate bone cement, the two devices should be regulated in the same manner.

FDA rejects the comment. Methyl methacrylate bone cement for orthopedic applications is a transitional device under section 520(1) of the act because it was subject to an approved new drug application on file with FDA prior to passage of the Medical Device Amendments of 1976. FDA disagrees that other uses of methyl methacrylate must be classified in the same manner as methyl methacrylate bone cement. Methyl methacrylate for cranioplasty has been marketed for many years and was not regulated as a prescription drug prior to passage of the Medical Device Amendments of 1976. FDA considers methyl methacrylate for cranioplasty to be a pre-enactment device and is classifying it into class II under section 513 of the act (21 U.S.C. 360c).

A comment objected to the proposal to classify methyl methacrylate for cranioplasty into class II because there is not sufficient information to establish a performance standard and recommended that it be classified instead into class III.

FDA disagrees with the comment. On May 29, 1979, the Neurological Section of the Respiratory and Nervous Systems Devices Panel (formerly the Neurological Device Classification Panel) met to consider all comments received on the proposal to classify methyl methacrylate for cranioplasty into class II. At the meeting, representatives of Howmedica, Inc., appeared before the Panel to present their views that methyl methacrylate for cranioplasty should be classified into class III rather than class II as proposed. Representatives of the L. D. Caulk Co. and a representative of the Joint Committee on Materials, Devices, and Drugs of the American Association of Neurological Surgeons appeared before the Panel to support FDA's proposal to classify methyl methacrylate for cranioplasty into class II.

After considering the comments and the additional testimony presented to the Panel, the Panel concluded that there is sufficient information available to establish a performance standard for the device and recommended that the classification of the device be class II as proposed. FDA agrees with the Panel and is adopting the proposed regulation without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5300, to read as follows:

§ 882.5300 Methyl methacrylate for cranioplasty.

(a) *Identification.* Methyl methacrylate for cranioplasty (skull repair) is a self-curing acrylic that a surgeon uses to repair a skull defect in a patient. At the time of surgery, the surgeon initiates polymerization of the material and forms it into a plate or other appropriate shape to repair the defect.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

21 CFR Part 882

[Docket No. 78N–1086]

Neurological Devices; Classification of Preformed Alterable Cranioplasty Plates

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying preformed alterable cranioplasty plates into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55709) a proposed regulation to classify preformed alterable cranioplasty plates into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5320, to read as follows:

§ 882.5320 Preformed alterable cranioplasty plate.

(a) *Identification.* A preformed alterable cranioplasty plate is a device that is implanted into a patient to repair a skull defect. It is constructed of a

material, e.g., tantalum, that can be altered or reshaped at the time of surgery without changing the chemical behavior of the material.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

Neurological Devices; Classification of Lesion Temperature Monitors

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying lesion temperature monitors into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55713) a proposed regulation to classify lesion temperature monitors into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5500, to read as follows:

§ 882.5500 Lesion temperature monitor.

(a) *Identification.* A lesion temperature monitor is a device used to monitor the tissue temperature at the site where a lesion (tissue destruction) is to be made when a surgeon uses a radiofrequency (RF) lesion generator and probe.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

21 CFR Part 882

[Docket No. 78N–1090]

Neurological Devices; Classification of Central Nervous System Fluid Shunts and Components

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying central nervous system fluid shunts and components into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55714) a proposed regulation to classify central nervous system fluid shunts and components into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

One comment objected to classifying central nervous system fluid shunts and components into class II (performance standards) and suggested that the device be classified into class III instead because not enough information exists to establish a performance standard.

The comment did not submit any additional data or information that was not considered by the agency before publishing the proposal to classify central nervous system fluid shunts and components into class II. Therefore, the agency rejects this comment.

A comment agreed with the proposal to classify implanted or partially implanted central nervous system fluid shunts and components into class II, but suggested that all components that are external to the patient (e.g., cerebrospinal fluid (CSF) collection bags) be classified into class I. The comment stated that medical costs could be reduced if bags designed for other purposes could be used for external CSF collection.

The agency has carefully considered this comment and has decided to classify all central nervous system fluid shunts and components in class II as proposed. The agency does not believe that classification of the device into class II will prevent the user from using other types of bags that were not specifically designed for CSF collection. The agency believes, however, that components specifically promoted for this purpose should be appropriate for the application and compatible with the other components used for central nervous system fluid shunting. The agency does not anticipate that a detailed performance standard for every component will be necessary. However, it does believe that a standard for central nervous system fluid shunt and components should address the compatibility of each component to the functioning of the overall system. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5550, to read as follows:

§ 882.5550 Central nervous system fluid shunts and components.

(a) *Identification.* A central nervous system fluid shunt is a device or combination of devices used to divert fluid from the brain or other part of the central nervous system to an internal delivery site or an external receptacle for the purpose of relieving elevated intracranial pressure or fluid volume (e.g., due to hydrocephalus). Components of a central nervous system shunt include catheters, valved catheters, valves, connectors, and other accessory components intended to facilitate use of the shunt or evaluation of a patient with a shunt.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 882

[Docket No. 78N-1091]

Neurological Devices; Classification of Cranial Electrotheraphy Stimulators

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying cranial electrotheraphy stimulators into class III (premarket approval). The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application that includes information concerning safety and effectiveness tests for the device. Each application must be submitted to FDA on or before May 28, 1982, or 90 days after promulgation of a separate regulation requiring premarket approval of the device, whichever occurs later. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55716) a proposed regulation to classify cranial electrotheraphy stimulators into class III (premarket approval). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5800, to read as follows:

§ 882.5800 Cranial electrotheraphy stimulator.

(a) *Identification.* A cranial electrotheraphy stimulator is a device that applies electrical current to a patient's head to treat insomnia, depression, or anxiety.

(b) *Classification.* Class III (premarket approval).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 882

[Docket No. 78N-1092]

Neurological Devices; Classification of External Functional Neuromuscular Stimulators

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying external functional neuromuscular stimulators into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55717) a proposed regulation to classify external functional neuromuscular stimulators into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5810, to read as follows:

§ 882.5810 External functional neuromuscular stimulator.

(a) *Identification.* An external functional neuromuscular stimulator is an electrical stimulator that uses external electrodes for stimulating muscles in the leg and ankle of partially paralyzed patients (e.g., after stroke) to provide flexion of the foot and thus improve the patient's gait.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 882

[Docket No. 78N-1093

Neurological Devices; Classification of Implanted Cerebellar Stimulators

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying implanted cerebellar stimulators into class III (Premarket approval). The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application that includes information concerning safety and effectiveness tests for the device. Each application must be submitted to FDA on or before May 28, 1982, or 90 days after promulgation of a separate regulation requiring premarket approval of the device, whichever occurs later. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55718) a proposed regulation to classify implanted cerebellar stimulators into class III (premarket approval). A period of 60 days was provided for interested persons to submit written comments to FDA.

One comment disagreed with the proposal to classify implanted cerebellar stimulators in class III. The comment recommended that cerebellar stimulators for use in the treatment of spasticity be classified instead in class II because personal experience with over 100 patients had proven the safety and effectiveness of the device.

The Neurological Device Classification Panel received extensive testimony and data on cerebellar stimulation and concluded that insufficient information exists to establish a performance standard that would assure the safety and effectiveness of the device. The Panel, therefore, recommended that the device undergo premarket approval to assure that it is safe and effective. The comment received on the proposal to classify implanted cerebellar stimulators in class III did not provide additional data to show that a performance standard can be established that would assure the safety and effectiveness of implanted cerebellar stimulators. Therefore, the agency rejects the comment and is adopting the proposed regulation without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5820, to read as follows:

§ 882.5820 Implanted cerebellar stimulator.

(a) *Identification.* An implanted cerebellar stimulator is a device used to stimulate electrically a patient's cerebellar cortex for the treatment of intractable epilepsy, spasticity, and some movement disorders. The stimulator consists of an implanted receiver with electrodes that are placed on the patient's cerebellum and an external transmitter for transmitting the stimulating pulses across the patient's skin to the implanted receiver.

(b) *Classification.* Class III (premarket approval).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26881 Filed 8-31-79; 8:45 am]

BILLING CODE 4110-03-M

---

21 CFR Part 882

[Docket No. 78N-1094]

Neurological Devices; Classification of Implanted Diaphragmatic/Phrenic Nerve Stimulators

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying implanted diaphragmatic/phrenic nerve stimulators into class III (premarket approval). The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application that includes information concerning safety and effectiveness tests for the device. Each application must be submitted to FDA on or before May 28, 1982, or 90 days after promulgation of a separate regulation requiring premarket approval of the device, whichever occurs later. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55719) a proposed regulation to classify implanted diaphragmatic/phrenic nerve stimulators into class III (premarket approval). A period of 60 days was provided for interested persons to submit written comments to FDA.

The following is a summary of the comments received and the agency's responses to them:

1. One comment stated that this device should now be classified into class III so that manufacturers and users who are unfamiliar with the device will realize the need for caution in its construction and its application. The comment stated, however, that the device, as currently constructed, is reasonably safe and effective and that the principal risk to the patient is not from device failure but from the failure of the user to appreciate the indications for diaphragm pacing and from failure to apply the device properly.

FDA agrees with this comment.

2. A comment pointed out that the Neurological Device Classification Panel gave as a reason for classifying this device in class III the fact that available data on the device were from only one company. The comment stated that whether the device is available from one or more sources has no bearing on its safety and efficacy and enclosed a select bibliography of 59 references on diaphragm stimulation.

FDA agrees that the availability of a device from only one company does not mean that the device is not safe or effective. The Neurological Device Classification Panel did not recommend that this device be classified into class III solely because it is available from only one company. However, the Panel did cite this fact as one reason for believing that insufficient information is available to establish a performance standard for the device that will assure its safety and effectiveness. Because this device is a life-sustaining implant, the Federal Food, Drug, and Cosmetic Act requires that FDA classify it into class III if insufficient information is available to establish a performance standard that will assure the safety and effectiveness of the device. In this case, the agency concurs with the Panel that insufficient information exists to establish such a performance standard.

3. A comment was received regarding the risks to health identified by the Panel. The comment stated that device failure can be minimized, although not totally prevented, by using high quality components and production techniques and that the consequences of a catastrophic device failure can be ameliorated by using patient monitoring and device redundancy. The comment

V 4 4 / 1 7 2 S E 4 7 9 UMI

also stated that the materials that are used to construct the device have been used in several thousand other patients and have been shown to be tissue compatible. The comment also noted that injury to the phrenic nerve in patients in whom the device has been implanted has been associated with the surgical technique rather than with the electrical stimulation of the device and that patients have used the device for up to 9 years without evidence of injury to the phrenic nerve.

FDA recognizes that the risks to health identified by the Panel will not occur in every patient. However, those risks to health are hazards that the patient is exposed to when the device is implanted and used. Obviously, in most patients, the benefits to be gained from using the device far outweigh the risks to which the patient is exposed. However, the risks to health do exist and should be regulated in the most effective possible way.

Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5830, to read as follows:

§ 882.5830 Implanted diaphragmatic/phrenic nerve stimulator.

(a) *Identification.* An implanted diaphragmatic/phrenic nerve stimulator is a device that provides electrical stimulation of a patient's phrenic nerve to contract the diaphragm rhythmically and produce breathing in patients who have hyperventilation (a state in which an abnormally low amount of air enters the lungs) caused by brain stem disease, high cervical spinal cord injury, or chronic lung disease. The stimulator consists of an implanted receiver with electrodes that are placed around the patient's phrenic nerve and an external transmitter for transmitting the stimulating pulses across the patient's skin to the implanted receiver.

(b) *Classification.* Class III (premarket approval).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 882

[Docket No. 78N-1095]

Neurological Devices; Classification of Implanted Intracerebral/Subcortical Stimulators for Pain Relief

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying implanted intracerebral/subcortical stimulators for pain relief into class III (premarket approval). The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application that includes information concerning safety and effectiveness tests for the device. Each application must be submitted to FDA on or before May 28, 1982, or 90 days after promulgation of a separate regulation requiring premarket approval of the device, whichever occurs later. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55720) a proposed regulation to classify implanted intracerebral/subcortical stimulators for pain relief into class III (premarket approval). A period of 60 days was provided for interested persons to submit written comments to FDA.

The following is a summary of the comments and the agency's responses to them:

1. Several comments asked that the implanted intracerebral/subcortical stimulator for pain relief not be classified into class III because this would make it more difficult for patients to get the device and for neurosurgeons to use it. Several comments also said that the device should not be classified into class III because brain stimulation for pain relief is no longer an experimental procedure and should be standard treatment.

The agency disagrees with the comments. Classifying a device into class III does not necessarily mean that the device will be more difficult to obtain and does not imply that it is an experimental device. Each manufacturer of a device classified into class III will have at least 30 months after the effective date of the final regulation classifying the device into class III to submit to FDA an application for approval of the device. Manufacturers may continue marketing the device during the 30-month period. If a manufacturer's application is approved, the manufacturer can continue marketing the device indefinitely. FDA believes that 30 months is sufficient time for manufacturers to document the safety and effectiveness of their devices and to submit an application for approval. If at the end of 30 months a manufacturer does not have sufficient safety and effective data to support an application for approval, FDA may authorize continued distribution of the device for investigational purposes, as provided in section 520(g) of the act (21 U.S.C. 360j(e)).

2. Several comments stated that the device should be classified into class II because there is sufficient clinical experience with the device to demonstrate that it is safe and effective. However, one comment agreed with classifying the device into class III and stated that long-term effectiveness of the device has not been proven.

The agency does not agree that the device should be classified into class II. Although there have been several reports of successful clinical application of the device, FDA does not believe that there is sufficient information to develop a performance standard that will assure that marketed devices are safe and effective. The available data contain little information that can be used in developing a performance standard. FDA believes that the only way to assure that implanted intracerebral/subcortical stimulators for pain relief are safe and effective is to classify the device into class III so that each manufacturer will be required to document the safety and effectiveness of the device that the manufacturer markets.

3. Several comments stated that the risks of using the device are minimal and that the complication rate has been low. One comment stated that the platinum electrodes that are used cause almost no tissue reaction. Two comments stated that the risks of injuring brain tissue while inserting the device electrodes into the brain are no greater than the risks involved in using some other widely accepted neurosurgical procedures. Another comment stated that the devices use safe levels of electrical current. The comments suggested that, for these reasons, the device should be classified into class II instead of class III.

The agency does not agree that the risks to health from this device are minimal and that the device should be classified into class II. FDA realizes that the risks associated with this device may be presented by other accepted neurosurgical procedures and may not result in patient injury in every case. Patients are, however, exposed to potentially serious risks when the device is used. Obviously, the benefits to the patient must be balanced against these risks before the device is used. If a particular device is unreliable or ineffective, patients may be exposed to risks needlessly. FDA believes that the implanted intracerebral/subcortical stimulator for pain relief must be classified into class III to require manufacturers of the device to demonstrate that their device is reasonably safe and effective for this use. Accordingly, the proposed rule is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5840, to read as follows:

§ 882.5840 Implanted intracerebral/subcortical stimulator for pain relief.

(a) *Identification.* An implanted intracerebral/subcortical stimulator for pain relief is a device that applies electrical current to subsurface areas of a patient's brain to treat severe intractable pain. The stimulator consists of an implanted receiver with electrodes that are placed within a patient's brain and an external transmitter for transmitting the stimulating pulses across the patient's skin to the implanted receiver.

(b) *Classification.* Class III (premarket approval).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N-1096]

Neurological Devices; Classification of Implanted Spinal Cord Stimulators for Bladder Evacuation

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying implanted spinal cord stimulators for bladder evacuation into class III (premarket approval). The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application that includes information concerning safety and effectiveness tests for the device. Each application must be submitted to FDA on or before May 28, 1982, or 90 days after promulgation separate regulation requiring premarket approval of the device, whichever occurs later. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55721) a proposed regulation to classify implanted spinal cord stimulators for bladder evacuation into class III (premarket approval). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5850, to read as follows:

§ 882.5850 Implanted spinal cord stimulator for bladder evacuation.

(a) *Identification.* An implanted spinal cord stimulator for bladder evacuation is an electrical stimulator used to empty the bladder of a paraplegic patient who has a complete transection of the spinal cord and who is unable to empty his or her bladder by reflex means or by the intermittent use of catheters. The stimulator consists of an implanted receiver with electrodes that are placed on the conus medullaris portion of the patient's spinal cord and an external transmitter for transmitting the stimulating pulses across the patient's skin to the implanted receiver.

(b) *Classification.* Class III (premarket approval).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

Neurological Devices; Classification of Implanted Neuromuscular Stimulators

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying implanted neuromuscular stimulators into class III (premarket approval). The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application that includes information concerning safety and effectiveness tests for the device. Each application must be submitted to FDA on or before May 28, 1982, or 90 days after promulgation of a separate regulation requiring premarket approval of the device, whichever occurs later. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

V 4 4 / 1 7 2 S E 4 7 9 UMI

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55722) a proposed regulation to classify implanted neuromuscular stimulators into class III (premarket approval). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5860, to read as follows:

§ 882.5860 Implanted neuromuscular stimulator.

(a) *Identification.* An implanted neuromuscular stimulator is a device that provides electrical stimulation to a patient's peroneal or femoral nerve to cause muscles in the leg to contract, thus improving the gait in a patient with a paralyzed leg. The stimulator consists of an implanted receiver with electrodes that are places around a patient's nerve and an external transmitter for transmitting the stimulating pulses across the patient's skin to the implanted receiver. The external transmitter is activated by a switch in the heel in the patient's shoe.

(b) *Classification.* Class III (premarket approval).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

21 CFR Part 882

[Docket No. 78N–1098]

Neurological Devices; Classification of Implanted Peripheral Nerve Stimulators for Pain Relief

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying implanted peripheral nerve stimulators for pain relief into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55724) a proposed regulation to classify implanted peripheral nerve stimulators for pain relief into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

Several comments agreed with classifying implanted peripheral nerve stimulators for pain relief in class II. One comment recommended that the device be classified into class III (premarket approval), but no new information was submitted to support the recommendation.

Accordingly, the agency rejects the comment and is adopting the proposed regulation without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5870, to read as follows:

§ 882.5870 Implanted peripheral nerve stimulator for pain relief.

(a) *Identification.* An implanted peripheral nerve stimulator for pain relief is a device that is used to stimulate electrically a peripheral nerve in a patient to relieve severe intractable pain. The stimulator consists of an inplanted receiver with electrodes that are placed around a peripheral nerve and an external transmitter for transmitting the stimulating pulses across the patient's skin to the implanted receiver.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 882

[Docket No. 78N–1099]

Neurological Devices; Classification of Implanted Spinal Cord Stimulators for Pain Relief

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying implanted spinal cord stimulators for pain relief into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55725) a proposed regulation to classify implanted spinal cord stimulators for pain relief into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

Several comments were received regarding the use of this device for treating conditions other than pain, such as multiple sclerosis or other motor disorders. One comment suggested that the device category be broadened to include indications other than pain relief, or that a separate category for implanted spinal cord stimulators for motor disorders be created.

The agency disagrees that this device category should include devices that are indicated for uses other than pain relief. The proposed neurological device classification regulations that FDA published will apply to those neurological devices that were on the market prior to May 28, 1976, the enactment date of the Medical Device Amendments of 1976. New devices introduced for marketing after May 28, 1976, or devices that have been substantially altered (e.g., by providing new indications in the labeling), are by law automatically classified into class III and must undergo premarket approval prior to marketing. The agency believes that implanted spinal cord stimulators for motor disorders were distributed by manufacturers before May 28, 1976 only for investigational purposes and were not being "marketed." Because the implanted spinal cord stimulator for motor disorder indications is not a "pre-enactment" device and will be automatically classified into class III, the Panel did not recommend, and FDA did not propose, a separate classification category for this use. Manufacturers who now desire to distribute, for other than investigational purposes, an implanted spinal cord stimulator that includes labeling with indications for motor disorders must submit to FDA a premarket approval application or petition the agency to reclassify the device for this new indication.

Several comments agreed with the agency's proposal to classify implanted spinal cord stimulators for pain relief into class II.

Two comments disagreed with classifying the device into class II. One comment suggested that the device be classified into class I (general controls), but offered no reason for the recommendation other than stating that the collective experience of many surgeons justified classification of the device into class I. The other comment suggested that the device be classified into class III rather than class II because there is not sufficient information to develop a performance standard. The comment did not supply any additional information or explain the basis for the suggestion. Therefore, the agency disagrees with both comments and is adopting the proposed regulation without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5880, to read as follows:

§ 882.5880 Implanted spinal cord stimulator for pain relief.

(a) *Identification.* An implanted spinal cord stimulator for pain relief is a device that is used to stimulate electrically a patient's spinal cord to relieve severe intractable pain. The stimulator consists of an implanted receiver with electrodes that are placed on the patient's spinal cord and an external transmitter for transmitting the stimulating pulses across the patient's skin to the implanted receiver.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William R. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

Neurological Devices; Classification of Dura Substitutes

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying dura substitutes into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55728) a proposed regulation to classify dura substitutes into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5910, to read as follows:

§ 882.5910 Dura substitute.

(a) *Identification.* A dura substitute is a sheet or material that is used to repair the dura mater (the membrane surrounding the brain).

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

21 CFR Part 882

[Docket No. 78N-1103]

Neurological Devices; Classification of Electroconvulsive Therapy Devices

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying electroconvulsive therapy devices into class III (premarket approval). The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application that includes information concerning safety and effectiveness tests for the device. Each application must be submitted to FDA on or before May 28, 1982, or 90 days after promulgation of a separate regulation requiring premarket approval of the device, whichever occurs later. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK-430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification

procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55729) a proposed regulation to classify electroconvulsive therapy devices into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

Several comments were received from patients who had been treated with electroconvulsive therapy (ECT). The comments complained of loss of memory after receiving the ECT treatments and asked for strict controls over the application of ECT. Several other comments disagreed with the proposal to classify ECT devices in class II and recommended that they be classified in class III. One of the comments stated that there is insufficient information available to develop a performance standard for ECT devices in the following areas: (1) The proper wave form to be used; (2) The amount of energy to be applied; (3) The size and shape of the electrodes; (4) The characteristics of the skin/electrode interface. Another comment stated that ECT is, by its nature, brain damaging and, because there is no consensus regarding the effectiveness of the therapy, disagreed that the FDA can "assure effectiveness" of ECT. Another comment agreed with the proposal to classify ECT devices in class II and pointed out that the American Psychiatric Association (APA) has initiated efforts to develop a performance standard for ECT devices.

On May 29, 1979, the Neurological Section of the Respiratory and Nervous System Devices Panel (formerly the Neurological Device Classification Panel) met to consider the comments that were received on the proposal to classify electroconvulsive therapy devices in class II. At the meeting, a representative of the Health Research Group asked that ECT devices be classified in class III because insufficient information is available to develop a performance standard. A representative of the Citizen's Commission on Human Rights of the Association of Scientologists for Reform, claimed that ECT is neither safe nor effective for any use and called for its abolition. A patient described her personal experience with ECT and stated that she had severe memory loss because of the treatment. Richard Weiner, M.D., Ph. D., described the goals and purposes of a committee formed by the American Psychiatric Association (APA) at the request of FDA to develop standards for electroconvulsive therapy devices. Dr. Weiner stated that the committee is reviewing the literature to gather information on which to base a performance standard, and that he expected to have sufficient information to begin writing the standard in about six months.

The Panel's discussion centered around the question of whether there is now sufficient information to develop an adequate performance standard for electroconvulsive therapy devices. There was disagreement over what constitutes sufficient information; and several panel members expressed doubt that enough information does, in fact, exist and noted that such information was not available to them. The Panel therefore voted to recommend that ECT devices be classified in class III rather than class II as proposed, because there is not now enough information available on which to establish a performance standard for ECT devices.

FDA has carefully considered the classification of electroconvulsive therapy devices and has decided to classify the devices in class III rather than class II as proposed. FDA is aware of and encourages the work of the APA committee in developing a performance standard. The agency is persuaded, however, based on the comments received on the proposal and on the recommendation of the Panel, that there is insufficient information to establish a standard to provide reasonable assurance of the safety and effectiveness of the ECT device. This conclusion, which differs from the preliminary judgment contained in the proposed regulation, was prompted by FDA's belief that the characteristics of ECT devices that should be addressed in a standard have not been identified precisely enough for the agency to determine whether adequate information is available to write a standard. Accordingly, the agency believes that ECT devices should be classified in class III until the APA committee has completed its review of ECT, has identified the characteristics of ECT devices that should be controlled by a performance standard, and has found that sufficient information exists to establish an adequate standard. FDA encourages the committee to submit its conclusions, a proposed standard, and the information on which the standard is based to FDA, along with a petition to reclassify ECT devices into class II.

Accordingly, the final regulation for electroconvulsive therapy devices is being changed to classify the device in class III instead of class II as proposed. For the reasons stated in the general regulation on neurological devices, published elsewhere in this issue of the **Federal Register**, FDA does not believe that it is necessary to issue a new proposal concerning this decision. Persons who disagree with classifying electroconvulsive therapy devices in class III may petition for reclassification of the device under Subpart C of Part 860, the classification procedures regulation.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5940, to read as follows:

§ 882.5940 Electroconvulsive therapy device.

(a) *Identification.* An electroconvulsive therapy device is a device used for treating severe psychiatric disturbances (e.g., severe depression) by inducing in the patient a major motor seizure by applying a brief intense electrical current to the patient's head.

(b) *Classification.* Class III (premarket approval).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

21 CFR Part 882

[Docket No. 78N-1104]

Neurological Devices; Classification of Artificial Embolization Devices

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying artificial embolization devices into class III (premarket approval). The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application that includes information concerning safety and effectiveness tests for the device. Each application must be submitted to FDA on or before May 28, 1982, or 90 days after promulgation of a separate regulation requiring premarket approval of the device, whichever occurs later. This action is being taken

V 4 4 / 1 7 2 SEP 4 79 UMI

under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55730) a proposed regulation to classify artificial embolization devices into class III (premarket approval). A period of 60 days was provided for interested persons to submit written comments to FDA.

One comment recommended that artificial embolization devices be classified in class II rather than III because the devices have been used for 15 years and the safety of their use has been established. The comment noted that the safety of artificial embolization devices depends more on the experience of the user than on the device itself. The comment also pointed out that although the use of the device is associated with major risks of neurological damage, the disease process being treated is also associated with high morbidity and mortality.

The agency agrees that the safety of artificial embolization devices depends on the skill of the user as well as on the device itself. However, the comment did not supply additional information that was not considered by the Neurological Device Classification Panel and FDA in developing the proposed classification regulation. Therefore, the agency disagrees that artificial embolization devices should be classified in class II. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5950, to read as follows:

§ 882.5950 Artificial embolization device.

(a) *Identification.* An artificial embolization device is an object that is placed in a blood vessel to permanently obstruct blood flow to an aneurysm or other vascular malformation.

(b) *Classification.* Class III (premarket approval).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

21 CFR Part 882

[Docket No. 78N–1105]

Neurological Devices; Classification of Skull Tongs for Traction

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule classifying skull tongs for traction into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Veale, Bureau of Medical Devices (HFK–430), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7226.

SUPPLEMENTARY INFORMATION: FDA published in the **Federal Register** of November 28, 1978 (43 FR 55640) a proposed regulation explaining the development of the proposed regulations classifying neurological devices, the medical device classification procedures, and the activities of the Neurological Device Classification Panel. FDA also published in that issue of the **Federal Register** (43 FR 55731) a proposed regulation to classify skull tongs for traction into class II (performance standards). A period of 60 days was provided for interested persons to submit written comments to FDA.

No written comments have been received regarding the proposed regulation to classify this device. Accordingly, the proposed regulation is being adopted without change.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs is amending Part 882 in Subpart F by adding new § 882.5960, to read as follows:

§ 882.5960 Skull tongs for traction.

(a) *Identification.* A skull tongs for traction is an instrument used to immobilize a patient with a cervical spine injury (e.g., fracture or dislocation). The device is caliper shaped with tips that penetrate the skin. It is anchored to the skull and has a heavy weight attached to it that maintains, by traction, the patient's position.

(b) *Classification.* Class II (performance standards).

Effective date. This regulation shall be effective October 4, 1979.

(Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540–546 (21 U.S.C. 360c, 371(a)).)

Dated: August 17, 1979.

Part IV

Community Services Administration

Energy Crisis Assistance Program

COMMUNITY SERVICES ADMINISTRATION

45 CFR Part 1061

[CSA Instruction 6143-4]

Emergency Energy Conservation Program; Energy Crisis Assistance Program

AGENCY: Community Services Administration

ACTION: Final rule.

SUMMARY: The Community Services Administration is filing a final rule on the Energy Crisis Assistance Program. This rule is required in order to implement the fiscal year 1980 appropriation which includes funding for the program. This rule details how these energy funds will be allocated and sets forth project application and post grant requirements.

DATES: This rule is effective October 4, 1979. CSA, however, welcomes written comments on this rule and will accept them through September 19, 1979; if warranted CSA will amend the rule to reflect the comments.

ADDRESS: Please send comments to:

Mr. Edward J. Freel, or
Mr. Wallace W. Lumpkin, Room 300, 1200 19th Street, N.W., Washington, D.C. 20506.

FOR FURTHER INFORMATION CONTACT:

Mr. Edward J. Freel, Telephone (202) 254-6110, or
Mr. Wallace W. Lumpkin, Telephone (202) 632-6503, Teletypewriter (202) 254-6218.

SUPPLEMENTARY INFORMATION: On July 31, 1979 the Committee on Appropriations acted favorably on an Administration request to appropriate funds for use this winter to enable states to aid the poor and near poor cope with the high cost of fuel and/or the weather related problems that may result from an anticipated severe winter.

Based on positive congressional action to date, CSA has developed a final rule to implement energy crisis assistance program funds which might be appropriated under Section 222(a)(5) of the Economic Opportunity Act of 1964 as amended.

This rule also sets forth the application process and procedures Governors of States and the Mayor of the District of Columbia will follow in requesting funds under this program.

CSA is waiving the formal 60 day minimum comment period for this significant rule as required by Executive Order 12044, Improving Government regulations. CSA finds that a 60 day comment period for this rule is contrary to the public interest and impracticable since complying with this requirement would make it impossible to publish a final rule prior to the onset of winter weather, would not provide Governors sufficient time to plan for weather-related problems in their states and would not be consistent with Congressional intent that this program be operated during all cold weather months.

However, CSA, has involved affected groups in the rule making process process at an early stage of development. For example, on August 6, 1979 CSA officials met with individuals involved in the administration of last year's program from New Hampshire, Pennsylvania, Kansas, Wisconsin, Missouri, and Texas. On August 20, 1979 CSA officials met with individuals representing the welfare reform task force of the National Governor's Conference, and Washington based representatives of state governments. On August 21, 1979 and on August 23, 1979 they met with representatives of the National Community Action Agency Executive Directors Association (NCAAEDA).

William W. Allison,
Deputy Director.

45 CFR 1061 is amended by adding a new subpart 1061.70 to read as follows:

Subpart 1061.70—Energy Crisis Assistance Program

Sec.

1061.70-1 Effective Date.
1061.70-2 Applicability.
1061.70-3 Policy.
1061.70-4 Who Can Apply for Funds.
1061.70-5 Administration of the Program at the State Level.
1061.70-6 Local Delivery System(s).
1061.70-7 How a Local Program is Operated.
1061.70-8 What These Funds can be Used for.
1061.70-9 Who is Eligible to Participate in this Program.
1061.70-10 Termination of Program.
1061.70-11 How a Governor Requests Funds.
1061.70-12 General Funding Policies.
1061.70-13 Post-Funding Requirements.
1061.70-14 CSA Application Review and Approval Process.
1061.70-15 Coordination with Utility/Fuel Vendors.

Subpart 1061.70—Energy Crisis Assistance Program

§ 1061.70-1 Effective date.

October 4, 1979.

§ 1061.70-2 Applicability.

This subpart is applicable to grants funded under section 222(a)(5) of the Economic Opportunity Act of 1964 as amended if the assistance is administered by the Community Services Administration.

§ 1061.70-3 Policy.

(a) The primary intent of the program is to make funds available to states to enable Governors to respond to energy-related crises affecting poor and near poor households, which are caused by the high cost of energy and an anticipated severe winter.

(b) This one-time CSA-funded program does not entitle any household to a certain amount and/or form of assistance.

§ 1061.70-4 Who can apply for funds.

(a) Governors of each State, Puerto Rico and the Virgin Islands, and the Mayor of the District of Columbia may apply for funds under this program. (Note: All references in this document to "Governor" include the Mayor of the District of Columbia.)

(b) Funds will be distributed by CSA among the States and the District of Columbia according to a formula based on the following: past severity of weather, a fuel cost factor, and number of low-income individuals residing in the State.

(c) To make a request, the Governor will submit a State Funding Plan (Appendix C) to the CSA Regional Office serving his/her state. (See Appendix A). This will begin the formal application process.

(d) For further information regarding the application process see § 1061.70-11.

§ 1061.70-5 Administration of the program at the State level.

The Governor is provided the flexibility to choose any agency, which meets the following criteria, to serve as the grantee of record for this program. The Agency

(a) has proven experience in administering, monitoring, or operating programs for the poor;

(b) will be able to implement the program and provide services in a timely manner throughout the state;

(c) has a sound fiscal system and proven acceptability of its audits; and

(d) will be able to comply with CSA's program and financial reporting requirements.

Where there are either administrative or legislative impediments that would prevent an agency at the State level from implementing the delivery of services in a timely manner, CSA will work with the Governor to develop an alternate plan which could include the option of designating more than one grantee for the state.

§ 1061.70-6 Local delivery system(s).

The Governor also has the flexibility to choose the local delivery system, such as community action agencies, aging offices and welfare offices. [Note: This does not preclude using the single state grantee as a deliverer.] However, in making the determination regrading the local operator(s), the Governor should assure that the operator(s) have:

(a) experience in operating programs that serve the poor;

(b) the ability to carry out, or arrange for the outreach activities outlined in § 1061.70-7; and

(c) and adequate accounting system with appropriate fiscal controls.

§ 1061.70-7 How a local program is operated.

(a) *Serving Clients.* (1) *Reaching Potential Clients.*—(i) The local program operator is required to provide assistance to those households that do not have access to other supportive service networks but are income eligible for this program as well as to those who do have such access.

(ii) To carry out this mandate effectively, local delivery systems must notify, inform, and contact persons potentially eligible for this program through, for example, the use of outreach workers, community groups, decentralized intake and certification systems, mass mailings, radio and T.V. spots, use of community newspapers, church bulletins, etc. Expenses for these activities are to be included as administrative costs.

(2) *Serving the elderly.* Highest priority should be placed on serving the elderly. Therefore, local program operators should offer special services. Suggested activities include:

(i) intake and certification by mail;

(ii) scheduled appointments;

(iii) transportation;

(iv) use of senior citizen centers for provision of services; and

(v) intake and certification in residences for persons unable to leave their residences due to infirmity or fear of victimization.

(3) *Serving Renters.* This program is also intended to serve renters who are experiencing an energy related crisis.

In the State Plan, the Governor will indicate how renters in an energy-related crisis will be served. For example assistance might be provided where a renter lives in a building heated with natural gas provided for in his/her rent; however, because the heating is inadequate, the renter purchased two electric space heaters and pays the electric bill himself.

(b) *Limitations on payments.* In no event shall the sum of all assistance under this program made to and/or on behalf of any household, exceed the actual amount needed to ameliorate the household's energy-related problem or $400 whichever is less. The Governor is free to set assistance limits at a lower level as well as to provide for varying the maximum assistance level up to the $400 limit based on one or more of the following factors: climate, availability of, type of and cost of fuel. Such procedures must be outlined in Part IV of the State Funding Plan. (See Appendix C).

(c) *Appeal by household which has been denied assistance.* (1) Within 30 days of the effective date of this subpart each local program operator shall make known to all applicants procedures for review of the partial or complete denial of assistance under the program to any household. If the agency has an existing process which includes the elements listed below its continued use will satisfy the requirements of this policy.

(2) The locally-designed procedures are to be applicable to partial or complete denials of requests for assistance for specific, tangible benefits to low-income household, e.g. utility payments, in-kind assistance, etc. for which the local program operator currently is receiving CSA funds. The procedures will not apply to such activities as community organization, information and referral, etc.

(3) For purposes of this policy we will consider that there has been a denial of assistance when the benefits or services and/or funds currently are available, the local program operator has the authority to provide or disburse them, and the applicant falls within or believes that he/she can prove that he/she falls within the income eligibility and established program guidelines.

(4) Unless CSA provides standard forms, local program operators will use their existing intake/application forms or develop application forms of none currently are in use.

(5) In addition operators will develop procedures for reviewing denials of assistance which will include:

(i) provisions for notifying the applicant in writing of the reasons for denial of assistance, that he/she may request a review of the denial and may submit additional information (in writing or orally) which the applicant believes would warrant a favorable determination;

(ii) provisions for reviewing the denial of an application for assistance in a timely manner if such is requested by the applicant. This should include the specific assignment of responsibility to a senior level official other than the person making the initial determination;

(iii) provisions for notifying the applicant in writing of the agency's final decision; and

(iv) the methods the agency will employ to publicize the existence of the appeal process.

(6) If the population served by the local program operator includes a sizable non-English speaking group, procedures, written materials, and publicity shall be made available in that language.

(7) A written description of the above required procedures shall be maintained on file by the local program operator and shall be available for public inspection.

(8) All documents relating to specific denials of assistance and action(s) taken will be maintained in the agency's files for the length of time required by CSA policy on "Retention and Custodial Requirement for Records." These records will be available for review by CSA officials upon request.

§ 1061.70-8 What these funds can be used for.

(a) Funds made available under this program must be used for the payment of utility/fuel costs, not to include telephone costs. Funds may also be used for one or more of the following:

(1) establishment of a line of credit with utility/fuel vendors for the primary fuel used by the eligible household. Governors may also include other limitations such as: limiting the line of credit to the elderly and the handicapped only, establishing a specific duration of a future credit, and varying the maximum level (not to exceed $400). (See Appendix C, Part IV).

(2) the provision of immediate, short-term assistance in the form of emergency fuel supplies; warm clothing; blankets; replacement of broken window panes; firewood; fuel oil delivery; temporary shelter; nutrition, health and other supportive services; and emergency repairs to housing; and

(3) direct cash assistance in those cases where a person has paid a fuel bill and is in crisis, or to implement one of

the allowable activities of the program discussed under this subsection. This amount shall not exceed a $50 total per household for the entire duration of the program.

(b) Funds under this program cannot be used to weatherize homes.

§ 1061.70-9 Who is eligible to participate in this program.

(a) *Income Eligibility.* Only households with incomes no higher than 125% of the CSA Poverty Guidelines (see Appendix B) or those certified for

(c) CSA requested from OMB a complete waiver of the clearinghouse review procedures for the FY 80 Energy Crisis Assistance Program. OMB has granted a waiver under the following conditions transmitted in a letter dated August 29, 1979:

(1) The Governor's State Funding Plan (Appendix C) will be subject to modified procedures of Part III of A-95. To the fullest practicable degree, the State agency responsible for development of the plan will involve the State clearinghouse in the development phase.

additional resources to supplement and support this program.

(b) *Maintenance of Effort.* Resources for similar services scheduled to be provided this heating season under state and local authorities shall not be reduced because of this program nor shall this program be used as a substitute for such services. The Director of CSA may make exceptions only in those situations where a strict application of this requirement would result in unnecessary hardship or be inconsistent with the purposes of the Energy Crisis Assistance Program.

activities for this program only. These reports are due bi-weekly for the period beginning November 15, 1979 through June 30, 1980, and a final report is due 90 days after the termination date. The Grantee of Record shall follow these procedures for submission of the SF269: one copy to the appropriate CSA Regional Office, one copy to Grants Accounting Branch, Finance and Grants Management Division, CSA Headquarters, 1200 19th Street NW., Washington, D.C. 20506, and one copy to Energy Assistance Programs Division, R300, 1200 19th Street NW., Washington,

state regulations prior to September 1, 1979 and, where required by law or regulation is included in a deferred payment arrangement.

H. E. Lofdahl,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

BILLING CODE 6315-01-M

the allowable activities of the program discussed under this subsection. This amount shall not exceed a $50 total per household for the entire duration of the program.

(b) Funds under this program cannot be used to weatherize homes.

§ 1061.70–9 Who is eligible to participate in this program.

(a) *Income Eligibility.* Only households with incomes no higher than 125% of the CSA Poverty Guidelines (see Appendix B) or those certified for Supplementary Security Income who are heads of households. [Note: No state may change these income eligibility guidelines.]

(b) *Program Eligibility.* In the State Plan, the Governor may specify certain program eligibility criteria by defining what constitutes an energy-related crisis. The Governor also has the option to use income eligibility criteria as the sole eligibility criteria.

(c) *Income disregard.* Payments made under this program are not to be considered as income for purposes of determining eligibility or benefits under any income maintenance program including, but not limited to public assistance, veterans benefits, food stamps, or Supplemental Security Income.

(d) *Determination of Income Eligibility Required of Grantees.* Proof of income eligibility is required. The period for determining eligibility will be not more than 12 months nor less than the 90 day period preceding the request for assistance. When proof of eligibility is unavailable, an applicant must sign a declaration of income eligibility. In such cases, the local program operator must make a reasonable number of spot checks to verify income eligibility.

§ 1061.70–10 Termination of program.

This program shall terminate on September 30, 1980 and expenses may not be incurred after this date.

§ 1061.70–11 How a Governor requests funds.

(a) Applications for funds under this program will be for statewide coverage with the exception of Indian reservations and farmworker groups who will be funded directly by CSA.

(b) Within 15 calendar days of the effective date of this subpart, the Governor will provide the appropriate CSA Regional Office with the information required in Appendix C. In addition to the materials requested in Appendix C, the Governor will provide a timetable indicating when services will be provided at the local level.

(c) CSA requested from OMB a complete waiver of the clearinghouse review procedures for the FY 80 Energy Crisis Assistance Program. OMB has granted a waiver under the following conditions transmitted in a letter dated August 29, 1979:

(1) The Governor's State Funding Plan (Appendix C) will be subject to modified procedures of Part III of A–95. To the fullest practicable degree, the State agency responsible for development of the plan will involve the State clearinghouse in the development phase. Where such early coordination is not possible, the plan will be sent to the State clearinghouse not later than simultaneously with the submission of the plan to CSA;

(2) The State clearinghouse will determine the degree to which areawide clearinghouses should be involved in the review process and a normal 45 day review period will be afforded, on an *after the fact* basis;

(3) CSA's approval of the State Funding Plan will be conditional, in that the State plan may be subject to possible subsequent revision to accommodate any appropriate recommendations for its modification as provided by clearinghouses in the A–95 review process. The State operating agency will be instructed to make every effort to accommodate such recommendations and will provide appropriate clearinghouses with a statement as to its final judgment on each recommendation. As a result of this requirement CSA must require that any revisions made to the State Funding Plan be submitted to the appropriate CSA Regional Office for approval;

(4) CSA will provide State and appropriate areawide clearinghouses, via Standard Form 424, with an information copy of the "block" grant award to the State agency receiving the funds; and

(5) In addition the State agency will provide, for each, "sub-state" project grant award, information to the State and appropriate areawide clearinghouses as to the amount of monies awarded, to whom, and the purpose of each award. For these sub-state award notifications the use of Standard Form 424 is encouraged but is not mandatory.

(d) If a state fails to submit a plan, CSA may develop and implement a plan for the state.

§ 1061.70–12 General funding policies.

(a) *Matching Share.* A matching share is not required for this program. However, states and local program operators are encouraged to mobilize additional resources to supplement and support this program.

(b) *Maintenance of Effort.* Resources for similar services scheduled to be provided this heating season under state and local authorities shall not be reduced because of this program nor shall this program be used as a substitute for such services. The Director of CSA may make exceptions only in those situations where a strict application of this requirement would result in unnecessary hardship or be inconsistent with the purposes of the Energy Crisis Assistance Program.

(c) *Administrative Costs.* The grantee of record may expend up to 10% of the total state grant for administrative and program support costs. Where the grantee has contracted out performance of all or part of the work program, the grantee must provide a sufficient portion of these administrative funds to those program operators to enable them to administer the program.

(d) *Overexpenditures.* If the grantee incurs expenditures in excess of the total amount of the approved grant, the amount of the overexpenditure must be absorbed by the grantee.

(e) *Procurement.* In accordance with OMB Circulars A–110 and A–102 all proposed sole source contracts where only one bid or proposal is received in which the aggregate expenditure is expected to exceed $5,000 must receive prior approval by the appropriate CSA Regional Office.

(f) *Other.* Where the grantee is found to be deviating from the approved state funding plan, CSA, upon investigation, shall take appropriate corrective action.

§ 1061.70–13 Post-funding requirements.

(a) *Audit.* The grantee of record will not be required to have a separate audit of this program. The program including its contracted-out components will be audited at the time of the grantee's regularly scheduled audit. Five copies of the audit shall be submitted by the auditor to the appropriate CSA Regional Auditor concurrent with submission to the grantee of record.

(b) *Project Reporting.* The grantee of record is required to submit a separate Project Progress Review Report, CSA Form 440 bi-weekly beginning November 15, 1979 through June 30, 1980 and a final report is due ninety days after the termination date to the appropriate CSA Regional Office with a copy forwarded to CSA Headquarters Attention: Energy Assistance Programs Division, R300, 1200 19th Street, NW., Washington, D.C. 20506.

(c) *Financial Reporting.* The grantee of record must submit a separate SF269, Financial Status Report, covering

activities for this program only. These reports are due bi-weekly for the period beginning November 15, 1979 through June 30, 1980, and a final report is due 90 days after the termination date. The Grantee of Record shall follow these procedures for submission of the SF269: one copy to the appropriate CSA Regional Office, one copy to Grants Accounting Branch, Finance and Grants Management Division, CSA Headquarters, 1200 19th Street NW., Washington, D.C. 20506, and one copy to Energy Assistance Programs Division, R300, 1200 19th Street NW., Washington, D.C. 20506.

(d) *Evaluation.* In the event that CSA undertakes a national evaluation of this program, the cooperation of the grantee of record, the local program operators, and that of participating utility/fuel vendors will be required.

(e) *Prohibition against transfer to another grant.* Funds unobligated at the termination of the grant cannot be transferred by the grantee of record to another grant.

§ 10611.70–14 CSA application review and approval process.

(a) CSA Regional Directors are delegated the authority for final approval of grants under this program.

(b) Based on uniform review guidance, Regional Directors will determine the adequacy of state funding plans.

(c) Once a plan has been approved by the Regional Director, Regional Offices will expedite the processing and forward the Statement of CSA Grant (CSA Form 314) to the grantee of record chosen by the Governor. Upon receiving the CSA Form 314, the grantee of record must sign it and return it to the CSA Regional Office.

(d) When a state deviates from its approved state plan, upon investigation, CSA will take appropriate action.

§ 1061.70–15 Coordination with utility/fuel vendors.

The Governor is required to undertake activities in order to reach agreements with utility/fuel vendors to ensure that in each case where payment is certified that:

(a) reconnection of utilities and/or delivery of fuel is made upon certification for payment;

(b) for any remaining balances, the customer is offered a deferred payment arrangement or a level payment plan;

(c) a reconnection charge, is to be paid by the customer only where such a charge was company practice prior to September 1, 1979; and

(d) no security deposit is required to be paid except where such a deposit was required by state law or explicit state regulations prior to September 1, 1979 and, where required by law or regulation is included in a deferred payment arrangement.

H. E. Lofdahl,

Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

APPENDIX C

REQUEST FOR FUNDS

ENERGY CRISIS ASSISTANCE PROGRAM

PART I

I, _____ Governor of the State of _____ apply for funds in the amount of _____ to conduct activities for the purpose of relieving part of the increased energy/fuel cost burden facing the poor and the near-poor.

I waive the thirty day review and disapproval period set out in Section 242 of the Economic Opportunity Act of 1964, as amended.

I am choosing _____ agency/organization as the grantee of record for the State. The address of the agency/organization is _____, the telephone number is _____, and the person to contact for further information is _____.

_____
Signature of the Governor

_____
Date

PART II

(1) AREA TO BE SERVED*	(2) NAME OF PROGRAM OPERATOR	(3) ADDRESS AND TELEPHONE NUMBER OF CONTACT PERSON	(4) PER CENT OF FUNDS FROM GRANT TO BE USED IN THIS AREA

(e.g.)
* CITY, CITIES, COUNTY, COUNTIES, WHOLE STATE

PART III

I am submitting the following required forms for the grantee of record (if it is not presently receiving CSA funds or for Program Operators who are not presently receiving CSA funds.

Required Forms

CAP Form 11
OEO Form 380
CSA Form 353 (for grantees of record only)
Bonding Certification
(applicable only for non-profit organizations)

PART IV

Provide a description of the methods in the state you will require (1) for monitoring of the program at this level; (2) for assuring that initial and immediate investigation of charges of poor administration of the program, faulty or inadequate eligibility certification, failure of energy suppliers to provide relief, and duplication and/or fraud; (3) for assuring that fiscal and Management technical assistance will be provided if needed, to program operators. Specify which agency (agencies) will have this responsibility and provide the mailing address and telephone number of the contact person in the responsible agency or agencies. Please include how you will notify the Regional Office of the initiation of an investigation and of the outcome of all such investigations (4) for providing special services to assure that the highest priority is placed on serving the elderly and (5) for providing service to renters.

In addition, if you are planning to set assistance limits at lower levels or are varying the assistance level or the types of assistance provided within the state as provided for in the regulation, furnish the details of such arrangements including the specific factors you will use in developing within-state payment levels.

APPENDIX D

OFFICE OF ECONOMIC OPPORTUNITY
Community Action Program

Assurance of Compliance with the Office of Economic Opportunity's Regulations under Title VI of the Civil Rights Act of 1964

_____ (hereinafter called the "Applicant")
(Name of Applicant or Delegate Agency)

AGREES THAT it will comply with title VI of the Civil Rights Act of 1964 (P.L. 88-352) and the Regulations of the Office of Economic Opportunity issued pursuant to that title (45 C.F.R. Part 1010), to the end that no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity for which the Applicant receives Federal financial assistance either directly or indirectly from the Office of Economic Opportunity; and HEREBY GIVES ASSURANCE THAT it will immediately, in all phases and levels of programs and activities, install an affirmative action program to achieve equal opportunities for participation, with provisions for effective periodic self-evaluation.

In the case where the Federal financial assistance is to provide or improve or is in the form of personal property, or real property or interest therein or structures thereon, the assurance shall obligate the Applicant, or, in the case of a subsequent transfer, the transferee, for the period during which the property is used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services and benefits, or for as long as the Applicant retains ownership or possession of the property, whichever is longer. In all other cases, this assurance shall obligate the Applicant for the period during which the Federal financial assistance is extended to it.

THIS ASSURANCE is given in consideration of and for the purpose of obtaining either directly or indirectly any and all Federal grants, loans, contracts, property, or discounts, the referral or assignment of VISTA volunteers, or other Federal financial assistance extended after the date hereof to the Applicant by the Office of Economic Opportunity, including installment payments after such date on account of applications for Federal financial assistance which were approved before such date. The Applicant recognizes and agrees that such Federal financial assistance will be extended in reliance on the representations and agreements made in this assurance, and that the United States shall have the right to seek judicial enforcement of this assurance. This assurance is binding on the Applicant, its successors, transferees, and assignees, and the person or persons whose signatures appear below are authorized to sign this assurance on behalf of the Applicant.

CERTIFICATE OF APPLICANT'S ATTORNEY

(For Health Demonstration Programs under Section 222, Research and Pilot Programs under Section 232, and Special Impact Programs under Section 151 of the Economic Opportunity Act)

Form Approved OMB No. 116-R0198

This certificate is required when applying for a new grant; or upon OEO's request, for the continuation of an existing grant.

1. NAME OF APPLICANT AGENCY

2. IS THE APPLICANT AN INSTITUTION OF HIGHER EDUCATION AS DEFINED IN SECTION 401(F) OF THE HIGHER EDUCATION ACT OF 1963, PUBLIC LAW 88-204?

☐ YES ☐ NO

IF "YES", WAS IT IN EXISTENCE ON AUGUST 20, 1964? ☐ YES ☐ NO

3. THE APPLICANT IS

☐ A PUBLIC AGENCY

☐ AN ORGANIZATION CHARTERED AS A NONPROFIT CORPORATION UNDER THE LAWS OF THE STATE OF _____

☐ A NONPROFIT UNINCORPORATED ASSOCIATION.

☐ OTHER *(Explain in Item 6, below.)*

4. IF THE APPLICANT IS A NONPROFIT ORGANIZATION, INDICATE WHETHER IT HOLDS A CURRENT RULING FROM THE INTERNAL REVENUE SERVICE THAT IT IS TAX EXEMPT

☐ YES *(Date of Ruling)* _____ ☐ NO

5. IF ANSWER TO ITEM 4, ABOVE, IS "NO"

A. IS IT YOUR OPINION THAT THE APPLICANT QUALIFIES FOR SUCH A RULING?

☐ YES ☐ NO

B. HAS ANY OFFICIAL OF THE INTERNAL REVENUE SERVICE INDICATED THAT THE APPLICANT MAY NOT QUALIFY FOR SUCH A RULING?

☐ YES *(Explain in Item 6, below.)* ☐ NO

6. REMARKS

7. **OPINION**

In my opinion, the above information accurately describes the applicant agency, and that agency has the authority, under applicable principles of law, to carry out the program described in this application.

INSTRUCTIONS

Please type or print legibly. Items 1, 2, 3, 6, 7, 9, 10d, 10e, 10g, 10i, 10l, 11a, and 12 are self-explanatory, specific instructions for other items are as follows:

Item	*Entry*
4	Enter the employer identification number assigned by the U.S. Internal Revenue Service or FICE (institution) code, if required by the Federal sponsoring agency.
5	This space is reserved for an account number or other identifying numbers that may be assigned by the recipient.
8	Enter the month, day, and year of the beginning and ending of this project period. For formula grants that are not awarded on a project basis, show the grant period.
10	The purpose of vertical columns (a) through (f) is to provide financial data for each program, function, and activity in the budget as approved by the Federal sponsoring agency. If additional columns are needed, use as many additional forms as needed and indicate page number in space provided in upper right; however, the totals of all programs, functions or activities should be shown in column (g) of the first page. For agreements pertaining to several Catalog of Federal Domestic Assistance programs that do not require a further functional or activity classification breakdown, enter under columns (a) through (f) the title of the program. For grants or other assistance agreements containing multiple programs where one or more programs require a further breakdown by function or activity, use a separate form for each program showing the applicable functions or activities in the separate columns. For grants or other assistance agreements containing several functions or activities which are funded from several programs, prepare a separate form for each activity or function when requested by the Federal sponsoring agency.
10a	Enter the net outlay. This amount should be the same as the amount reported in Line 10e of the last report. If there has been an adjustment to the amount shown previously, please attach explanation. Show zero if this is the initial report.
10b	Enter the total gross program outlays (less rebates, refunds, and other discounts) for this report period, including disbursements of cash realized as program income. For reports that are prepared on a cash basis, outlays are the sum of actual cash disbursements for goods and services, the amount of indirect expense charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to contractors and subgrantees. For reports prepared on an accrued expenditure basis, outlays are the sum of actual cash disbursements, the amount of indirect expense incurred, the value of in-kind contributions applied, and the net increase (or decrease) in the amounts owed by the recipient for goods and other property received and for services performed by employees, contractors, subgrantees, and other payees.
10c	Enter the amount of all program income realized in this period that is required by the terms and conditions of the Federal award to be deducted from total project costs. For reports prepared on a cash basis, enter the amount of cash income received during the reporting period. For reports prepared on an accrual basis, enter the amount of income earned since the beginning of the reporting period. When the terms or conditions allow program income to be added to the total award, explain in remarks, the source, amount and disposition of the income.
10f	Enter amount pertaining to the non-Federal share of program outlays included in the amount on line e.
10h	Enter total amount of unliquidated obligations for this project or program, including unliquidated obligations to subgrantees and contractors. Unliquidated obligations are: Cash basis—obligations incurred but not paid; Accrued expenditure basis—obligations incurred but for which an outlay has not been recorded. Do not include any amounts that have been included on lines a through g. On the final report, line h should have a zero balance.
10j	Enter the Federal share of unliquidated obligations shown on line h. The amount shown on this line should be the difference between the amounts on lines h and i.
10k	Enter the sum of the amounts shown on lines g and j. If the report is final the report should not contain any unliquidated obligations.
10m	Enter the unobligated balance of Federal funds. This amount should be the difference between lines k and l.
11b	Enter rate in effect during the reporting period.
11c	Enter amount of the base to which the rate was applied.
11d	Enter total amount of indirect cost charged during the report period.
11e	Enter amount of the Federal share charged during the report period. If more than one rate was applied during the project period, include a separate schedule showing bases against which the indirect cost rates were applied, the respective indirect rates the month, day, and year the indirect rates were in effect, amounts of indirect expense charged to the project, and the Federal share of indirect expense charged to the project to date

INSTRUCTIONS

Please type or print legibly. Items 1, 2, 8, 9, 10, 11d, 11e, 11h, and 15 are self explanatory, specific instructions for other items are as follows:

Item	*Entry*
3	Enter employer identification number assigned by the U.S. Internal Revenue Service or the FICE (institution) code. If this report covers more than one grant or other agreement, leave items 4 and 5 blank and provide the information on Standard Form 272–A, Report of Federal Cash Transactions—Continued; otherwise;
4	Enter Federal grant number, agreement number, or other identifying numbers if requested by sponsoring agency.
5	This space reserved for an account number or other identifying number that may be assigned by the recipient.
6	Enter the letter of credit number that applies to this report. If all advances were made by Treasury check, enter "NA" for not applicable and leave items 7 and 8 blank.
7	Enter the voucher number of the last letter-of-credit payment voucher (Form TUS 5401) that was credited to your account.
11a	Enter the total amount of Federal cash on hand at the beginning of the reporting period including all of the Federal funds on deposit, imprest funds, and undeposited Treasury checks.
11b	Enter total amount of Federal funds received through payment vouchers (Form TUS 5401) that were credited to your account during the reporting period.
11c	Enter the total amount of all Federal funds received during the reporting period through Treasury checks, whether or not deposited.
11f	Enter the total Federal cash disbursements, made during the reporting period, including cash received as program income. Disbursements as used here also include the amount of advances and payments less refunds to subgrantees or contractors, the gross amount of direct salaries and wages, including the employee's share of benefits if treated as a direct cost, interdepartmental charges for supplies and services, and the amount to which the recipient is entitled for indirect costs.
11g	Enter the Federal share of program income that was required to be used on the project or program by the terms of the grant or agreement.
11i	Enter the amount of all adjustments pertaining to prior periods affecting the ending balance that have not been included in any lines above. Identify each grant or agreement for which adjustment was made, and enter an explanation for each adjustment under "Remarks." Use plain sheets of paper if additional space is required.
11j	Enter the total amount of Federal cash on hand at the end of the reporting period. This amount should include all funds on deposit, imprest funds, and undeposited funds (line e, less line h, plus or minus line i).
12	Enter the estimated number of days until the cash on hand, shown on line 11j, will be expended. If more than three days cash requirements are on hand, provide an explanation under "Remarks" as to why the drawdown was made prematurely, or other reasons for the excess cash. The requirement for the explanation does not apply to prescheduled or automatic advances.
13a	Enter the amount of interest earned on advances of Federal funds but not remitted to the Federal agency. If this includes any amount earned and not remitted to the Federal sponsoring agency for over 60 days, explain under "Remarks." Do not report interest earned on advances to States.
13b	Enter amount of advance to secondary recipients included in item 11h.
14	In addition to providing explanations as required above, give additional explanation deemed necessary by the recipient and for information required by the Federal sponsoring agency in compliance with governing legislation. Use plain sheets of paper if additional space is required.

APPENDIX I

ACCOUNTING SYSTEM CERTIFICATION

(CSA Instruction 6801-1)

ADDRESS *(CSA Program Office/Region)*

SECTION I. STATEMENT OF PUBLIC FINANCIAL OFFICER *(If the applicant is a Public Agency or when the Accounting System of a Private-nonprofit Agency will be maintained by a Public Agency.)*

I am the Chief Financial Officer of _____ (NAME OF PUBLIC AGENCY) _____

and, in this capacity, I will be responsible for providing financial services adequate to insure the establishment and maintenance of an accounting system for _____ (NAME OF APPLICANT) which is a public (or nonprofit) agency charged with carrying out a CSA program in _____ _____ (NAME OF COMMUNITY) _____. The accounting system will have internal controls adequate to safeguard the assets of such agency(ies), check the accuracy and reliability of accounting data, promote operating efficiency, and encourage compliance with prescribed management policies of the agency(ies).

NAME OF PUBLIC AGENCY

TYPED NAME OF FINANCIAL OFFICER	SIGNATURE	DATE

SECTION II. STATEMENT OF PUBLIC ACCOUNTANT *(If applicant is a Private-nonprofit Agency or a Public Agency whose accounting system will not be maintained by a Public Agency.)*

I am a certified or duly licensed public accountant and have been engaged to examine and report on the financial accounts of the _____ (NAME OF APPLICANT), which is a private-nonprofit organization (or public agency) carrying out a CSA program in _____ (NAME OF COMMUNITY)

I have reviewed the accounting system that this agency has established and, in my opinion, it includes internal controls adequate to safeguard the assets of the agency, check the accuracy and reliability of accounting data, promote operating efficiency, and encourage compliance with prescribed management policies of the agency.

NAME OF FIRM

TYPED NAME OF ACCOUNTANT	SIGNATURE	DATE

CSA FORM 380 MAY 75 (FORMERLY OEO FORM 380, DATED JAN 72, WHICH MAY BE USED UNTIL EXHAUSTED.)

523-3408	Automation
523-4534	Special Projects
523-3517	Privacy Act Compilation

FEDERAL REGISTER PAGES AND DATES—SEPTEMBER

51549-51794.....4

V 44 / 172 SEP 4 79

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday).

This is a voluntary program. (See OFR NOTICE FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY*	USDA/ASCS		DOT/SECRETARY*	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/FHWA	USDA/FSQS		DOT/FHWA	USDA/FSQS
DOT/FRA	USDA/REA		DOT/FRA	USDA/REA
DOT/NHTSA	MSPB/OPM		DOT/NHTSA	MSPB/OPM
DOT/RSPA	LABOR		DOT/RSPA	LABOR
DOT/SLSDC	HEW/FDA		DOT/SLSDC	HEW/FDA
DOT/UMTA			DOT/UMTA	
CSA			CSA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

***NOTE: As of July 2, 1979, all agencies in the Department of Transportation, will publish on the Monday/Thursday schedule.**

TABLE OF EFFECTIVE DATES AND TIME PERIODS—SEPTEMBER 1979

This table is for use in computing dates certain in connection with documents which are published in the Federal Register subject to advance notice requirements or which impose time limits on public response.

Federal Agencies using this table in calculating time requirements for submissions must allow sufficient extra time for Federal Register scheduling procedures.

In computing dates certain, the day after publication counts as one. All succeeding days are counted except that when a date certain falls on a weekend or holiday, it is moved forward to the next Federal business day. (See 1 CFR 18.17)

A new table will be published in the first issue of each month.

Dates of FR publication	15 days after publication	30 days after publication	45 days after publication	60 days after publication	90 days after publication
September 4	September 19	October 4	October 19	November 5	December 3
September 5	September 20	October 5	October 22	November 5	December 4
September 6	September 21	October 9	October 22	November 5	December 5

September 28	October 15	October 29	November 13	November 27	December 27

CFR CHECKLIST; 1978/1979 ISSUANCES

This checklist, prepared by the Office of the Federal Register, is published in the first issue of each month. It is arranged in the order of CFR titles, and shows the revision date and price of the volumes of the Code of Federal Regulations issued to date for 1978/1979. New units issued during the month are announced on the back cover of the daily **Federal Register** as they become available.

For a checklist of current CFR volumes comprising a complete CFR set, see the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription service to all revised volumes is $450 domestic, $115 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

CFR Unit (Rev. as of Jan. 1, 1979):

Title	Price
1	$3.00
2 [Reserved]	
3	6.00

Highlights

ADDRESSES FOR DELIVERY OF COMMENTS

Some readers of the **FEDERAL REGISTER** have complained that it is difficult to hand deliver comments on agency rulemakings. Agencies always give a mailing address, but when that address is a post office box, it may take many phone calls to find out where to deliver comments. Consider saving the readers time by including this information in proposed rule documents. For example—

ADDRESSES: Comments may be mailed to Box 1, Washington, D.C. 00000, or delivered to Room 1, 1 First Street, Washington, D.C. between 8:45 am and 5:15 pm. Comments received may also be inspected at Room 1 between 8:45 am and 5:15 pm.

51962 **Federal Election Campaign** FEC requests comments regarding contributions to and expenditures by delegates and candidates for delegate to national party nominating conventions; comments by 10–5–79 (Part V of this issue)

51894 **Uranium Mill Tailings Radiation Control** DOE proposes designaton of processing sites and establishment of priorities; comments by 9–15–79 (Part II of this issue)

51829 **Veterans Benefits** VA proposes to define "child" for determining benefit payment; comments by 10–5–79

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies of 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Area Code 202–523–5240

Highlights

51826 **Food Retailing and Gasoline Industries** FTC proposes to amend rules relating to games of chance; notification of interest by 9–28–79

51829 **Archeological, Architectural, Historic, and Scientific Properties** Interior/HCRS extends comment period on proposed procedures for identification and protection of properties; comments by 10–4–79

51921 **Cost Principles—State and Local Government** OMB solicits comments on proposed revision of rules dealing with travel costs of chief executives and members of governing bodies; comments by 11–5–79 (Part III of this issue)

51924 **State Implementation Plans** EPA proposes to amend rules regarding requirements for preparation, adoption, and submittal; comments by 10–5–79 (Part IV of this issue)

51797 **Air Taxi Operators and Commuter Air Carriers** CAB reduces amount of required information in reporting requirements; effective 11–4–79

51871 **Air Quality** National Commission on Air Quality publishes policy on public participation in Commission's studies

51801 **Mortgage Insurance** HUD/FHC amends rules to reflect increased dollar limitations on units within projects insured under National Housing Act; effective 10–5–79

51868 **Minimum Property Standards** HUD announces availability of recent changes; effective 10–5–79

51795 **Real Estate Loans** Treasury/Comptroller revises selected interpretive rulings

51801 **Atlantic Bluefin Tuna** Commerce/NOAA issues a notice of closure of purse seine fishing; effective 8–24–79

51877 **Bicycle Tires and Tubes for the Republic of Korea** Treasury/Sec'y extends comment period, comments by 9–19–79

51890 **Sunshine Act Meetings**

Rules and Regulations

Federal Register
Vol. 44, No. 173
Wednesday, September 5, 1979

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Part 7

Interpretive Rulings; Loans Secured by Real Estate

AGENCY: Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: This amendment revises selected interpretive rulings issued by the Comptroller of the Currency relating to loans by national banks which are secured by real estate. The revisions are necessary in order to conform the rulings with the governing statute under which national banks may make real estate loans (12 U.S.C. 371, as amended).

EFFECTIVE DATE: October 5, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Andrew J. Levinson, Staff Attorney, Office of the Comptroller of the Currency, Washington, D.C. 20219, (202) 447–1880.

SUPPLEMENTARY INFORMATION: On February 16, 1978, the Comptroller of the Currency published for comment a proposed amendment to 12 CFR Part 7 (43 FR 6801) to revise selected interpretive rulings relating to loans by national banks which are secured by real estate. The revisions were necessary in order to conform the rulings with the governing statute under which national banks may make real estate loans.

On September 25, 1978, the Comptroller published in final form (43 FR 43289) those rulings which were slightly altered or left unchanged from the February proposal. Also on that date, the Comptroller reproposed for comment (43 FR 43310), those rulings which were substantially changed from the February proposal or which were not specifically addressed in the February proposal. The Comptroller is now adopting in final form, with certain changes as discussed below, those rulings proposed in September. All comments submitted with respect to the proposed rulings were given due consideration.

Nonconforming Loans

As a result of the comments received, the Comptroller has decided to revise § 7.2700 regarding nonconforming loans. As adopted, the Comptroller has deleted the requirement in the proposed ruling that real estate loans classified as nonconforming be carried in a separate general ledger account. The Comptroller was persuaded by the comments that each bank be permitted to earmark its nonconforming real estate loans in a way most suitable to the bank's loan accounting system without requiring the establishment of a separate general ledger account. The bank must adopt an appropriate accounting method whereby it can ascertain the total number of nonconforming real estate loans on a regular basis and be able to provide such information to OCC bank examiners when requested.

Development and Construction Loans

Several comments questioned the treatment of land acquisition and development loans under 12 U.S.C. 371 as interpreted by proposed ruling § 7.2015. Among other things, the 1974 amendments to 12 U.S.C. 371 for the first time specifically addressed national bank lending on unimproved real estate. As such, development loans are subject to the loan to value ratio requirements of the statute. Construction loans, on the other hand, are not subject to the loan to value ratios if they are classified as commercial loans under 12 U.S.C. 371(c).

It is important that the distinctions between development loans and construction loans be kept in mind. Development loans are generally loans the proceeds of which are used to acquire and convert undeveloped property into improved real estate through the construction of roads, installation of sewers and other similar improvements, and division of the tract into individual lots in preparation of a residential subdivision. Construction loans are loans to finance the construction of a building or buildings for either residential or commercial purposes. Development loans may be reclassified as construction loans at the time they qualify as such.

Section 7.2015 permits national banks to make development loans based upon the appraised value of the final project. Advances at various stages of development, however, must not exceed the limitations contained in 12 U.S.C. 371 and in 12 CFR 7.2010, which enunciate the statutory loan to value ratios. For example, if the land to be acquired was raw land with no offsite improvements, then the bank could not advance more than 66⅔ percent of the appraised value of such real estate. If the real estate was improved by offsite improvements or in the process of being improved by a building or buildings to be constructed then the bank could advance up to 75 percent of the appraised value.

It should be remembered that construction loans may be made in amounts in excess of 75 percent of appraised value: *Provided,* That the maturity is 60 months or less and there is a firm takeout commitment from a financially responsible lender other than the construction lender. No takeout is necessary for loans which finance construction of residential or farm buildings. Construction loans in excess of 75 percent of appraised value are classified as commercial loans and (along with those construction loans voluntarily classified as commercial under 12 U.S.C. 371(c)) are subject to an aggregate limit of 100 percent of capital and surplus.

Takeout Commitments

Several comments asked for a further explanation of § 7.2000(g) regarding takeout commitments. In addressing interim financing, the ruling was intended to clarify 12 U.S.C. 371(a)(3), which exempts from the real estate loan restrictions any loan, other than a construction loan, which is covered by a valid and binding agreement by a financially responsible third party to take out the bank within 60 months from the date of making the loan. This was intended to specifically address the mortgage warehousing situation. A construction loan with a takeout agreement will be exempt from the real estate restrictions only if treated as a commercial loan under 12 U.S.C. 371(c).

Rehabilitation Loans

As proposed, § 7.2400(b) would clarify that loans made to substantially renovate, remodel or rehabilitate

existing residential structures may be considered as construction loans. One comment suggested that this language be expanded to include existing commercial structures as well.

The Comptroller agrees with this suggestion and has amended § 7.2400(b) to clarify that rehabilitation loans may be classified as construction loans whether involving residential or commercial structures. The purpose of this paragraph is to assist banks in helping meet our nation's housing stock by financing the rehabilitation of existing dwellings. The Comptroller recognizes that in many housing rehabilitation programs in urban areas, the revitalization of the commercial sector is fundamental to the ultimate success of the project.

Drafting Information

The principal drafters of this document were Mr. Richard H. Neiman, Attorney, Mr. Andrew J. Levinson, Attorney, Mr. Michael B. Mierzewski, legal clerk, and Mr. John M. Miller, Deputy Chief Counsel.

Final Amendment

The Comptroller amends 12 CFR Part 7 by deleting § 7.2020, by adding §§ 7.2010, 7.2015, and 7.2700 and by revising §§ 7.2040 and 7.2400. The final rulings read as follows:

§ 7.2010 Loan-to-value ratios.

(a) *Unimproved real estate.* Real estate is unimproved if there are not offsite improvements or substantial and permanent onsite improvements significantly enhancing the value of the property. National banks may make loans secured by unimproved real estate in an amount not to exceed 66⅔ percent of the appraised value of such real estate.

(b) *Real estate improved by offsite improvements.* Offsite improvements are those improvements which substantially enhance the value of otherwise unimproved real estate. Whether an improvement qualifies as an offsite improvement for purposes of 12 U.S.C. 371 is a question of fact to be determined in each case. National banks may make loans upon the security of such real estate in an amount not to exceed 75 percent of its appraised value. Common examples of offsite improvements are: Streets, sewers, water, other utilities, and real property whose value is enhanced because it is located in a rapidly developing area.

(c) *Real estate in the process of being improved by a building or buildings to be constructed or in the process of construction.* National banks may make loans upon the security of such real estate in an amount not to exceed 75 percent of its appraised value. The appraised value may be based upon the value of the completed building or buildings; however, prudent banking requires that the disbursement of loan proceeds be made proportionately to the development of the project. For purposes of 12 U.S.C. 371, a completed building or buildings is defined as a permanent structure contributing substantially to the value of the property. Examples of such are cited in paragraph (d) of this section.

(d) *Real estate improved by building or buildings.* National banks may make loans upon real estate improved by a building or buildings in an amount not to exceed 90 percent of its appraised value. For purposes of 12 U.S.C. 371, a completed building or buildings is defined as a permanent structure contributing substantially to the value of the property. Examples of permanent structures contributing substantially to the value of the property, other than conventional buildings, within the meaning of paragraphs (c) and (d) are as follows:

(1) A commercial recreation area which may include such amenities as: Numerous campsites, picnic tables, tent bases, toilet facilities, fireplaces, or dockage and a beach;

(2) A trailer park consisting of numerous sites with facilities for sewage, running water, and electricity;

(3) Farmland which is improved. Farmland is improved when it is useful for agricultural purposes without further substantial improvements. Agricultural purposes include animal husbandry as well as the growing of crops. Usefulness for such purposes may be demonstrated either by actual past or present use, by the appraisal of persons familiar with the value of agricultural land or by both. The appraised value of improved farmland is to be based upon its value for agricultural purposes.

The appraised value, for purposes of this ruling, may be based upon the current market value, the cost approach to value, the capitalization of income approach to value or any other acceptable appraisal standard appropriate for the particular type of loan.

§ 7.2015 Land acquisition and development loans.

National banks may make commitments to make land acquistition and development loans based upon the appraised value of the final project. Advances at various stages of construction, however, must not exceed the limitations contained in 12 U.S.C. 371 and in 12 CFR 7.2010.

§ 7.2020 [Deleted]

§ 7.2040 First liens.

(a) *General definition.* A first lien on real estate within the meaning of 12 U.S.C. 371 is any lien which grants to the lienholder a claim against the property so secured which is prior to the rights of all others. Such a lien will normally be created by an instrument in the form of a mortgage or deed of trust but may also consist of a judgment which by operation of law creates a lien against certain property of the judgment debtor or a land contract such as that described in § 7.2000(c).

(b) *Effect of life estates and similar claims.* A mortgage on the fee simple interest in real estate which is subject to an existing life tenancy or other existing or potential claim whereby under local law the interest of the life tenant or other claimant may vest in whole or in part in a third party free of the mortgage is not an eligible first lien under 12 U.S.C. 371 unless the third party joins in the mortgage or otherwise agrees to subordinate his or her interest in the mortgaged property.

(c) *Effect of certain permitted liens.* (1) A mortgage on real estate will be subject from time to time to various liens, charges, and encumbrances which, although they may be paramount to the bank's security claim in the form of a mortgage, do not substantially affect the value or use of the real estate. Liens for taxes and assessments imposed by a governmental body for the current year, zoning laws and ordinances, construction liens not yet filed or relating to obligations not overdue, permits, rights-of-way, easements, leases, and encumbrances will not prevent such mortgage from constituting a first lien within the meaning of 12 U.S.C. 371.

(2) A subordinate lien on real estate may be treated as a "first lien" within the meaning of 12 U.S.C. 371 if:

(i) The bank has the right to pay off the prior liens and become a first lienholder; and

(ii)(A) The bank actually holds funds pledged by or on behalf of the borrower in an amount sufficient to pay off the prior liens; or

(B)(*1*) The borrower is obligated for all funds advanced by the bank, including any amount advanced to perfect or secure the bank's first lien position; and

(B)(*2*) The bank, at the inception of the loan, could fund the amount advanced to the borrower plus the amount outstanding on prior liens without violating 12 U.S.C. 84, 12 U.S.C. 371, 12 U.S.C. 371c, or any other statute, regulation, or ruling.

(d) *Exclusion of oil, gas, or mineral rights from lien of mortgage.* A mortgage on the fee title to realty is a first lien despite the fact that the mortgage may expressly provide that it does not cover oil, gas, or mineral rights. This is true regardless of whether the mortgagor has already transferred or mortgaged such rights to a third person or simply retains such rights by excluding them from the lien of the mortgage given to the bank.

(e) *Merger of first and junior liens.* If a national bank holds a first and junior mortgage on real estate and there is no intervening lien, the combined mortgages will be regarded as merged into one first lien with the combined indebtedness being considered as a single loan when applying the provisions of 12 U.S.C. 371. A lien which arises only upon the bank's election of its remedy under mortgage insurance or guaranty, applicable to the first lien, is not an intervening lien.

(f) *"Cover-all" or "open-end" mortgages.* Mortgages sometime contain a provision that the mortgaged properties shall secure both the loan for which it is given as well as all other present and future indebtedness of the borrower to the bank, i.e., a "cover-all clause," such mortgage being frequently termed an "open-end" mortgage. In such case, the amount of all loans made by the bank in primary reliance upon the security of the real estate must be added together to determine if the requirements of 12 U.S.C. 371 have been met.

(g) *Personal liability of mortgagor.* The requirement of 12 U.S.C. 371 that a real estate loan shall be secured by a lien on real estate does not require that the mortgagor have personal liability for the mortgage loan.

§ 7.2400 Construction loans.

(a) Loans made to finance the construction of buildings, including apartment buildings, which are intended primarily for residential purposes, even though some commercial use may be made of a part of the building, are considered loans to finance the construction of residential buildings within the meaning of 12 U.S.C. 371(c).

(b) For purposes of 12 U.S.C. 371(c), loans, the proceeds of which are used to substantially renovate, remodel, or rehabilitate existing residential or commercial structures, are considered construction loans.

§ 7.2700 Nonconforming loans.

Paragraph (f) of 12 U.S.C. 371 permits a national bank to make loans secured by real estate which do not comply with the limitations and restrictions in that section, provided the aggregate unpaid amount on the nonconforming loans does not exceed 10 percent of the amount the bank may invest in real estate loans. The bank shall keep records available for examination that indicate which loans are to be counted against the limit on nonconforming loans. All nonconforming loans shall be earmarked as such and accounted for in a manner permitting the bank to be able to ascertain the total number of nonconforming loans and the outstanding balance of these loans on a regular basis. The bank's records shall also indicate those loans which were at one time nonconforming but have subsequently come into compliance with the limitations and restrictions of 12 U.S.C. 371.

Dated: August 29, 1979.

John G. Heimann,

Comptroller of the Currency.

BILLING CODE 4810-33-M

CIVIL AERONAUTICS BOARD

14 CFR Part 298

[ER-1148; Docket 33910]

Reduction in Air Taxi Reporting Requirements

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on August 29, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This rule reduces the amount of information now collected from air taxi operators and commuter air carriers by eliminating one report and reducing the data reported on another. State governments which already collect the air taxi data needed by the CAB are encouraged to share these data with us in return for exempting their air taxi operators from the CAB's reporting requirements. The limited period of confidential treatment accorded commuter origin and destination data has been eliminated.

DATES: Adopted: August 29, 1979. Effective: November 4, 1979.

FOR FURTHER INFORMATION CONTACT: Clifford M. Rand, Chief, Data Requirements Division, Office of Economic Analysis, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, 202-673-6044.

SUPPLEMENTARY INFORMATION:

Background

In EDR-367 (43 FR 52182, November 8, 1978) the Board proposed to reduce the reporting requirements applicable to air taxi operators and commuter air carriers under Part 298, of our Economic Regulations (14 CFR Part 298). These reductions were to be accomplished by:

1. Eliminating CAB Form 298-D, "Report of All Revenue Operations (Excluding Rotary-Wing and All-Cargo Operations) Performed by Air Taxi Operators, Including Commuter Air Carriers;"

2. Eliminating one of the three schedules comprising CAB Form 298-C, "Report of Scheduled Operations of Commuter Air Carriers," consolidating the remaining schedules of Form 298-C into a new one-page format, reducing the filing frequency from quarterly to semi-annually, and reducing the required number of copies from three to one; and

3. Modifying the definition of "commuter air carrier" to exclude air taxi operators with mail contracts of $20,000 or less per year who would otherwise not qualify as commuters.

Beyond these reductions, the Board proposed to encourage State governments, which already collect the commuter data needed by the Board, to share these data with the Board by exempting their commuter carriers from the Board's reporting requirements. The Board also proposed to eliminate the limited period of confidential treatment currently accorded commuter origin and destination (O & D) data.

Comments

Fourteen comments were received in response to the rulemaking notice.[1]

Comments submitted by the National Air Transportation Association, the Public Utilities Commission of the State of California, and Woodland Aviation expressed support for the overall proposal, but were concerned that the Board's proposed sharing of state-collected commuter data would encourage or force State agencies to institute new and unnecessary reporting requirements that could be more burdensome than what the Board now requires.

Currently, air taxi data are collected by both the Federal and State levels of government. The data collected by the States range from no data at all to more than the Board needs. For example, the State of Alaska's air taxi reporting system generates a broad spectrum of

[1] Air Ruidoso, Inc., Bard-Air Corporation, Gemini Air Service, Kenmore Air Harbor, Inc., McPhillips Flying Service, Inc., Seaco Airlines, Inc., State of Wisconsin Department of Transportation, VIP Aviation, Inc., National Air Transportation Association, Department of Transportation of the State of New Mexico, Official Airline Guides, Inc., Public Utilities Commission of the State of California, Woodland Aviation, Inc., and the Air Line Pilots Association, International.

V 4 4 / 1 7 3

data which encompasses, among other things, the same commuter data we receive. By sharing our data with the states, any duplicative reporting burden which commuter carriers now face in reporting to both levels of government could be eliminated.

Our intention is not to encourage any State to collect commuter data. On the contrary, State attempts to regulate the routes, rates, or services of federally authorized carriers, including commuters, are forbidden under the Airline Deregulation Act of 1978 [2] and the States of California, Oregon, and Illinois [3] have been permanently enjoined from violating the federal pre-emption provision. Thus, a State-imposed reporting requirement may run counter to Federal law if undertaken to faciliate or implement impermissible State regulation. Our intention, therefore, is simply to enable the Board to take advantage of any lawful and legitimate State reporting requirements and at the same time, decrease the overall reporting burden. We also realize that some States may wish to fulfill their legitimate information needs, if any, by using the Board's data rather than collecting the data themselves. In this situation the Board will, when requested by an interested State, routinely supply it with a copy of our commuter reports. This may help some States avoid the burden of having to develop their own reporting systems.

In another comment dealing with the Board's proposed sharing of commuter data, the Department of Transportation of the State of New Mexico stated that, since the Federal government has pre-empted the States' authority to regulate air carriers under the Airline Deregulation Act of 1978, it would be more reasonable for the Board to continue collecting and providing carrier data to the States instead of receiving the data from them. As stated previously, our goal is to reduce the overall reporting burden, particularly that of the Federal government, for commuter carriers. We will, of course, supply State governments with copies of the reports we do receive whenever asked. We cannot justify, however, collecting data solely for the benefit of others when the Board itself has no need for the data.

[2] Section 105(a) of the Airline Deregulation Act of 1978, Pub. L. 95-504 92 Stat. 1705, 1708, 49 U.S.C. 1305.

[3] *Hughes Air Corp., et al.* v. *California Public Utilities Commission, et al.*, N.D. Cal. No. C-78-2880-SW (March 9, 1979); *Sierra Flite Service, et al.* v. *California Public Utilities Commission, Oregon Public Utility Commissioner, et al.*, N.D. Cal. No. C-79-0840-SW (June 1, 1979); *Coleman Air Transport, et. al.* v. *Illinois Aeronautics Board, et al.*, C.D. Ill. No. 79-3080 (August 16, 1979).

The Official Airline Guides, Inc. (OAG) filed a comment objecting to the proposed reduction in the filing frequency for commuter operating data on CAB Form 298-C. Specifically, the OAG stated that it sometimes requires commuter carriers to submit a copy of their Form 298-C at the same time it is filed with the Board in order to verify that a carrier is, in fact, operating, and that the scheduled flights performed agree with the flight schedules published in the *Official Airline Guide*. In order to ensure the availability of timely information about commuter operations, the OAG recommended retaining a quarterly filing frequency.

Since EDR-367 was developed before the enactment of the Airline Deregulation Act of 1978, we have taken another hard look at the proposed semi-annual reporting period.

Within the current deregulated environment, which encourages competition among carriers, commuter data are needed in a timely manner to enable the Board to analyze and monitor carrier fitness and the level of air service being provided to small communities. As a result of our review, we believe that a quarterly filing requirement is needed to ensure the availability of data for effectively monitoring continuing fitness and service levels. Accordingly, quarterly filing of CAB Form 298-C will be continued.

The Air Line Pilots Association, International (ALPA) submitted the only comment in opposition to the proposed rule.

First, ALPA expressed its belief that the Board needs timely air taxi and commuter data about the number of departures and the number of passengers. ALPA was concerned that any reduction or elimination of these data would limit the effective participation of air taxi operators and commuter air carriers in issues (such as safety, airport congestion, aircraft manufacturing demands, *etc.*) affecting the air transportation industry.

Commuters will continue to report departure and passenger data quarterly on revised CAB Form 298-C. Air taxi departure and passenger data, on the other hand, will be monitored during periodic surveys of the air taxi industry, which the Board will be conducting on behalf of the National Transportation Safety Board (NTSB).

We anticipate, at this time, that an air taxi survey will be conducted at least annually; therefore, the survey data collected will be as timely as the air taxi operating data now reported annually on CAB Form 298-D. This continued availability of timely air taxi and commuter data will ensure meaningful participation by air taxis and commuters in the issues concerning the air transportation industry.

Secondly, ALPA indicated that any sharing of data between the Board and State governments must ensure that the data shared are uniform, reliable and timely.

As with any data collection undertaken by the Board, proper steps will be taken to ensure that the data submitted are uniform. Furthermore, before establishing a data sharing program, the reliability and timeliness of the data to be shared will also be considered.

ALPA also suggested that a determination be made as to which States a carrier would report to when its operations switch from intrastate to interstate. While we have no control over the States developing their own reporting systems which do not conflict with Federal pre-emption, the Board plans to enter into a data sharing agreement with those States that have legitimate needs for commuter data. This will help eliminate any current and possible future duplicative reporting requirements.

Finally, ALPA expressed its concern that the disclosure of commuter O & D data would subject commuter carriers to a competitive disadvantage in relation to other air taxi operators. As stated in EDR-367, public policy favors disclosure of all data filed with the Board, and withholding commuter O & D data from public disclosure runs counter to the Board's policy of immediately disclosing the domestic O & D Survey and service segment data submitted by certificated carriers.

Other Matters

In EDR-367 the Board proposed that the Director, Bureau of Accounts and Statistics, under delegated authority, would conduct periodic surveys of the air taxi industry to satisfy the NTSB's data needs and grant commuters an exemption from the Board's reporting requirements when the data needed by the Board can be collected from State governments.

A reorganization of the Board's staff on January 14, 1979, redesignated the Bureau of Accounts and Statistics (BAS) as the Bureau of Carrier Accounts and Audits and transferred certain functions from BAS to the Office of Economic Analysis (OEA) and the Office of Comptroller (OC). Among these were the functions dealing with collecting special reports from any air carrier and granting waivers from the Board's reporting requirements. Editorial corrections necessary to reflect these changes have been made in the final rule.

A review by the Board's staff of recent CAB Form 298-C Schedule T-1, "Report of Revenue Traffic by On-Line Origin and Destination," filings has revealed that a significant number of commuter carriers are reporting a greater number of O & D markets than can be reported on the revised CAB Form 298-C contained in EDR-367. The proposed report format would needlessly burden these carriers with having to file several pages of the same form. Considering this and the current and anticipated future growth in the commuter industry under the Airline Deregulation Act of 1978, we have decided to divide the proposed CAB Form 298-C into two schedules, Schedule A-1, "Report of Flight and Traffic Statistics in Scheduled Operations" and Schedule T-1 "Report of Revenue Traffic by On-Line Origin and Destination." This will enable carriers with 72 or fewer markets to file their O & D data on a single page.

Also, a number of carriers have very similar names which make it difficult for users of CAB Form 298-C data to distinguish between them. Furthermore, problems arise when a carrier changes its address without notifying the Board. This situation makes it very difficult to contact a carrier when a question arises about its reports. We have clarified CAB Form 298-C to indicate that the reporting carrier will provide its full corporate name on the face of each schedule. We wish to remind each carrier that any change of address must be reported to the Board within 30 days of the change on CAB Form 298-A "Registration, Reregistration and Amendments Under Part 298 of the Economic Regulations of the Civil Aeronautics Board."

The Board amends 14 CFR Part 298 as follows:

1. The Table of Contents is amended by revoking and reserving §§ 298.62 and 298.63 and by adding a new § 298.65 to Subpart F as follows:

Subpart F—Requirements for Filing of Flight Schedules and Reports

Sec.

* * * * *

298.62 [Reserved]
298.63 [Reserved]

* * * * *

298.65 Reporting exemption for State collection of data.

2. Paragraph (f) of § 298.2 is amended to read as follows:

§ 298.2 Definitions.

* * * * *

(f) "Commuter air carrier" means an air taxi operator which (1) performs at least five round trips per week between two or more points and publishes flight schedules which specify the times, days of the week and places between which they are performed, or (2) transports mail by air under a contract or contracts with the United States Postal Service when the total amount of the contract or contracts is estimated at the beginning of any reporting period (January 1 and July 1) to be in excess of $20,000 over the next 12 months.

* * * * *

3. § 298.61 is revised to read as follows:

§ 298.61 Reporting of scheduled operations by commuter air carriers.

(a) Each "commuter air carrier" shall file CAB Form 298-C "Report of Scheduled Operations of Commuter Air Carriers" as prescribed in this section. CAB Form 298-C can be obtained from the Publications Services Division, Civil Aeronautics Board, Washington, D.C. 20428.

(b) CAB Form 298-C report is comprised of two schedules, Schedule A-1 "Report of Flight and Traffic Statistics in Scheduled Operations" and Schedule T-1 "Report of Revenue Traffic by On-Line Origin and Destination." The original of each schedule shall be filed quarterly with the Office of Comptroller for the periods ended March 31, June 30, September 30, and December 31 of each year to be received on or before May 10, August 10, November 10, and February 10, respectively. Note.—Due dates falling on a Saturday, Sunday, or national holiday will become effective on the first following working day.

(c) Each commuter air carrier shall indicate, in the space provided, its full corporate name.

(d) The information included in this report shall pertain only to flights performed in scheduled service during the quarter. The numeric carrier code and the date code established by the Office of Comptroller shall be inserted in the spaces provided in the heading of the report. All information shall be typed or neatly printed.

(e) Schedule A-1 shall be used to report the total flight and traffic statistics in scheduled operations by commuter air carriers. Each carrier shall identify the type of traffic carried during the reporting period by checking the appropriate box or boxes in the heading of the schedule. These statistics should cover only scheduled services and should be compiled in accordance with the instructions below. All statistics shall be reported in whole numbers; do not use decimals.

(1) Line 1 "Aircraft-Hours Flown" shall show the total airborne aircraft hours flown computed from the moment an aircraft leaves the ground until it touches ground at the end of each flight stage.

(2) Line 2 "Aircraft-Miles Flown" shall show the total aircraft-miles operated computed in airport-to-airport distances for each flight stage as actually operated, whether or not actually performed according to the scheduled service pattern.

(3) Line 3 "Number of Departures Performed" shall show the total number of takeoffs performed, including extra section takeoffs and takeoffs from nonscheduled airports resulting from deviations from the scheduled service pattern.

(4) Line 4 "Revenue Passenger-Miles" shall show total revenue passenger-miles, computed by mulitplying the aircraft-miles flown on each flight stage by the number of revenue passengers carried on that flight stage.

(5) Line 5 "Available Seat-Miles" shall show total revenue seat-miles available, computed by multiplying the aircraft-miles flown on each flight stage by the number of passenger seats available for sale on that flight stage.

(6) Line 6 "Revenue Ton-Miles" shall show total revenue ton-miles, computed by first multiplying the aircraft-miles flown on each flight stage by the number of pounds of revenue traffic carried on that flight stage to obtain revenue pound-miles. Revenue pound-miles are then divided by 2,000 pounds to find revenue ton-miles. For passengers and their baggage, a standard weight of 200 pounds per passenger may be used.

(7) Line 7 "Available Ton-Miles" shall show total revenue ton-miles available, computed by first multiplying the aircraft-miles flown on each flight stage by the number of pounds of aircraft capacity available for use on that stage to obtain revenue pound-miles available. Revenue pound-miles available are then divided by 2,000 pounds to find available ton-miles.

(8) Line 8 "Number of Departures Scheduled in Passenger Service" shall show the total number of takeoffs scheduled to be performed in passenger service.

(9) Line 9 "Number of Scheduled Departures Completed in Passenger Service" shall show the total number of scheduled departures in passenger service reported on Line 8 which were performed, excluding extra sections. To determine if a departure is performed as scheduled, only the originating point of a flight stage need be considered; whether

S E 5 7 9

UMI

the flight lands at its scheduled destination or not has no bearing.

(f) Schedule T–1 shall show the total on-line origin and destination traffic in scheduled service for the period as follows:

(1) Each pair of origin and destination airports shall appear only once, *i.e.*, no entry shall have the same origin and destination airports as another entry. For example, DAL–HOU and HOU–DAL would each appear once, but either DAL or HOU could reappear with any other point.

(2) The origin and destination data shall be for the on-line movement of traffic rather than for flight stages or flight origin and destination. For example, if a flight operates from A to B to C with 5 passengers enplaning at A, 1 deplaning and 2 enplaning at B, and 6 deplaning at C, the applicable passenger data would be reported as follows:

Origin airport	Destination airport	Number of passengers
A	B	1
A	C	4
B	C	2

(3) Only the ultimate origins and destinations of the traffic moving on the reporting carrier's system shall be reported. Using the example given above, the traffic report would remain the same, even if the carrier operated one flight from A to B and a different flight from B to C, as long as the passengers' on-line origins and destinations remained the same.

(4) Only one grand total shall be shown in the space provided after the final traffic entry. Do not use subtotals.

(5) Columns (1) and (2) shall show the airport codes for the movement of traffic from the point of origin to the point of destination. Carriers shall use the airport codes in the *Official Airline Guide* (OAG). If an airport cannot be found in the OAG, the carrier shall, until otherwise instructed by the Board, insert its own code for the airport in column (1) or (2) followed by an asterisk, and shall identify the airport and its location in the space provided.

(6) Columns (3), (4) and (5) shall show the total number of revenue passengers, pounds of cargo, and pounds of mail, respectively, transported from the point of on-line origin to the point of on-line destination.

(g) The information requested in CAB Form 298–C may be submitted on any comparable form prepared on automatic data processing equipment if the substitute form has been approved by the Comptroller, Civil Aeronautics Board, Washington, D.C. 20428. Data in any approved format shall contain the same column headings arranged in the same sequence as in CAB Form 298–C.

§§ 298.62, 298.63 [Revoked and Reserved]

4. §§ 298.62 and 298.63 are revoked and reserved.

5. § 298.64 is revised to read as follows:

§ 298.64 Requests for extensions of time within which to file reports or for waivers from reporting requirements.

(a) If circumstances prevent the filing of CAB Form 298–C on or before the due date, a written request for an extension may be submitted. Except in cases of emergency, the request must be delivered to the Board's Office of Comptroller in writing at least 3 days in advance of the due date. The request must state good and sufficient reason to justify the granting of the extension and the date when the reports can be filed. If the request is denied, and air carrier remains subject to the filing requirements to the same extent as if no request for extension of time had been made.

(b) The Director, Office of Economic Analysis may waive any reporting requirement contained in § 298.61 of this part, upon his own initiative or upon written request from any commuter air carrier if the waiver is in the public interest and the request demonstrates that (i) unusual circumstances warrant such a departure, (ii) a specifically defined alternative procedure or technique will result in a substantially equivalent or more accurate portrayal, and (iii) the application of the alternative procedure will maintain or improve uniformity in reporting between commuter air carriers.

6. A new § 298.65 is added to Subpart F to read as follows:

§ 298.65 Reporting exemption for State collection of data.

(a) The Director, Office of Economic Analysis, may exempt a commuter air carrier from the reporting requirements of § 298.61 of this part if a State government collects the information specified in that section and provides it to the Board by the dates specified. The data provided to the Board in this manner must be at least as reliable as if they were collected by the Board directly.

(b) The Director, Office of Economic Analysis, will provide assistance to any State agency interested in participating in this exemption program.

7. CAB Form 298–C Schedules A–1 and T–1 are amended as shown in attached Exhibits A and B, respectively.[1]

(Sections 204(a) and 416(b) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 771, 91 Stat. 2164, 49 U.S.C. 1324(a), and 1386(b).)

By the Civil Aeronautics Board:

Phyllis T. Kaylor,

Secretary.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 236

[Docket No. R–79–705]

Rental Projects; Eligibility Requirements for Mortgage Insurance

AGENCY: U.S. Department of Housing and Urban Development, Office of the Assistant Secretary for Housing—Federal Housing Commissioner.

ACTION: Final rule.

SUMMARY: Section 236.12 is being amended to reflect the increased dollar limitations on units within projects insured under Part 236 of the National Housing Act as authorized by the Housing and Community Development Amendments of 1978.

EFFECTIVE DATE: October 5, 1979.

ADDRESS: Rules Docket Clerk, Office of the Secretary, Room 5218, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT: Frank D. Brown, Office of Housing, Multifamily Housing Development, Development Division, Room 6114, HUD, 451 7th Street, S.W., Washington, D.C. 20410; (202) 755–6513. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Since these amendments to § 236.12 implement a statute without the exercise of administrative discretion and because of the benefits that will inure to the public from an expeditious implementation of these amendments, the Secretary has determined that advance publication, notice and public procedure are unnecessary.

A finding of inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this finding of inapplicability will be available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Office of the General Counsel, Room 5218, Department of HUD, 451 7th Street, S.W., Washington, D.C. 20410.

Accordingly, § 236.12 is amended by revising paragraph (a)(1) and (b) to read as follows:

§ 236.12 Maximum mortgage amounts.

(a) The mortgage shall involve a principal obligation not in excess of the lowest of the following:

(1) Dollar limitations on units. For such part of the property or project attributable to dwelling use (excluding exterior land improvements as defined by the Commissioner) an amount per family unit, depending on the number of bedrooms, which may be:

(i) For projects involving eligible nonprofit mortgagors:

(a) $21,563 without a bedroom
(b) $24,662 with one bedroom
(c) $29,984 with two bedrooms
(d) $38,379 with three bedrooms
(e) $42,756 with four or more bedrooms

(ii) For projects involving eligible mortgagors other than nonprofit mortgagors:

(a) $19,406 without a bedroom
(b) $22,195 with one bedroom
(c) $26,985 with two bedrooms
(d) $34,541 with three bedrooms
(e) $38,480 with four or more bedrooms

* * * * *

(b) Increased mortgage amount-elevator type structures. In order to compensate for higher costs incident to construction of elevator type structures of sound standards of construction and design, the Commissioner may increase the dollar amount limitations per family unit as provided in paragraph (a)(1) of this section not to exceed:

(1) For projects involving eligible nonprofit mortgagors:

(i) $22,692 without a bedroom
(ii) $26,012 with one bedroom
(iii) $31,631 with two bedrooms
(iv) $40,919 with three bedrooms
(v) $44,917 with four or more bedrooms

(2) For projects involving eligible mortgagors other than nonprofit mortgagors:

(i) $20,422 without a bedroom
(ii) $23,410 with one bedroom
(iii) $28,467 with two bedrooms
(iv) $36,827 with three bedrooms
(v) $40,425 with four or more bedrooms

* * * * *

Issued at Washington, D.C., on August 27, 1979.

Lawrence B. Simons,

Assistant Secretary for Housing—Federal Housing Commissioner.

[FR Doc. 79–27556 Filed 9–4–79; 8:45 am]

BILLING CODE 4210–01–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 285

Atlantic Bluefin Tuna; Closure

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Notice of closure of purse seine fishing for giant-size bluefin tuna.

SUMMARY: This notice closes the 1979 purse seine fishing season for giant-size Atlantic bluefin tuna at 2359 hours e.d.t., August 24, 1979.

EFFECTIVE DATE: 2359 hours e.d.t., August 24, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Allen E. Peterson, Regional Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Gloucester, Massachusetts 01930; telephone 617–281–3600.

SUPPLEMENTARY INFORMATION: On June 14, 1979, final regulations promulgated under the authority of the Atlantic Tuna Convention Act (16 U.S.C. Sections 971–971h), and implementing the provisions thereof, were filed with the Office of the Federal Register.

Section 285.30(a) of those final regulations (50 CFR Part 285) establishes an annual quota of 300 short tons for giant-size Atlantic bluefin tuna taken by purse seine vessels. Section 285.29(a)(2) provides that the Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration, shall monitor the catch of giant tuna and project a date when the quota for the purse seine fishery for giant tuna will be exhausted. Notice of the date and time when the fishery is to be closed is to be published in the **Federal Register** by the Assistant Administrator.

Notice is hereby given that the Assistant Administrator has projected, based upon reported catches of giant tuna, that the 1979 quota of giant-size Atlantic bluefin tuna permitted to be caught by vessels using purse seine gear will be caught by August 24, 1979. Actual notice of this closure was given to all vessel owners holding a valid vessel certificate for this fishery. Consequently, fishing for giant tuna by purse seine vessels was closed at 2359 e.d.t. on August 24, 1979.

Signed at Washington, D.C., this 29th day of August, 1979.

(16 U.S.C. 971–971h).

Winfred H. Meibohm,

Executive Director, National Marine Fisheries Service.

50 CFR Parts 611 and 672

Gulf of Alaska Groundfish; Correction to Regulations

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Correction to Regulations.

SUMMARY: These amendments are corrections to the regulations governing foreign and domestic fishing for groundfish in the Gulf of Alaska. These amendments exclude fish of the genus *Sebastolobus* from the "other rockfish" category of fish.

EFFECTIVE DATE: August 30, 1979.

FOR FURTHER INFORMATION CONTACT: Denton R. Moore, Acting Chief, Permits and Regulations Division, National Marine Fisheries Service, Washington, D.C. 20235. Telephone: (202) 634–7432.

SUPPLEMENTARY INFORMATION: The regulations implementing the Alaska groundfish fishery management plan (see 43 FR 52709 for vessels of the United States; 43 FR 59321 for foreign vessels) include fish of the genus *Sebastolobus* (thornyhead) in the specifications of optimum yield (OY) and total allowable level of foreign fishing (TALFF) for the "other rockfish" category of fish (see 50 CFR 611.92(b), Table I, and 50 CFR 672(a), Table I). The National Oceanic and Atmospheric Administration (NOAA) has since discovered that the specifications of OY and TALFF in the plan (see 43 FR 17242) and the regulations did not include thornyhead because, since the species was of no commercial value, the magnitude of past harvest of the species was unknown.

This correction deletes fish of the genus *Sebastolobus* from the "other rockfish" category, thereby classifying *Sebastolobus* in the "other species" category.

The Assistant Administrator for Fisheries, NOAA has determined that these regulations are not significant under Executive Order 12044, and also

that a regulatory anlysis is not required. The Assistant Administrator has determined that this amendment is essentially technical in nature, and will have no impact on fishery resources. The amendment alleviates an unintended restriction on fishing activities, and is not controversial. Accordingly, the advance notice and comment requirements of 5 U.S.C. 553(b) and the "cooling off" requirement of section 553(d) are found to be impracticable, unnecessary or contrary to the public interest concerning this amendment.

Signed in Washington, D.C., this 30th day of August, 1979.

(16 U.S.C. 1801 *et seq.*).

Winfred H. Meibohm,

Executive Director, National Marine Fisheries Service.

PART 611—FOREIGN FISHING

§ 611.92 [Amended]

(A) 50 CFR 611.92(b), Table I, footnote 4, is amended to read:

⁴The category "other rockfish" means all fish of the genus *Sebastes* except Pacific ocean perch.

PART 672—GROUNDFISH OF THE GULF OF ALASKA

§ 672.20 [Amended]

(B) 50 CFR 672.20(a)(1), Table I, is amended by:

(1) Changing the asterisk after the species category "other species" to a "2";

(2) By adding footnote number "1" after the species category "other rockfish";

(3) By adding the following footnote number 1 to the bottom of Table I:

¹The category "other rockfish" includes all fish of the genus *Sebastes* except Pacific Ocean perch.

and

(4) By renumbering the original asterisk footnote as footnote number "2".

Proposed Rules

Federal Register

Vol. 44, No. 173

Wednesday, September 5, 1979

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

[7 CFR Part 425]

Proposed Peanut Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation.

ACTION: Proposed rule.

SUMMARY: This proposed rule prescribes procedures for insuring peanut crops effective with the 1980 crop year. This rule combines provisions from previous regulations for insuring peanuts in a shorter, clearer, and more simplified document which will make the program more effective administratively. This rule is promulgated under the authority contained in the Federal Crop Insurance Act, as amended.

DATE: Written comments, data, and opinions must be submitted not later than November 5, 1979 to be assured of consideration.

ADDRESS: Written comments on this proposed rule should be sent to James D. Deal, Manager, Federal Crop Insurance Corporation, Room 4096, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, 202–447–3325.

SUPPLEMENTARY INFORMATION: Under the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), it is proposed that there be established a new Part 425 of Chapter IV in Title 7 of the Code of Federal Regulations to be known as 7 CFR Part 425, Peanut Crop Insurance.

This part prescribes procedures for insuring peanut crops effective with the 1980 crop year.

All previous regulations applicable to insuring peanut crops as found in 7 CFR 401.101–401.111, and 401.138, will not be applicable to 1980 and succeeding peanut crops but will remain in effect for Federal Crop Insurance Corporation (FCIC) peanut insurance policies issued for the crop years prior to 1980.

It has been determined that combining all previous regulations for insuring peanut crops into one shortened, simplified, and clearer regulation would be more effective administratively.

In addition, proposed 7 CFR Part 425 provides (1) for a Premium Adjustment Table which replaces the current premium discount provisions and includes a maximum 50 percent premium reduction for good insurance experience, as well as premium increases for unfavorable experience, on an individual contract basis, (2) for the consolidation of cancellation and termination for indebtedness dates to the extent possible, (3) that any premium not paid by the termination date will be increased by a 9 percent service fee with a 9 percent simple interest charge applying to any unpaid balances at the end of each subsequent 12-month period thereafter, (4) that the time period for submitting a notice of loss be extended from 15 days to 30 days, (5) that the 60-day time period for filing a claim be eliminated, (6) that three coverage level options be offered in each county, (7) that the Actuarial Table shall provide the level which will be applicable to a contract unless a different level is selected by the insured and the conversion level will be the one closest to the present percent level offered in each county, (8) that when appraisals for unharvested acreage are made (except appraisals for uninsured causes or poor farming practices) only the appraisal in excess of 20 percent of the amount of insurance will be included in the value of production, and (9) for an increase in the limitation from $5,000 to $20,000 in those cases involving good faith reliance on misrepresentation, as found in 7 CFR Part 425.5 of these proposed regulations, wherein the Manager of the Corporation is authorized to take action to grant relief.

The proposed Peanut Crop Insurance regulations provide a December 31 cancellation date for all peanut producing counties.

These regulations, and any amendments thereto, must be placed on file in the Corporation's office for the county in which the insurance is available not later than 15 days prior to the cancellation date, in order to afford farmers an opportunity to examine them before the cancellation date of December 31, 1979, before they become effective for the 1980 crop year.

All written submissions made pursuant to this notice will be available for public inspection at the office of the Manager during regular business hours, 8:15 a.m. to 4:45 p.m., Monday through Friday.

Proposed Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation proposes to delete and reserve 7 CFR 401.138, but these provisions shall remain in effect for FCIC peanut insurance policies issued for crop years prior to 1980. The Corporation also proposes to issue a new Part 425 in Chapter IV of Title 7 of the Code of Federal Regulations effective with the 1980 and subsequent crops of peanuts, which shall remain in effect until amended or superseded, to read as follows:

PART 425—PEANUT CROP INSURANCE

Subpart—Regulations for the 1980 and Succeeding Crop Years

Sec.

425.1 Availability of Peanut Insurance
425.2 Premium rates, coverage levels and amounts of insurance per acre
425.3 Public notice of indemnities paid
425.4 Creditors
425.5 Good faith reliance on misrepresentation
425.6 The contract
425.7 The application and policy

Authority: Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended (7 U.S.C. 1506, 1516).

§ 425.1 Availability of Peanut Insurance.

Insurance shall be offered under the provisions of this subpart on peanuts in counties within limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended. The counties shall be designated by the Manager of the Corporation from those approved by the Board of Directors of the Corporation. Before insurance is offered in any county, there shall be published by appendix to this chapter the names of the counties in which peanut insurance will be offered.

§ 425.2 Premium rates, coverage levels, and amounts of insurance per acre.

(a) The Manager shall establish premium rates, coverage levels, and applicable pounds of peanuts per acre to determine the dollar amounts of insurance which shall be shown on the county actuarial table on file in the office for the county and may be changed from year to year.

(b) At the time the application for insurance is made, the applicant shall elect a coverage level from among those levels shown on the actuarial table for the crop year.

§ 425.3 Public notice of indemnities paid.

The Corporation shall provide for posting annually in each county at each county courthouse a listing of the indemnities paid in the county.

§ 425.4 Creditors.

An interest of a person in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankruptcy, or an involuntary transfer shall not entitle the holder of the interest to any benefit under the contract except as provided in the policy.

§ 425.5 Good faith reliance on misrepresentation.

Notwithstanding any other provision of the peanut insurance contract, whenever (a) an insured person under a contract of crop insurance entered into under these regulations, as a result of a misrepresentation or other erroneous action or advice by an agent or employee of the Corporation, (1) is indebted to the Corporation for additional premiums, or (2) has suffered a loss to a crop which is not insured or for which the insured person is not entitled to an indemnity because of failure to comply with the terms of the insurance contract, but which the insured person believed to be insured, or believed the terms of the insurance contract to have been complied with or waived, and (b) the Board of Directors of the Corporation, or the Manager in cases involving not more than $20,000, finds (1) that an agent or employee of the Corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice, (2) that said insured person relied thereon in good faith, and (3) that to require the payment of the additional premiums or to deny such insured's entitlement to the indemnity would not be fair and equitable, such insured person shall be granted relief the same as if otherwise entitled thereto.

§ 425.6 The contract.

(a) The insurance contract shall become effective upon the acceptance by the Corporation of a duly executed application for insurance on a form prescribed by the Corporation. Such acceptance shall be effective upon the date the notice of acceptance is mailed to the applicant. The contract shall cover the peanut crop as provided in the policy. The contract shall consist of the application, the policy, the attached appendix, and the provisions of the county actuarial table. Any changes made in the contract shall not affect its continuity from year to year. Copies of forms referred to in the contract are available at the office for the county.

§ 425.7 The application and policy.

(a) Application for insurance on a form prescribed by the Corporation may be made by any person to cover such person's insurable share in the peanut crop as landlord, owner-operator, or tenant. The application shall be submitted to the Corporation at the office for the county on or before the applicable closing date on file in the office for the county.

(b) The Corporation reserves the right to discontinue the acceptance of applications in any county upon its determination that the insurance risk involved is excessive, and also, for the same reason, to reject any individual application. The Manager of the Corporation is authorized in any crop year to extend the closing date for submitting applications or contract changes in any county, by placing the extended date on file in the office for the county and publishing a notice in the **Federal Register** upon the Manager's determination that no adverse selectivity will result during the period of such extension: *Provided, however,* That if adverse conditions should develop during such period, the Corporation will immediately discontinue the acceptance of applications.

(c) In accordance with the provisions governing changes in the contract contained in policies issued under FCIC regulations for the 1969 and succeeding crop years, a contract in the form provided for under this subpart will come into effect as a continuation of a peanut contract issued under such prior regulations, without the filing of a new application.

(d) The provisions of the application and Peanut Insurance Policy for the 1980 and succeeding crop years, and the Appendix to the Peanut Insurance Policy are as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Application for 19——and succeeding crop years1974PEANUT

Crop Insurance Contract

(Contract Number) ————————
(Identification Number) ————————
(Name and Address) ————————
(Zip Code) ————————
(County) ————————
(State) ————————
Type Of Entity ————————
Applicant Is Over 18 Yes——No ————————

A. The applicant, subject to the provisions of the regulations of the Federal Crop Insurance Corporation (herein called "Corporation"), hereby applies to the Corporation for insurance on the applicant's share in the peanuts planted on insurable acreage as shown on the county actuarial table for the above-stated county. The applicant elects from the actuarial table the coverage level. THE PREMIUM RATES AND APPLICABLE POUNDS PER ACRE USED TO DETERMINE THE AMOUNT OF INSURANCE SHALL BE THOSE SHOWN ON THE APPLICABLE COUNTY ACTUARIAL TABLE FILED IN THE OFFICE FOR THE COUNTY FOR EACH CROP YEAR.

Level Election ————————

EXAMPLE: FOR THE 19——CROP YEAR ONLY (100% SHARE)

Location/ Farm No.	Amount of insurance per acre*	Premium per acre**	Practice

*Your guarantee will be on a unit basis (acres x amount of insurance per acre x share).

**Your premium is subject to adjustment in accordance with section 5(c) of the policy.

B. WHEN NOTICE OF ACCEPTANCE OF THIS APPLICATION IS MAILED TO THE APPLICANT BY THE CORPORATION, the contract shall be in effect for the crop year specified above, unless the time for submitting applications has passed at the time this application is filed, AND SHALL CONTINUE FOR EACH SUCCEEDING CROP YEAR UNTIL CANCELED OR TERMINATED as provided in the contract. This accepted application, the following peanut insurance policy, the attached appendix, and the provisions of the county actuarial table showing the applicable pounds per acre used to determine the dollar amount of insurance, coverage levels, premium rates, and insurable and uninsurable acreage shall constitute the contract. Additional information regarding contract provisions can be found in the county regulations folder on file in the office for the county. No term or condition of the contract shall be waived or changed except in writing by the Corporation.

PEANUT CROP INSURANCE POLICY

TERMS AND CONDITIONS

Subject to the provisions in the attached appendix:

1. CAUSES OF LOSS. (a) Causes of loss insured against. The insurance provided is against unavoidable loss of production and/or value resulting from adverse weather conditions, insects, plant disease, wildlife, earthquake or fire occurring within the insurance period, subject to any exceptions, exclusions or limitations with respect to causes of loss shown on the actuarial table.

(b) Causes of loss not insured against. The contract shall not cover any loss of production and/or value, as determined by the Corporation, due to (1) the neglect or malfeasance of the insured, any member of the insured's household, the insured's tenants or employees, (2) failure to follow recognized good farming practices, (3) damage resulting from the backing up of water by any governmental or public utilities dam or reservoir project, or (4) any cause not specified as an insured cause in this policy as limited by the actuarial table.

2. CROP AND ACREAGE INSURED. (a) The crop insured shall be peanuts planted for the purpose of digging, maturing and marketing as farmers' stock peanuts, as determined by the Corporation, and which is grown on insured acreage and for which the actuarial table shows a guarantee and premium rate per acre.

(b) The acreage insured for each crop year shall be that acreage planted to peanuts on insurable acreage as shown on the actuarial table, and the insured's share therein as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect: *Provided,* That insurance shall not attach or be considered to have attached, as determined by the Corporation, to any acreage (1) not planted to a type shown as insurable on the actuarial table, (2) planted on a farm for which an acreage allotment and poundage quota for peanuts was not established, (3) destroyed for the purpose of conforming with any other program administered by the Secretary of Agriculture, (4) where premium rates are established by farming practices on the actuarial table, and the farming practices carried out on any acreage are not among those for which a premium rate has been established, (5) not reported for insurance as provided in section 3 if such acreage is irrigated and an irrigated practice is not provided for such acreage on the actuarial table, (6) which is destroyed and after such destruction it was practical to replant to peanuts and such acreage was not replanted, (7) initially planted after the date on file in the office for the county which has been established by the Corporation as being too late to initially plant and expect a normal crop to be produced, or (8) planted for experimental purposes.

3. RESPONSIBILITY OF INSURED TO REPORT ACREAGE AND SHARE. The insured shall submit to the Corporation on a form prescribed by the Corporation, a report showing (a) all acreage of peanuts planted in the county (including a designation of any acreage to which insurance does not attach) in which the insured has a share and (b) the insured's share therein at the time of planting. Such report shall be submitted each year not later than the acreage reporting date on file in the office for the county.

4. COVERAGE LEVELS AND AMOUNT OF INSURANCE PER ACRE. (a) For each crop year of the contract, the coverage levels and applicable pounds of peanuts per acre to be used to determine the dollar amount of insurance shall be those shown on the actuarial table. The dollar amount of insurance per acre for each crop year shall be the applicable pounds of peanuts per acre multiplied by the average quota support price per pound for the insured type of peanuts for the crop year as announced by the United States Department of Agriculture under the current price support program and this result rounded to the nearest whole dollar.

(b) The amount of insurance per acre shall be reduced by 20 percent for any unharvested acreage.

5. ANNUAL PREMIUM. (a) The annual premium is earned and payable at the time of planting and the amount thereof shall be determined by multiplying the insured acreage times the dollar amount of insurance per acre, times the applicable premium rate, times the insured's share at the time of planting, times the premium adjustment percentage in subsection (c) of this section.

(b) For premium adjustment purposes, only the years during which premiums were earned shall be considered.

(c) The premium shall be adjusted as shown in the following table:

1/ Loss Ratio means the ratio of indemnity(ies) paid to premium(s) earned.

2/ Only the most recent 15 crop years will be used to determine the number of "Loss Years" (A crop year is determined to be a "Loss Year" when the amount of indemnity for the year exceeds the premium for the year).

BILLING CODE 3410-08-C

(d) Any amount of premium for an insured crop which is unpaid on the day following the termination date for indebtedness for such crop shall be increased by a 9 percent service fee, which increased amount shall be the premium balance, and thereafter, at the end of each 12-month period, 9 percent simple interest shall attach to any amount of the premium balance which is unpaid: *Provided*, When notice of loss has been timely filed by the insured as provided in section 7 of this policy, the service fee will not be charged and the contract will remain in force if the premium is paid in full within 30 days after the date of approval or denial of the claim for indemnity; *however*, if any premium remains unpaid after such date, the contract will terminate and the amount of premium outstanding shall be increased by a 9 percent service fee, which increased amount shall be the premium balance. If such premium balance is not paid within 12 months immediately following the termination date, 9 percent simple interest shall apply from the termination date and each year thereafter to any unpaid premium balance.

(e) Any unpaid amount due the Corporation may be deducted from any indemnity payable to the insured by the Corporation or from any loan or payment to the insured under any Act of Congress or program administered by the U.S. Department of Agriculture, when not prohibited by law.

6. INSURANCE PERIOD. Insurance on insured acreage shall attach at the time the peanuts are planted and shall cease upon the earliest of (a) final adjustment of a loss, (b) threshing or removal of the peanuts from the field, (c) total destruction of the insured peanut crop, or (d) the November 30 of the calendar year in which the peanuts are normally harvested.

7. NOTICE OF DAMAGE OR LOSS. (a) Any notice of damage or loss shall be given promptly in writing by the insured to the Corporation at the office for the county.

(b) Notice shall be given promptly if, during the growing season or after harvest but before threshing, the peanuts on any unit are damaged to the extent that the insured does not expect to further care for the crop or harvest any part of it, or if the insured wants the consent of the Corporation to put the acreage to another use. No insured acreage shall be put to another use until the Corporation has made an appraisal of the potential production of such acreage and consents in writing to such other use. Such consent shall not be given until it is too late or impractical to replant to peanuts. Notice shall also be given when such acreage has been put to another use.

(c) In addition to the notices required in subsection (b) of this section, if an indemnity is to be claimed on any unit, the insured shall give written notice therof to the Corporation at the office for the county not later than *30 DAYS* after the earliest of (1) completion of selling or otherwise disposing of the insured crop on the unit, (2) the calendar date for the end of the insurance period, or (3) the date the entire peanut crop on the unit is destroyed, as determined by the Corporation. The Corporation reserves the right to provide additional time if it determines there are extenuating circumstances.

(d) Any insured acreage which is not to be harvested and upon which an indemnity is to be claimed shall be left intact until inspected by the Corporation.

(e) The Corporation may reject any claim for indemnity if any of the requirements of this section are not met.

8. CLAIM FOR INDEMNITY. (a) It shall be a condition precedent to the payment of any indemnity that the insured (1) establish the total production of peanuts on the unit and that any loss of production was directly caused by one or more of the insured causes during the insurance period for the crop year for which the indemnity is claimed and (2) furnish any other information regarding the manner and extent of loss as may be required by the Corporation.

(b) Indemnities shall be determined separately for each unit. The amount of indemnity for any unit shall be determined by (1) multiplying the insured acreage of peanuts on the unit by the applicable amount of insurance per acre, which product shall be the amount of insurance for the unit, (2) subtracting therefrom the value of the total production of peanuts to be counted for the unit, and (3) multiplying the result obtained in step (2) by the insured share: *Provided*, That if the premium computed on the insured acreage and share is more than the premium computed on the reported acreage and share, the amount of indemnity shall be computed on the insured acreage and share and then reduced proportionately.

(c) The value of the total production to be counted for a unit shall be determined by the Corporation and shall include the value of all threshed and appraised production as follows:

(1) Threshed production which has been sold shall be valued at the gross receipt or the fair market value (as determined by the Corporation) taking into consideration the average quota support price.

(2) Unthreshed, unharvested or threshed but not sold production shall be valued at the fair market value (as determined by the Corporation) taking into consideration the average quota support price.

(3) The value of appraised production to be counted shall include (i) any appraisals made by the Corporation for potential production on harvested acres, for uninsured causes of loss, and for poor farming practices, valued at the average quota support price or fair market value (as determined by the Corporation), whichever is higher, (ii) not less than the applicable amount of insurance for any acreage which is abandoned or put to another use without prior written consent of the Corporation or damaged solely by an uninsured cause, and (iii) only the value of the production in excess of 20 percent of the amount of insurance for all other unharvested acreage.

(d) The value of the appraised potential production for acreage for which consent has been given to be put to another use shall be counted as the value of the production in determining the amount of loss under the contract. *However*, if consent is given to put acreage to another use and the Corporation determines that any such acreage (1) is not put to another use before harvest of peanuts becomes general in the county, (2) is harvested, or (3) is further damaged by an insured cause before the acreage is put to another use, the indemnity for the unit shall be determined without regard to such appraisal and consent.

(e) To enable the Corporation to determine the fair market value of any peanuts for which a United States Department of Agriculture "Inspection Certificate and Sales Memorandum" has not been issued, the Corporation shall be given the opportunity to have such peanuts inspected and graded before they are disposed of by the insured. If the insured disposes of any production without giving the Corporation the opportunity to have the peanuts inspected and graded, the value of such production shall be the average quota support price per pound for the crop year under the peanut price support program for the insured type.

9. MISREPRESENTATION AND FRAUD. The Corporation may void the contract without affecting the insured's liability for premiums or waiving any right, including the right to collect any unpaid premiums if, at any time, the insured has concealed or misrepresented any material fact or committed any fraud relating to the contract, and such voidance shall be effective as of the beginning of the crop year with respect to which such act or omission occurred.

10. TRANSFER OF INSURED SHARE. If the insured transfers any part of the insured share during the crop year, protection will continue to be provided according to the provisions of the contract to the transferee for such crop year on the transferred share, and the transferee shall have the same rights and responsibilities under the contract as the original insured for the current crop year. Any transfer shall be made on an approved form.

11. RECORDS AND ACCESS TO FARM. The insured shall keep or cause to be kept for two years after the time of loss, records of the harvesting, storage, shipments, sale or other disposition of all peanuts produced on each unit including separate records showing the same information for production from any uninsured acreage. Any persons designated by the Corporation shall have access to such records and the farm for purposes related to the contract.

12. LIFE OF CONTRACT: CANCELLATION AND TERMINATION. (a) The contract shall be in effect for the crop year specified on the application and may not be canceled for such crop year. Thereafter, either party may cancel the insurance for any crop year by giving a signed notice to the other on or before the cancellation date preceding such crop year.

(b) Except as provided in section 5(d) of this policy, the contract will terminate as to any crop year if any amount due the Corporation under this contract is not paid on or before the termination date for indebtedness preceding such crop year: *Provided*, That the date of payment for premium (1) if deducted from an indemnity claim shall be the date the insured signs such claim or (2) if deducted from payment under another program administered by the U.S. Department of Agriculture shall be the date such payment was approved.

(c) Following are the cancellation and termination dates:

V 44/173 SEP 5 79

State: All states.
Cancellation date: Dec. 31.
Termination date for indebtedness: Mar. 31.

(d) In the absence of a notice from the insured to cancel, and subject to the provisions of subsections (a), (b), and (c) of this section, and section 7 of the Appendix, the contract shall continue in force for each succeeding crop year.

APPENDIX TO PEANUT INSURANCE POLICY

(ADDITIONAL TERMS AND CONDITIONS)

1. MEANING OF TERMS. For the purpose of peanut crop insurance:

(a) "Actuarial table" means the forms and related material for the crop year approved by the Corporation which are on file for public inspection in the office for the county, and which show the pounds of peanuts per acre used to determine the amount of insurance, insurable and uninsurable acreage, and related information regarding peanut insurance in the county.

(b) "Average quota support price per pound" means the average quota support price per pound for the insured type of peanuts for the crop year as announced by the United States Department of Agriculture under the current price support program. If such price is not announced by July 15 of the crop year, the Corporation may elect to use the average support price for the previous crop year and determine the price by type based on the differentials in effect for such year. *Provided, however,* That for any crop year in which a quota support price is not in effect, the estimated average market price, as determined by the Corporation, shall be used in lieu thereof.

(c) "County" means the county shown on the application and any additional land located in a local producing area bordering on the county, as shown on the actuarial table.

(d) "Crop year" means the period within which the peanut crop is normally grown and shall be designated by the calendar year in which the peanut crop is normally harvested.

(e) "Harvest" as to any acreage means the digging of at least 20 percent of the applicable pounds per acre of peanuts as shown on the actuarial table for the purpose of combining or threshing.

(f) "Insurable acreage" means the land classified as insurable by the Corporation and shown as such on the county actuarial table.

(g) "Insured" means the person who submitted the application accepted by the Corporation.

(h) "Office for the county" means the Corporation's office serving the county shown on the application for insurance or such office as may be designated by the Corporation.

(i) "Person" means an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

(j) "Share" means the interest of the insured as landlord, owner-operator, or tenant in the insured peanut crop at the time of planting as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect, and no other share shall be deemed to be insured: *Provided,* That for the purpose of determining the amount of indemnity, the insured share shall not exceed the insured's share at the earliest of (1) the date of beginning of harvest on the unit, (2) the calendar date for the end of the insurance period, or (3) the date the entire crop on the unit is destroyed, as determined by the Corporation.

(k) "Tenant" means a person who rents land from another person for a share of the peanut crop or proceeds therefrom.

(l) "Unit" means all insurable acreage of peanuts in the county, planted on a farm for which a single farm acreage allotment for the insurable type of peanuts is established, on the date of planting for the crop year (1) in which the insured has a 100 percent share, or (2) which is owned by one entity and operated by another entity on a share basis. Land rented for cash, a fixed commodity payment, or any consideration other than a share in the peanut crop on such land shall be considered as owned by the lessee. Land which would otherwise be one unit may be divided according to applicable guidelines on file in the office for the county or by written agreement between the Corporation and the insured. The Corporation shall determine units as herein defined when adjusting a loss, notwithstanding what is shown on the acreage report, and has the right to consider any acreage and share reported by or for the insured's spouse or child or any member of the insured's household to be the bona fide share of the insured or any other person having the bona fide share.

2. ACREAGE INSURED. (a) The Corporation reserves the right to limit the insured acreage of peanuts to any acreage limitations established under any Act of Congress, provided the insured is so notified in writing prior to the planting of peanuts.

(b) If the insured does not submit an acreage report on or before the acreage reporting date on file in the office for the county, the Corporation may elect to determine by units the insured acreage and share or declare the insured acreage on any unit(s) to be "zero". If the insured does not have a share in any insured acreage in the county for any year, the insured shall submit a report so indicating. Any acreage report submitted by the insured may be revised only upon approval of the Corporation.

3. IRRIGATED ACREAGE. (a) Where the actuarial table provides for insurance on an irrigated practice, the insured shall report as irrigated only the acreage for which the insured has adequate facilities and water to carry out a good irrigation practice at the time of planting.

(b) Where irrigated acreage is insurable, any loss of production caused by failure to carry out a good irrigation practice, except failure of the water supply from an unavoidable cause occurring after the beginning of planting, as determined by the Corporation, shall be considered as due to an uninsured cause. The failure or breakdown of irrigation equipment or facilities shall not be considered as a failure of the water supply from an unavoidable cause.

4. ANNUAL PREMIUM. (a) If there is no break in the continuity of participation, any premium adjustment applicable under section 5 of the policy shall be transferred to (1) the contract of the insured's estate or surviving spouse in case of death of the insured, (2) the contract of the person who succeeds the insured if such person had previously participated in the farming operation, or (3) the contract of the same insured who stops farming in one county and starts farming in another county.

(b) If there is a break in the continuity of participation, any reduction in premium earned under section 5 of the policy shall not thereafter apply; *however,* any previous unfavorable insurance experience shall be considered in premium computation following a break in continuity.

5. CLAIM FOR AND PAYMENT OF INDEMNITY. (a) Any claim for indemnity on a unit shall be submitted to the Corporation on a form prescribed by the Corporation.

(b) In determining the total production to be counted for each unit, production from units on which the production has been commingled will be allocated to such units in proportion to the liability on each unit.

(c) There shall be no abandonment to the Corporation of any insured peanut acreage.

(d) In the event that any claim for indemnity under the provisions of the contract is denied by the Corporation, an action on such claim may be brought against the Corporation under the provisions of 7 U.S.C. 1508(c): *Provided,* That the same is brought within one year after the date notice of denial of the claim is mailed to and received by the insured.

(e) Any indemnity will be payable within 30 days after a claim for indemnity is approved by the Corporation. *However,* in no event shall the Corporation be liable for interest or damages in connection with any claim for indemnity whether such claim be approved or disapproved by the Corporation.

(f) If the insured is an individual who dies, disappears, or is judicially declared incompetent, or the insured is an entity other than an individual and such entity is dissolved after the peanuts are planted for any crop year, any indemnity will be paid to the person(s) the Corporation determines to be beneficially entitled thereto.

(g) the Corporation reserves the right to reject any claim for indemnity if any of the requirements of this section or section 8 of the policy are not met and the Corporation determines that the amount of loss cannot be satisfactorily determined.

6. SUBROGATION. The insured (including any assignee or transferee) assigns to the Corporation all rights of recovery against any person for loss or damage to the extent that payment hereunder is made by the Corporation. The Corporation thereafter shall execute all papers required and take appropriate action as may be necessary to secure such rights.

7. TERMINATION OF THE CONTRACT. (a) The contract shall terminate if no premium is earned for five consecutive years.

(b) If the insured is an individual who dies or is judicially declared incompetent, or the insured entity is other than an individual and such entity is dissolved, the contract shall terminate as of the date of death, judicial declaration, or dissolution; *however,* if such event occurs after insurance attaches for any crop year, the contract shall continue in force through such crop year and terminate at the end thereof. Death of a partner in a partnership shall dissolve the partnership unless the partnership agreement provides otherwise. If two or more persons having a joint interest are insured jointly, death of one of the persons shall dissolve the joint entity.

COVERAGE LEVEL. (a) If the insured has not elected on the application a coverage level from among those shown on the actuarial table, the coverage level which shall be applicable under the contract, and which the insured shall be deemed to have elected, shall be as provided on the actuarial table for such purposes.

(b) The insured may, with the consent of the Corporation, change the coverage level for any crop year on or before the closing date for submitting application for that crop year.

9. ASSIGNMENT OF INDEMNITY. Upon approval of a form prescribed by the Corporation, the insured may assign to another party the right to an indemnity for the crop year and such assignee shall have the right to submit the loss notices and forms as required by the contract.

10. CONTRACT CHANGES. The Corporation reserves the right to change any terms and provisions of the contract from year to year. Any changes shall be mailed to the insured or placed on file and made available for public inspection in the office for the county at least 15 days prior to the cancellation date preceding the crop year for which the changes are to become effective, and such mailing or filing shall constitute notice to the insured. Acceptance of any changes will be conclusively presumed in the absence of any notice from the insured to cancel the contract as provided in section 12 of the policy.

This proposal has been reviewed under the USDA criteria established to implement Executive Order No. 12044, "Improving Government Regulations." A determination has been made that this action should not be classified "significant" under those criteria. A Draft Impact Analysis has been prepared and is available from Peter F. Cole, Secretary, Federal Crop Insurance Corporation, Room 4088, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

Note.—The reporting requirements contained herein have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942, and OMB Circular No. A-40.

Approved by the Board Directors on July 24, 1979.

Peter F. Cole,

Secretary, Federal Crop Insurance Corporation.

BILLING CODE 3410-08-M

Agricultural Marketing Service

[7 CFR Part 1065]

[Docket No. AO-86-A39]

Milk in the Nebraska-Western Iowa Marketing Area; Extension of Time for Filing Exceptions to the Recommended Decision on Proposed Amendments to Tentative Marketing Agreement and to Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Extension of time for filing exceptions to proposed rule.

SUMMARY: This notice further extends the time for filing exceptions to a recommended decision concerning a proposed amended order regulating the handling of milk in the Nebraska-Western Iowa marketing area. Associated Milk Producers, Inc., requested additional time to complete an analysis of the decision.

DATE: Exceptions now are due on or before September 14, 1979.

ADDRESS: Exceptions (four copies) should be filed with the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C., 20250.

FOR FURTHER INFORMATION CONTACT: Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U. S. Department of Agriculture, Washington, D.C. 20250 (202-447-7183).

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of hearing: Issued September 29, 1978; published October 4, 1978 (43 FR 45881).

Extension of time for filing briefs: Issued January 15, 1979; published January 19, 1979 (44 FR 3989).

Recommended Decision: Issued July 24, 1979; published July 30, 1979 (44 FR 44523).

Extension of time for filing exceptions: Issued August 13, 1979; published August 16, 1979 (44 FR 47950).

Notice is herby given that the time for filing exceptions to the above listed recommended decision is hereby extended to September 14, 1979.

This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.),* and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Signed at Washington, D.C., on: August 29, 1979.

William T. Manley,

Deputy Administrator Marketing Program Operations.

[FR Doc. 79-27492 Filed 9-4-79; 8:45 am]

BILLING CODE 3410-02-M

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

[12 CFR Ch. I]

Improving Government Regulations; Semiannual Agenda

AGENCY: Comptroller of the Currency.

ACTION: Semiannual Agenda.

SUMMARY: The Semiannual Agenda, required by the Secretary of the Treasury in order to implement the President's Executive Order 12044 concerning improving government regulations, provides notice to the public of the Comptroller of the Currency's regulatory actions since February 1, 1979, including projects initiated or acted upon since that date, and projects pending at this time. The principal functions of the Comptroller of the Currency are the chartering, examining, supervising and regulating of national banking associations.

ADDRESS: Public comments are invited, and may be directed to Alan Herlands, Director of Regulations Analysis, Office of the Comptroller of the Currency, 490 L'Enfant Plaza East, S.W., Washington, D.C. 20219. Comments on specific projects may also be directed to knowledgeable officials identified in connection with projects set forth below.

FOR FURTHER INFORMATION CONTACT: Alan Herlands, Director of Regulations Analysis, 202-447-1177.

SUPPLEMENTARY INFORMATION:

Investment Securities

(12 CFR Part 1)

An Advance Notice of Proposed Rulemaking and request for comments were published in the **Federal Register** on January 3, 1979 (44 FR 762). This proposal concerned 12 CFR 1.9, which provides that a national bank may request the Comptroller to rule on the applicability of 12 CFR Part 1 or paragraph Seven of 12 U.S.C. 24 to any security which it holds, or desires to deal in, underwrite, or purchase for its own account. Comment was requested as to whether Part 1 should be revised by including a general set of principles or characteristics applicable to

UMI

V 4 4 / 1 7 3 SE 5 79 UMI

determinations between general obligation bonds and revenue bonds.

Only two comments were received: One favoring such an amendment, one opposing it. In light of the Comptroller's review of the need for an amendment and the lack of public interest, the Comptroller has decided not to pursue this project.

For further information, contact Radcliffe Park, Assistant Director for Legal Advisory Services, 202–447–1880.

Description of Office Organization, Procedures, Public Information

(12 CFR Part 4)

This Part describes, among other matters, the office organization and delegations of authority within the Office of the Comptroller of the Currency. An amendment is expected to be issued within the next three months to incorporate into the regulation recent organizational changes to provide current and accurate information to the public.

On August 7, 1979 the Comptroller published an amendment to Part 4 to expand the delegations of authority to Regional Administrators of National Banks to decide applications for certain operating subsidiaries, changes in par value of common stock, certain capital increases and cash dividends, and increases in investments in bank premises (44 FR 46263). These changes should reduce processing time for affected applications.

On August 17, 1979 the Comptroller published additional amendments to Part 4 to provide criteria and procedures for expedited processing of applications for branches and changes in title or location (44 FR 48169). It is estimated these amendments will apply to 75% of all applications received and will reduce the processing time of those applications by 20%.

For further information, contact Darrel W. Dochow, Deputy Director, Bank Organization and Structure Division, 202–447–1184.

Policies on Corporate Applications

(12 CFR Parts 4, 5 and 14)

On November 1, 1978, the Comptroller issued policy statements applicable to applications for charters, branches, conversions, mergers, fiduciary powers, operating subsidiaries, title changes, relocations and changes in capital structure (41 FR 47964). The policies were not codified.

The Comptroller is reassessing all of these policies and the related regulations, considering appropriate reductions in application processing time, barriers to entry, and substantive decision criteria. Proposed revisions to the policy statements and related regulations may be issued for comment from time to time during the next six months.

For further information, contact Darrel W. Dochow, Deputy Director, Bank Organization and Structure Division, 202–447–1184.

Common Trust Fund Survey Trust Department Annual Report

(12 CFR Part 4.11(b) (4))

Each national bank exercising fiduciary powers is required to file a Trust Department Annual Report. In addition, certain national banks have been required to respond to an annual Common Trust Fund Survey. The Comptroller had determined that, in general, the benefits derived from the Common Trust Fund Survey are not justified by the costs associated therewith, and the survey should be discontinued. However, the Comptroller is considering amendments to the Trust Department Annual Report which would require those national banks previously subject to the Common Trust Fund Survey to include in their annual reports certain minimal information concerning their common trust funds. Discussions are underway with other Federal bank regulatory agencies which also require trust department annual reports. Final resolution of these matters should occur prior to December 31, 1979.

For further information, contact Dean E. Miller, Deputy Comptroller for Specialized Examinations, 202–447–1731.

Hearings on Corporate Applications

(12 CFR Part 5)

An amendment to this Part is expected to be issued in September, 1979, to clarify (a) the procedure for requesting a hearing, (b) the basis upon which a hearing will be ordered, and (c) where hearings will be held.

In the past, many hearings held added little information for the Comptroller's decision, but significantly delayed the processing of applications. This amendment will clarify the Comptroller's policy to limit hearings to those circumstances where one is justified. This change should reduce unnecessary expenses and time delays.

Also in the past, hearings were normally held in the city where the Regional Administrator of National Banks' office was located. Particularly in light of the increased involvement by non-profit citizens' groups expected as a result of the implementation of the Community Reinvestment Act of 1977, the Comptroller expects that a greater number of hearings will be held at locations more convenient for interested parties. This amendment will clarify the Comptroller's policy concerning the location of hearings. This change should enhance public participation in the decision process.

For further information, contact Darrel W. Dochow, Deputy Director, Bank Organization and Structure Division, 202–447–1184.

Lending Limits Applicable to Foreign Governmental Entities

(12 CFR Part 7.1330)

April 12, 1979, the Comptroller issued, after public comment on a proposal, a new interpretive ruling to clarify the statutory (12 USC 84) national bank lending limits with respect to loans to foreign governments, their agencies and instrumentalities. This action was necessary as a result of the increased level of international lending by national banks, which in turn led to an increase in the number of questions concerning the proper interpretation of the statute. The interpretation also described minimum document requirements, which are not in excess of what would normally be necessary for proper account relationships and credit analysis purposes.

For further information, contact William B. Glidden, Attorney, 202–447–1880.

Loans Secured by Real Estate

(12 CFR Part 7, Subpart B)

September 25, 1978, the Comptroller published for comment (43 FR 43310) proposed amendments to 12 CFR Part 7 to revise selected interpretive rulings relating to loans by national banks which are secured by real estate. The revisions are necessary in order to conform the rulings with the governing statute under which national banks may make real estate loans (12 U.S.C. 371, as amended), and to clarify the Comptroller's interpretation of that statute. The interpretive rulings are expect to be issued in final form during September, 1979.

For further information, contact Charles F. Byrd, Assistant Director for Legal Advisory Services, 202–447–1880.

Other Real Estate Owned

(12 CFR Part 7.3025)

In January and Septmeber, 1978, the Comptroller issued for comment proposed amendments to the interpretive ruling describing the treatment of property acquired by banks through foreclosure or to secure debts previously contracted. A final interpretation was published on August 8, 1979 (44 FR 46428).

The purpose of the amendment is to provide greater consistency with revised generally accepted accounting principles (GAAP) and to establish an exemption from annual independent appraisals for small properties. Both of these changes should reduce the costs to banks associated with the present interpretation. In addition, the increased consistency with GAAP should make national bank financial data more useful to the banks themselves, the Comptroller, and public users of national banks' financial statements.

For further information, contact Andrew J. Levinson, Attorney, 202–447–1880.

Investment in Bank Premises

(12 CFR Part 7.3100)

In January, 1978 the Comprtoller issued for comment an amendment to this interpretive ruling in order to provide greater consistency with revisions to generally accepted accounting principles. This change should reduce the costs to national banks in preparing their financial statements and should make the financial statements more useful to the banks themselves, the Comptroller, and public users of national bank financial statements. A final interpretation is expected within three months.

For further information, contact Paul G. Nelson, Senior Attorney, 202–447–1880.

Leasing of Personal Property

(12 CFR Part 7.3400)

On April 13, 1979, the Comprtoller amended an interpretive ruling allowing national banks to lease personal property to customers where the lease transaction is the functional equivalent of an extension of credit to the lessee (44 FR 22388). This action followed lengthy public proceedings dating from June, 1975.

For further information, contact Thomas P. Vartanian, Attorney, 202–447–1880.

National Banks' Pension Plans

(12 CFR Part 7.5010)

This interpretive ruling briefly sets forth the Comptroller's position with respect to pension plans for a national bank's employees. A statement therein describes appropriate eligibility standards which should be applied. In light of the many changes which have recently occurred in laws applicable to pension plans, the Comptroller intends to review this interpretation and, if appropriate, propose an amendment thereto for public comment to update its provisions. A proposal may results with three months.

For further information, contact Larry A. Mallinger, Attorney, 202–447–1880.

Loan Production Offices

(Formerly 12 CFR Part 7.7380)

In response to a recent court decision, the Comptroller withdrew this interpretation in May, 1979 pending the resolution of any appeals of that decision (44 FR 29038).

For further information, contact L. Robert Griffin, Attorney, 202–447–1893.

Bank Indebtedness: Leasing

(12 CFR Part 7.7520)

In January, 1978, the Comptroller issued for comment a proposed interpretive ruling to provide greater consistency with revised generally accepted accounting principles for national banks which lease their banking premises. A final interpretation should be issued within three months. This change should reduce the costs to national banks in preparing their financial statements and should make the financial statements more useful to the banks themselves, the Comptroller, and public users of national financial statements.

For further information, contact Paul G. Nelson, Senior Attorney, 202–447–1880.

Single Premium Annuities

(12 CFR Part 7)

On July 27, 1979, the Comptroller published an Advance Notice of Proposed Rulemaking requesting comment concerning national bank participation in insurance company offerings of single premium annuity contracts which would utilize deposit accounts in national banks.

For further information, contact Thmoas P. Vartanian, Attorney, 202–447–1880.

Fiduciary Powers of National Banks; Collective Investment Funds

(12 CFR Part 9)

The Comptroller has under development an amendment to this regulation which would require national banks to prepare and make available a disclosure statement with respect to accounts over which investment discretion may be exercised. The statement would set forth policies and practices concerning commissions paid for effecting securities transactions.

This proposal would be issued pursuant to Section 28(e) of the Securities Exchange Act of 1934, and follows the recent adoption of rules by the Securities and Exchange Commission. The Comptroller's proposal is expected within 3 months.

For further information, contact Dean E. Miller, Deputy Comptroller for Specialized Examinations, 202–447–1731.

Securities Exchange Act Disclosure Rules

(12 CFR Part 11)

On June 4, 1979, the Comptroller published for comment proposed amendments to this regulation governing disclosures by national banks which have registered pursuant to Section 12(g) of the Securities Exchange Act of 1934. Banks required to register are generally those with more than 500 shareholders.

The proposed additions to Part 11 would make it substantially similar to Securities and Exchange Commission regulations for non-bank companies. The amendments cover beneficial ownership of securities, corporate governance, management remuneration, and accounting matters. In addition, the Comptroller requested comments on ways to significantly reduce the burdens imposed by these disclosure rules. A final amendment on the matters proposed is expected to be issued in November, 1979.

For further information, contact Frederick R. Medero, Director, Securities Disclosure Division, 202–447–1954.

Recordkeeping and Confirmation Requirements for Securities Transactions Effected for Customers

(12 CFR Part 12)

On July 24, 1979, the Comptroller adopted a new regulation requiring national banks to establish minimum procedures and records, and provide confirmations relating to the handling of securities transactions for trust department accounts and for customers, effective January 1, 1980 (44 FR 43252). Additional comment was requested on these requirements as they relate to government and municipal securities. The regulation includes partial exemptions for national banks which have averaged less than 200 transactions per year for customers.

For further information, contact Dean E. Miller, Deputy Comptroller for Specialized Examinations, 202–447–1731.

Change in Bank Control Rules

(12 CFR Part 15)

The Change in Bank Control Act of 1978 (Title VI of the Financial Institutions Regulatory and Interest Rate Control Act of 1978) requires that

V 4 4 / 1 7 3 SE 5 7 9 UMI

individuals seeking to acquire control of a national bank give the Comptroller 60 days advance notice, and the Comptroller may disapprove the acquisition. Effective March 10, 1979, the Comptroller amended this regulation in furtherance of the new statute, and issued an accompanying policy statement. The Comptroller is presently attempting to identify any problems that have developed with this new regulatory provision and welcomes comments from the public.

For further information, contact Patrick Doyle, Attorney, 202–447–1880.

Offering Circular Regulation

(12 CFR Part 16)

This regulation presently requires new national banks raising their initial equity captial and national banks offering debt or equity securities to the public in excess of $300,000 to use an offering circular. Following changes by the Securities and Exchange Commission in its regulations requiring similar documents, the Comptroller proposed for comment in June, 1979, to require a limited offering circular for national banks offering less than $1,000,000 in securities and a full-scope offering circular for larger offering. Final action of this proposal should occur by December 31, 1979.

For further information, contact Ralph Janvey, Attorney, 202–447–1954.

Required Notification to Nominate Bank Directors

(12 CFR Part 17)

This regulation permits national banks to require that any person proposing to nominate a director file certain information in advance with the Comptroller and the bank. Particularly in light of amendments to the Change in Bank Control rules (12 CFR Part 15) discussed above, the Comptroller is considering a proposal to rescind this regulation.

For further information, contact Larry Mallinger, Attorney, 202–447–1880.

Form and Content of Annual Report to Shareholders

(12 CFR Part 18)

This existing regulation requires that each national bank (other than those subject to 12 CFR Part 11, discussed above, and wholly-owned subsidiaries of bank holding companies) send an Annual Report to Shareholders and file that report with the Comptroller. The Comptroller expects to issue within two months proposed amendments which would clarify certain accounting requirements and delete the filing requirement. In addition, the proposal is expected to request comment on whether or not the regulation should be eliminated in its entirety.

For further information, contact Rhoger H. Pugh, Director, Coordination Division, 202–447–1587.

Rules of Practice: Hearings

(12 CFR Part 19)

Procedures and Standards Applicable to Suspensions and Prohibitions, Where a Felony Is Charged

(Former 12 CFR Part 24)

The Financial Institutions Regulatory and Interest Rate Control Act of 1978 (Pub. L. 95–630) changed and expanded the Comptroller's regulatory powers in several respects, including bringing individuals within the scope of the Comptroller's cease-and-desist authority, providing for civil money penalties against banks and individuals that violated certain provisions of law, and permitting the Comptroller to hold hearings with a view to suspension or removal from office of a bank officer or director who has evidenced personal dishonesty or who has committed a breach of trust. These statutory changes were incorporated on April 3, 1979, into an amended version of the Comptroller's rules of practice and procedure (12 CFR Part 19).

In addition, the Comptroller incorporated into this regulation revised procedures governing securities law hearings and rules relating to investigations. This consolidation of rules of practice and procedures led the Comptroller to rescind the former regulation (12 CFR Part 24) governing part of what is now covered in Part 19 (44 FR 19373).

For further information, contact William B. Glidden, Attorney, 202–447–1880.

Minimum Security Devices and Procedures

(12 CFR Part 21)

The Comptroller's existing regulation requires several specific reports and records, refers to effective dates long past, and unnecessarily contains gender-specific terminology. The Comptroller is considering a proposal to eliminate most of the reporting and recordkeeping requirements, the now meaningless effective dates, and the gender-specific terminology. A proposed amendment is expected within two months.

For further information, contact Richard C. Wanlin, National Bank Examiner, 202–447–1574.

Statements of Business Interest of Directors and Principal Officers of National Banks

(12 CFR Part 23)

The Comptroller's present regulation requires that bank insiders file certain reports concerning their outside business interests. In light of the provisions of the Financial Institutions Regulatory and Interest Rate Control Act of 1978 and the proposed rules issued thereunder on the same subject by the Board of Governors of the Federal System, the Comptroller is considering significant reductions in or elimination of this regulation. Action should be expected within three months.

For further information, contact Thomas P. Vartanian, Attorney, 202–447–1880.

Community Reinvestment Act Regulation

(12 CFR Part 25)

On March 27, 1979, the Comptroller adopted an amendment to the Community Reinvestment Act regulation which reflected an amendment to that law contained in the Financial Institutions Regulatory and Interest Rate Control Act of 1978, relating to financial institutions whose business predominantly consists of serving the needs of military personnel who are not located within a defined geographic area. This amendment allowed qualified institutions to delineate a "military community" of nonlocal depositors in addition to a local community or communities (44 FR 18163).

For further information, contact Jo Ann D. Barefoot, Deputy Comptroller for Customer and Community Programs, 202–447–0934.

Management Interlocks Regulation

(12 CFR Part 26)

The Depository Institution Management Interlocks Act, Title II of the Financial Institutions Regulatory and Interest Rate Control Act of 1978, authorized the Comptroller to issue regulations to implement that Act's prohibitions and to permit service not otherwise prohibited under the Act. On July 19, 1979, the Comproller issued this regulation to clarify the prohibitions and grant certain exceptions to the prohibitions (44 FR 42152). In addition, proposed amendments to the regulation were simultaneously issued for comment with respect to establishing "grandfather" provisions and to clarify the coverage of the prohibitions to nominees of others.

For further information, contact Gwen Hibbs, Attorney, 202–447–1880.

Fair Housing Home Loan Data System

(Proposed 12 CFR Part 27)

The Comptroller published a proposed regulation in April, 1979, which would have required all national banks to maintain a log of inquiries and applications for home loans, obtain and maintain specified information in its own files, and submit data to the Comproller upon request for computer analysis to assist examiners in determining compliance with fair housing laws. A final regulation is expected to be issued in September, 1979, which may contain significantly less burdens then were proposed. Despite the inclusion of some new requirements on national banks, the final regulation should reduce the time involved for both bankers and bank examiners during on-site examinations and should result in more effective enforcement of fair housing laws.

For further information, contact Patrick J. Marr, Consumer, Community and Fair Lending Examinations Division, 202–447–1600.

Foreign Banks Operating in the United States

(Proposed 12 CFR Part 28)

Under the International Banking Act of 1978 (Public Law 95–369), the Comptroller has responsibility to charter and supervise the activities of federal branches and agencies operated by foreign banks in the United States. The Comptroller published a proposed regulation on May 10, 1979, issued a proposed statement of policy, and adopted on April 4, 1979, several amendments to regulations governing applications (12 CFR Parts 4 and 5) and fees (12 CFR Part 8) to permit applications to be filed. A final Part 28 and minor changes to Parts 4, 5 and 8 are expected to be issued in September 1979.

For further information, contact William B. Glidden, Attorney, 202–447–1880.

By Direction of the Secretary of the Treasury.

Dated: August 27, 1979.

John G. Heimann,

Comptroller of the Currency.

BILLING CODE 4810–33–M

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[File No. 782 3077]

Westinghouse Credit Corp.; Consent Agreement with Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order, accepted subject to final Commission approval, among other things, would require a Pittsburgh, Pa. finance company to cease violating federal regulations and statutes relating to credit discrimination and credit reporting by requesting, recording and utilizing prohibited consumer credit information; considering the sex and marital status of applicants in evaluating creditworthiness; and failing to provide rejected applicants with reasons for denial of credit. The company would be further required to establish educational programs for its consumer credit employees and retail dealers to explain the application of federal credit regulations to firm's credit practices.

DATE: Comments must be received on or before Nov. 5, 1979.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th St. and Pennsylvania Ave., NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: FTC/PD, Lewis H. Goldfarb, Washington, D.C. 20580, (202) 724–1181.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

In the matter of Westinghouse Credit Corp.; agreement containing consent order to cease and desist.

The Federal Trade Commission having initiated an investigation of certain acts and practices of Westinghouse Credit Corporation, a corporation, and it now appears that Westinghouse Credit Corporation, a corporation, hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between Westinghouse Credit Corporation, by its duly authorized officer and its attorneys, and counsel for the Federal Trade Commission that:

1. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

2. Proposed respondent Westinghouse Credit Corporation is a corporation organized, existing and doing business under and by virtue of the laws of the State of Delaware, with its office and principal place of business located at Three Gateway Center, Pittsburgh, Pennsylvania 15222.

3. Proposed respondent admits all the jurisdictional facts set forth in the draft complaint here attached.

4. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

5. This agreement shall not become a part of the official record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released; and such acceptance may be withdrawn by the Commission if comments or views submitted to the Commission disclose facts or considerations which indicate that the order contained in the agreement is inappropriate, improper or inadequate.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent (1) issue its complaint

V 4 4 / 1 7 3 SEP 5 79 UMI

corresponding in form and substance with the draft of the complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by the statute for other orders. The order shall become final upon service. Mailing of the complaint and decision containing the agreed-to-order to proposed respondent's address as stated in this agreement shall constitute service. Proposed resondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby, and it understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order, and that it may be liable for a civil penalty in the amount provided by law for each violation of the order after it becomes final.

8. It is agreed that the relief for consumers set forth in the order contained herein fully satisfies any claim for consumer redress which the Commission has under Section 5(b) and 19 of the Federal Trade Commission Act, as amended, arising out of the acts and practices alleged in the draft of complaint, prior to service of this order. By its final acceptance of this agreement, with such modifications, if any, which the parties may make prior to said final acceptance, the Commission waives its right to recommend or commence a civil action under Section 5 or Section 19 of the Federal Trade Commission Act, as amended, with respect to the acts and practices alleged in the Commission's draft of complaint, prior to service of this order.

Order

Definitions: For the purpose of this order the following definitions are applicable:

(a) "Equal Credit Opportunity Act" shall refer to that version of the Act, 15 U.S.C. § 1691 *et seq.*, now in effect or as it may be amended. (A copy of the Act to which the citations in this order refer is attached as Appendix A hereto.)

(b) "Regulation B" shall refer to that version of Regulation B, 12 CFR 202, now in effect or as it may be amended. (A copy of the Regulation to which the citations in this order refer is attached as Appendix A hereto.)

(C) "Fair Credit Reporting Act" shall refer to that version of the Act, 15 U.S.C. § 1681 *et seq.*, now in effect or as it may be amended. (A copy of the Act to which the citations in this order refer is attached as Appendix A hereto.)

(d) The terms "adverse action," "applicant," "application," "completed application for credit," "contractually liable," "consumer credit," "credit," "creditor," "credit transaction," "extend credit and extension of credit," "inadvertent error," "marital status" and "person" shall be defined as provided by § 202.2 of Regulation B.

(e) The term "regional manager" shall refer to each employee of the respondent who has immediate supervisory responsibility for respondent's "district managers."

(f) The term "district manager" shall refer to each employee of the respondent who is the head of each office where respondent receives and evaluates applications for consumer credit.

(g) The terms "consumer report" and "consumer reporting agency" shall be defined as provided in Section 603(d) and 603(f) respectively, of the Fair Credit Reporting Act, 15 U.S.C. §§ 1681a(d) and 1681a(f) (1970).

(h) The term "retail dealer" shall refer to a separate business entity engaged in the sale of retail merchandise with which respondent has an agreement or a course of dealing whereby it purchases consumer sales finance contracts from the dealer.

(i) The term "dealer audit program" shall refer to respondent's current and usual procedure of reviewing the business practices of retail dealers through communications by mail, telephone or a visit with a retail dealer or with a consumer who has financed a purchase from a retail dealer.

Part I

It is ordered That respondent Westinghouse Credit Corporation, a corporation, its successors and assigns, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with every application for consumer credit do forthwith cease and desist from:

1. Retaining in its files information, the use of which is prohibited by the Equal Credit Opportunity Act or Regulation B in the evaluation of a credit application, and retention of which is not expressly permitted by § 202.12(a) of Regulation B.

2. Recording the marital status of an applicant in terms other than "married," "unmarried," or "separated" on any document used to evaluate any application for consumer credit.

3. Placing any notation for the purpose of emphasizing prohibited marital status information on a consumer credit report used to evaluate any application for consumer credit.

4. Taking sex or marital status into account in the evaluation of any applicant's creditworthiness in connection with an application for consumer credit.

5. Requesting or considering information concerning the spouse (or former spouse under (e) below) of an applicant for consumer credit unless:

(a) The spouse will be permitted to use the account; or

(b) The spouse will be contractually liable upon the account; or

(c) The applicant is relying on the spouse's income as a basis for repayment of the credit requested; or

(d) The applicant resides in a community property state or property upon which an applicant is relying as a basis for repayment of the credit requested is located in such a state; or

(e) The applicant is relying on alimony, child support or separate maintenance payments from a spouse or former spouse as a basis of repayment of the credit requested.

6. Extending consumer credit or purchasing consumer credit contracts unless respondent provides each applicant against whom adverse action is taken upon an application for consumer credit with a written notification of the action taken on the application within 30 days of respondent's receipt of a completed application for consumer credit as required by § 202.9(a)(1) of Regulation B. Within thirty (30) days after service of this order, each notification of adverse action shall be provided by sending by first class mail a notice in the form and language shown in Appendix B which has been properly completed to indicate the principal, specific reasons for adverse action on each consumer credit application.

(a) Provided that where an application for consumer credit was denied by respondent after October 1, 1977, and the applicant was neither given the principal, specific reasons for the denial through issuance to the applicant of WCC Form 486 or otherwise, nor informed of the right to request the principal, specific reasons, as required by § 202.9 of Regulation B, respondent shall, within ninety (90) days of the service upon it of this order, mail to each such applicant known to respondent at the last address reflected in respondent's files, the letter and self-addressed, postage prepaid request form set forth in Appendix C. Respondent shall reply to each request which complies with § 202.9 of Regulation B and shall enclose a copy of the Commission's pamphlet on the Equal Credit Opportunity Act, attached as Appendix D, or a subsequent similar pamphlet mutually agreeable to the Federal Trade Commission and Westinghouse Credit Corporation. If, upon receiving a consumer request in response to this notification letter, respondent cannot determine the principal, specific reasons for the denial by a good faith examination of the applicant's file because one or more documents are missing from the file, respondent shall not be deemed to have violated the requirements of this order if respondent: (i) discloses to any such applicant that it is unable to provide reasons for denial because its records are incomplete and (ii) invites the applicant to reapply for consumer credit. A list of the names of consumers whose requests are processed pursuant to (i) and (ii) hereof shall be submitted as part of respondent's supplemental compliance report.

(b) *Provided further that* if, during the next eight (8) years, respondent changes its consumer credit evaluation criteria and the notification letter contained in Appendix B can no longer be completed to disclose the principal, specific reasons for adverse action on each application, respondent shall submit to the Commission a supplemental written report of compliance setting forth the proposed changes to Appendix B and the reasons therefor, which report shall be received and filed by the Commission before respondent implements such changes in its evaluation system.

7. Failing to preserve records as required by § 202.12(b) of Regulation B, including but not limited to (1) notifications of adverse actions, and (2) statements of the specific reasons for denial.

8. Extending consumer credit through or purchasing consumer credit contracts from any retail dealer from which respondent purchased 150 or more consumer sales finance contracts during the previous twelve (12) months and which engages in a pattern or practice of failing to provide respondent with a complete and legible copy of the application forms received by the retail dealer relating to applications for consumer credit acted upon by respondent.

Provided that the provisions of this paragraph shall expire ten (10) years after service of this order.

9. Failing to implement, within one hundred and eighty (180) days after service of this order, an initial educational program, a full and complete description of which has been received and filed by the Commission as a supplemental report of compliance, for all of respondent's officers and employees who are responsible for the formulation and implementation of respondent's consumer credit policies and practices, including but not limited to the processing of credit applications. In order to satisfy its obligations under this paragraph, respondent shall:

(a) Furnish each such officer and employee a copy of this order, a copy of the Equal Credit Opportunity Act and Regulation B, and written educational materials which explain the Equal Credit Opportunity Act, Regulation B, and the Fair Credit Reporting Act, as they apply to respondent's credit practices. Such educational materials shall be clearly written, shall omit discussion of any part of the Equal Credit Opportunity Act, Regulation B, or the Fair Credit Reporting Act which is not relevant to respondent's credit practices, and shall emphasize those parts of Regulation B and the Fair Credit Reporting Act which are particularly relevant to respondent's credit practices, including but not limited to §§ 202.4, 202.5(c), 202.5(d), 202.6(b)(2), 202.6(b)(5), 202.6(b)(6), 202.7(a), 202.7(d), 202.9 and 202.12 of Regulation B and Section 615 of the Fair Credit Reporting Act;

(b) Inform orally each such officer and employee, at a general meeting, or otherwise, of the provisions of this order and of the duties of Westinghouse Credit Corporation and its officers and employees under the Equal Credit Opportunity Act, Regulation B, and the Fair Credit Reporting Act. Each such officer and employee shall be advised that his or her failure to comply with the provisions of this order shall subject him or her to disciplinary action, including possible dismissal, as Westinghouse Credit Corporation deems appropriate. Respondent shall submit a written agenda of its oral presentation to its employees as part of the supplemental report of compliance filed pursuant to this paragraph; and

(c) Secure a signed statement from each such officer and employee that he or she has been given a copy of this order, the Equal Credit Opportunity Act and Regulation B, has also been given and has read the educational materials described in subparagraph (a), and has received the information described in subparagraph (b). A copy of each such statement shall be retained for at least three (3) years and shall be made available for inspection by a representative of the Commission.

10. Failing to provide the documents described in Paragraph 9(a) hereof and the information described in Paragraph 9(b) hereof to each officer or employee who within five (5) years after the service of this order is given the responsibilities described in Paragraph 9 hereof and to require each such officer or employee to sign within ten (10) days of the assumption of said responsibilities a statement as described in Paragraph 9(c) hereof. A copy of each such statement shall be retained for at least three (3) years and shall be made available upon request for inspection by a representative of the Commission.

11. Failing to conduct a refresher educational program at least once a year for five (5) years after service of this order for all officers and employees having the responsibilities described in Paragraph 9 hereof, for the purpose of explaining the requirements of the Equal Credit Opportunity Act, Regulation B, and the Fair Credit Reporting Act and ensuring that such employees are carrying out their employment responsibilities in conformity with this order. In order to satisfy its obligations under this paragraph, respondent shall:

(a) Conduct a conference or seminar for all district managers to discuss the requirements of the Equal Credit Opportunity Act, Regulation B, and the Fair Credit Reporting Act as they pertain to respondent's credit practices. Such conferences or seminars shall also cover relevant amendments to the Equal Credit Opportunity Act, Regulation B, or the Fair Credit Reporting Act and relevant current regulatory or judicial interpretations.

(b) Conduct at each district office similar conferences or seminars led by an appropriate person, for all employees at the district level having the responsibilities described in Paragraph 9 hereof in order to ensure that each such employee receives or has received in the past the written materials described in Paragraph 9(a) and an oral explanation of those materials, and of the requirements of the Equal Credit Opportunity Act, Regulation B, and the Fair Credit Reporting Act as they pertain to respondent's credit practices. These sessions also shall cover relevant amendments to the Equal Credit Opportunity Act, Regulation B, or the Fair Credit Reporting Act and relevant current regulatory and judicial interpretations.

(c) If necessary to reflect relevant amendments to the Equal Credit Opportunity Act, Regulation B, or the

Fair Credit Reporting Act, or relevant regulatory and judicial interpretations, furnish each employee having the responsibilities described in Paragraph 9 hereof with an updated version of the written educational materials described in subparagraph 9(a). Such written materials shall be retained for a period of three (3) years and shall be made available upon request for inspection by a Commission representative.

12. Extending consumer credit through or purchasing consumer credit contracts from retail dealers unless respondent conducts an initial retail dealer education program as herein described. A full and complete description of said initial retail dealer educational program shall be filed with the Commission as a supplemental report of compliance within one hundred and eighty (180) days after service of this order. In order to satisfy its obligations under this paragraph, respondent shall:

(a) Within one hundred and eighty (180) days after service of this order, send by first-class mail to each retail dealer from which respondent purchased 150 or more consumer sales finance contracts during the previous twelve (12) months, the letter set forth in Appendix E;

(b) Within one hundred and eighty (180) days after service of this order, send by first-class mail to each retail dealer not included in subparagraph (a) hereof, the letter set forth in Appendix F;

(c) Within one hundred and eighty (180) days after service of this order, furnish to each retail dealer written educational materials which explain in clearly written language the Equal Credit Opportunity Act and Regulation B as they apply to the retail dealer's credit practices regarding applications referred to respondent. Such educational materials shall omit discussion of any part of the Equal Credit Opportunity Act or Regulation B which is not relevant to the retail dealer's or respondent's credit practices, and shall address itself to those parts of Regulation B which are particularly relevant to the retail dealer's credit practices, including but not limited to §§ 202.4, 202.5(a), 202.5(c), 202.5(d), 202.6(b)(6), 202.7(a), 202.7(d), and 202.12;

(d) Make available to each retail dealer described in subparagraph (a) hereof an initial educational class which shall include an oral explanation of the written educational materials described in subparagraph (c) hereof. Such initial educational class may be provided by respondent's district managers as part of the district manager's normal ongoing business relationship with the retail dealer, and shall be made available at such a time or times as to facilitate attendance by the retail dealer's officers and/or employees who have responsibilities regarding the processing of applications for consumer credit, including but not limited to those who have direct contact with consumers regarding such applications. Within one hundred and eighty (180) days after service of this order, respondent shall contact each retail dealer described in subparagraph (a) hereof to set a date for the initial retail dealer educational classes; and

(e) With respect to each retail dealer described in subparagraph (a) hereof, secure a signed statement from the responsible representative of respondent which states or provides:

(i) That the retail dealer has been provided with the written educational materials described in subparagraph (c) hereof;

(ii) That respondent made available the educational class described in subparagraph (d) hereof;

(iii) The date(s) on which respondent made available the educational class described in subparagraph (d) hereof; and

(iv) A list setting forth the titles and number of individuals who attended the educational class described in subparagraph (d) hereof, a list setting forth the titles and number of individuals who received the written educational materials described in subparagraph (c) hereof, and a statement as to the total number of such dealer's employees who, in the dealer's opinion, have the responsibilities set forth in subparagraph (d) above. A copy of such lists shall be retained for at least three (3) years and shall be made available for inspection by a representative of the Commission.

13. Failing to provide, within thirty (30) days after respondent purchases the first consumer credit contract, the letter described in subparagraph 12(b) hereof and the written educational materials described in subparagraph 12(c) hereof to each business entity which within five (5) years after the service of this order becomes a retail dealer.

14. Extending consumer credit through or purchasing any consumer credit contract from any retail dealer unless respondent conducts at least once a year for five (5) years after service of this order a refresher retail dealer educational program. In order to satisfy its obligations under this paragraph, respondent shall:

(a) If necessary to reflect relevant amendments to the Equal Credit Opportunity Act or Regulation B, or relevant, current regulatory and judicial interpretations, furnish to each retail dealer an updated version of the written educational materials described in subparagraph 12(c) hereof. If an updated version of the educational materials is not furnished to retail dealers, a notice informing said dealers of the availability of additional copies of the written educational materials from the previous year shall be furnished. Such updated written materials shall be retained for at least three (3) years and shall be made available for inspection by a representative of the Commission.

(b) Make available to each retail dealer from which respondent purchased 150 or more consumer credit contracts during the previous twelve (12) months, a refresher educational class which shall include an oral explanation of the written educational materials described in subparagraph (a) hereof. Such refresher educational class may be provided by respondent's district managers as part of the district manager's normal ongoing business relationship with the retail dealer, and shall be made available at such a time or times as will facilitate attendance by the retail dealer's officers and/or employees of the retail dealer who have responsibilities regarding the processing of applications for consumer credit, including but not limited to those who have direct contact with consumers regarding such applications.

15. Failing to use credit application forms which clearly and conspicuously disclose to the applicant that he or she is entitled to apply for an individual account, and that if the applicant chooses to apply for an individual account, he or she need not supply any information about his or her spouse or former spouse unless the applicant is relying upon a spouse's income, is relying on alimony, child support or separate maintenance payments, or resides in a community property state.

16. Failing to make available to each retail dealer and to each business entity that within five (5) years after service of this order becomes a retail dealer an equal opportunity in credit sign for the purpose of public display in the retail dealer's place of business, which is clear and conspicuous, not smaller in dimension than twenty-two (22) inches by twenty-eight (28) inches, states the provisions of Section 701(a) of the Equal Credit Opportunity Act, and further states the right to apply for an individual account regardless of the applicant's marital status.

17. Failing to include in its ordinary dealer audit program questions to determine whether retail dealers are in compliance with the requirements of the Equal Credit Opportunity Act and Regulation B, which are contained in §§ 202.5, 202.7(a), 202.7(d) and 202.12 of the Regulations.

Provided that if respondent eliminates its dealer audit program at any time in the future, it shall nevertheless retain those portions of the program which pertain to compliance by retail dealers with the Equal Credit Opportunity Act and its implementing Regulation.

Provided further that the provisions of this paragraph shall expire fifteen (15) years after service of this order.

18. Respondent shall not be liable for a civil penalty for any violation of any paragraph except 4 and 5 of Part I of this order if it shows by a preponderance of the evidence that any such violation was caused by an inadvertent error.

Part II

It is further ordered that respondent, Westinghouse Credit Corporation, a corporation, its successors and assigns, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device in connection with any application for credit that is primarily for personal, family, household purposes, and in connection with either the receipt or consideration of any consumer report, do forthwith cease and desist from:

1. Failing whenever credit for personal, family or household purposes involving the consumer is denied, either wholly or partly because of information contained in a consumer report from a consumer reporting agency, to so advise the consumer against whom such adverse action has been taken and to supply the name and address of the consumer reporting agency making the report as required by Section 615(a) of the Fair Credit Reporting Act.

2. Failing, within ninety (90) days after service of this order, to mail the letter and self-addressed, postage prepaid request form contained in Appendix G to each applicant who was denied credit after October 1, 1977, and before the service of this consent order, for personal, family, or household purposes involving the consumer, based in whole or in part on information contained in a consumer report from a consumer reporting agency. The letter shall be sent to the last address of the applicant which is reflected in respondent's files.

(a) *Provided that* to the extent that respondent's records indicate that the notice required by Section 615(a) of the Fair Credit Reporting Act was previously given to the applicant, respondent shall be deemed to be in compliance with this provision of the order as to each such applicant.

(b) *Provided further that* the notice required in this paragraph may be combined, where appropriate, with the notice required under Paragraph 6, Part I, hereof.

(c) *Provided further that* in replying to requests from applicants received in response to the letter contained in Appendix G, respondent shall include the language set forth in Appendix H in the Section 615(a) notice it sends to the applicant and shall enclose a copy of the Commission's pamphlet on the Fair Credit Reporting Act attached as Appendix I, or a subsequent pamphlet mutually agreeable to the Federal Trade Commission and Westinghouse Credit Corporation.

3. Failing whenever credit for personal, family, or household purposes involving the consumer is denied, either wholly or partly because of information obtained from a person other than a consumer reporting agency bearing upon the consumer's creditworthiness, credit standing, credit capacity, character, general reputation, personal characteristics, or mode of living, to disclose, at the time such adverse action is communicated to the consumer, his or her right to make a written request for the nature of the information upon which such adverse action was based, and failing, upon receipt of such a request to disclose within a reasonable period of time the nature of the information to the consumer, as required by Section 615(b) of the Fair Credit Reporting Act.

4. Failing, withint ninety (90) days after service of this order, to mail the letter and self-addressed, postage prepaid request form contained in Appendix G to each applicant who was denied credit after October 1, 1977, and before the service of this consent order, for personal, family or household purposes involving the consumer, based in whole or in part on information obtained from a person other than a consumer reporting agency bearing on the consumer's creditworthiness, credit standing, credit capacity, character, general reputation, personal characteristics, or mode of living. The letter shall be sent to the last address of the applicant which is reflected in respondent's files.

(a) *Provided that* to the extent that respondent's records indicate that the notice required by Section 615(b) of the Fair Credit Reporting Act was previously given to the applicant, respondent shall be deemed to be in compliance with this provision of the order as to each such applicant.

(b) *Provided further that* the notice required by this paragraph may be combined, where appropriate, with the notice required under Paragraph 6, Part I, hereof.

5. Respondent shall not be liable for a civil penalty for any violation of Part II of this order if it shows by a preponderance of the evidence that any such violation was caused by an inadvertent error.

Part III

1. *It is further ordered* that respondent shall preserve evidence of compliance with the requirements imposed under this order for a period of not less than three (3) years after respondent notifies each applicant of the reasons for denial pursuant to Paragraph 6 of Part I of this order, the right to request the name and address of any consumer reporting agency pursuant to Paragraph 2 of Part II of this order, and the right to request the nature of third party information pursuant to Paragraph 4 of Part II of this order. Respondent shall upon request permit Commission representatives to inspect such records.

2. *It is further ordered* that respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, arrangement of sale resulting in the emergence of successor corporations, the creation or dissolution of subsidiaries, or any other change in the corporation which may affect compliance obligations arising out of the order.

3. *It is further ordered* that respondent shall: (a) Within sixty (60) days after service of this order, submit to the Commission a written report setting forth in detail the manner and form in which it has complied with Paragraphs 1, 2, 3, 4, 5, 6, 7, 8, and 15 of Part I of this order and Paragraphs 1 and 3 of Part II of this order, and the manner and form in which it intends to comply with Paragraphs 9, 10, 11, 12, 13, 14, and 17 of Part I of this order and Paragraphs 2 and 4 of Part II of this order.

(b) Within one hundred and eighty (180) days after service of this order submit to the Commission a supplemental written report setting forth the manner and form in which it has complied with Paragraphs 9, 10, 12, 13, 16, and 17 of Part I of this order and Paragraphs 2 and 4 of Part II of this order.

(c) Once a year for five (5) years, submit to the Commission a supplemental written report setting forth the manner and form in which it has complied with Paragraphs 11 and 4 of Part I of this order. These five (5) annual periods shall begin the day after service of this order and such supplemental reports shall be submitted within ten

V 44 / 173 S E 5 7 9 UMI

(10) days after the close of each annual period.

Disclosure of Use of Information Obtained From an Outside Source

No information from a consumer reporting agency or an outside source other than a consumer reporting agency was used in whole or in part as a basis for the adverse action. Additional disclosure inapplicable.

Information obtained in a report from a consumer reporting agency. If you have any questions about the report, you may contact the agency.

Name:
Address:
Phone:

Information obtained from an outside source other than a consumer reporting agency. Under the Fair Credit Reporting Act, you have the right to make a written request, within 60 days of receipt of this notice, for disclosure of the nature of the adverse information. Write or call Westinghouse Credit Corporation at the address appearing at the top of this letter.

The Federal Equal Credit Opportunity Act prohibits creditors from discriminating against credit applicants on the basis of race, color, religion, national origin, sex, marital status, age (provided that the applicant has the legal capacity to enter into a binding contract), because all or part of the applicant's income derives from any public assistance program, or because the applicant has in good faith exercised any right under the Consumer Credit Protection Act. The Federal agency that administers compliance with this law concerning this creditor is the Federal Trade Commission, Equal Credit Opportunity, Washington, DC 20580.

Very truly yours,
Westinghouse Credit Corporation
District Manager

Appendix C

Dear——

Our records show that Westinghouse Credit Corporation denied your application for consumer credit within the last two years. In most circumstances, the Equal Credit Opportunity Act requires WCC to give its applicants for consumer credit whose applications were denied the right to be told the specific reasons for the denial.

Our records show that you may not have been informed of your right to request the reasons for WCC's denial of your application. If you were not so informed, or if you exercised that right but found that the reasons given to you were not meaningful or helpful, let us know within the next sixty (60) days by returning the enclosed self-addressed, postage prepared request form. We will do our best promptly to provide you with the information you seek.

If you want more information about federal credit laws, write: Federal Trade Commission, Equal Credit Opportunity, Washington, D.C. 20580.

Sincerely,
Westinghouse Credit Corporation

Appendix D

[Attach ECOA pamphlet as required by Part I, ¶6(a).]

Appendix E

Dear ——:

The Equal Credit Opportunity Act and Regulation B prohibit discrimination on the basis of sex, marital status, race, religion, national origin, age, receipt of public assistance or exercise of rights under federal consumer credit laws. Some months ago the Federal Trade Commission initiated an investigation of Westinghouse Credit Corporation and other national credit companies relating to their compliance with the Equal Credit Opportunity Act. On [date], WCC entered into a consent agreement with the FTC, which terminated the investigation of WCC. A copy of that agreement, with its incorporated order, is enclosed.

Many of the provisions of the consent order concern only WCC's internal procedures and have no bearing whatsoever on the operations of its dealers. For example, the order contains detailed provisions governing the mailing of notices by WCC to applicants against whom adverse action has been taken and provisions concerning the education of WCC employees with respect to the requirements of the Equal Credit Opportunity Act and Regulation B.

There are, however, other provisions in the consent order that directly or indirectly affect WCC's relationship with your company and with other retail dealers. Under those provisions WCC has agreed:

To furnish to you the various materials enclosed with this letter, including a copy of the consent order referred to above, a copy of the Equal Credit Opportunity Act and Regulation B, and a copy of certain written materials summarizing the requirements of the statute and regulations.

To meet once a year with your employees for the purpose of discussing and answering questions about WCC's policies concerning compliance with the requirements of the Equal Credit Opportunity Act and Regulation B as they relate to applications referred to WCC.

To make available to you, upon request, an equal-opportunity-in-credit sign, for display in your place of business.

To require you to furnish to WCC complete and legible copies of all documents received by you relating to credit applications referred to WCC.

WCC has agreed to these provisions for two reasons. First, it is the FTC Staff's opinion that under certain circumstances WCC itself could be liable for civil penalties if retail dealers with whom WCC has an agreement or a course of dealing (whereby WCC purchases sales finance contracts) violated the Equal Credit Opportunity Act. To protect itself against such possible liability, as well as because of its general policy of supporting the protection of rights of consumers in credit transactions, WCC has agreed to and intends to comply fully with the provisions of the consent order set forth above concerning WCC's relationship with retail dealers. Second, WCC believes that compliance by WCC with these provisions of its agreement will assist its dealers in avoiding problems under the Act.

WCC urges that you review the enclosed materials carefully, and that you take steps to insure that WCC receives copies of all documents received by you relating to applications for consumer credit referred to WCC. WCC's District Manager will contact you in the near future to arrange a convenient time to meet with your staff to discuss compliance with the Act.

Your assistance and cooperation in this program can be critical in protecting both WCC as well as your own company from exposure to the substantial penalties that the Equal Credit Opportunity Act provides for violation of its provisions.

Thank you for your cooperation. If you have any questions, please contact [name] at [address] [telephone number].

Sincerely yours,
Westinghouse Credit Corporation

Appendix F

Dear——:

The Equal Credit Opportunity Act and Regulation B prohibit discrimination on the basis of sex, marital status, race, religion, national origin, age, receipt of public assistance or exercise of rights under federal consumer credit laws. Some months ago the Federal Trade Commission initiated an investigation of Westinghouse Credit Corporation and other national credit companies relating to their compliance with the Equal Credit Opportunity Act. On [date], WCC entered into a consent agreement with the FTC, which terminated the investigation of WCC.

Many of the provisions of the consent order concern only WCC's internal procedures and have no bearing whatsoever on the operations of its dealers. For example, the order contains detailed provisions governing the mailing of notices by WCC to applicants against whom adverse action has been taken and provisions concerning the education of WCC employees with respect to the requirements of the Equal Credit Opportunity Act and Regulation B.

There are, however, other provisions in the consent order that directly or indirectly affect WCC's relationship with your company and with other retail dealers. Under those provisions WCC has agreed:

Westinghouse Credit Corporation

Appendix G

Dear ——:

Our records show that Westinghouse Credit Corporation denied your application for consumer credit within the last two years. The Fair Credit Reporting Act gives persons denied consumer credit the right to know whether the denial was based on information supplied by a consumer credit reporting agency and, if so, the name and address of such agency. Credit reports provide a variety of information to creditors including information about how many and what types of credit accounts you have, whether you are able to pay your bills, and whether you have been sued.

The Fair Credit Reporting Act also gives persons denied credit the right to know the substannce of information relied upon in denying credit if such information was supplied by a person other than a consumer credit reporting agency. For example, you can find out whether a creditor considered information from your employer concerning your salary or the period of time which you have been employed, or information from your landlord about how much rent you pay or how long you have lived at a given address.

Our records show that you may not have been informed about whether WCC used information from a credit bureau or from some other person in considering your application. If you would like to find out whether such information was taken into account, please fill out and return the enclosed self-addressed, postage prepaid request form.

One reason that you may want to return the enclosed form is to see whether credit report or third party information is accurate. If such information is wrong, you may be able to correct it, and improve your chances to get credit.

If you want more information about the federal credit laws, write: Federal Trade Commission, Equal Credit Opportunity, Washington, D.C. 20580.

Sincerely,
Westinghouse Credit Corporation.

[File No. 782-3077]

Westinghouse Credit Corp.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Westinghouse Credit Corporation (WCC), Three Gateway Center, Pittsburgh, Pennsylvania 15222.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint that led to the proposed order to cease and desist alleged violations of the separate Acts: The Equal Credit Opportunity Act ("ECOA") and the Fair Credit Reporting Act ("FCRA"). The alleged violations and corresponding order provisions of each of these Acts will be discussed separately below.

I. Equal Credit Opportunity Act Allegations and Order Provisions

The complaint contains allegations of five separate violations of the ECOA and Regulation B, as in effect since March 23, 1977. The proposed order provisions require WCC to cease and desist from the law violations alleged in the complaint and to provide retroactive relief to consumers whose rights are alleged to have been violated. In addition, the proposed order would impose five addtional affirmative obligations on WCC, which are designed to lessen the likelihood of future violations by WCC and the retail dealers through which it operates.

(1) *Recording and Retaining Prohibited Information.* The complaint alleges that WCC regularly receives oral communications from its retail dealers and consumer reporting

V 4 4 / 1 7 3 S E 5 7 9 UMI

agencies ("credit bureaus") which describe applicants' marital status using the terms "divorced," "widowed," and "single." The complaint alleges that WCC records such prohibited marital status information on the internal documents which are used by its evaluators to make credit decisions. The proposed consent agreement would order WCC to cease and desist from either recording or retaining in its files prohibited marital status information.

(2) *Considering an Applicant's Sex and Marital Status.*

Consumer credit reports which WCC obtained from credit bureaus regularly contain information from court records, including divorce actions in which the applicant was named as a party. The complaint alleges that WCC regularly annotated consumer credit reports to emphasize prohibited marital status information. The complaint further alleges that WCC's credit evaluators considered such prohibited marital status information in determining whether to decline or approve applications for consumer credit. The proposed consent agreement would order WCC to cease and desist from placing any notation for the purpose of emphasizing marital status information on a consumer credit report and from taking sex or marital status into account in the evaluation of an applicant's creditworthiness.

(3) *Requesting and Considering Information About a Non-Applicant Spouse.* The complaint alleges that WCC regularly requested information about an applicant's spouse when it did not know whether the spouse intended to be a joint applicant or whether another permissible purpose existed for WCC to request information about the spouse. The compliant also alleges that, in a substantial number of instances, WCC obtained credit reports on applicants' deceased spouses. The proposed order would prohibit WCC from requesting or considering information about an applicant's spouse unless authorized by Regulation B.

(4) *Failing to Provide Reasons for Denial or Informing Rejected Applicants of the Right Reasons for Denial.* The complaint alleges that the form used by WCC to notify consumers of its decision to reject their applications for credit did not comply with the reason-giving procedures set forth in Regulation B. The form did not comply because where the form was used to disclose, as required by the FCRA, that information from a credit bureau or other third party had been used to make an adverse decision, WCC failed to also notify the consumer, as required by the ECOA, that he or she had a right to a separate statement from WCC of the principal, specific reasons for denial. The complaint additionally charges that WCC sometimes failed to inform consumers of the action taken on their applications and failed to respond to consumers' requests for reasons for denial.

The proposed consent agreement would order WCC to cease and desist from failing to comply with the notification requirements of Regulation B. It would further require that WCC give consumers the principal, specific reasons for denial by completing a specified form when it first notifies them of the rejection, rather than merely telling consumers that they have a right to request a statement of the reasons for denial. The proposed order would also require WCC to mail retroactive notices to all consumers who may not have received either a statement of the reasons why their applications were denied or a statement of their right to request such reasons. The retroactive notice will be given to all consumers whose applications were denied on or after October 1, 1977, unless WCC can prove that such consumers received either a statement of the reasons for denial or a statement of the right to request reasons for denial. The notice states that consumers have a right to reasons for denial and that WCC may not have informed them of the right to request them. The notice also states that if consumers received a statement of reasons but found that the reasons given were not meaningful or helpful, they may make a second request for reasons from WCC. The notice invites consumers to write the Federal Trade Commission for further information about their credit rights. The proposed order would also require WCC to mail the Commission's ECOA pamphlet to each consumer requesting reasons for denial pursuant to its retroactive notice provision. Finally, the letter containing the retroactive notice would contain a postage pre-paid, self-addressed request form which consumers could complete and mail to request a statement of reasons for denial.

(5) *Failing to Retain Applications and Rejection Notifications.* The complaint alleges that WCC and its retail dealers have failed to retain records of consumer credit transactions, as required by Regulation B. Specifically, the complaint alleges that WCC has failed to retain the originals or copies of notifications of denial. The complaint additionally alleges that WCC's retail dealers regularly discarded rejected applications and that WCC knew about its dealers' record retention violations. The proposed consent agreement would require WCC to cease and desist from failing to retain records already in its possession and would further order it to cease doing business with any retail dealer which engages in a pattern or practice of failing to provide WCC with copies of all the records in the dealer's possession which have been used to process applications for consumer credit from WCC. The provision requiring WCC to obtain applications from its dealers only applies to dealers from which WCC purchases 150 or more consumer credit contracts annually, and the provision expires in ten years.

(6) *Educational Program for WCC Employees.* The proposed consent agreement would order WCC to establish an educational program for its consumer credit employees which would explain the application of the ECOA, Regulation B, and the FCRA to the company's consumer credit practices. As part of the initial educational program, WCC would prepare written educational materials which explain in clear language WCC's obligations under the ECOA, Regulation B, and the FCRA. WCC would also provide each employee with a copy of the Commission's final order in this case. Pursuant to the consent agreement, WCC would hold general meetings for its employees which would include an oral presentation describing the requirements imposed on WCC by the proposed agreement and the ECOA. Any employee who is unable to attend a general meeting would be approached individually by WCC training personnel. All employees would be informed that their failure to comply with the provisions of the proposed agreement would subject them to disciplinary action, including possible dismissal. WCC would secure a signed statement from each of its consumer credit employees that he or she has read the Commission's order, received the written educational materials, and received oral instructions regarding the requirements of the statutes and Regulation B.

The proposed consent agreement further provides that each new consumer credit employee hired by WCC during the next five years will receive a copy of the written educational materials and the proposed order. Each new employee would also be required to sign the statement confirming participation in the educational program. The proposed consent agreement would also require WCC to conduct a refresher educational program for its consumer credit employees each year for five years. The refresher program would include the distribution of written educational materials concerning changes in the law and employee attendance at seminars reviewing general ECOA and FCRA requirements.

(7) *Educational Program for WCC's Retail Dealers.* The proposed consent agreement would order WCC to institute an educational program for its retail dealers. As part of such program, WCC would develop written educational materials which would explain in clear language the retail dealers' obligation under the ECOA and Regulation B. The written educational materials would be provided to each retail dealer which refers consumer credit contracts to WCC. These materials would be accompanied by a cover letter which states that WCC has agreed to undertake the education of its retail dealers pursuant to an agreement with the FTC. The Consent agreement would further order WCC to provide an educational class to each of its retail dealers from which WCC purchases 150 or more consumer credit contracts annually. The class would be provided to those employees of the retail dealer with responsibilities for processing consumer credit applications and would include an oral explanation of the written educational materials. WCC employees would be required to sign a statement certifying that they made the class available to each covered retail dealer and listing the number and titles of the employees of each retail dealer who actually received such training. The consent agreement would further require WCC to provide the cover letter and written educational materials to each new retail dealer during the next five years. WCC would have to conduct annual refresher courses for its retail dealers for five years. Such refresher courses would include providing each retailer dealer with updated written educational materials. If during any year it were unnecessary to update the written educational materials because there were neither amendments to the ECOA or

Regulation B nor relevant regulatory or judicial interpretations, WCC would be required to offer each retail dealer additional copies of the written educational materials from the previous year. For retail dealers from which WCC purchased 150 or more consumer credit contracts during the previous year, the refresher educational class which would also include an annual oral explanation of the written educational materials.

(8) *Notice of Applications of Rights of Married Applicants to Apply for Individual Accounts.* The proposed agreements would order WCC to use credit application forms which clearly disclose to applicants that they are entitled to apply for an individual account and that applicants choosing to apply for individual accounts need not supply any information about their spouses or former spouses unless they are relying on their spouses' income, or relying on alimony, child support or separate maintenance payments, or reside in a community property state.

(9) *Equal Opportunity in Credit Sign for Retail Dealers.* The proposed consent agreement would order WCC to make available to each retail dealer an equal opportunity in credit sign for display in the retail dealer's place of business. Such signs would state that discriminiation on the basis of sex, marital status, race, national origin, color, religion, age, receipt of public assistance income, or exercise of rights under the Federal Consumer Credit Protection Act is prohibited in any aspect of a credit transaction. The sign would further state that applicants have the right to apply for an individual credit account regardless of their marital status, the ECOA signs would be made available to each existing retail dealer and to each new dealer during the next five years.

(10) *Retail Dealer Audit Program to Detect ECOA Violations.* The proposed consent agreement would order WCC to audit each retail dealer for fifteen years to determine whether the dealer is in compliance with the requirements of Regulation B regarding discriminatory discouragement of applicants, the information asked of applicants during the application process, the signatures obtained from applicants on credit instruments, and the retention of applications. The audit of retail dealers would be incorporated in WCC's ordinary dealer audit program; however, if WCC eliminated its dealer audit program at any time during the fifteen year period, it would be required to continue auditing its retail dealers for ECOA compliance.

(11) *Defenses for Violation of Consent Agreement.* The proposed consent agreement states that WCC would not be liable for a civil penalty for violating most of the provisions of the order if WCC could demonstrate that certain violations were caused by a mechanical, electronic, or clerical error which was not intentional and occurred notwithstanding the maintenance of procedures reasonably adapted to avoid any such error. The inadvertent error defense would not be available if WCC took sex or marital status into account in evaluating an applicant's creditworthiness, or if WCC requested or considered information about an applicant's spouse in an impermissible situation.

II. Fair Credit Reporting Act Allegations and Order Provisons

The complaint contains allegations of two vilolations of the FCRA. The proposed order provisons are designed to provide prospective relief as well as retroactive relief in some instances.

(1) *Violation of Notification Requirements When Credit is Denied Due to Credit Bureau Report.* The complaint alleges that WCC violated Section 615(a) of the Fair Credit Reporting Act. Section 615(a) provides that whenever consumer credit is denied either wholly or partly because of information contained in a consumer credit report from a credit bureau, the creditor must so advise the consumer and supply the name and address of the credit bureau making the report. The complaint alleges that subsequent to April 25, 1971 WCC violated Section 615(a) in three ways. First, it alleges that WCC rejected applications for credit in all or part because of adverse information contained in credit reports. Second, it alleges that WCC rejected applications for credit in whole or in part because the credit bureau report did not contain sufficient affirmative information to meet WCC's creditworthiness standards or that the credit bureau reported that it did not have a file in the consumer's name. Third, it alleges that WCC often failed to provide the complete name and address of the creit bureau as required.

The proposed consent agreement would order WCC to prospectively comply with Section 615(a). The proposed order would also require WCC to mail a letter to each applicant who was denied credit since October 1, 1977, in whole or in part because of information in a credit bureau report. The letter explains consumers' rights under the Fair Credit Reporting Act and states that the applicant may not have been informed about whether WCC used information from a credit bureau or from some other source in denying the consumer's application.

The letter states that if the consumer would like to know whether such information played a part in WCC's decision to deny the consumer's application, the consumer should complete and return the enclosed self-addressed, postage pre-paid request form. The letter also explains that by returning the request form and receiving their information about the role, if any, a credit bureau report or other third party information may have had in WCC's decision to deny credit, the consumer will be better able to determine whether such information is accurate or in need of correction. The letter concludes by inviting the consumer to write to the Federal Trade Commission if more information about federal credit laws is desired.

The consent order would excuse WCC from mailing the proposed letter and request form to any consumer to whom WCC has previously given the notice required by Section 615 of the FCRA. The consent order also provides that WCC may combine the information in the letter concerning consumers' FCRA rights with the information in the letter regarding consumers' right to receive the specific reasons for denial under the ECOA. Consumers who complete and return the FCRA request form would receive, in addition to the information required under the FCRA, a statement of their right to receive the nature and substance of the information in their credit file from the credit bureau without charge if their request to the credit bureau is made within 30 days. WCC would also enclose a copy of the FTC pamphlet on the FCRA.

(2) *Violation of Notification Requirements When Credit Is Denied Due to Information Received from Other Creditors, Employers, Landlords, or Other Third Parties.* The complaint alleges that WCC violated Section 615(b) of the Fair Credit Reporting Act. Section 615(b) provides that whenever consumer credit is denied either wholly or partly because of information obtained from a third party other than a credit bureau, the creditor must tell the consumer that he or she may request a disclosure of the nature of the information obtained. The complaint alleges that subsequent to April 25, 1971 WCC often failed to disclose to consumers that information obtained from such third parties contributed to the credit denial and that they had a right to request form WCC the nature of the information.

The consent agreement would require WCC to prospectively comply with Section 615(b). It would also require that WCC mail the FCRA letter and request form discussed above to each applicant who was denied credit since October 1, 1977 in whole or in part because of information WCC received from a third party other than a credit bureau. As with the notification respecting information obtained from credit bureaus, the proposed consent agreement would permit combining this notification letter with the ECOA notification and states that the FCRA letter and request form need not be sent to any consumer who has previously received the required Section 615 notice from WCC.

(3) *Defense for Violation of Consent Agreement.* The proposed consent agreement states that WCC would not be liable for a civil penalty for violating the provisions of the order respecting the FCRA if WCC could demonstrate that any violation was caused by a mechancial, electronic, or clerical error which was not intentional and occurred notwithstanding the maintenance of procedures reasonably adapted to avoid any such error.

III. Standard Compliance Provisions

The proposed consent order contains standard paragraphs to facilitate the Commission's review of WCC's compliance with its obligations under the proposed order.

(1) *Preserving Evidence of Compliance.* The proposed consent order would require WCC to retain for three years evidence of its compliance with the order provisions regarding the retroactive notifications to rejected applicants about their rights under the ECOA and FCRA.

(2) *Notification of Changes in WCC's Corporate Structure.* The proposed order would require WCC to notify the Commission at least thirty days prior to any corporate changes, such as dissolution or mergers, which would affect its compliance obligations.

V 4 4 / 1 7 3 S E 5 7 9 UMI

(3) *Compliance Reports.* The consent order would require WCC to submit a total of seven compliance reports. The first report, due sixty days after the order becomes final, would require WCC to detail how it has complied or intends to comply with each order provision. The second compliance report, due one hundred eighty days after the order becomes final, would require WCC to detail how it complied with those order provisions with which it had not yet complied at the time it submitted its first compliance report. WCC would also be obligated to submit for five years annual reports on its compliance with the order to conduct annual refresher courses on the ECOA and FRCA for its employees and to make yearly ECOA refresher courses available to its dealers.

The purpose of this analysis is to facilitate public comment on the proposed order. It is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

James A. Tobin,

Acting Secretary.

[FR Doc. 79-27545 Filed 9-4-79; 8:45 am]

BILLING CODE 6750-01-M

[16 CFR Part 419]

Games of Chance in the Food Retailing and Gasoline Industries; Proposed Rule

AGENCY: Federal Trade Commission.

ACTION: Notice of Proposed Amendment of Trade Regulation Rule.

SUMMARY: The Federal Trade Commission proposes to amend its regulations relating to games of chance in the food retailing and gasoline industries. The proposed amendment will limit the information currently required to be posted in all participating retail outlets and furnished to the Commission. The reasons for the proposed amendment are the lack of evidentiary support of the provision as it is currently in operation, and the Commission's continuing concern with reducing the cost burdens and inflationary impact of government regulation.

DATES: Notification of Interest on or before September 28, 1979. Written comments and available exhibits on or before October 15, 1979. Prepared statements on or before October 29, 1979. Public hearings commence November 19, 1979, in Washington, D.C. at 9:00 a.m.

ADDRESSES: Send comments to Federal Trade Commission, Cleveland Regional Office, Suite 500, The Mall Building, 118 St. Clair Avenue, Cleveland, Ohio 44114. Public hearing: Federal Trade Commission Building, Room 332, Pennsylvania Avenue at 6th Street, NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Noble F. Jones, Consumer Protection Specialist, Federal Trade Commission, Suite 500, The Mall Building, 118 St. Clair Avenue, Cleveland, Ohio 44114. Telephone (216) 522-4207.

SUPPLEMENTARY INFORMATION: The Commission is proposing to amend the existing Trade Regulation Rule for Games of Chance in the Food Retailing and Gasoline Industries by modifying paragraph (e) of § 419.1. This provision currently requires that, at the conclusion of a game the following information must be clearly and conspicuously posted in all participating retail outlets and must be furnished to the Commission:

A complete list of the name and address of the winner of each prize and the amount or value of the prize won by each;

The total number of game pieces distributed;

The total number of prizes available in each category; and

The total number of prizes awarded in each category.

The Commission's proposed modification will limit the individual retail outlet postings to only those winners which redeemed their prizes at the individual retail outlet in question, and will no longer require the submission of complete winner lists to the Commission at the conclusion of a game, but rather will require that the information previously submitted under the Rule will be retained for a three-year period and will be made available for Commission staff inspection upon reasonable request.

This notice sets out the procedures to be followed, the text of the proposed Rule, a list of general questions and issues upon which the Commission particularly desires comment and testimony, an invitation for written comments, and instructions for prospective witnesses and other interested persons who desire to testify or otherwise participate in the proceedings.

The Commission is proposing to modify the record-keeping and reporting requirements (16 CFR 419.1(e)) of the Trade Regulation Rule for Games of Chance in the Food Retailing and Gasoline Industries. This proceeding has been instituted upon receipt of two petitions for modification of paragraph (e). The reasons for the proposed amendment are the lack of evidentiary support of the provision as it is currently in operation, and the Commission's continuing concern with reducing the cost burdens and inflationary impact of government regulation.

Section A. Proposed Amendment of Trade Regulation Rule.

Notice is hereby given that the Federal Trade Commission, pursuant to the Federal Trade Commission Act, as amended, 15 U.S.C. 41, *et seq.*, the provisions of Part I, Subpart B of the Commission's procedures and rules of practice, 16 CFR 1.7, *et seq.*, and Section 553 of Subchapter II, Chapter 5, Title 5, of the United States Code (Administrative Procedure), has initiated a proceeding for the amendment of the Trade Regulation Rule for Games of Chance in the Food Retailing and Gasoline Industries. The Commission has determined, pursuant to 16 CFR 1.20, to follow the procedures set forth in this notice for this proceeding.

Section B. Reasons for Amendment of the Rule

Section 419.1(e) of the Trade Regulation Rule for Games of Chance in the Food Retailing and Gasoline Industries requires that, at the conclusion of a game, certain information be furnished to the Commission and be posted in each retail outlet which participated in the game. The required information includes: a complete list of the names and addresses of all winners; the total number of game pieces distributed; the total number of prizes available; and the total number of prizes awarded. During the course of the hearings on the Rule, there were three (3) comments which addressed the area of record-keeping and reporting. None of the comments suggested the rather extensive requirements included in the final form of the Rule. However, at the time of the promulgation of the Rule in October, 1969, the Commission was of the opinion that the information required by the Rule was material to consumers who participated in game promotions. The Commission stated:

Paragraph (e) of the final rule requires producers and users of games to post, at the conclusion of a game, certain information in each retail outlet which used the game and to also furnish this information to the Commission. This paragraph adopts the suggestion of the game producers that the Commission require the maintenance of certain records to be furnished to the Commission upon its request. It goes further than the producers' suggestion, however, in requiring that the information be posted in each outlet using the game and furnished automatically to the Commission at the conclusion of each game. Also, in addition to that which was suggested by the producers, the rule requires that this information consist of a complete list of the winners of each prize and the total number of prizes by category or denomination which were made available.[1]

Also in October, 1969, the Commission released its response to a request by an industry member for a change in Rule paragraph (e)(1) to eliminate the necessity of posting the names and addresses of all prize winners in each store and to require instead that only the names and addresses of winners of prizes of five dollars ($5.00) or more need be posted. The Commission, in denying the request, clarified its reason for the inclusion of the paragraph in the Rule. The Commission stated:

* * * the purpose of this provision of the Rule is to enable the game participants to see for themselves that the prizes were awarded and to whom.[2]

This proceeding has been initiated in response to two petitions from industry members for relief from the requirements of paragraph (e)(1).[3] The petitions request that the Commission no longer require the users of games to post a complete list of all winners in every retail outlet that participates in a game. Both petitions argue that the information is rarely utilized by consumers and, therefore, the additional costs involved in compiling a complete list of all winners is unnecessary and inflationary. Copies of both petitions are available for inspection in Room 130, Public Reference Room, Federal Trade Commission, Pennsylvania Avenue at Sixth Street, NW., Washington, D.C. 20580.

In light of the issues raised in the petitions, the Commission is persuaded at this time to consider an amendment to the Rule.

Section C. Invitation To Comment on Amendment of the Trade Regulation Rule

All interested parties are hereby notified that they may submit to the Federal Trade Commission, Cleveland Regional Office, Suite 500, The Mall Building, 118 St. Clair Avenue, Cleveland, Ohio 44114, written data, views, or arguments on any issues of fact, law or policy, which may have some bearing on the proposed modification of 16 CFR 419.1(e). The Commission requests that persons commenting on this subject address the following issues:

1. With what frequency do consumers currently examine the winners lists?

2. How meaningful is the information currently available?

3. What impact would the proposed amendment have on consumer access to the information contained in the winners lists?

4. What are the costs involved in complying with paragraph (e) as it is currently in operation? How would these costs be affected by the proposed amendment?

In all comments, the Commission particularly welcomes empirical evidence. Written comments will be accepted until October 15, 1979. To assure prompt consideration of all comments, it should be identified as "Games of Chance Amendment Comment," and, when feasible and not burdensome, submitted in five (5) copies.

Section D. Public Hearings

Public hearings will be held commencing on November 19, 1979, at 9:00 a.m., in Room 332 of the Federal Trade Commission Building, Pennsylvania Avenue at Sixth Street, NW., Washington, D.C. 20580. Persons desiring to present their views orally at the hearings should so advise the Presiding Officer, Federal Trade Commission, Washington, D.C. 20580, no later than September 28, 1979.

Section E. Instructions to Witnesses

1. *Advance notice.* If you wish to testify at the hearings, you must notify the Presiding Officer of your desire to appear and file with him your complete, word-for-word statement no later than October 29, 1979. This advance notice is required so that other interested persons can determine the need for examination and have an opportunity to prepare. Any examination which is permitted will be conducted with regard to the written testimony, which will be entered into the record exactly as submitted. Consequently, it will not be necessary for you to repeat this statement at the hearing. You may simply appear to answer questions with regard to your written statement or you may deliver a short summary of the most important aspects of that statement within time limits to be set by the Presiding Officer. As a general rule, such oral summaries should not exceed ten (10) minutes.

2. *Use of exhibits.* Use of exhibits during oral testimony is encouraged, especially when they are to be used to help clarify technical or complex matters. If you plan to offer documents as exhibits, file them as soon as possible during the period for submission of written comments so they can be studied by other interested persons. Such documents that may be unavailable to you during this period must be filed as soon as possible thereafter, and not later than the deadline for filing prepared statements. Mark each of the documents with your name, and number them in sequence (*e.g.*, Jones Exhibit 1). The Presiding Officer has the power to refuse to accept for the public record any hearing exhibits that are not furnished by the deadline.

3. *Expert witnesses.* If you are going to testify as an expert witness, you must attach to your statement a *curriculum vita*, biographical sketch, resume, or summary of your professional background, and a bibliography of your publications. It would be helpful if you would also include documentation for the opinions and conclusions you express by footnotes to your statements or in separate exhibits. If your testimony is based upon, or chiefly concerned with, one or two major scientific works, copies should be furnished. The remaining citations to other works can be accomplished by using footnotes in your statement referring to those works.

4. *Results of surveys and other research studies.* If in your testimony you will present the results of a survey or other research study, as distinguished from simple references to previously published studies conducted by others, you must also present as an exhibit or exhibits in compliance with paragraph 2, above, the following:

(a) A complete report of the survey or other research study and the information and documents listed in (b) through (e) if they are not included in that report.

(b) A description of the sampling procedures and selection process including the number of persons contacted, the number of interviews completed, and the number of persons who refused to participate in the survey.

(c) Copies of all completed questionnaires or interview reports used in conducting the survey or study if respondents were permitted to answer questions in words of their choice rather than to select an answer from one or more answers printed on the questionnaire or suggested by the interviewer.

(d) A description of the methodology used in conducting the survey or other research study including the selection of and instructions to interviewers, introductory remarks by interviewers to respondents and a sample questionnaire or other data collection instrument.

[1] Statement of Basis and Purpose of Trade Regulation Rule for Games of Chance in the Food Retailing and Gasoline Industries, 34 FR 13,309 (1969).

[2] CCH Trade Reg. Rep. para. 41,121-3.

[3] *Petition for Modification of Paragraph (e)(1) of the Trade Regulation Rule for Games of Chance in the Food Retailing and Gasoline Industries* (filed on behalf of Wallace Games, Inc. and Silpro, Inc., Nov. 20, 1978); *Petition for an Interpretive Guide or Statement of Policy* (filed on behalf of TeleCom Productions, Inc., March 28, 1979).

V 4 4 / 1 7 3 SE 5 7 9 UMI

(e) A description of the statistical procedures used to analyze the data and all data tables which underlie the results reported.

Other interested persons may wish to examine the questionnaires, data collection forms and any other underlying data not offered as exhibits and which serve as a basis for your testimony. This information along with punch cards or computer tapes which were used to conduct analyses should be made available (with appropriate explanatory data) upon request of the Presiding Officer. The Presiding Officer will then be in a position to permit their use by other interested persons or their counsel.

5. *Identification, number of copies, and inspection.* To assure prompt consideration, all materials filed by prospective witnesses pursuant to the instructions contained in paragraphs 1–4, above, should be identified as "Games of Chance Statement" ("and Exhibits," if appropriate), and submitted in five copies when feasible and not burdensome.

Copies of all materials filed by witnesses will be made available for examination in Room 130, Public Reference Room, Federal Trade Commission, Pennsylvania Avenue and Sixth Street, NW., Washington, D.C.

6. *Reason for requirements.* The foregoing requirements are necessary to permit us to schedule the time for your appearances and that of other witnesses in an orderly manner. Other interested parties must have your expected testimony and supporting documents available for study before the hearing so they can decide whether to examine or cross-examine you or file rebuttals. If you do not comply with all of the requirements, the Presiding Officer has the power to refuse to let you testify.

7. *General procedures.* These hearings will be informal and courtroom rules of evidence will not apply. You will not be placed under oath unless the Presiding Officer so requires. You are also not required to respond to any question outside the area of your written statement, although, if such questions are permitted, you may respond if you feel you are prepared and have something to contribute. The Presiding Officer will assure that all questioning is conducted in a fair and reasonable manner and will allocate time according to the number of parties participating, the legitimate needs of each group for full and true disclosure, and the number and nature of the factual issues discussed. The Presiding Officer further has the right to limit the number of witnesses to be heard if the orderly conduct of the hearing so requires.

The deadlines established by this notice will not be extended and hearing dates will not be postponed unless hardship to participants can be demonstrated.

Section F. Notification of Interest

Interested persons who wish to avail themselves of the opportunity to question witnesses must, by September 28, 1979, notify the Presiding Officer of their position with respect to the proposed rule and each individual provision thereof. This notification must be in sufficient detail to enable the Presiding Officer to identify groups with the same or similar interests respecting the proposed rule and the Presiding Officer may require the submission of additional information from any applicant whose notification is inadequate. Failure to file an adequate notification in sufficient detail may result in the applicant not being considered for purposes of direct and cross-examination.

Before the hearings commence, the Presiding Officer will identify groups with the same or similar interests in the proceeding. Such groups will be required to select a single representative for the purpose of conducting direct or cross-examination and, if unable to make this selection, the Presiding Officer may select a representative of each such group. The Presiding Officer will notify all interested persons of the identity of the group representatives at the earliest practicable time.

Section G. Post-Hearing Procedures

Interested persons will be afforded 30 days after the close of the hearings to file rebuttal submissions. Rebuttal presentations shall be permitted only if the Presiding Officer determines that the presentation of rebuttal submissions is required for a full and true disclosure with respect to any disputed issue of fact that is material and necessary to resolve. Rebuttal submissions must be based only upon identified, properly cited matters already in the record. The Presiding Officer will reject all submissions which are essentially additional written comment in contrast to rebuttal. The 30-day rebuttal period is intended to include the time consumed in securing a complete transcript.

Section H. Rulemaking Record

In view of the substantial rulemaking records that have been established in prior trade regulation rulemaking proceedings (and the consequent difficulty in reviewing such records), the Commission urges all interested persons to consider the relevance of any material before placing it on the rulemaking record. While the Commission encourages comments on its proposed rule, the submission of material that is not generally probative of the issues posed by the proposed rule merely overburdens the rulemaking record and decreases its usefulness, both to those reviewing the record and to interested persons using it during the course of the proceeding. The Commission's rulemaking staff has received similar instructions. Material that the staff has obtained during the course of its investigation prior to the initiation of the rulemaking proceeding that is not placed in the rulemaking record will be made available to the public, to the extent that it is considered to be nonexempt from disclosure under the Freedom of Information Act, 5 U.S.C. Section 552.

Section I. Compensation for Representation in Rulemaking Proceedings

Pursuant to Section 18(h) of the FTC Act, funds may be available for reimbursement of public participation costs incurred in this proceeding to those who satisfy the requirements of Section 1.17 of the Commission's Rules. For further information, contact Bonnie Naradzay, Special Assistant for Public Participation, Office of the General Counsel, Federal Trade Commission, Sixth Street and Pennsylvania Avenue, NW., Washington, D.C. 20580, 202–523–3520.

Accordingly, the Commission has proposed to amend 16 C.F.R. 419 by revising § 419.1(e) to read as follows:

§ 419.1 The Rule

* * * * *

(e) Fail to post clearly and conspicuously at the conclusion of each game in each individual retail outlet which used the game:

(1) The names and addresses of all persons who redeemed a prize in the individual participating retail outlet, and the amount or value of each prize;

(2) The total number of game pieces distributed in all participating retail outlets;

(3) The total number of prizes in each category or denomination which were made available in all participating retail outlets;

(4) The total number of prizes in each category or denomination which were awarded in all participating retail outlets.

The information required by subparagraphs (2), (3), and (4) of this paragraph (e), as well as a complete list of the names and addresses of all winners of a game, is required to be retained in the records of the game promoter for a period of not less than three (3) years. Upon reasonable request, such information shall be made immediately available to the Commission and its staff for inspection.

Issued: July 24, 1979.

By direction of the Commission.

Loretta Johnson,

Acting Secretary.

BILLING CODE 4310-03-M

VETERANS ADMINISTRATION

[38 CFR Part 3]

Veterans Benefits; Child

AGENCY: Veterans Administration.

ACTION: Proposed regulation amendment.

SUMMARY: The Veterans Administration is proposing to amend its regulation defining the term "child" for payment of Veterans Adminstration benefits. The need for this action results from a determination that certain persons attending school may be considered to be veterans' children for benefit payment purposes even if they were adopted by veterans on or after the attainment of age 18 or, in the case of stepchildren, by becoming members of veterans' households on or after the attainment of age 18. The major effect of this change is to permit payment of Veterans Administration educational assistance to certain persons over age 18 who were adopted by veterans on or after age 18, or who became members of veterans' households on or after age 18 as stepchildren, and to permit payment of additional disability compensation, pension or dependency and indemnity compensation by reason of such dependent "children".

DATES: Comments must be received on or before October 5, 1979. It is proposed to give this change unlimited retroactive effect.

ADDRESSES: Send written comments to: Administrator of Veterans' Affairs (271A), Veterans Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420.

Comments will be available for inspection at the address shown above during normal business hours until October 15, 1979.

FOR FURTHER INFORMATION CONTACT:
T. H. Spindle (202–389–3005)

SUPPLEMENTAL INFORMATION: For Veterans Administration benefit purposes the term "child" is defined in 38 U.S.C. 101(4) to include a veteran's adopted child or a veteran's stepchild who is a member of the veteran's household or was a member at the time of the veteran's death. The regulation implementing 38 U.S.C. 101(4), § 3.57, imposes the further requirement that an adopted child must have been under age 18 at the time of adoption by the veteran, and that a stepchild must have been under age 18 at the time the child became a member of the veteran's household.

The Veterans Administration has determined that the statutory definition of the term "child" renders the under-age 18 requirement invalid in school attendance situations. Consequently, we are proposing to amend § 3.57 to permit a person age 18 or over (but not over age 23) to be recognized as a "child" of the veteran without regard to the child's age at the time of adoption or, in the case of a stepchild, at the time the child became a member of the veteran's household.

The Veterans Administration does not consider this to be a significant proposal since only a small segment of the veteran population is affected and no compliance burdens or costs are imposed.

Additional Comment Information

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans' Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420. All written comments received will be available for public inspection at the above address only between the hours of 9 a.m. and 4:30 p.m. Monday through Friday (except holidays) until October 15, 1979. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Services Unit in room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

Approved: August 27, 1979.

By direction of the Administrator:

Rufus H. Wilson,

Deputy Administrator.

Section 3.57 is revised to read as follows:

§ 3.57 Child.

(a) *General.* (1) Except as provided in paragraph (a)(2) of this section, the term "child" of the veteran means an unmarried person:

(i) Who is a legitimate child, a child legally adopted before the age of 18 years, a stepchild who acquired that status before the age of 18 years and who is a member of the veteran's household or was a member of the veteran's household at the time of the veteran's death, or an illegitimate child; and

(ii) Who is under the age of 18 years; or

(iii) Who, before eaching the age of 18 years, became permanently incapable of self-support; or

(iv) Who, after reaching the age of 18 years and until completion of education or training (but not after reaching the age of 23 years) is pursuing a course of instruction at an approved educational institution.

(2) For the purposes of determining entitlement to benefits based on a child's school attendance, the term "child" of the veteran also includes the following unmarried persons:

(i) A person who was adopted by the veteran between the ages of 18 and 23 years.

(ii) A person who became a stepchild of the veteran between the ages of 18 and 23 years and who is a member of the veteran's household or was a member of the veteran's household at the time of the veteran's death.

(b) *Stepchild.* The term means a legitimate or an illegitimate child of the veteran's spouse. A child of a surviving spouse whose marriage to the veteran is deemed valid under the provisions of § 3.52, and who otherwise meets the requirements of this section is included.

(c) *Adopted child.* The term means a child adopted pursuant to a final decree of adoption, a child adopted pursuant to an unrescinded interlocutory decree of adoption while remaining in the custody of the adopting parent (or parents) during the interlocutory period, and a child who has been placed for adoption under an agreement entered into by the adopting parent (or parents) with any agency authorized under law to so act, unless and until such agreement is terminated, while the child remains in the custody of the adoping parent (or parents) during the period of placement for adoption under such agreement. The term includes, as of the date of death of a veteran, such a child who:

(1) Was living in the veteran's household at the time of the veteran's death, and

(2) Was adopted by the veteran's spouse under a decree issued within 2 years after August 25, 1959, or the veteran's death whichever is later, and

(3) Was not receiving from an individual other than the veteran or the veteran's spouse, or from a welfare organization which furnishes services or assistance for children, recurring contributions of sufficient size to constitute the major portion of the child's support. (38 U.S.C. 101(4).)

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 1312-3]

Approval and Promulgation of Implementation Plans; Florida; Proposed Plan Revision-Correction

AGENCY: U.S. Environmental Protection Agency, Region IV.

ACTION: Correction in proposed rule.

SUMMARY: In document FRL 1260-4, appearing at pp. 38578-38580 of the Federal Register of July 2, 1979, an erroneous impression is given of the SO_2 emission limit which applies to large fuel burning sources located north of Hecksher Drive in Duval County; for such sources, the proposed emission rate is 2.5#/10^6 Btu, as set forth in the proposal notice of August 15, 1975 (40 FR 34408). In the portion of FRL 1260-4 dealing with "Duval County Sources" (page 38579), the first sentence of the third paragraph should read: "All other fossil fuel fired steam generators in Duval County with more than 250 million Btu/hour heat input are to meet an emission limit of no more than 1.65 lbs. $SO_2/10^6$ Btu, except those located north of Hecksher Drive; for the latter sources, the applicable emission limit is 2.5 lbs. $SO_2/10^6$ Btu."

This correction raises no issue that has not been opened to public comment in the proposal notice of August 15, 1975, or in the public hearings held in Florida on the several revisions in SO_2 emission limits for fuel burning sources. Accordingly, it is not felt necessary to reopen the comment period for the proposal of July 2, 1979.

[40 CFR Part 65]

[FRL 1312-7]

Proposed Delayed Compliance Order for General Electric Co., Erie, Pennsylvania, Withdrawal of Proposed Rulemaking

AGENCY: Environmental Protection Agency.

ACTION: Withdrawal of proposed rulemaking.

SUMMARY: The purpose of this notice is to withdraw a prior **Federal Register** notice proposing a Delayed Compliance Order for the General Electric Company's Erie, Pennsylvania plant. This action is being taken because the final compliance date specified in the proposal has passed.

DATE: This withdrawal is immediately effective.

FOR FURTHER INFORMATION CONTACT:

Benjamin Kalkstein, Attorney-Advisor, U.S. Environmental Protection Agency, 3EN31, 6th and Walnut Streets, Philadelphia, Pennsylvania, 19106. 215/597-3439.

SUPPLEMENTARY INFORMATION: A **Federal Register** notice published at 44 FR. 38603 (July 2, 1979) solicited public comments and offered the opportunity to request a public hearing on a Proposed Delayed Compliance Order to be issued by EPA to General Electric's Erie, Pennsylvania plant. Final compliance with the proposed Order would have been required on or before July 1, 1979. Because the date for final compliance has passed, EPA is withdrawing the proposal.

In consideration of the foregoing, the proposal published in the **Federal Register** at 44 FR 38603 (July 2, 1979) entitled "Proposed Delayed Compliance Order for General Electric Co., Erie, Pa." is hereby withdrawn.

Dated: August 9, 1979.

INTERSTATE COMMERCE COMMISSION

[49 CFR Ch. X]

[Ex Parte No. 366]

Legal Assistance Referral Service

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Association of Interstate Commerce Commission Practitioners (AICCP) and the Motor Carrier Lawyers' Association (MCLA) have asked the Commission to develop regulations to facilitate the operation of a legal assistance program for indigent or partially indigent participants in Commission proceedings.

DATES: Comments are due on or before October 5, 1979.

ADDRESS: Send comments to:

Secretary, Interstate Commerce Commission, Washington, DC 20423.

All written submissions will be available for public inspection during regular business hours at the same address.

Petitioners' Representatives:

Frank Montecalvo, President, Association of Interstate Commerce Commission Practitioners, 1112 ICC Building, Washington, DC 20423.

John L. Alfano, Esq., 550 Mamaroneck Avenue, Harrison, NY 10528.

J. Raymond Clark, Esq., Suite 1150, 600 New Hampshire Avenue, NW, Washington, DC 20037.

Charles Ephraim, Esq., President, Motor Carrier Lawyers' Association, Suite 600, 1250 Connecticut Avenue, NW, Washington, DC 20036.

Charles A. Webb, Esq., Vorys, Sater, Seymour, and Pease, 1800 M Street, NW, Suite 800—South, Washington, DC 20036.

Joseph G. Dail, Jr., Esq., 6810 Fleetwood Road, McLean, VA 22101.

Marshall Kragen, Esq., 1721 DeSales Street, NW, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT:

Donald J. Shaw, Jr. (202) 275-7292 or Lee Alexander (202) 275-7989.

SUPPLEMENTARY INFORMATION: The Association of Interstate Commerce Commission Practitioners (AICCP) and the Motor Carrier Lawyers' Association (MCLA) propose that this program be supervised by a separate "Committee on Interstate Commerce Representation" (CICR). The Committee will consist of five members, two appointed by AICCP, two appointed by MCLA, and a Chairman appointed by the other four members. CICR will develop detailed procedures for day-to-day operation of the program. A panel of participating representatives will be established. The panelists will volunteer to provide professional services without charge or at reduced fees to parties with limited financial resources. Specific eligibility standards will be established by CICR. Any fees charged will be determined by panelists and clients on a case-by-case basis. If a fee is paid, a nominal portion will be remitted to CICR for reimbursement of expenses.

To assist CICR in implementing this program, petitioners request that the Commission promulgate rules and regulations providing for:

(1) The appointment of a Commission employee to serve as a liaison to CICR;

(2) Administrative and clerical support for the daily functioning of CICR;

(3) Petitions for waiver or reduction of filing fees on an individual basis by parties of limited financial resources;

(4) Availability of the Commission's "second copy" of transcript;

(5) Reduction in the number of copies of pleadings to be filed by eligible clients; and

(6) Cooperation by Commission personnel in CICR's evaluation process.

We agree with the objectives and procedures described in petitioners' innovative and worthwhile proposal. The rules proposed here will entail a minor modification of the usual administrative processes. For example, in addition to submitting the normal application forms, a client of the Legal Assistance Referral Service will submit a certification form to be developed by CICR. This form will merely show that the applicant meets CICR eligibility standards. These standards for admission to the referrel program will be submitted to the Commission for approval. The certification form will indicate to our Fee Branch that no filing fee is necessary. The Commission will also require that only two copies of any pleading be filed by eligible clients. A copy of any transcripts will also be made available. The Commission is prepared to assist and support CICR to the extent necessary to assure the success of the referral service. We anticipate a one year trial period to evaluate the program and make necessary changes.

Persons interested in commenting on the proposed regulations are invited to file written statements with the Commission. No oral hearing is contemplated at this time. We request that comments address the following issues: When requests for assistance are received by Commission personnel, to whom should they by directed? What are the functions of the proposed Commission liaison to CICR? What level of administrative and clerical support will CICR require? What are CICR's eligibility standards? (As part of this question, parties should address the types of cases to be covered by the program and who should qualify for assistance. Parties are also asked to address the relationship between the provision authorizing waiver of filing fees and the Commission's duty to ensure financial fitness. 125 M.C.C. at 334-37.) What type of records will the Commission be required to keep?

Accordingly, it is proposed that the following rules be adopted at 49 CFR Part ———.

PART ———. SPECIAL REGULATIONS GOVERNING COMMISION PARTICIPATION IN THE LEGAL ASSISTANCE REFERREL SERVICE

§ ———.1. Scope.

These special rules govern the participation in Commission proceedings by eligible clients of the Committee on Interstate Commerce Representation (CICR).

§ ———.2. Definition.

(a) *CICR.* The Committee on Interstate Commerce Representation will consist of five members, two appointed by the Motor Carrier Lawyers' Association, two appointed by the Association of Interstate Commerce Commission Practitioners, and a fifth member to serve as Chairman to be appointed by the other four members.

(b) *Certification Form.* CICR will develop a certification form to document the fact that a participant in Commission proceedings meets CICR eligibility requirements.

§ ———.3. Function of CICR.

CICR will supervise the Legal Assistance Referral Service, including the determination of eligibility standards. These standards will be subject to Commission approval.

§ ———.4. Special Procedures.

(a) Submission by any participant in Commission proceedings of a proper CICR certification form will trigger Commission assistance as provided in this Part.

(b) Upon submission of the proper certification as set forth in (a), the Commission will make the following adjustments in procedures.

I. Filing fees will be waived.

II. Participants will be provided copies of pertinent transcripts at no charge.

III. Only two copies of any pleading or evidentiary presentation will be required.

§ ———.5. Commission Assistance.

The Commission, through the Office of the Secretary, will provide CICR assistance as follows:

(a) *Liaison.* The Commission will appoint an employee to serve as liaison to CICR.

(b) *Support.* The Commission will provide some administrative and clerical support to CICR.

(c) *Referral.* Any person requesting free representation or assistance from the Commission will be referred to CICR.

(d) *Coorporation.* The Commission will cooperate in CICR's evaluation process and will assist CICR to provide representation for small businesses and individuals with limited resources.

§ ———.6. Duration.

Commission assistance to the Legal Assistance Referral Service program will be provided for one year. At the end of this time, we will evaluate the program and make any changes in the rules to assure the success of this program.

Dated: August 27, 1979.

By the Commission, Chairman O' Neal, Vice Chairman Stafford, Commissioners Gresham, Clapp, Christian, Trantum, and Gaskins. Commissioner Gaskins not participating.

Agatha L. Mergenovich,

Secretary.

Wednesday, September 5, 1979

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Foreign Agricultural Service

Estimate with Respect to 1979 White or Irish Potato Production

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Estimate with respect to 1979 white or Irish potato production.

Headnote 2 of Subpart A of Part 8 of Schedule 1 of the Tariff Schedules of the United States (TSUS) provides that, if for any calendar year the production in the United States of white or Irish potatoes, including seed potatoes, according to the estimate of the Department of Agriculture made as of September 1, is less than 21 billion pounds, an additional quantity of potatoes equal to the amount by which such estimated production is less than 21 billion pounds shall be added to the 45 million pounds for which duty at 37.5 cents per 100 pounds is provided by TSUS item 137.25 for the 12-month period beginning September 15.

The estimate of the Department of Agriculture, made as of September 1, 1979, is that for the calendar year 1979 the production in the United States of white or Irish potatoes, including seed potatoes, will exceed 21 billion pounds.

* * * * * * *

Issued at Washington, D.C., on this 1st day of September 1979.

Thomas R. Hughes,
Administrator.

CIVIL AERONAUTICS BOARD

[Order 79-8-166; Docket 36486]

Dallas/Ft. Worth-Honolulu/Hilo Subpart Proceeding

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order 79-8-166.

SUMMARY: The Board is instituting the *Dallas/Ft. Worth-Honolulu/Hilo Subpart Q Proceeding*, Docket 36486, and is proposing to grant Dallas/Ft. Worth-Honolulu/Hilo authority to Western Air Lines and Ozark Air Lines. The complete text of this order is available as noted below.

DATES: Objections: All interested persons having objections to the Board issuing the proposed authority shall file, and serve upon all persons listed below, no later than October 4, 1979, a statement of objections, together with a summary of the testimony, statistical data, and other material expected to be relied upon to support the stated objections.

ADDRESSES: Objections or Additional Data should be filed in Docket 36486, Docket Section, Civil Aeronautics Board, Washington, D.C., 20428.

FOR FURTHER INFORMATION CONTACT: Donna Kaylor, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, Washington, D.C 20428 (202) 673-5380.

SUMMARY INFORMATION: Objections should be served upon all persons listed in the service lists of Dockets 35472 and 35471.

The complete text of Order 78-8-166 is available from our Distribution Section, Room 516, 1825 Connecticut Avenue, N.W., Washington, D.C. Persons outside the metropolitan area may send a postcard request for Order 79-8-166 to the Distribution Section, Civil Aeronautics Board, Washington, D.C., 20428.

By the Civil Aeronautics Board: August 29, 1979.

Phyllis T. Kaylor,
Secretary.

BILLING CODE 6320-01-M

[Order 79-8-160]

Northern Tier Authority Awards to Alaska Airlines, et al.

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Final Order and Order to Show Cause 79-8-160.

SUMMARY: The Board is making final the tentative findings in Order 79-3-60, served March 13, 1979, and awarding the following Northern Tier authority to the respective carrier applicants:

Alaska Airlines—New segments: (1) Seattle-Portland-Spokane-Missoula-Great Falls-Billings-Minneapolis-Baltimore-Washington (National and Dulles Airports); (2) Anchorage-Minneapolis-Baltimore-Washington (National and Dulles Airports). The authority is subject to the maintenance of certain minimum service levels at small communities on its system.

USAir (formerly Allegheny Airlines)—New segments: (1) Salt Lake City-Denver; (2) Salt Lake City-Spokane; (3) Spokane-Chicago (O'Hare, Midway, and Rockford Airports); (4) Minneapolis-Milwaukee; (5) Minneapolis-Philadelphia/New York (La Guardia and Kennedy Airports)/Newark/Baltimore/Washington (National and Dulles Airports); (6) Minneapolis-Spokane-Portland-Seattle.

American Airlines—New segments: (1) Seattle-Portland-Minneapolis-Baltimore-Washington (National and Dulles Airports); (2) Minneapolis-New York (La Guardia and Kennedy Airports)/Newark/Philadelphia; (3) Denver-Salt Lake City.

Braniff Airways—New segments: (1) Minneapolis-New York (La Guardia and Kennedy Airports)-Newark; (2) Minneapolis-Philadelphia/Baltimore/Washington (National and Dulles Airports); (3) Minneapolis-Anchorage/Seattle/Portland/Spokane.

Continental Air Lines—New segments: (1) Billings-Denver/Portland/Salt Lake City/Seattle; (2) Spokane-Chicago (O'Hare, Midway, and Rockford Airports)/Minneapolis/Portland/Seattle/Salt Lake City; (3) Washington (National and Dulles Airports)-Milwaukee/Minneapolis/Portland/Seattle; (4) Denver-Great Falls/Salt Lake City; (5) Minneapolis-New York (La Guardia and Kennedy Airports)/Newark/Philadelphia/Portland/Seattle; (6) Great Falls-Minneapolis/Portland/Seattle/Salt Lake City; (7) Milwaukee-Minneapolis/Portland/Seattle.

Delta Air Lines—New segment: Salt Lake City-Denver.

Eastern Air Lines—New segments: (1) Minneapolis-Portland-Seattle; (2) Minneapolis-New York (La Guardia and Kennedy Airports)-Newark; (3) Minneapolis-Philadelphia; (4) Minneapolis-Baltimore-Washington (National and Dulles Airports); (5) Milwaukee-Portland-Seattle; (6) Milwaukee-Baltimore-Washington (National and Dulles Airports).

Frontier Airlines—New segments: (1) Denver-Idaho Falls-Pocatello; (2) Seattle-Portland-Spokane-Missoula-Bozeman-Great Falls-Billings. Add the intermediate point Helena.

Hughes Airwest—Add new segments: (1) Portland-Seattle-Spokane-Minneapolis-Milwaukee; (2) Idaho Falls-Denver; (3) Pocatello-Denver. Condition 5 is amended to eliminate the stop restriction in the Portland-Spokane market.

National Airlines—New segment: Spokane-Seattle/Portland.

Republic Airlines (formerly North Central Airlines)—New segments: (1) Anchorage-Seattle-Spokane-Portland-Missoula-Great Falls-Helena-Billings-Minneapolis-Milwaukee-Baltimore-Washington (National and Dulles Airports); (2) Denver-Salt Lake City-Billings-Bozeman-Great Falls-Missoula-Spokane; (3) Minneapolis-New York (La Guardia and Kennedy Airports)/Newark/Philadelphia; (4) Denver-Idaho Falls/Pocatello; (5) Spokane-Chicago (O'Hare, Midway, and Rockford Airports); (6) Helena-Denver/Chicago (O'Hare, Midway, and Rockford Airports)/Omaha/Rapid City/Minot/Salt Lake City/Las Vegas/Phoenix/Ticson/Albuquerque/Santa Fe/Topeka/Kansas City/St. Louis/Memphis/Little Rock/Dallas/El Paso. The authority is conditioned to preclude single-plane service between Anchorage and Portland and Seattle, and between Denver and Spokane.

Northwest Airlines—New segment: Spokane-Missoula-Helena-Great Falls-Bozeman-Billings-Salt Lake City-Denver.

Ozark Air Lines—New segments: (1) Minneapolis-Philadelphia; (2) Spokane-Missoula-Great Falls-Bozeman-Billings-Salt Lake City-Denver; (3) Anchorage-Seattle-Portland-Spokane-Great Falls-Billings-Minneapolis-Milwaukee-Baltimore-Washington (National and Dulles Airports); (4) Portland-Seattle-Spokane-Missoula-Great Falls-Billings-Minneapolis; (5) Spokane-Chicago (O'Hare, Midway, and Rockford Airports); (6) Denver-Helena; (7) Denver-Idaho Falls/Pocatello; (8) Billings-Helena; (9) Minneapolis-New York (La Guardia and Kennedy Airports)-Newark. The authority is conditioned to preclude single-plane service between Anchorage and Portland and Seattle, and between Denver and Spokane.

Trans World Airlines—New segment: Minneapolis-New York (La Guardia and Kennedy Airports)-Newark.

United Air Lines—New segments: (1) Minneapolis-Portland/Seattle; (2) Spokane-Chicago-Rockford (O'Hare, Midway, and Rockford Airports).

Western Air Lines—New segments: (1) Salt Lake City-Billings/Spokane; (2) Minneapolis-Baltimore-Washington (National and Dulles Airports); (3) Anchorage-Minneapolis-Milwaukee-Baltimore-Washington (National and Dulles Airports); (4) Seattle-Portland-Spokane-Great Falls-Billings-Minneapolis-Milwaukee-Baltimore/Washington (National and Dulles Airports); (5) Minneapolis-New York (La Guardia and Kennedy Airports)/Newark/Philadelphia; (6) Billings-Helena.

Wien Air Alaska—New segments: (1) Portland-Seattle-Spokane-Missoula-Great Falls-Billings-Minneapolis-Milwaukee-Baltimore-Washington (National and Dulles Airports); (2) Anchorage-Minneapolis-Milwaukee-Baltimore-Washington (National and Dulles Airports).

In addition, the Board is proposing to award unrestricted authority to Continental Air Lines between Boise, on the one hand, and Portland, Seattle, and Spokane, on the other; to Western Air Lines between Boise and Seattle; and to any other fit, willing and able carrier, in any of the markets at issue.

The complete text of this order is available as noted below.

DATES: All interested persons having objections to the Board issuing an order making final the tentative findings and conclusions shall file, by October 5, 1979, a statement of objections, together with a summary of testimony, statistical data, and other material expected to be relied upon to support the stated objections. Such filings shall be served upon all parties listed below.

Additional Data: All further applicants are directed to file applications, motions to consolidate, illustrative service proposals, environmental evaluations, and estimates of fuel to be consumed in the first year no later than September 20, 1979.

ADDRESSES: Objections to the issuance of a final order, or additional data as described above, should be filed in Docket 36477, which we have entitled the *Boise-Portland/Seattle/Spokane Show-Cause Proceeding*. They should be addressed to the Dockets Section, Civil Aeronautics Board, Washington, D.C. 20428.

In addition, copies of such filings should be served on Alaska Airlines; USAir (formerly Allegheny Airlines); American Airlines; Braniff Airways; Continental Air Lines; Delta Air Lines; Eastern Air Lines; Frontier Airlines; Highes Airwest; National Airlines, Republic Airlines (formerly North Central Airlines); Northwest Airlines; Ozark Air Lines; Trans World Airlines; United Air Lines; Western Air Lines; Wien Air Alaska; City of Great Falls; Alaska Transportation Commission; Champion International Corporation; Seattle Parties; Spokane Parties; State of Minnesota; Minneapolis-Saint Paul Metropolitan Airports Commission; Missoula Area Chamber of Commerce; City of Missoula; Missoula County; Chamber of Commerce of Bozeman, Montana; State of Maryland; Control Data Corporation; the Great Falls Area Chamber of Commerce; the City of Boston; and the City of Boise.

FOR FURTHER INFORMATION CONTACT: Anne W. Stockvis, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, (202) 673-5354.

SUPPLEMENTARY INFORMATION: The complete text of Order 79-8-160 is available from the Distribution Section, Room 516, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 79-8-160 to that address.

By the Civil Aeronautics Board: August 28, 1979.

Phyllis T. Kaylor,
Secretary.

COMMISSION ON CIVIL RIGHTS

Maryland Advisory Committee; Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission in Civil Rights, that a planning meeting of the Maryland Advisory Committee (SAC) of the Commission will convene at 6:30 p.m. and will end at 10:00 p.m., on October 3, 1979, at The George Howard Building, 3450 Courthouse Drive, Ellicott City, Maryland 21043.

Persons wishing to attend this open meeting should contact the Committee Chairperson, or the Mid-Atlantic Regional Office of the Commission, 2120 L Street, N.W., Room 510, Washington, D.C. 20037.

The purpose of this meeting is for a discussion of civil rights issues with representatives of the Howard County Human Rights Commission and a review

V 4 4 / 1 7 3 SE 5 7 9 UMI

of the draft report on police handling of complaints of abuse in Baltimore.

This meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., August 30, 1979.

John I. Binkley,

Advisory Committee Management Officer.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Bureau of the Census

Census Advisory Committee on the Black Population for the 1980 Census; Public Meeting

Pursuant to the Federal Advisory Committee Act, as amended, 5 U.S.C., app. (1976), notice is hereby given that the Census Advisory Committee on the Black Population for the 1980 Census will convene on October 2, 1979, at 9:15 a.m. The Committee will meet in Room 2424, Federal Building 3, at the Bureau of the Census in Suitland, Maryland.

The Census Advisory Committee on the Black Population for the 1980 Census is composed of 21 members appointed by the Secretary of Commerce. It was established in October 1974 to advise the Director, Bureau of the Census, on such 1980 census planning elements as improving the accuracy of the population count, recommending subject content and tabulatins of special use to the black population, and expanding the dissemination of census results among present and potential users of census data in the black population.

The agenda for the meeting, which is scheduled to adjourn at 4:30 p.m., is: (1) Introductory remarks by the Director of the Census Bureau, (2) current status of 1980 census plans, (3) neighborhood statistics, (4) State data center programs, (5) Community Services Program update, (6) Affirmative Action Program report, (7) promotional plans for the 1980 census, (8) Committee discussion, and (9) Committee recommendations and plans for the next meeting.

The meeting will be open to the public and a brief period will be set aside for public comment and questions. Extensive questions or statements must be submitted in writing to the Committee Control Officer at least 3 days prior to the meeting.

Persons wishing further information concerning these meetings or who wish to submit written statements may contact the Committee Control Officer, Larry Lucas, Decennial Census Division, Bureau of the Census, Room 2747, Federal Building 3, Suitland, Maryland. (Mailing address: Washington, D.C. 20233). Telephone (301) 763-2050.

Dated: August 30, 1979.

Vincent P. Barabba,

Director, Bureau of the Census.

BILLING CODE 3510-07-M

Industry and Trade Administration

[Transmittal No. 263; Order No. 47-1, Amdt. 4]

Bureau of International Economic Policy and Research; Statement of Organization, Function and Delegation of Authority

ITA Organization and Function Order 47-1 of December 4, 1977, as amended (43 FR 12056, 43 FR 29344, 44 FR 31689, and 44 FR 39571) is hereby further amended as follows to reflect the reorganization of the Office of International Economic Research.

1. In *Section 5. Office of International Economic Research* is revised to read:

.01 The *Office of the Director* includes the *Director*, who shall conduct the Department's program of quantitative research and analysis of trade and international economic policy issues; conduct research on the U.S. international economic and competitive positions and on their domestic economic impact; produce trade and international economic forecasts and simulations; provide Secretarial officials with economic background and policy recommendations based on analyses and simulations; publish interpretative data and analyses; undertake a program of research to improve the accuracy of international economic methodologies; and service requests for trade and international economic information. The immediate office of the Director includes the *International Statistics Staff* which shall plan, develop, and implement a system of international economic statistics for advanced warning of international economic developments; ensure that international statistics used within the Office are of adequate quality; serve as consultants within the Office on the use of international statistics; advise on correct statistical procedures for international data; and publish the quarterly *International Economic Indicators*. The Director shall direct the following Divisions:

.02 The *International Economics Division* shall analyze international economic factors affecting U.S. trade and investment interests abroad; undertake special studies of foreign economic behavior and interrelationships; utilize econometric models concerned with forecasting and simulating the international economy; prepare analyses and recommendations based on simulations of the international economy; and alert policy officials to significant international economic developments.

.03 The *Trade Performance Division* shall analyze the U.S. trade share position; evaluate changes in U.S. trade performance compared to competitor nation performance; and prepare reports and policy recommendations based on assessment of the factors affecting the U.S. position. The Division shall perform its functions through the following subordinate units:

a. The *Comparative Analysis Branch* shall undertake a program of research and analysis into the U.S. market share position; analyze world trade flows and competitor nation exports; analyze and evaluate exchange rate changes, price changes and other factors affecting the comparative U.S. trade position; produce reports on global trade patterns and market shares; and maintain large-scale matrices of competitor nation trade behavior.

b. The *Trade Statistics Branch* shall maintain data on U.S. trade, produce compilations of trade data for comparative trade analyses; maintain automated data bases of trade statistics; publish a series of reports on U.S. trade statistics; and maintain trade data reference facilities.

.04 The *Trade Research Division* shall conduct policy-oriented research and analyses of U.S. foreign trade and shall be responsible for the forecasting of U.S. trade. The Division shall perform its functions through the following subordinate elements:

a. The *Quantitative Research Branch* shall conduct quantitative research into the short- and long-term factors affecting U.S. trade; develop and utilize a variety of econometric models for forecasting and simulating U.S. trade, including specific product and geographic groups; prepare forecasts and simulations of short- and long-term U.S. trade, including specialized forecasts and policy simulations for other parts of the Department; utilize quantitative techniques to estimate the effect of policy or economic variables on trade; and prepare policy analyses/recommendations based on the above.

b. The *Analytic Studies Branch* shall analyze trends and current developments in U.S. trade; conduct special studies on specific developments in U.S. trade; analyze historical trade data for changes in patterns, including specific regions or products; develop a system of monitoring current U.S. trade developments to alert policy officials; produce reports interpreting U.S. trade trends and developments; and maintain timely data packages and presentations for policy officials.

.05 The *Structural Research Division* shall conduct research into the fundamental structural factors affecting the international competitiveness of U.S. industry, to include the influence on structure and trade competitiveness of technology, investment, and productivity; conduct research into the impact of changes in world trade and trade policies on the domestic economy, including employment, income, and welfare effects; undertake a program of long term forecasting of the structural effects of trade and of U.S. competitiveness; conduct research into the effects of the U.S. competitiveness of major international developments, such as the emergence of newly-industralized economies; conduct research into the effect of global industrial and positive adjustment policies; and undertake special studies in these areas to evaluate specific U.S. policy alternatives.

Effective date: July 30, 1979.

Frank A. Weil,

Assistant Secretary for Industry and Trade.

Abraham Katz,

Deputy Assistant Secretary for International Economic Policy and Research.

[FR Doc. 79-27540 Filed 9-4-79; 8:45 am]

BILLING CODE 3510-25-M

Maritime Administration

[Docket No. S-646]

Notice of Application

Notice is hereby given that Cove Ships Inc., Wall Street Plaza, Suite No. 1630, New York, New York 10005, has filed an application dated August 17, 1979, with the Maritime Subsidy Board (the Board) pursuant to Title VI of the Merchant Marine Act, 1936, as amended (the Act), for an operating-differential subsidy contract, to expire December 31, 1979, unless extended, to operate the SS COVE SAILOR, 34,865 deadweight tons, in the carriage of bulk raw and processed agricultural commodities in the foreign commerce of the United States (U.S.) from ports in the U.S. to ports in the Union of Soviet Socialist Republics (U.S.S.R.), or other permissible ports of discharge. Dry and liquid bulk cargoes may be carried from the U.S.S.R. and other foreign ports inbound to U.S. ports during voyages subsidized for carriage of export bulk raw and processed agricultural commodities to the U.S.S.R., or other permissible ports of discharge.

Full details concerning the U.S.-U.S.S.R export bulk raw and processed agricultural commodities subsidy program, including terms, conditions and restrictions upon both the subsidized operators and vessels, appear in Title 46 of the Code of Federal Regulations, Part 294.

For the purposes of section 605(c) of the Act, it should be assumed that should the Board grant the requested approval, the vessel named above will engage in the described trade, on a full-time basis, during the indicated time period. Under such approval, each voyage must be approved for subsidy assistance prior to its commencement, and the Board will act on such request(s) as an administrative matter for which there is no requirement for further section 605(c) notice(s).

Any person having an interest in the granting of the application and who would contest a finding by the Board that the service now provided by vessels of U.S. registry for the carriage of cargoes previously specified is inadequate, must on or before September 28, 1979, notify the Board's Secretary, in writing, of his interest and of his position, and file a petition for leave to intervene in accordance with the Board's Rules of Practice and Procedure (46 CFR 201). Each such statement of interest and petition to intervene shall state whether a hearing is requested under section 605(c) of the Act, and, with as much specificity as possible, the facts that the intervenor would undertake to prove at such hearing.

In the event a hearing under section 605(c) of the Act is ordered to be held with respect to the subject application, the purpose of such hearing will be to receive evidence relevant to (1) whether the application herein described, with respect to the vessel to be operated in an essential service and serviced by citizens of the U.S., would be in addition to the existing service or services, and if so, whether the service already provided by vessels of U.S. registry is inadequate, and (2) whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated thereon.

If no request for hearing and petition for leave to intervene is received within the specified time, or if the Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Board will take such actions as may be deemed appropriate.

(Catalog Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidy (ODS)).

Dated: August 28, 1979.

Robert J. Patton, Jr.,

Acting Secretary.

BILLING CODE 3510-15-M

National Oceanic and Atmospheric Administration

Office of Coastal Zone Management; Receipt of Petition for Amendment of Rule

Notice is given that, on August 6, 1979, the National Oceanic and Atmospheric Administration (NOAA) received a petition for the amendment of a rule, as authorized by 5 U.S.C. 533(e), from the Coastal Zone Management Interaction Committee (COZMIC). Petitioner COZMIC described itself as a national organization of electric utilities and the Edison Electric Institute. COZMIC requests that NOAA amend certain regulations pertinent to the implementation of Section 307(c)(3)(A) of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1451, 1456(c)(3)(A)).

The cited section of the Act requires that any activity which requires a Federal license or permit and which affects land or water uses in the coastal zone of a State must be conducted in a manner consistent with the State's approved coastal zone management program (if there is an approved program). The pertinent regulations declare this consistency requirement to apply to any such activity for which an *initial* application for a Federal license or permit is made and, under certain circumstances, to any such activity for which a *renewal* application is made. With regard to a renewal application, COZMIC seeks to restrict the application of the consistency requirement to a renewal only if the "affected State demonstrates that changes in the construction or operation of this facility or activity will cause *new* land or water use coastal zone effects substantially different than those originally authorized" (emphasis supplied). The regulations appear in 15 CFR 930, 930.50, 930.22, 930.50-930.52 (44 Fed. Reg. 123, June 25, 1979, pgs. 37150, *et seq.*)

Pursuant to § 14.03 of NOAA Directive 21-24, effective June 1, 1979, the COZMIC petition has been referred to the Assistant Administrator for Coastal Zone Management for consideration. Pursuant to Section 14.06 of the Directive, the Assistant Administrator

must notify COZMIC of this decision to proceed or not to proceed with the amendment requested by COZMIC within 120 days of his receipt of the petition.

Questions with regard to this notice may be asked of Mr. Harry Feehan, Office of General Counsel, NOAA, 2001 Wisconsin Avenue, NW., Washington, D.C. 20235 (202–254–7512).

August 28, 1979.

M. P. Snidero,

Acting Assistant Administrator for Administration.

[FR Doc. 79–27469 Filed 9–4–79; 8:45 am]

BILLING CODE 3510–08–M

Receipt of Application for Permit

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:
a. Name, Dr. Jennifer Buckwald, Department of Physiology.
b. Address, University of California-Los Angeles, 760 Westwood Plaza, Los Angeles, California 90024.
2. Type of Permit: Scientific Research.
3. Name and Number of Animals: Northern elephant seals (*Mirounga angustirostris*), 60.
4. Type of Take: To mark with bleach to be able to identify and record individuals in order to study the vocalizations of Northern elephant seals.
5. Location of Activity: San Nicholas Island, California.
6. Period of Activity: One Year.

Concurrent with the publication of this notice in the **Federal Register** the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, on or before October 5, 1979. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C.; and
Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: August 30, 1979.

R. B. Brumsted,

Acting Director, Office of Marine Mammals and Endangered Species, National Marine Fisheries Service.

[FR Doc. 79–27583 Filed 9–4–79; 8:45 am]

BILLING CODE 3510–22–M

Permit Modification Request

Notice is hereby given that Dr. Kenneth S. Norris, University of California at Santa Cruz, has requested a modification to Permit No. 269, which was issued to him under the authority of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), on June 19, 1979.

Dr. Norris is requesting that three (3) spotted porpoises (*Stenella attenuata)* be authorized in lieu of three (3) of the fifteen (15) spinner dolphins (*Stenella longirostris)* which are authorized under Permit No. 269 to be captured and radio tagged. The procedures and techniques for the capture and tagging would be the same as described in the original permit application.

Concurrent with the publication of this notice in the **Federal Register** the Secretary of Commerce is forwarding copies of this request to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this modification request should be submittted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, on or before October 5, 1979. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular request would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this request are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documentation pertaining to the above modification request is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and
Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: August 30, 1979.

R. B. Brumsted,

Acting Director, Office of Marine Mammals/ Endangered Species, National Marine Fisheries Service.

BILLING CODE 3510–22–M

DEPARTMENT OF DEFENSE

Department of the Air Force

Coal-Fired Heating Plant: Intent to Prepare an Environmental Impact Statement and Scoping Meeting; Environmental Impact Analysis Process

The U.S. Air Force will be preparing an environmental impact statement on a new central heating plant for Malmstrom Air Force Base, Great Falls, Montana. This plant will be a coal-fired, high-temperature water facility replacing numerous existing individual natural gas-fired building heating units. The statement will consider other fuel alternatives and no-action alternative.

One public scoping meeting will be held to identify what are and what are not significant issues. Additionally an overview or preliminary findings of an air quality study will be presented. The meeting will be at 7:00 p.m. on 20 September 1979 at the Commission Chambers, Room 200, Civic Center, Great Falls, Montana 59401.

Interested parties that cannot attend the meeting are encouraged to submit comments and recommendations in writing.

For information concerning the proposed action and the environmental impact statement, contact Mr. Phillip E. Lammi, Chief, Environmental Planning Division, U.S. Air Force Regional Civil Engineer/Western Region, 630 Sansome Street; Room 1316, San Francisco, California, 94111, (Telephone 415–556–6439).

Carol M. Rose,

Air Force Federal Register Liaison Officer.

Operation of the PAVE PAWS Radar System at Beale Air Force Base, California; Public Hearing

An informal public hearing will be held for the purpose of soliciting comments from the public on the Draft Environmental Impact Statement (EIS) on Operation of the PAVE PAWS Radar System at Beale Air Force Base, California. The hearing is scheduled to be conducted on September 20, 1979 at 7:30 p.m. at Yuba County Veterans Memorial Community Center, Marysville, California.

The Draft EIS was filed with the Environmental Protection Agency on July 27, 1979. The statement considers the impacts of operating PAVE PAWS, a new surveillance radar to be used to detect, track and provide early warning of sea-launched ballistic missiles. A secondary purpose of the radar is to assist the USAF Spacetrack System by tracking objects that are orbiting the Earth.

The following procedures will apply during the hearing. Individual speakers will be limited to five minutes, with ten minutes allotted for a group spokesman. The time limit may be waived at the discretion of the presiding officer. There will be no relinquishing of time by one speaker to another. Written statements, in additon to or in lieu of oral presentations, will be accepted. Submit written communications as directed at the public hearing, or to the Deputy for Environment and Safety, Office of the Secretary of the Air Force (SAF/MIQ), Washington, D.C. 20330. Written statements must be received not later than October 2, 1979 in order to be included in the hearing record. For further information contact Lt. Col. Paul E. Radder, Jr., Deputy Commander 100th Combat Support Group, Beale AFB, CA 95903, Phone: (916) 634–2311.

Carol M. Rose,

Air Force Federal Register Liaison Officer.

Supersonic Flight Operations, Valentine Military Operations Area, Holloman AFB, N. Mex., Extension of Review Period; Draft Environmental Impact Statement

On August 3, 1979 the Environmental Protection Agency announced in the **Federal Register** that the Air Force had filed a Draft Environmental Impact Statement (EIS) on Supersonic Flight Operations, Valentine Military Operations Area (MOA). The proposed flights are in support of aircraft training operations at Holloman Air Force Base (AFB), New Mexico. The **Federal Register** notice stated that the 45-day review period for the Draft EIS was calculated from August 3, and would end on September 17, 1979.

In response to local request the Air Force hereby extends the review period until October 6, 1979.

FOR FURTHER INFORMATION CONTACT:
Capt. Bill Gauntt, Headquarters, Tactical Air Command (HQ TAC/DEEV), Langley AFB, VA 23665. Phone: 804–764–4430.

USAF Scientific Advisory Board; Meeting

August 28, 1979.

The USAF Scientific Advisory Board Ad Hoc Committee on Attack of Mobile Forces (Night/Adverse Weather) will meet on September 24 and 25, 1979 in the Pentagon. The meetings will start at 9:00 a.m. and adjourn at 5:00 p.m. each day.

The Committee will review the Air Force operational concepts to achieve this mission. The meetings will be closed to the public in accordance with section 522b(c), Title 5, United States Code, specifically subparagraph (2).

For further information contact the Scientific Advisory Board Secretariat at (202) 697–4648.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. 79–CERT–82]

American Cyanamid Co., Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Take notice that on August 10, 1979, American Cyanamid Company (American), Berdan Avenue, Wayne, New Jersey 07470, filed an application for certification of an eligible use of natural gas to displace fuel oil at its Pensacola Plant, Pensacola, Florida, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979) all as more fully set forth in the application on file with the Economic Regulatory Administration (ERA) and open to public inspection at the ERA, Docket Room 4126–A, 2000 M Street, N.W., Washington, D.C. 20461, from 8:30 a.m.–4:30 p.m., Monday through Friday, except Federal holidays.

In its application, American states that the volume of natural gas for which it requests certification is up to 3,000 Mcf per day and the eligible seller is Conecuh-Monroe Counties Gas District, P.O. Box 210, Evergreen, Alabama 36401. This natural gas will displace the use of approximately 20,000 gallons of No. 6 fuel oil (2.5% sulfur) per day and will be transported by United Gas Pipe Line Company, 700 Milam, P.O. Box 1478, Houston, Texas 77001.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Room 4126–A, 2000 M Street, N.W., Washington, D.C. 20461, Attention: Mr. Finn K. Neilsen, on or before September 17, 1979.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest, and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines an oral presentation is required, further notice will be given to American and any persons filing comments, and published in the **Federal Register.**

Issued in Washington, D.C., on August 28, 1979.

Doris J. Dewton,

Assistant Administrator, Office of Petroleum Operations, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Energy Information Administration

American Statistical Association Ad Hoc Committee on Energy Statistics; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given that the American Statistical Association's Ad Hoc Committee on Energy Statistics will meet with representatives of the Energy Information Administration (EIA) on Friday, September 21, 1979, in Room GE-045 of the James Forrestal Building located at 1000 Independence Avenue, S.W., Washington, D.C., from 9:00 a.m. to approximately 4:00 p.m.

The purpose of the meeting is to enable the EIA to utilize the American Statistical Association's Ad Hoc Committee on Energy Statistics to obtain advice on EIA programs and to benefit from the Ad Hoc Committee's expertise concerning other energy statistical matters.

The tentative agenda is as follows:

A. Opening remarks.
B. Progress reports on topics discussed at the May 4, 1979, meeting, including:
   1. Use of proprietary modes and model components
   2. Consistency and comparability of different data bases used in models
   3. Evaluating short-term forecasts
   4. Oil and Gas Information System (OGIS) validation
   5. Status of work on seasonal adjustment of EIA data
   6. Energy Emergency Management Information System
C. Major topics:
   1. EIA disclosure policies
   2. New initiatives to collect and analyze data on secondary stocks
   3. EIA policies and procedures for imputation of missing data, with special reference to domestic production and imports of crude petroleum
   4. Procedures for determining normal stock ranges and minimum acceptable levels of petroleum stocks
D. Planning for future meetings with EIA, and other Committee activities.

The meeting is open to the public. Any member of the public may file a written statement with EIA for forwarding to the committee, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should inform Mr. Bruce D. Dwyer, Acting Director, Office of Planning and Evaluation, EIA, (202) 633-8696, or Dr. Fred Leone, Executive Director of the American Statistical Association, (202) 393-3253, at least five days prior to the meeting and reasonable provision will be made to include their presentations on the agenda.

Subsequent to approval by the Committee, minutes and an executive summary of the meeting will be available for public review and copying at the Office of Planning and Evaluation, EIA, 12th and Pennsylvania Avenue, N.W., Room 6149, Mail Stop 4311, Washington, D.C. 20461 between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday.

Issued at Washington D.C. on August 30, 1979.

Albert H. Linden, Jr.,

Acting Administrator, Energy Information Administration.

Federal Energy Regulatory Commission

[Docket No. E-9408]

American Electric Power Service Corp.; Compliance Filing

August 28, 1979.

Take notice that by letter dated August 6, 1979, the American Electric Power Service Corporation (AEP), in accordance with ordering paragraph (A) (1) and (B) of Opinion No. 50 of the Commission, issued July 27, 1979, in the above Docket filed on behalf of Ohio Power Company and Appalachian Power Company, Indiana & Michigan Electric Company and Kentucky Power Company (the AEP Companies), five copies each of (a) Supplement No. 1, dated as of August 1, 1979, to Modification No. 3, dated as of April 1, 1975, to the Interconnection Agreement, dated July 6, 1951, as amended, among the AEP Companies and the undersigned, American Electirc Power Service Corporation, as agent, and (b) Certificate of Concurrence signed by each of the AEP Companies.

Any person desiring to be heard or to protest said filing should file a protest with the Federal Energy Commission, 825 North Capitol Street, N.W., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such protests should be filed on or before September 17, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-01-M

[Docket Nos. E-8187, E-8700, ER76-203 and ER76-238]

Boston Edison Co.; Order on Remand

Issued August 27, 1979.

On October 23, 1978, the United States Court of Appeals for the District of Columbia remanded the case of *Town of Norwood* v. *Federal Energy Regulatory Commission* [1] to this Commission. In its decision, the court required the Commission to determine whether the Town of Norwood, Massachusetts (Norwood) has been the subject of undue discrimination within the meaning of Section 205(b) of the Federal Power Act. In accordance with that opinion, we shall reopen the record in these dockets for purposes of making findings of fact and conclusions of law consistent with this order and the court's decision in this case as well as the cases of *Public Service Company of Indiana* v. *Federal Energy Regulatory Commission (PSCI)* [2] and *Borough of Chambersburg* v. *Federal Energy Regulatory Commission*.[3]

This case involves an array of facts and issues having their origins in four separate proceedings. Essentially, Norwood has desired to use transmission facilities of Boston Edison Company (Edison) in order to wheel power purchased from New England Power Company (NEPCO). Norwood seeks to discontinue purchasing wholesale power from Edison, its present supplier, and instead, purchase its requirements from NEPCO. In doing so however, Norwood desires to obtain the same low wheeling rate that Edison has provided to NEPCO in a contract relating to service for the Quincy-Weymouth area. Although the wheeling service provided to NEPCO for the Quincy-Weymouth area is substantially similar to the service Norwood has sought, Edison has offered to wheel for

[1] 587 F.2d 1306 (D.C. Cir. 1978).
[2] 575 F.2d 1204 (7th Cir. 1978).
[3] 580 F.2d 573 (D.C. Cir. 1978).

Norwood only at a rate substantially higher than that provided for in the Edison-NEPCO contract. Norwood thus argues that it has been unduly discriminated against and that this discrimination constitutes a violation of § 205(b) of the Federal Power act.

On May 21, 1976, the presiding administrative law judge issued an initial decision rejecting Norwood's claim that the wheeling rate in effect between Edison and NEPCO should be provided to Norwood. The judge reasoned that, since Norwood had not shown the Edison-NEPCO transmission rate to be a compensatory one, he could not order Edison to wheel at such an unduly low rate. Various parties took exception to the judge's initial decision and, on December 7, 1976, the Commission [4] issued its order in this case.[5] The Commission agreed with the presiding judge's determination that the Edison-NEPCO wheeling contract was noncompensatory. The Commission ruled, however, that the contract was insulated from any alteration by virtue of the *Sierra-Mobile* doctrine.[6] Due to the contract's fixed-rate nature, the Commission held that Edison could not unilaterally increase the wheeling rate absent a showing that the contract "might impair the financial ability of the public utility to continue its service, cast upon other customers an excessive burden, or be unduly discriminatory." [7]

The FPC also refused to extend the low Edison-NEPCO wheeling rate to Norwood since this would require the Commission to set jurisdictional rates below a just and reasonable level. In April 1977, the Commission denied rehearing.[8]

The Town of Norwood subsequently appealed from the Commission's orders and on October 23, 1978, the United States Court of Appeals for the District of Columbia handed down its decision. The Court ruled that Norwood's claims of discrimination could not be dismissed merely because the Edison-NEPCO contract was protected by the *Sierra-Mobile* doctrine. Such an approach, the court argued, "comes altogether too close to reading Section 205(b) out of the Federal Power Act in cases where there is a *Sierra-Mobile* contract." [9] The Court held that where one customer is discriminated against in favor of another customer of the same class, that discrimination is not justified merely because one party has a fixed-rate contract while the other does not. The Court concluded that the Commission must look beyond the mere existence of a contract in order to determine whether a disparity in rates is justified. The Court in *Norwood* as well as the Seventh Circuit Court of Appeals [10] have pointed out various factors at which this Commission may look to determine whether a disparity in rates resulting from one or more customers having a fixed-rate contract is justified. *Norwood* suggests that we consider the negotiations of the parties in which they bargained for their respecting contractual terms:

> The process of bargaining over contractual terms is necessarily a technique for risk allocation. Where several customers have bargained with a utility over a period of time, it is quite likely that the contracts which result will differ. Customers' needs may vary, as well as their general level of risk aversion and the types of risk to which they are most averse. They may have different projections about likely cost changes, technological advances, or demand fluctuations. And their bargaining power is likely to vary as well.[11]

PSCI additionally suggests that this Commission may consider among other things, (1) the length of the contract "since discounts can be justified on the basis of long-term requirements arrangements," [12] (2) the services that might be provided or excluded by either the buyer or seller, or (3) "any factor that might explain why a buyer did not bargain for a contract with a *Sierra-Mobile* clause in it when other comparable utilities successfully obtained such a clause.[13] *Norwood* also requires us to consider any allegations which go to the fairness and good faith of the parties at the contract formation stage.

Once a customer alleging § 205(b) undue discrimination shows that a substantial disparity in rates exists between customers of the same class, it then becomes incumbent on the utility to justify this disparity on the basis of factual differences. The Commission has already found that a substantial disparity exists between the Edison-NEPCO wheeling rate and that rate offered by Edison to Norwood. Norwood has also alleged that the Quincy-Weymouth contract was the result of a prohibited undue preference. We shall therefore reopen the record in order to allow Edison the opportunity to justify the disparity in rates and to answer the allegations of undue preference.

Related Issues

In *Norwood* v. *FERC, supra*, the town sought review of a number of issues other than § 205(b) undue discrimination. These issues related to (1) Norwood's failure to give Edison proper notice of termination of service, (2) Edison's computation of the adverse impacts that would flow from termination of Edison's requirements contract with Norwood, (3) Norwood's accountability for any of these adverse impacts and (4) Edison's willingness to wheel power for Norwood. The Circuit Court declined to review these issues since our determination as to any § 205(b) violation could alter or moot these and other questions. We shall therefore order the presiding judge to reconsider these questions in light of his or her findings of fact or conclusions of law on the issues of § 205(b) undue discrimination.

The Commission orders

(A) The record in these dockets is reopened for purposes of establishing findings of fact and conclusions of law as required by this order.

(B) The Chief Administrative Law Judge shall designate a presiding administrative law judge to convene a conference in this case to be held within 15 days of issuance of this order. The designated law judge is authorized to set procedural dates for hearing on the issue of Section 205(b) undue discrimination and related issues and to rule upon all motions (except motions to consolidate and sever any motions to dismiss) as provided for in the Commission's Rules of Practice and Procedure.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Section 402(a) of the DOE Act and by the Federal Power Act, particularly Sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the Regulations under the Federal Power Act (18 CFR, Chapter I), a hearing shall be held to determine whether Boston Edison has unduly discriminated against the Town of Norwood in violation of § 205(b) of the Federal Power Act, and further, to inquire into related issues as set forth in this order.

(D) The Secretary shall promptly publish this order in the **Federal Register**.

BILLING CODE 6450-01-M

[Docket No. CP73-329]

Chattanooga Gas Co.; Proposed PGA Rate Adjustment

August 28, 1979.

Take notice that on August 10, 1979, Chattanooga Gas Company, A Division of Jupiter Industries, Inc., (Chattanooga) tendered for filing proposed changes to Original Volume No. 1 of its FERC Gas Tariff to be effective on July 1, 1979 consisting of the following revised tariff sheet:

Substitute Thirty Fourth Revised Tariff Sheet No. 6

The Substitute Thirty Fourth Revised Tariff Sheet No. 6 reflects a current increase in the LNG rates of 50.0 cents per MMBTU and a cumulative increase of $2.067 per MMBTU.

Chattanooga originally filed its semi-annual PGA Rate adjustment with the Commission on July 9, 1979. However, East Tennessee filed revised tariff sheets on July 25, 1979. The revised tariff sheets filed by East Tennessee are based upon revised rates filed by Tennessee Gas Pipeline Company to reflect the elimination of costs and volumes associated with gas purchases not flowing by July 1, 1979 and the elimination of costs from producers and pipeline suppliers not authorized by the Commission to charge Tennessee on or before July 1, 1979. Moreover, East Tennessee's May 31, 1979 filing failed to reflect certain transportation revenues which East Tennessee received during the period October 1, 1978 through March 31, 1979. Therefore, Chattanooga files this revision to its originally July 1, 1979 PGA filing to reflect the effect of East Tennessee's latest revision.

As noted above, the Proposed effective date of Chattanooga's rate change is July 1, 1979. Sections 221.(c) and 24.8(d) require Chattanooga to file any propsed rate change pursuant to those Sections at least forty-five days prior to the Effective Date of Adjustment. However, for good cause shown, Chattanooga respectfully requests that the Commission grant waiver of the forty-five day notice requirement in order that the proposed rate change will become effective July 1, 1979, as proposed.

Chattanooga states that copies of the filing have been mailed to all of its jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 13, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket No. GP79-108]

State of New Mexico, Section 108 NGPA Determination El Paso Natural Gas Co., Flanningam, No. 1 Well, JD79-12827; Preliminary Finding by State of New Mexico

Issued August 27, 1979.

On July 13, 1979, the Commission received notice from the New Mexico Oil Conservation Division that the Flanningam No. 1 well has been designated as a "seasonally affected" stripper well under § 271.804(e) of the Commission's interim regulations implementing the Natural Gas Policy Act of 1978 (NGPA). The Commission published notice of this designation on July 24, 1979.

Under § 271.804(e)(1), a well may be designated as "seasonally affected" at the *same time* it receives a section 108 determination as a stripper well. Alternatively, under § 271.804(e)(2), a well may be designated as "seasonally affected" *subsequent* to receiving a determination as a stripper well. In no case, however, do the regulations provide that a well may be designated as "seasonally affected" *prior* to receiving a determination as a stripper well.

With respect to the well in question, the jurisdictional agency submitted to the Commission a notice of determination that this well qualifies as a stripper well on April 18, 1979. This notice purported to establish maximum efficient rate of flow based on 12-month production records. Such records, however, indicated that the well's average production for the 12 months was in excess of 60 Mcf per production day. Accordingly, the notice of determination was returned to the jurisidictional agency on May 31, 1979, for deferral under § 271.804(d). A subsequent notice of determination for the well has not been submitted by the agency.

Accordingly, the well in question has not previously received a determination that it qualifies as a stripper well, nor is such a determination before the Commission at this time. Therefore, the designation of this well as a seasonally affected stripper well is improper at this time.

On the basis of the data submitted with this designation, the Commission makes a preliminary finding, pursuant to 18 CFR 271.806(b) and 275.202 (a)(1)(i), that the designation submitted by the State of New Mexico Oil Conservation Division that the above-named well qualifies as a seasonally affected well is not supported by substantial evidence.

By direction of the Commission.
Kenneth F. Plumb,
Secretary.
[FR Doc. 79-27500 Filed 9-4-79; 8:45 am]
BILLING CODE 6450-01-M

[Docket No. GP79-107]

State of New Mexico, § 108 NGPA Determination, El Paso Natural Gas Co., San Juan 27-5 Unit Well #110, JD79-12375; Preliminary Finding Regarding Determination by State of New Mexico

Issued August 24, 1979.

On July 12, 1979, the Commission received notice from the New Mexico Oil Conservation Division that the San Juan 27-5 Unit well #110, which has previously been determined to qualify as a stripper well [1] under section 108 of the Natural Gas Policy Act of 1978 (NGPA), has been designated as a "seasonally affected" well under § 271.804(e) of the Commission's interim regulations. The Commission published notice of this designation on July 23, 1979.

Section 271.804(e)(2) provides that if at any time subsequent to a final determination of stripper well status, the operator acquires production reports for a period of 24 consecutive months which demonstrate that the well is "seasonally affected", he may file with the jurisdictional agency for a designation as a seasonally affected well. Section 271.804(e)(1) defines a seasonally affected well as one which is "subject to seasonal fluctuations which temporarily increase average production above 60 Mcf per production day," and further provides that a jurisdictional agency shall grant a designation that a well is seasonally affected "only if it finds that the seasonal fluctuations *have not* and cannot reasonably be expected to increase production levels above an average of 60 Mcf per production day for *any* 12-month period." (emphasis added)

[1] The well was determined by the jurisdictional agency to qualify as a stripper well on May 25, 1979 and the Commission was notified of this determination on May 30, 1979. The Commission's 45-day review period expired on July 15, 1979.

The data submitted with this designation indicate that average production during the first 12 months of the 24-month period was 107.05 Mcf per production day. Accordingly, the well does not qualify as a seasonally affected well under § 271.804.

On the basis of the records submitted with this designation, the Commission makes a preliminary finding, pursuant to 18 CFR § 271.806(b) and 275.202 (a)(1)(i), that the designation submitted by the state of New Mexico Oil Conservation Division that the above-named well qualifies as a seasonally affected well is not supported by substantial evidence.

By direction of the Commission.
Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket No. ER79-612]

Iowa Power & Light Co.; Rate Schedule Filing

August 20, 1979.

The filing Company submits the following: Take notice that Iowa Power and Light Company ("Iowa Power"), on August 24, 1979, tendered for filing proposed changes in its Docket No. ER79-148, which sets forth rates for wholesale electric service to Montezuma Municipal Light and Power, Montezuma, Iowa ("City").

Proposed Supplement No. 11 to Docket No. ER79-148 provides for an increased capacity charge for base load power. Proposed Supplement No. 12 provides for an increased capacity charge for equalization power. These changes are needed to conform to increased costs of added capacity and changes in the Mid-Continent Area Power Pool rates.

Iowa Power requests that the Commission waive its prior notice requirements and accept Proposed Supplement Nos. 11 and 12 for filing with a retroactive effective date of June 1, 1979. Iowa Power states that copies of the filing have been served upon the City and the Iowa State Commerce Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 18, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

Iowa Power & Light Co., Rate Schedule Filing

August 28, 1979.

The filing Company submits the following: Take notice that Iowa Power and Light Company ("Iowa Power"), on August 24, 1979, tendered for filing proposed changes in its FERC Rate Schedule No. 45, which sets forth rates for wholesale electric service to Indianola Waterworks and Electric Light and Power Board of Trustees.

Proposed Supplement No. 17 to Rate Schedule No. 45 provides for an increased capacity charge for base load power. Proposed Supplement No. 18 provides for an increased capacity charge for equalization power. These changes are needed to conform to increased costs of added capacity and changes in the Mid-Continent Area Power Pool rates.

Iowa Power requests that the Commission waive its prior notice requirements and accept Proposed Supplement Nos. 17 and 18 for filing with a retroactive effective date of June 1, 1979. Iowa Power states that copies of the filing have been served upon the City and the Iowa State Commerce Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 18, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Justin T. Rogers; application

August 29, 1979.

Take notice that Justin T. Rogers on July 11, 1979, filed an application pursuant to Section 305(b) of the Federal Power Act to hold the following positions:

Director, Pennsylvania Power Company, Public Utility.
Executive Vice President, Ohio Edison Company, Public Utility.
Director, Ohio Edison Company, Public Utility.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 18, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. ES79-57]

The Kansas Power and Light Co., Application

August 29, 1979.

Take notice that on August 10, 1979, The Kansas Power and Light Company (Applicant) filed an application seeking authority pursuant to Section 204 of the Federal Power Act to issue up to $70,000,000 in the aggregate principal amount of short-term, unsecured promissory notes in the form of commercial paper, and authorizing Applicant to issue said notes from and after October 1, 1979, until and on

V 4 4 / 1 7 3 S E 5 7 9 UMI

October 31, 1980, with a final maturity date for any of said notes of not later than October 31, 1981.

Applicant is incorporated under the laws of the State of Kansas with its principal business office at Topeka, Kansas.

The interest rate applicable to the commercial paper promissory notes will be, in the case of notes issued to commercial paper dealers, the market rate (or discount rate) at the date of issuance for commercial paper or comparable quality and of the particular maturity sold to commercial paper dealers, and in the case of commercial paper placed directly with regular purchasers of such commercial paper for their own accounts, the market rate (or discount rate) at the date of issuance for commercial paper of comparable quality and of the particular maturity placed directly by the issuer thereof. Applicant contemplates the issuance of promissory notes and "roll-over" of commercial paper promissory notes, at any time and from time to time until October 31, 1980, each of such notes to have a maturity date of not later than October 31, 1981.

The proceeds will be used to finance in part Applicant's construction program to October 31, 1980. The authorization to issue up to $70,000,000 and the authorization of Applicant to issue said notes not later than October 31, 1980, with final maturities of said notes not later than October 31, 1981, will allow Applicant more freedom in selecting the appropriate times under market conditions to fund its short-term debt.

Any person desiring to be heard or to make any protest with reference to the application should, on or before September 14, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions or protests in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). The application is on file with the Commission and is available for public inspection.

BILLING CODE 6450-01-M

[Docket No. ES79-58

Montana-Dakota Utilities Co.; Application

August 29, 1979.

Take notice that on August 15, 1979, Montana-Dakota Utilities Company (Applicant) filed an application seeking an order pursuant to Section 204 of the Federal Power Act authorizing the issuance of 850,000 additional shares of Common Stock. Applicant is incorporated under the laws of Delaware with its principal business office at Bismarck, North Dakota. It is engaged in the natural gas and electric business in the States of Minnesota, Montana, North Dakota, South Dakota and Wyoming.

The Applicant proposes to issue 850,000 shares of Common Stock, par value $10, in accordance with the Commission's Regulations under the Federal Power Act. The Company presently has issued and outstanding 5,459,476 shares of Common Stock with the par value of $10 per share.

The net proceeds from the issuance and sale of the Common Stock are to be used for the Applicant's 1979 Construction Program including the repayment of short-term borrowings incurred for that purpose.

Any person desiring to be heard or to make any protest with reference to said application should, on or before September 17, 1979, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to the proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

BILLING CODE 6450-01-M

[Docket Nos., RP71-16 (PGA79-3) and Docket No. RP72-140 (PGA79-02)]

Midwestern Gas Transmission Co. and Great Lakes Gas Transmission Co.; Pipeline Rates: Order Accepting Tariff Sheets for Filing, Permitting Rate Increase To Become Effective, and Granting Interventions

Issued August 24, 1979.

On July 12, 1979, the Canadian Government through its Privy Council established a new price for natural gas exports from Canada to the United States. The new border price is $2.80 (U.S.) per MMBtu, or 50 cents per MMBtu higher than the previous rate. Midwestern Gas Transmission Company (Midwestern) and Great Lakes Gas Transmission Company (Great Lakes) seek to flow through the Canadian price increase to their U.S. customers.

Effective October 1, 1977, the Secretary of Energy was vested with jurisdiction over Section 3 of the Natural Gas Act, 15 U.S.C. § 717(b), concerning the importation and exportation of natual gas. The Secretary has delegated certain specific Section 3 authority to the Administrator jurisdiction over " the price proposed to be charged at the point of importation or exportation".

Pursuant to this authority and upon application, the ERA issued on August 10, 1979, in ERA Docket No. 79-17-NG, *et al.*, an interim order authorizing Midwestern and Great Lakes, among others, to continue to import gas from Canada at the increased border price. The temporarry authorization became effective August 11, 1979, "pending final findings of fact after conclusion of the comment period." (ERA order, mineo at 4). The Commission takes notice of the fact that by notice issued August 10, 1979, the ERA set August 20, 1979 as the deadline for filing of comments.

On July 25, 1979, Midwestern filed a proposed PGA rate increase reflecting in its rates the scheduled increase in the Canadian border price. [1] It requests an August 11, 1979, effective date to coincide with the change in the border price. Acceptance of the filing will result in an annual increase of approximately $57 million. Because a 30 day notice period was provided by the Canadian government, Midwestern states it was unable to prepare and file its PGA increase with the Commission within the 30-day statutory notice period. Midwestern further states that under the current PGA regulations and its tariff it is only permitted to file for PGA rate adjustments on January 1 and July 1 of each year and that, without waiver of the regulations and its tariff permitting the August 11, 1979, effective date, the new Canadian border price will result in undue hardship. Midwestern states that no customers opposed the requested waivers.

On July 20, 1979, as amended July 25, 1979, Great Lakes filed a similar PGA rate request. [2] Great Lakes now seeks a September 1, 1979, effective date which would require waiver of its tariff and the Commission's regulations. [3] Great Lakes is now permitted to file PGA rate adjustments on May 1 and November 1 of each year.

On August 8, 1979, Wisconsin Gas Company (Wisconsin Gas) filed a petition to intervene in Docket No. RP71-16 (PGA79-3). On August 10, 1979, a joint petition to intervene was filed by Northern States Power Company Wisconsin (NSP Wisconsin) and Northern States Power Company Minnesota (NSP Minnesota) in that docket. All have demonstrated an interest in this proceeding warranting their participation and accordingly their petitions shall be granted.

NSP Wisconsin and NSP Minnesota fully support Midwestern's proposed effective date of August 11. They point out that refusal to permit the tracking of the Canadian increase will only enlarge the economic burden which ultimately will be imposed on the consumer. Also, they point out that deferral of the increase until Midwestern's next PGA filing on January 1, 1980, will impose cost increases at a time when substantial volumes are being used. Wisconsin Gas believes that a waiver should be granted but requests that Midwestern be given a September 1, 1979, effective date.

In view of the financial hardship that would be placed on Midwestern and Great Lakes if the proposed increases are not permitted to become effective on the requested dates and the substantial carrying charges that would have to be recouped from the companies' customers when their next regularly scheduled PGA filing is made, the Commission finds that good cause exists to grant waiver of § 154.38(d)(4)(iv)(a) of the Commission's regulations in order to allow these rate increases to become effective on the proposed effective dates. Accordingly, in view of this fact and the ERA's interim authorization and upon a review of the filings, the Commission finds, subject to further order of the ERA, that it is appropriate and in the public interest to permit these rates to become effective on the proposed dates.

The Commission orders:

(A) Subject to the ERA's grant of permanent authority to import natural gas from Canada at the new border price of $2.80 (U.S.) per MMBtu, Midwestern's revised tariff sheet filed July 25, 1979, is accepted for filing and permitted to become effective August 11, 1979.

(B) Subject to the ERA's grant of permanent authority to import natural gas from Canada at the new border price of $2.80 (U.S.) per MMBtu, Great Lakes' revised tariff sheet filed July 20, 1979, is accepted for filing and permitted to become effective September 1, 1979.

(C) Pursuant to § 154.51 of the Commission's regulations, and for good cause shown, waiver of the 30-day notice requirement is granted to permit the rates in Paragraphs (A) and (B) to go into effect on their proposed effective dates.

(D) For good cause shown, waiver of § 154.38(d)(4)(iv)(a) is granted.

(E) The petitioners to intervene listed below shall be permitted to intervene in this proceeding subject to the Commission's rules and regulations; *Provided*, however, that the participation of the intervenors shall be limited to matters affecting asserted rights and interests specifically set forth in the petitions to intervene; and *Provided*, further, that the admission of such intervenors shall be construed as recognition that they might be aggrieved by any order entered in this proceeding.

(F) The Secretary shall cause prompt publication of this order in the **Federal Register.**

By the Commission.

[Docket No. RP74-100 (PGA79-4)]

National Fuel Gas Corp.; Proposed PGA Rate Adjustment

August 28, 1979.

Take notice that on August 16, 1979, National Fuel Gas Supply Corporation (National) tendered for filing a proposal for relief from the requirement of filing revised tariff sheets to be effective August 1, 1979, as directed by letter order dated August 2, 1979.

National states that this proposal is in the public interest because the rate revision would result in a rate reduction of only .11¢ per Mcf. Increases that will occur September 1, 1979, but will not be included in National's rates until February 1, 1980, amount to approximately 9.7¢ per Mcf. Additionally, National's customers have used the originally filed rates.

It is stated that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 13, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants party to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER79-611]

Niagara Mohawk Power Corp.; Tariff Revision

August 28, 1979.

The filing Company submits the following:

Take notice that Niagara Mohawk Power Corporation (Niagara) on August 24, 1979, tendered for filing as a rate schedule, an agreement between Niagara and the Power Authority of the State of New York (PASNY) dated April 27, 1979.

Niagara presently has on file an agreement with PASNY dated January 15, 1963, that is designated as Niagara's Rate Schedule FPC No. 22. The new agreement is being submitted as a supplement to the existing agreement.

Niagara requests waiver of the Commission's notice requirements to allow September 1, 1979 to become the effective date.

According to Niagara copies of this filing were served upon PASNY.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street, N.E., Washington, D.C. 20426, in accordance with paragraphs 1.8 and 1.10 of the Commission's rules or practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 18, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the

BILLING CODE 6450-01-M

[Docket No. RP74-72]

Northwest Pipeline Corp.; Change in Rates Pursuant to Demand Charge Credit Adjustment

August 28, 1979.

Take notice that Northwest Pipeline Corporation, on August 16, 1979 tendered for filing proposed changes in its FERC Gas Tariff, Original Volume No. 1, to compensate Northwest for demand charge credits given to certain of its customers due to curtailment of firm contract obligations because of gas supply deficiency.

The notice of change in rates is being filed pursuant to the Commission's Order issued March 29, 1974, at Docket No. RP74-72 and Article 13.4 of Northwest's FERC Gas Tariff, Original Volume No. 1. The change in rates will result in a net increase of .001¢ per therm for Rate Schedules CDL-1, DS-1 and PL-1. As more fully explained in the instant filing the demand charge credit adjustment reflected on Northwest's Statement of Rates is zero.

Northwest is concurrently filing a notice of change in rates applicable to Article 16, Purchased Gas Cost Adjustment Provision contained in its Original Volume No. 1 Tariff. Both rate adjustments are reflected on the tendered Substitute Twenty-third Revised Sheet No. 10 which is proposed to become effective October 1, 1979.

Copies of this filing have been served upon Northwest's jurisdictional customers and affected state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the FERC, 825 North Capitol Street, Washington, D.C. 20426, in accordance with § 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 13, 1979. Protests will be considered by the Commission in determining the appropriate actions to be taken, but will not serve to make protestants parties to the proceeding. Any persons wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-01-M

[Docket No. CP76-104]

Pacific Interstate Transmission Co.; Proposed Changes in FERC Gas Tariff Pursuant To Purchased Gas Cost Adjustment Provision

August 28, 1979.

Take notice that Pacific Interstate Transmission Company (Pacific Interstate) on August 15, 1979 tendered for filing as part of its FERC Gas Tariff, Original Volume No. 2, the following sheets:

Twelfth Revised Sheet No. 4
Ninth Revised Sheet No. 5

Pacific Interstate states that these tariff sheets are issued pursuant to the Purchased Gas Cost Adjustment (PGCA) Provision as set forth in Section 16 of the General Terms and Conditions of its FERC Gas Tariff, Original Volume No. 2. The proposed effective date of both of these tendered tariff sheets and the rates reflected thereon is October 1, 1979.

Pacific Interstate states that the above tendered tariff sheets reflect a proposed October 1, 1979 Pacific Interstate Rate Schedule S-G-1 commodity rate of 183.96¢ per decatherm, an increase of 24.17¢ from the 159.79¢ per decatherm rate effective April 1, 1979, the date of the last S-G-1 commodity rate change and that such increase reflects a Current Gas Cost Adjustment and a change in the Surcharge Adjustment.

Pacific Interstate states that the Current Gas Cost Adjustment is based on an annualized gas cost increase of $104,717 and that the Surcharge Adjustment is designed to amortize, over a six-month period beginning October 1, 1979, an amount of $76,309, which is the amount in Pacific Interstate's Unrecovered Purchased Gas Cost Account at June 30, 1979.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before Sept. 13, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

BILLING CODE 6450-01-M

[Docket Nos. E-8586 and E-8587]

Public Service Co. of Indiana, Inc.; Order on Remand

Issued: August 27, 1979.

On April 27, 1978, the United States Court of Appeals for the Seventh Circuit affirmed in part, reversed and remanded in part Commission Opinion Nos. 783 and 783-A issued in *Public Service Company of Indiana*, Docket Nos. E-8586 and E-8587.[1] Specifically, the court remanded to this Commission the question of whether the rates proposed by PSCI for service to the City of Frankfort, Indiana violate Section 205(b) of the Federal Power Act. In accordance with that opinion, we shall order the record reopened in these dockets and direct the presiding administrative law judge to make certain findings of fact and conclusions of law consistent with this Order and the Circuit Court's decision in this case as well as the cases of *Borough of Chambersberg* v. *Federal Energy Regulatory Commission* [2] and *Town of Norwood* v. *Federal Energy Regulatory Commission*.[3]

On January 8, 1974, PSCI tendered for filing a rate schedule purporting to increase the rates for firm power service to five interconnected municipalities—Crawfordsville, Peru, Washington, Loganport and Frankfort, Indiana (Cities). The proposed filing would have resulted in an aggregate annual increase in the power costs to the five municipal systems of $835,000. The filing was assigned Docket No. E-8587.[4]

On March 7, 1974, the Commission [5] issued an order in consolidated Docket Nos. E-8586 and E-8587, suspending PSCI's rates to cities for five months, those rates to become effective, subject to refund, on October 15, 1974.[6] In that order, the Commission held that the contracts governing service to the cities of Crawfordsville, Washington, Peru and Logansport, Indiana, contained fixed-rate provisions, which under the authority of the *Sierra-Mobile* doctrine,[7] prohibited unilateral attempts by PSCI to alter the applicable wholesale rates. Accordingly, PSCI's filings with respect to these cities were rejected. The contract governing service to the city of Frankfort, however, was found to contain a *Memphis* clause [8] which permitted the filing of a unilateral rate increase, and the proposed rates as applied to Frankfort were permitted to become effective, subject to refund, and set for hearing under Section 205 of the Federal Power Act. PSCI's proferred rates to the other four cities were also set for investigation under Section 206(a) of the Act for purposes of determining whether their contractualy-fixed rates were "so low as to adversely affect the public interest." [9]

On March 10, 1976, an initial decision was handed down. The Presiding Administrative Law Judge essentially approved PSCI's proposed rate increase to Frankfort and the other interconnected cities, holding that the fixed-rate contracts of the four cities violated Section 206. On November 10, 1976, the Commission issued Opinion No. 783 which disallowed in part PSCI's proposed rate increase and reversed the judge's ruling with regard to the fixed-rate contracts held by the four cities.[10] The FPC felt that this Commission was "legally prohibited from depriving the *Sierra* cities of contractual protection" based on the record in this case.[11] Since Frankfort's rate increase was based on the presiding judge's establishment of "just and reasonable" rates for service to that city, the Commission declined to extend a *Sierra* protection to Frankfort based on the theory that other wholesale customers pay lower rates to PSCI. The Commission therefore held that, under Section 206(a), the fixed rate contracts to the four *Sierra* cities were not contrary to the public interest merely because of "a *de facto* discriminatory impact resulting from PSCI's lawful exercise of its contractual right to seek a just and reasonable rate for service to Frankfort".[12]

Based upon *St. Michaels Utilities Commission* v. *F.P.C.*,[13] the Commission held that a rate differential could exist between members of the same class if it were predicated upon differences in facts.[14] The Commission conceded that a substantial disparity existed between the rates of Frankfort and the other four interconnected Cities. The FPC held, however, that the existence of a *Sierra* protection for the four Cities constituted enough of a factual difference to justify the rate differential between the Cities and Frankfort within the meaning of *St. Michaels*. The Commission thus concluded that, to the extent that PSCI had shown that its proferred rate increase to Frankfort was necessary to recover its cost of service and a fair return, the increase had to be approved as lawful unter the Act.

On Appeal of our rulings in Opinion Nos. 783 and 783-A, the United States Court of Appeals for the Seventh Circuit affirmed in part and remanded in part with regard to the discrimination issues. The Court affirmed the Commission's determination that there was no violation of Section 206. Based on the Commission's finding that the *Mobile-Sierra* burden had not been met, the Court affirmed the policy expressed in *Mobile* that fixed-rate contracts generally should be enforced absent a very clear showing of injury to the public interest. However, the Circuit Court held that an allegation of discrimination under Section 205(b) cannot be dismissed merely because some members of a class of customers have fixed-rate contracts while others do not. Such a factual difference, by itself, is not sufficient to justify a disparity in rates. The Commission must look beyond the mere existence of a contract to find that a rate disparity is justified.

The Seventh Circuit, as well as the U.S. Court of Appeals for the District of Columbia [15] have addressed the question of what factors should be considered in a hearing on undue discrimination under Section 205(b). The Seventh Circuit has suggested that this Commission consider, among other things, (1) the length of a contract "since discounts can be justified on the basis of long-term requirements arrangements," [16] (2) the services that might be provided or excluded by either the buyer or seller, or (3) "any factor that might explain why a buyer did not bargain for a contract with a *Sierra-Mobile* clause in it when other comparable utilities successfully obtained such a clause.[17] The D.C. Circuit opinion additionally requires that, in reviewing a challenge of undue discrimination, the Commission must consider allegations which go to the fairness and good faith of the parties at the contract formation stage. If no impropriety is found, the customer may be required to live with its improvidently-incurred situation. The

[3] 587 F. 2d 1306 (D.C. Cir. 1978).

[4] PSCI also filed on that date proposed rate increases for its other municipal customers, including Hoosier Energy Division of the Indiana Statewide Rural Electric Cooperative, Inc. (Hoosier), Wabash Valley Power Association (Wabash) and the Indiana Municipal Electric Association (IMEA). The filing relating to Hoosier was assigned Docket No. E-8586. The other rate filings, including Cities, were assigned Docket No. E-8587. All filings were consolidated on March 7, 1974. See Order Suspending Proposed Rate Increases, Setting Matter for Hearing, Instituting an Investigation under Section 206, consolidating Proceedings and Permitting Intervention, *Public Service Company of Indiana, Inc.*, Docket No. E-8586 and E-8587 (issued March 7, 1974).

[5] The "Commission" when used in the context of an action taken prior to October 1, 1977, refers to the FPC; when used otherwise, the reference is to the FERC.

[6] The Hoosier rate increase was suspended for one day, to become effective March 10, 1974, subject to refund. The proposed rates to Wabash and IMEA were suspended for five months and became effective subject to refund, on October 15, 1974. These rate schedules were not pertinent to this order.

[15] *Norwood*, *supra*.

[16] *PSCI*, p. 1212, fn. 12.

[17] *Ibid.*

Court in *Norwood* delineated a number of factors which might justify a rate differential for purposes of Section 205(b). As stated by the Court:

> The process of bargaining over contractual terms is necessarily a technique for risk allocation. Where several customers have bargained with a utility over a period of time, it is quite likely that the contracts which result will differ. Customers' needs may vary, as well as their general level of risk aversion and the types of risk to which they are most averse. They may have different projections about likely cost changes, technological advances, or demand fluctuations. And their bargaining power is likely to vary as well.[16]

Thus, there may be a number of factors that justify a disparity in contractual rates and terms between members of a class of customers. Should these factual differences not justify the specific rate differences, then the presiding administrative law judge should find a violation of Section 205(b). If on the other hand the factors enumerated above justify the specific rate differences, the judge should find that no violation of Section 205(b) has occurred. As pointed out however by the Court in *PSCI*, no such factual determination was made in this case. We will therefore reopen the record for purposes of allowing evidence to be heard on this issue and direct the judge to make conclusions of law consistent with such evidentiary findings.

Burden of Proof

When a customer comes forth with allegations of undue discrimination under Section 205(b) of the Federal Power Act, that alleging customer has the initial burden of demonstrating that a substantial disparity in rates exists between members of the same class. Once such an initial showing is made, the burden then shifts to the filing utility to show that the disparity is justified on the basis of factual differences, as discussed above. In the present case, we have already determined that a substantial disparity in rates exists between Frankfort and the other four interconnected Cities. PSCI however was not given the opportunity below to justify the specific rate disparity on the basis of factual differences between Frankfort and the other cities. We shall therefore direct the judge to allow PSCI to make such a showing.

The Commission orders: (A) The record in this case is reopened for purposes of making findings of fact and conclusions of law as required by this order.

(B) The Chief Administrative Law Judge shall designate a presiding administrative law judge to convene a conference in this case to be held within 15 days of issuance of this order. The designated law judge is authorized to set procedural dates for hearing on the issue of Section 205(b) undue discrimination and rule upon all motions (except motions to consolidate and sever and motions to dismiss) as provided for in the Commission's Rules of Practice and Procedure.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Section 402(a) of the DOE Act and by the Federal Power Act, particularly Sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the Regulations under the Federal Power Act (18 CFR, Chapter I), a hearing shall be held to determine whether the rates proposed by PSCI for service to the City of Frankfort, Indiana violate Section 205(b) of the Federal Power Act.

(D) All motions contained in the pleadings of the parties on remand are hereby denied.

(E) The Secretary shall promptly publish this order in the *Federal Register*.

By the Commission.

Kenneth F. Plumb,

Secretary.

[Docket No. ID-1854]

Samuel Hunington; Application

August 29, 1979.

Take notice that on August 2, 1979, Samuel Hunington filed an application pursuant to Section 305(b) of the Federal Power Act to hold the following positions:

Vice President, New England Power Company, Public Utility.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 18, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 79-27515 Filed 9-4-79; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. RP79-80]

Southern Natural Gas Co.; Petition for Continued Rate Base Treatment of Advance Payments

August 28, 1979.

Take notice that on August 14, 1979, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202, filed in Docket No. RP79-80 a petition pursuant to Section 4 and Section 16 of the Natural Gas Act and Section 1.7 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure requesting that the Commission grant it an extension until October 31, 1979, of the requirement contained in Paragraph F of Account 166 of the Commission's Uniform System of Accounts that an advance payment recorded in that account be removed therefrom if deliveries of gas for which the advance payment was made have not commenced within five years from the date the advance payment was included in said account to permit Southern to retain in its rate base certain advance payments made to SONAT Exploraton Company (SONAT) and The Offshore Company (Offshore), all as more fully set forth in the petition on file with the Commission and open to public inspection.

Southern states that pursuant to two Advance Payment Agreements, both dated July 18, 1974, it has advanced certain sums of money to SONAT and Offshore for the development of the natural gas reserves in the Mississippi Canyon Block 194 Field, offshore Louisiana (Block 194 Field). Until very recently, it was expected that gas sales would commence from the Block 194 Field by August 23, 1979, the fifth anniversary of the date Southern's advance payments to SONAT and Offshore for the development of these gas reserves were included in Southern's Account 166. Gas production commenced on August 2 from the Block 194 Field, but onshore sales for Southern's account may not commence until after August 23. Accordingly, Southern requests, if the Commission deems it necessary under these circumstances, a short extension until October 31, 1979, of the five-year requirement contained in Paragraph F of Account 166.

Southern states further that good cause exists for granting the relief requested. The commencement of gas deliveries from the Block 194 Field will represent a historic achievement for the natural gas industry, and the unprecedented nature of the development necessary for the Block 194 Field made a lengthy development time unavoidable. The depth of the Gulf in the Block 194 Field varies from 700 feet to 1,800 feet, and the production platform stands in 1,020 feet of water. The platform rises to 1,090 feet at its deck level and is the tallest platform constructed. Because of its size, the platform had to be set in the Gulf in three stages. The extraordinary nature of the installation of these platform facilities necessitated the use of the most sophisticated current technology in the fields of engineering and design. Although the completion of such an enormous and sophisticated project necessarily extended beyond the presumptive five-year development time, there have been no undue delays. From the acquisition of the leases in March 1974, through the design and construction of the platform, the installation of the platform, and the drilling of exploratory wells, to the commencement of platform drilling in October 1978, each phase of this unique project has proceeded in an orderly and timely manner. Accordingly, Southern respectfully submits that the extraordinary circumstances of this case justifies the Commission granting the relief requested.

Any person desiring to be heard or to make any protest with reference to said application, should on or before Sept. 13, 1979 file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 79-27513 Filed 9-4-79; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. GP79-106]

Texaco, Inc., Table Rock Unit No. 8, JD79-12141; Preliminary Finding Regarding determination by State of Wyoming

Issued August 24, 1979.

On July 10, 1979, the Oil and Gas Conservation Commission of the State of Wyoming submitted to the Commission a notice that the Texaco, Inc., Table Rock Unit No. 8, JD79-12141, met all the requirements of a stripper well under under section 108 of the Natural Gas Policy Act of 1978 (NGPA) and Commission regulations implementing that section. Notice of that determination was issued July 19, 1979.

Section 108(b)(1) of the NGPA provides that in order to qualify as a stripper well, a well must, among other things, produce nonassociated natural gas at a rate which does not exceed an average of 60 Mcf per production day during such period. Section 108(b)(3) defines "production day" as (1) any day during which natural gas is produced; and (2) any day during which natural gas is produced if production during such day is prohibited by a requirement of State law or a conservation practice recognized or approved by the State agency.

The record submitted with the determination for the above-listed well indicates that this well produced no natural gas during the 90-day production period upon which the application is based. There were no findings that this well was shut in due to State law or practice. Accordingly, the 90-day production period upon which this application is based contained no production days. Since section 108(b) requires that a well produce natural gas at a rate not exceeding an average of 60 Mcf *per production day*, a well's rate of production cannot be calculated where the 90-day production period contains no production days.

On the basis of the records submitted with these determinations, the Commission hereby makes a preliminary finding, pursuant to 18 CFR 275.202(a)(i), that the determination submitted by the Oil and Gas Commission of the State of Wyoming that the above-listed well qualifies as a section 108 stripper well, is not supported by substantial evidence in the record on which the determination was made.

By direction of the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. RP72-156 (PGA 79-2, DCA 79-2)]

Texas Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

August 28, 1979.

Take notice that Texas Gas Transmission Corporation (Texas Gas) on August 23, 1979, tendered for filing proposed changes in Substitute Twenty-Sixth Revised Sheet No. 7 to its FERC Gas Tariff, Third Revised Volume No. 1.

The revised tariff sheet is being issued to reflect the elimination of costs from producer and pipeline suppliers which those suppliers are not authorized to charge on August 1, 1979.

The proposed effective date of the above tariff sheet is August 1, 1979.

Copies of the filing were served upon the company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426, in accordance with §§1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 13, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[DOE/EIS-0026-D]

Waste Isolation Pilot Plant Draft Environmental Impact Statement; Supplemental Notice in Connection with Public Hearings

AGENCY: U.S. Department of Energy.

ACTION: Notice of additional public hearings on the draft environmental impact statement (DEIS).

SUMMARY: The Department of Energy (DOE) announces additional public hearings on the draft environmental impact statement, DOE/EIS-0026-D, Waste Isolation Pilot Plant (April 1979), which discusses a pending proposal to design, construct and operate a licensed waste isolation pilot plant (WIPP) for the permanent disposal of radioactive transuranic nuclear wastes (TRU), for research and development on various high level waste forms in a mined repository, and for a disposal demonstration in an intermediate scale facility (ISF) of up to a thousand spent fuel assemblies from commercial nuclear power reactors. Additional hearings will be held at Odessa, Texas on October 1, 1979, at Hobbs, New Mexico on October 2, 1979, and at Santa Fe, New Mexico on October 5, 1979. A notice of the availability of the DEIS and general information on the public hearings was published on April 18, 1979 (44 FR 23117).

Hearings on the DEIS were held in Idaho Falls, Idaho on June 5, 1979, in Albuquerque, New Mexico on June 7 and 8, 1979, and in Carlsbad, New Mexico on June 9, 1979. Several interested parties have requested additional hearings in New Mexico and Texas.

DATES: The hearings will be held October 1, 1979, October 2, 1979, and October 5, 1979, from 9:00 a.m. to 10:00 p.m. with recess from 11:30 a.m. to 1:00 p.m. and 5:00–7:00 p.m.

ADDRESS: Send written comments and requests to speak to: U.S. Department of Energy, WIPP Project Office, Albuquerque, NM 87115.

HEARING LOCATIONS: Hearings will be held at the following locations.

The Founders Building, Auditorium, University of Texas, Permian Basin, Odessa, TX 79762.
Holiday Inn, 200 South Linam, Hobbs, NM 88240.
New Mexico National Guard Headquarters Complex, 2600 Cerrillos Road, Santa Fe, NM 87503.

FOR FURTHER INFORMATION CONTACT:

1. Mr. Eugene Beckett, WIPP Project Leader, Department of Energy, MS B-107, Washington, DC 20545, 301/353-3253.
2. Dr. Robert J. Stern, Acting Director, NEPA Affairs Division, Office of Environment, Department of Energy, MS 4G-064, Washington, DC 20545, 202/252-4600.
3. Mr. Stephen H. Greenleigh, Assistant General Counsel for Environment, Forrestal Building, MS 6A-152, Department of Energy, Washington, DC 20585, 202/252-6947.
4. Mr. Ben E. McCarty, Public Affairs Officer, Forrestal Building, MS 8G-031, Department of Energy, Washington, DC 20585, 202/252-4296.
5. Mr. Don Schueler, Project Manager, WIPP Project Office, Department of Energy, Albuquerque, New Mexico 87115, 505/766-3884.

SUPPLEMENTARY INFORMATION:

I. Previous Notices

The Department of Energy published a notice of intent (43 FR 30331) on July 14, 1978, regarding the preparation of a DEIS on a proposed waste isolation pilot plant and soliciting comments as to the scope and content of that document. The notice of intent indicated that the proposed facility was being considered for siting in Eddy County, New Mexico. The Department of Energy published a notice of availability of the DEIS (44 FR 23117) on April 18, 1979. The notice of availability provided general information on the public hearings. The Department of Energy published a supplemental notice of a public comment period extension to September 6, 1979 (44 FR 38620) on July 2, 1979.

II. Background for the Proposed Project

The role of the proposed project in the Nation's overall program has been examined by an interagency review group (IRG) whose report to the President was issued in March 1979 (TID-29442).

The DEIS examines the WIPP proposal in light of the policy recommendations contained in the IRG report and compares the environmental impacts of a WIPP reference case with other program and site alternatives.

III. Purpose of the EIS

The Department of Energy intends to use the WIPP EIS as the environmental input into future decisions concerning the proposed Wipp project. These include, but are not limited to, withdrawal of Federal and State land at the Eddy County site; proceeding to full detailed design and construction of the reference repository, including selection of a construction contractor and long lead-time equipment procurement. The DEIS was also designed to consider the submission of a license application to the NRC, however, Congress has not authorized the disposal demonstration of spent fuel assemblies from commerical reactors and licensing of the proposed facility.

IV. Comment Procedures

A. Availability of Draft EIS

Copies of the DEIS have been distributed to Federal, State and local agencies, organizations, and individuals known to be interested in the WIPP proposal. Additional copies may be obtained from the following locations:

WIPP Project Office, Department of Energy, MS B-107, Washington, DC 20545, 301/353-3253.
WIPP Project Office, Department of Energy, Albuquerque, New Mexico 87115, 505/766-3884.
U.S. Department of Energy, 2626 West Mockingbird Lane, Dallas, Texas 75235, 214/767-7736.

Copies of the DEIS are also available for public inspection at:

Public Reading Room, FOI, Room GA-152, Forrestal Building, 1000 Independence Ave., SW, Washington, DC.
Albuquerque Operations Office, National Atomic Museum, Kirtland Air Force Base East, Albuquerque, New Mexico.
Chicago Operations Office, 9800 South Cass Avenue, Argonne, Illinois.
Chicago Operations Office, 175 West Jackson Boulevard, Chicago, Illinois.
Idaho Operations Office, 550 Second Street, Idaho Falls, Idaho.
Nevada Operations Office, 2753 South Highland Drive, Las Vegas, Nevada.
Oak Ridge Operations Office, Federal Building, Oak Ridge, Tennessee.
Richland Operations Office, Federal Building, Richland, Washington.
Energy Information Center, 215 Fremont Street, San Francisco, California.
Savannah River Operations Office, Savannah River Plant, Aiken, South Carolina.
Regional Energy/Environment Information Center, Denver Public Library, 1357 Broadway, Denver, Colorado.
Carlsbad Public Library, Public Document Room, 101 South Halagueno Street, Carlsbad, New Mexico.

B. Written Comments

The **Federal Register** Notice of April 18, 1979 invited interested parties to submit written comments with respect to the DEIS to the WIPP Project Office at the Washington, DC address listed above. The **Federal Register** Notice of July 2, 1979 extended the written comment period to September 6, 1979.

V. Public Hearings

A. Conduct of Hearings

The purpose of the hearings is to afford further opportunity for public comment regarding the DEIS. DOE will make a presentation summarizing the substantive areas of concern raised in the June 5, 7, 8, and 9 hearings and written comments received prior to close of the comment period.

The hearings will be conducted by a three-person board selected by DOE. The presiding officer and one other member of the Board will constitute a quorum. This will not be a judicial or evidentiary type hearing.

DOE reserves the right to arrange the schedule of presentation to be heard and to establish the procedures governing the conduct of the hearing. The length of each presentation will be limited, based on the number of persons requesting to be heard.

Questions may be asked only by those conducting the hearing. Cross examination of persons presenting statements will not be permitted. Any participant who wishes to ask a question at the hearing may submit the question in writing, to the presiding officer. The presiding officer will determine whether the question is relevant and whether the time limitations permit it to be presented for answer. DOE will make available appropriate witnesses to respond to appropriate questions.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript will be retained by DOE and made available for inspection at the DOE Freedom of Information Office, Room GA-152, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday. Additional copies of the complete transcript will also be available at the public document centers noted above. Any person may purchase a copy of the transcript from the reporter.

After all hearings have been conducted, the hearing board will prepare a report identifying significant issues raised during the hearings. This report will be used by DOE in the preparation of the final EIS.

B. Full Participation

Any individual who desires may make a written or oral request to DOE for an opportunity to be scheduled to make an oral presentation at the hearing. Requests to participate in the hearings should be received by the WIPP Project Office, Department of Energy, Albuquerque, New Mexico 87115 before September 21, 1979. Requestors are encouraged, to the extent practical, to furnish DOE a summary of the proposed oral presentation with the written request to participate in order for DOE to arrange grouping of participants speaking on similar topics. Requestors should provide a phone number where they can be reached. Each person scheduled will be notified by DOE by phone or in writing no later than September 27, 1979, of the time scheduled for the presentation and the amount of time available. Scheduled speakers are encouraged to provide a text of the presentation at the hearing to assist the reporter. Priority will be given to those who did not have an opportunity to present a statement in previous hearings.

C. Limited Participation

Individuals who did not make an advance request to speak or who were not scheduled to speak may register to speak at the hearing. After scheduled speakers, an opportunity will be provided to these individuals to speak. Time for each participant will be limited depending on time available and number of requests.

Dated at Washington, D.C., this 29th day of August 1979.

For the United States Department of Energy.

Lynda L. Brothers,

Acting Deputy Assistant Secretary for Environment (Policy and Assessments).

[FR Doc. 79-27485 Filed 9-4-79; 8:45 am]

BILLING CODE 6450-01-M

National Petroleum Council, Refinery Capability Task Group of the Committee on Refinery Flexibility; Meetings

Notice is hereby given that the Refinery Capability Task Group of the National Petroleum Council's Committee on Refinery Flexibility will meet on Friday, September 21, 1979, at the National Petroleum Council Headquarters, Suite 601, 1625 K Street, N.W., Washington, D.C., beginning at 9:00 a.m.

The National Petroleum Council provides technical advice and information to the Secretary of Energy on matters relating to oil and gas or the oil and gas industries. Accordingly, the Committee on Refinery Flexibility has been requested by the Secretary to undertake an analysis of the factors affecting crude oil quality and availability and the ability of the refining industry to process such crudes into marketable products. This analysis will be based on information and data to be gathered by the Oil Supply, Demand, and Logistics Task Group and the Refinery Capability Task Group, whose efforts will be coordinated by the Coordinating Subcommittee. The tentative agenda of the Task Group session is as follows:

1. Review and approve summary minutes for the August 8 meeting of the Task Group.
2. Report on the Coordinating Subcommittee meeting of September 5, 1979.
3. Report on status of Part I of the NPC Survey of U.S. Refineries.
4. Review and comment on Executive Summary for Part II of the NPC Survey of U.S. Refineries.
5. Review and comment on Executive Summary for Part III of the NPC Reoprt.

6. Discuss any other matters pertinent to the overall assignment of the Task Group.

All meetings are open to the public. The Chairmen of the Task Group are empowered to conduct the meetings in a fashion that will, in their judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Mr. Gene Peer, U.S. Department of Energy, (202) 633–9179, prior to the meeting, and provision will be made for their appearance on the agenda. Summary minutes of the Task Group meeting will be available through the National Petroleum Council or by contacting Mr. Peer.

Issued at Washington, D.C., on August 31, 1979.

Alvin L. Alm,

Assistant Secretary, Policy and Evaluation.

[FR Doc. 79-27561 Filed 9-4-79; 8:45 am]

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL 1312-5]

Agency Comments on Environmental Impact Statements and Other Actions Impacting the Environment

Pursuant to the requirements of the section 102(2) (C) of the National Environmental Policy Act of 1969, and section 309 of the Clear Air Act, as amended, the Environmental Protection Agency (EPA) has reviewed and commented in writing on Federal agency actions impacting the environment contained in the following appendices during the period of June 1, 1978 and June 30, 1978.

Appendix I contains a listing of draft environmental impact statements reviewed and commented upon in writing during this review period. The list includes the Federal agency responsible for the statement, the number and title of the statement, the classification of the nature of EPA's comments as defined in Appendix II, and the EPA source for copies of the comments as set forth in Appendix VI.

Appendix II contains the definitions of the classifications of EPA's comments on the draft environmental impact statements as set forth in Appendix I.

Appendix III contains a listing of final environmental impact statements reviewed and commented upon in writing during this review period. The listing includes the Federal agency responsible for the statement, the number and title of the EPA source for copies of the comments as set forth in Appendix VI.

Appendix IV contains a listing of final environmental impact statements reviewed but not commented upon by EPA during this review period. The listing includes the Federal agency responsible for the statement, the number and title of the statement, a summary of the nature of EPA's comments, and the EPA source for copies of the comments as set forth in Appendix VI.

Appendix V contains a listing of proposed Federal agency regulations, legislation proposed by Federal agencies, and any other proposed actions reviewed and commented upon in writing pursuant to section 309(a) of the Clean Air Act, as amended, during the referenced reviewing period. This listing includes the Federal agency responsible for the proposed action, the title of the action, a summary of the nature of EPA's comments, and the source for copies of the comments as set forth in the Appendix VI.

Appendix VI contains a listing of the names and addresses of the sources of EPA reviews and comments listing in Appendices I, III, IV, and V.

Note that this is a 1978 report; the backlog of reports should be eliminated over the next three months.

Copies of the EPA Manual setting forth the policies and procedures for EPA's review of agency actions may be obtained by writing the Public Information Reference Unit, Environmental Protection Agency, Room 2922, Waterside Mall SW, Washington, D.C. 20460, telephone 202/755–2808. Copies of the draft and final environmental impact statements referenced herein are available from the originating Federal department or agency.

Dated: August 13, 1979.

William D. Dickerson,

Acting Director, Office of Environmental Review.

Appendix II—Definitions of Codes for the General Nature of EPA Comments

Environmental Impact of the Action

LO—Lack of Objection. EPA has no objections to the proposed action as described in the draft impact statement; or suggests only minor changes in the proposed action.

ER—Environmental Reservations. EPA has reservations concerning the environmental effects of certain aspects of the proposed action. EPA believes that further study of suggested alternatives or modifications is required and has asked the originating Federal agency to reassess these impacts.

EU—Environmentally Unsatisfactory. EPA believes that the proposed action is unsatisfactory because of its potentially harmful effect on the environment. Furthermore, the Agency believes that the potential safeguards which might be utilized may not adequately protect the environment from hazards arising from this action. The Agency recommends that alternatives to the action be analyzed further (including the possibility of no action at all).

Adequacy of the Impact Statement

Category 1—Adequate. The draft impact statement adequately sets forth the environmental impact of the proposed project of action as well as alternatives reasonably available to the project or action.

Category 2—Insufficient Information. EPA believes that the draft impact statement does not contain sufficient information to assess fully the environmental impact of the proposed project or action. However, from the information submitted, the Agency is able to make a preliminary determination of the impact on the environment. EPA has requested that the originator provide the information that was not included in the draft statement.

Category 3—Inadequate. EPA believes that the draft impact statement does not adequately assess the environmental impat of the proposed project or action, or that the statement inadequately analyzes reasonable available alternatives. The Agency has requested more information and analysis concerning the potential environmental hazards and has asked that substantial revision be made to the impact statement.

Appendix III.—*Final Environmental Impact Statements for Which Comments Were Issued Between June 1 and June 30, 1978*

Identifying No.	Title	General Nature of Comments	Source for copies of comments
	CORPS OF ENGINEERS		
F-COE-D28003-00	Potomac River Water Supply Structures, Maryland and Virginia.	EPA continues to have environmental reservations on the project as proposed. EPA concurs with the issuance of the permits with certain conditions relating to the low flow study task force's recommendation.	D
F-COE-F32017-MN	Lake Superior, Lutsen and Beaver Bay Harbor of Refuge, Cook and Lake Counties, Minnesota.	EPA's comments on the draft EIS are adequately addressed in the final EIS. EPA has no major objections to the proposed action provided that the littoral drift be monitored and remedial measures be taken. Also, that care be taken when materials are disposed of. Also, the material must be confined at a site, sealed and the material should be covered.	F
F-COE-F32034-WI	Fox River Navigation Project, Operation and Maintenance, Wisconsin.	EPA's concerns were adequately addressed in the final EIS	F
F-COE-F32041-MI	Mitigation Shore Damage, Frankfort Harbor, Benzie County, Michigan.	EPA's concerns were adequately addressed in the final EIS	F
F-COE-F32043-MI	Manistee Harbor, Navigation Structures, Manistee County, Michigan.	EPA's concerns were adequately addressed in the final EIS	F
F-COE-F36060-00	Kaskaskia Island Drainage and Levee, Flood Protection, Mississippi River, Missouri and Illinois.	EPA's concerns were adequately addressed in the final EIS	F
F-COE-J36013-CO	Bear Creek Lake, Colorado	EPA's concerns were adequately addressed in the final EIS	I
F-COE-K85011-CA	Delta Coves Proposed Subdivision, Permit, Contra Costa County, California.	EPA's concerns were adequately addressed in the final EIS	J

Appendix III.—*Final Environmental Impact Statements for Which Comments Were Issued Between June 1 and June 30, 1978*—Continued

Identifying No.	Title	General Nature of Comments	Source for copies of comments
	DEPARTMENT OF AGRICULTURE		
F-REA-J07006-ND	Antelope Valley Station, Two 455 MW Units and Related Transmission Facilities, Mercer County, North Dakota.	EPA's concerns were adequately addressed in the final EIS	I
	DEPARTMENT OF COMMERCE		
F-NOA-B91007-00	Fishery Management Plan for the Atlantic Mackeral Fishery.	Generally, EPA's concerns were adequately addressed in the final EIS. However, EPA pointed out that no fishing should occur at designated sewage and industrial waste ocean disposal sites which will be in use through 1981.	B
	DEPARTMENT OF ENERGY		
F-DOE-K08004-CA	New Melones 230 kV Electrical Transmission Line, Central Valley Project, California.	EPA's concerns were adequately addressed in the final EIS. However, EPA suggests that precautions be taken to reduce asbestos dust emissions should blasting occur in serpentine rock formations during construction.	J
	DEPARTMENT OF INTERIOR		
RF-BOR-A86102-00	Recreation Service (Formerly BOR), Departmental Implementation of Executive Order No. 11644, as Amended by EO 11989, Pertaining to the Use of Off-Road Vehicles of Public Lands.	As a result of EPA's review of the final EIS, EPA has concluded the document to be unresponsive to the major issues commented on the draft EIS. Furthermore, EPA has severe environmental reservations on the proposed action.	A
	DEPARTMENT OF TRANSPORTATION		
F-FHW-A41162-NY	Sunrise Highway Extension, Brentwood Road to Phyllis Drive, Suffolk County, New York.	EPA expressed environmental reservations over the proposed project's potential noise impacts on residential areas. The installation of noise reduction devices in the affected homes or construction of the roadway below grade in sensitive areas was recommended.	C
NF-FHW-A41923-MD	MD-198 From I-95 to MD-29, Montgomery and Prince Georges Counties, Maryland.	EPA's concerns were adequately addressed in the final EIS. However EPA is concerned that no mention was made of EPA's earlier reservations as reflected in our DEIS comment letter and the letter was not included in the final statement.	D
F-FHW-A41987-UT	Redwood Road, 6500 South to 3500 South, and North Temple to 1000 North, UT-68, Salt Lake County, Utah.	EPA's concerns were adequately addressed in the final EIS	I
F-FHW-A42147-MA	MA-25 and MA-28, Wareham, Plymouth, and Bourne, Plymouth County, Massachusetts.	EPA's concerns were adequately addressed in the final EIS	B
F-FHW-D40037-MD	U.S. 15, Putnam Road to Business Route MD-15, Frederick County, Maryland.	EPA's concerns were adequately addressed in the final EIS	d
F-FHW-H40051-NB	Grand Island, U.S. 30 Improvement, Hall County, Nebraska.	EPA continues to have environmental reservations with the proposed project because of anticipated noise levels which exceed the noise standards of the FHWA "Federal-Aid Highway Program Manual 7-7-3." EPA suggested FHWA further examine the feasibility of nonstructural alternatives such as rerouting truck traffic and changes to existing traffic flow patterns.	H
F-FHW-K40047-CA	Del Monte Avenue Widening, Washington Street to East City Limits, Monterey County, California.	EPA's concerns were adequately addressed in the final EIS	J
	GENERAL SERVICES ADMINISTRATION		
F-GSA-D81007-DC	Restoration of Old Post Office, Washington, D.C.	EPA's concerns were adequately addressed in the final EIS	D
	DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT		
F-HUD-D89020-DE	I-95/Route 40 Growth Corridor, New Castle County, Delaware.	EPA's concerns were adequately addressed in the final EIS	D
F-HUD-F85025-IL	Woodridge Center Development, Du Page County, Illinois.	EPA's concerns were adequately addressed in the final EIS. However, EPA made several suggestions such as water quality alternatives, public awareness program, and more.	F
F-HUD-F85028-IL	Knolls Development, Willowbrook, Du Page County, Illinois.	EPA's concerns were adequately addressed in the final EIS	F
F-HUD-F85035-MN	West Park Hills and Countryside Addition, Hennepin County, Minnesota.	EPA's concerns were adequately addressed in the final EIS. However, EPA feels that the existing wetland vegetation be left in the natural state with an additional buffer for protection.	F
F-HUD-J89000-CO	Unacceptable Noise Exposure Areas Surrounding Stapleton and Buckley Airports, Adams County, Colorado.	EPA's concerns were adequately addressed in the final EIS	I

Agency Comments on Environmental Impact Statements and Other Actions Impacting the Environment

Pursuant to the requirements of the section 102(2)(C) of the National Environmental Policy Act of 1969, and section 309 of the Clean Air Act, as amended, the Environmental Protection Agency (EPA) has reviewed and commented in writing on Federal agency actions impacting the environment contained in the following appendices during the period of July 1, 1978 and July 31, 1978.

Appendix I contains a listing of draft environmental impact statements reviewed and commented upon in writing during this review period. The list includes the Federal agency responsible for the statement, the number and title of the statement, the classification of the nature of EPA's comments as defined in Appendix II, and the EPA source for copies of the comments as set forth in Appendix VI.

Appendix II contains the definitions of the classifications of EPA's comments on the draft environmental impact statements as set forth in Appendix I.

Appendix III contains a listing of final environmental impact statements reviewed and commented upon in writing during this review period. The listing includes the Federal agency responsible for the statement, the number and title of the EPA source for copies of the comments as set forth in Appendix VI.

Appendix IV contains a listing of final environmental impact statements reviewed but not commented upon by EPA during this review period. The listing includes the Federal agency responsible for the statement, the number and title of the statement, a summary of the nature of EPA's comments, and the EPA source for copies of the comments as set forth in Appendix VI.

Appendix V contains a listing of proposed Federal agency regulations, legislation proposed by Federal agencies, and any other proposed actions reviewed and commented upon in writing pursuant to section 309(a) of the Clean Air Act, as amended, during the referenced reviewing period. This listing includes the Federal agency responsible for the proposed action, the title of the action, a summary of the nature of EPA's comments, and the source for copies of the comments as set forth in the Appendix VI.

Appendix VI contains a listing of the names and addresses of the sources of EPA reviews and comments listing in Appendices I, III, IV, and V.

Note that this is a 1978 report; the backlog of reports should be eliminated over the next three months.

Copies of the EPA Manual setting forth the policies and procedures for EPA's review of agency actions may be obtained by writing and the Public Information Reference Unit, Environmental Protection Agency, Room 2922, Waterside Mall SW, Washington, D.C. 20460, telephone 202/755-2808. Copies of the draft and final environmental impact statements referenced herein are available from the originating Federal department or agency.

Dated: August 13, 1979.

William D. Dickerson,
Acting Director, Office of Environmental Review.

Appendix I.—*Draft Environmental Impact Statements for Which Comments Were Issued Between July 1, 1978 and July 31, 1978*

Appendix II—Definitions of Codes for the General Nature of EPA Comments

Environmental Impact of the Action

LO—Lack of Objection. EPA has no objections to the proposed action as described in the draft impact statement; or suggests only minor changes in the proposed action.

ER—Environmental Reservation. EPA has reservations concerning the environmental effects of certain aspects of the proposed action. EPA believes that further study of suggested alternatives or modifications is required and has asked the originating Federal agency to reassess these impacts.

EU—Environmentally Unsatisfactory. EPA believes that the proposed action is unsatisfactory because of its potentially harmful effect on the environment. Furthermore, the Agency believes that the potential safeguards which might be utilized may not adequately protect the environment from hazards arising from this action. The Agency recommends that alternatives to the action be analyzed further (including the possibility of no action at all).

Adequacy of the Impact Statement

Category 1—Adequate. The draft impact statement adequately sets forth the environmental impact of the proposed project or action as well as alternatives reasonably available to the project or action.

Category 2—Insufficient Information. EPA believes that the draft impact statement does not contain sufficient information to assess fully the environmental impact of the proposed project or action. However, from the information submitted, the Agency is able to make a preliminary determination of the impact on the environment. EPA has requested that the originator provide the information that was not included in the draft statement.

Category 3—Inadequate. EPA believes that the draft impact statement does not adequately assess the environmental impact of the propsed project or action, or that the statement inadequately analyzes reasonable available alternatives. The Agency has requested more information and analysis concerning the potential environmental hazards and has asked that substantial revision be made to the impact statement.

Appendix III.—*Final Environmental Impact Statements for Which Comments Were Issued Between July 1, 1978, and July 31, 1978*

Identifying No.	Title	General nature of comments	Source for copies of comments
DEPARTMENT OF AGRICULTURE			
F-AFS-F65001-WI	Timber management plan, Chequamegon National Forest, Wisconsin.	EPA's concerns were adequately addressed in the final EIS	F
DEPARTMENT OF INTERIOR			
F-NPS-E61025-OO	Natchez Trace Parkway, additional construction, Tennessee, Alabama and Mississippi.	EPA's concerns were adequately addressed in the final EIS	E
DEPARTMENT OF TRANSPORTATION			
F-CGD-D40048-OO	Bridge over Ohio River, mile 66.5, U.S. 22 Wierton, West Virginia and Steubenville, Ohio.	EPA's concerns were adequately addressed in the final EIS	D
F-FHW-A41474-MI	MI-66 relocation, Phelps Road to Smithville, Missaukee and Kalkaska Counties, Michigan.	Generally, EPA's concerns were adequately addressed in the final EIS. However, EPA is still concerned about the proposed connector route from Smithville to the new MI-66 and the impacts of Filer Creek. EPA is aware that Michigan Department of Natural Resources and U.S. Fish and Wildlife Service have also expressed concerns about the need for the roadway and its impact on the Filer Creek Wetlands.	F
F-FHW-C40034-NY	U.S. 219, Southern Expressway, section 3 and 4, Erie County, New York.	EPA's concerns were adequately addressed in the final EIS	C
F-FHW-D40003-WV	U.S. 60, Diamond to Hugheston, Kanawha County, West Virginia.	Generally, EPA's concerns were adequately addressed in the final EIS. However, EPA did note some concern over the proposed dredge and fill operations in the Kanawha River and suggested several measures to minimize the impact. EPA also made comments to be considered when preparing air quality analyses for future projects.	D
F-FHW-D40041-MD	Relocated MD-97, Taneytown bypass, Carroll County, Maryland.	Generally, EPA's concerns were adequately addressed in the final EIS. However, EPA is concerned about the 600-foot channel relocation of stream A, and the 68-acre fill into the wetland area.	D
F-FHW-D40046-PA	LR 1037, Allegheny Valley expressway, Allegheny County, Pennsylvania.	EPA's concerns were adequately addressed in the final EIS	D
F-FHW-F40063-WI	WI-29, Wausau to Ringle, Marathon County, Wisconsin.	EPA's concerns were adequately addressed in the final EIS. However, EPA recommends that construction specifications limit the area where clearing and grubbing can take place, and that where feasible vegetation be cleared only from areas where roadway and shoulders will be placed. Also, EPA suggested that excess material be removed from site, rather than dumping on the site.	F
F-FHW-F40067-IL	Intersection of Eldorado Street, U.S. 36 and Jasper Street, Macon County, Illinois.	Generally, EPA's concerns were adequately addressed in the final EIS. However, EPA recommend that the private residence be soundproofed and that a noise barrier be installed adjacent to Jasper Park.	F
F-UMT-E54001-FL	Metropolitan Dade County rail rapid transit project, Florida.	EPA's concerns were adequately addressed in the final EIS	E
ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION			
F-ERD-A00132-WA	Fusion materials irradiation testing facility, Hanford Reservation, Richland, Washington (old No. ERDA-1556-D, high flux neutron source.	EPA's concerns were adequately addressed in the final EIS. However, EPA believes that DOE should have included a more detailed discussion of the construction costs, and the alternatives to this project as requested in the comments on the draft EIS.	A
GENERAL SERVICES ADMINISTRATION			
F-GSA-D80006-DC	Particulate removal equipment, boiler conversion, plant modifications, West Heating Plant, Washington, DC.	EPA's concerns were adequately addressed in the final EIS. However, EPA requested to be notified concerning an approvable compliance schedule and a prevention of significant deterioration determination.	D
DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT			
F-HUD-D54025-PA	Pedestrian walkway, 69th Street, Upper Darby Township, Delaware County, Pennsylvania.	EPA's concerns were adequately addressed in the final EIS	D
F-HUD-J65014-CO	Tollgate Village, Aurora Highlands, Willow Park, Summer Valley Ranch, Smoky Hill, City of Aurora Housing Developments, Arapahoe County, Colorado.	EPA's concerns were adequately addressed in the final EIS	I
F-HUD-K85016-CA	Community Development block grant, 3-year plan, July 1978-June 1981, San Jose, California.	EPA's concerns were adequately addressed in the final EIS	J
U.S. POSTAL SERVICE			
F-UPS-B81003-CT	U.S. Post Office and vehicle maintenance facility, Stamford, Fairfield County, Connecticut.	EPA finds the final EIS to be unresponsive to the agency's request for an analysis of the environmental risks and benefits associated with use of alternative sites. EPA feels the analysis is particularly important in light of the degradation of a class A stream and filling of valuable wetlands that will result from the proposed development of the preferred site. EPA has requested the Postal Service to take no action until a supplement to the EIS, containing the alternative analysis, is prepared and circulated for public review.	B

BILLING CODE 6560-01-M

[FRL 1266-7]

Canned and Preserved Fruits and Vegetables Processing Point Source Category; Effluent Guidelines and Standards; Denial

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: EPA is today denying a petition for modification of best practicable control technology currently available (BPT) effluent limitations guidelines for mushroom processors filed by the National Canners Association.

EFFECTIVE DATE: September 5, 1979.

FOR FURTHER INFORMATION CONTACT: Allen Leduc, Office of Analysis and Evaluation (WH-586), U.S. EPA, 401 M Street, SW., Washington, D.C. 20460, telephone (202) 426-2617.

SUPPLEMENTARY INFORMATION: On April 16, 1976 (41 FR 16272) EPA promulgated effluent limitations guidelines for best practicable control technology currently available (BPT) for canned and preserved mushroom processors (40 CFR 407.72), a constituent of the canned and preserved vegetables subcategory of the Canned and Preserved Fruits and Vegetables Processing Point Source Category (40 CFR Part 407). The BPT effluent limitations guidelines were subsequently challenged by the National Canners Association (NCA), on behalf of its mushroom processing members, in a petition for modification filed with EPA on November 16, 1976. In addition, industry representatives filed a petition for review of BPT effluent limitations guidelines for mushrooms (40 CFR 407.72) in the U.S. Court of Appeals for the Third Circuit. *Pennsylvania Food Processors Association* v. *EPA*, No. 76-1836. On December 29, 1978, the U.S. Court of Appeals for the Third Circuit granted a joint motion by EPA and the industry representatives to dismiss the petition for review. The motion was made pursuant to a settlement agreement reached by EPA and the petitioners. EPA agreed as a part of the settlement to publish in the **Federal Register** its response to the National Canners Association "Petition for Modification of the 1977 effluent limitations established for mushroom processors" dated November 16, 1976.

The Petition

The NCA petition criticized the EPA economic analysis of the impacts of the BPT regulations. That analysis was presented in the document entitled *Economic Analysis of Effluent Guidelines—Canned, Frozen and Preserved Fruits and Vegetables Industry*, EPA 230/2-75-036 (*Economic Analysis*). The NCA criticism is based on the following grounds: (1) The after tax income estimates for the mushroom processing model plants in the analysis were too high; (2) the results of an NCA survey of the industry showed financial losses in the industry not reflected in the analysis; and (3) the analysis failed to consider the impact of increasing canned mushroom imports on the domestic industry.

The NCA believes that this information shows that the conomic impacts on the industry have been much more severe than predicted in the EPA *Economic Analysis* and that the effluent limitations guidelines should be revised to reflect the use of a less expensive technology. The NCA petition requested that the BPT effluent limitation guidelines be modified by eliminating the requirement to install biological treatment systems and substituting limitations based only on screening and pH control.

Background of the EPA Economic Analysis of the BPT Regulations

The EPA *Economic Analysis* calculated the economic impacts of the BPT effluent limitations guidelines on the mushroom processing industry by performing a study using model plants. The model plants were developed from survey data collected by EPA from the mushroom processing industry. The models represented plants processing 200, 1500, 2500 and 5000 tons per year of raw product.

The profit and rate of return which were used in the model plant study were based on 1973 data. EPA selected 1973 because it was one of the least profitable years for the industry. (*Economic Analysis*, p. VII-9). Although it was determined that these low profit levels were the result of credits for returns of possibly contaminated products, rather than high operating costs, these low returns nevertheless were including in the model plant budgets (*Economic Analysis*, p. III-17). By using the low profit levels from 1973, the after tax income estimates reported in the *Economic Analysis* would not have been overstated as alleged by NCA.

Also included as a characteristic of the model plants were low rates of return on investment (ROI) based on 1973 data from the industry. The ROI in the mushroom industry varied with plant sizes, but the after tax ROI for all sizes was below one percent (*Economic Analysis*, p. III-21). Therefore, the 1973 figures may have understated the overall industry financial status.

The impact of imports was not quantitatively addressed in the *Economic Analysis*. However, the effects of imports were qualitatively considered in two ways. First, import competition was assumed to restrict the ability of mushroom processors to pass the costs of pollution control on to the consumer. Second, this effect as well as the qualitative assessment of the effects of imports on demand for domestic production, were considered in the closure analysis (*Economic Analysis*, pp. VII-50 to 52). Based on the results of the closure analysis, small plants processing less than 2000 tons per year of raw product were exempted from the regulations.

EPA believes that the NCA criticisms of the EPA *Economic Analysis* are not justified, considering the data base used in the *Economic Analysis*.

EPA Review of the NCA Petition

As part of the EPA evaluation of the NCA petiton, EPA requested a review of the petition by Development Planning and Research Associates, Inc. (DPRA), the organization that assisted in preparation of the original EPA *Economic Analysis* (EPA 230/1-75-036). DPRA prepared a report summarizing its assessment of the NCA petition. This report, entitled *Economic Review, Petition for Modification, 1977 Established Effluent Limitations for Mushroom Processors*, May, 1977, P-243, (Economic Review) is available for public review upon request. Also, the petition was reviewed by the Office of Analysis and Evaluation of the Office of Water and Waste Management and the Office of Planning and Evaluation of the Office of Planning and Management.

The NCA petition proposed that the financial data used in the EPA *Economic Analysis* be changed to reflect losses in the baseline year of the analysis (1973) and in the effective year

of the BPT regulations (1977), rather than reflect small after tax profits in those years. This proposal was made based on data received by NCA from four mushroom canning plants in a special industry survey. The data showed that those four plants incurred losses in the years 1973, 1974, and 1975. The NCA attributed these losses to the increased imports of canned mushrooms during that time period.

The DPRA review of the NCA industry survey results indicated that the data submitted by the four plants responding to that survey were not representative of the industry. The four plants represented about 13 percent of the total number of plants in the industry and 11 to 12 percent of the total industry production. However, the losses reported for those plants represented about 35 percent of all financial losses reported by the industry in 1973, and 81 percent of all industry losses reported in 1974. These disproportionate losses relative to production by the four plants leads us to believe the data do not reflect typical industry characteristics.

In addition, none of the plants in the NCA survey were direct dischargers (Petition p. 9). The respondents either discharged their wastewaters to publicly owned treatment works (POTWs) or to land. BPT effluent limitations guidelines would only be applicable to direct dischargers. Therefore, NCA's reliance on data from indirect dischargers to assess the costs of BPT effluent limitations guidelines on direct dischargers was highly speculative. DPRA pointed out that the cost for discharge to a POTW, which a majority of mushroom processors utilize, is less than the annual cost of a privately owned biological treatment system. (Economic Review, p. 4). DPRA concluded that when most users can no longer afford the cost of a POTW, they likely will not be able to afford to stay in business (Id). Therefore, these users would never face the costs of installing a biological treatment system.

The NCA petition also challenged the development of the model plants in the *Economic Analysis* on the basis that the data available to the contractor did not cover all sizes of plants. However, the model plants for sizes not covered by the data were developed using a standard economic engineering synthesis approach. The resulting model plants accurately represent the characteristics of plants in the respective size ranges.

Finally, NCA submitted data released by a Special Representative for Trade Negotiations (U.S. International Trade Commission) on the amount of canned mushroom imports during 1976. While the impact of mushroom imports was not quantitatively examined in the original EPA analysis, the effects of imports were qualitatively considered in the closure analysis conducted by DPRA. The mushroom industry was said to have a "severe impact" pertaining to imports. This qualitative analysis is explained in the *Background* section above and on pages IV—33, VII–50 to 52 and Table IV–19 of the *Economic Analysis*.

Conclusions

The Agency finds the financial data submitted by NCA to be insufficient for modifying the *Economic Analysis*. Also, contrary to the petition, the effects of imports on the domestic industry were adequately considered in the analysis. For these reasons, the National Canners Association "Petition for Modification of the 1977 effluent limitations established for mushroom processors" is denied.

Dated: August 27, 1981.

Douglas M. Costle,

Administrator.

[FR Doc. 79-27577 Filed 9-4-79; 8:45 am]

BILLING CODE 6560-01-M

[FRL 1312-4]

Water Quality Standards; Navigable Waters of the State of Oklahoma

AGENCY: U.S. Environmental Protection Agency.

ACTION: Notice of State Water Quality Standards Approval.

SUMMARY: The Environmental Protection Agency has approved the water quality standards revisions adopted by the State of Oklahoma. These revisions become part of the State's water quality standards contained in the document "Oklahoma's Water Quality Standards 1976."

FOR FURTHER INFORMATION CONTACT: Mr. Thomas Lera, EPA Region VI, Oklahoma/New Mexico Section Chief, Water Division, Water Program Branch, 1201 Elm Street, Dallas, Texas 75270, (214–767–2624).

SUPPLEMENTAL INFORMATION: On March 16, 1979, EPA, Region VI approved the water quality standards revisions adopted by the State on February 13, 1979. This action was taken in accordance with section 303(c) of the Clean Water Act (33 U.S.C. 1313(c)). These revisions are consistent with the Clean Water Act as interpreted in the Agency's water quality standards regulations at 40 CFR 35.1550.

AVAILABILITY: Copies of the Oklahoma water quality standards may be obtained from Mr. Ron Jarman, Water Quality Division, Oklahoma Water Resources Board, P.O. Box 53585, Oklahoma City, Oklahoma 73152.

(Sec. 303(c), Clean Water Act, as amended (33 U.S.C. 1313(c)))

Dated: August 29, 1979.

Thomas C. Jorling,

Assistant Administrator.

BILLING CODE 6712-01-M

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10423; or may inspect the agreements at the Field Offices located at New York, N.Y.; New Orleans, Louisiana; San Francisco, California; Chicago, Illinois; and San Juan, Puerto Rico. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before September 25, 1979. Comments should include facts and arguments concerning the approval, modification, or disapproval of the propsed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No. T–3852.

Filing Party: Wallace Aiken, Esq., Aiken, St. Louis and Siljeg, 1215 Norton Building, Seattle, Washington 98104.

Summary: Agreement No. T–3852, between the City of Kodiak, Alaska (City) and Alaska Terminal and Stevedoring, Inc. (AT&S) provides for the 5-year lease by the City to AT&S of certain terminal and back-up land at Kodiak for non-preferential use in performing a full and customary range of stevedoring services for any and all vessels calling at the facility, excluding those customarily serviced and controlled by Sea-Land Service, Inc.

Agreement No. T–3853.

Filing Party: General Manager, Chicago Regional Port District, 12800 Butler Drive, Lake Calumet Harbor, Chicago, Illinois 60633.

Summary: Agreement No. T–3853, between the Chicago Regional Port District (District) and International Great Lakes Shipping Company (INGLA), provides for the licensing of INGLA for the purpose of rendering stevedoring, terminalling, cleaning, fitting, securing of all cargos and other services to or for vessels, barges, railroad cars, containers and trucks which seek to utilize the licensed area in the Port of Chicago. Charges for such services will be assigned in accordance with INGLA's tariff. INGLA will pay a license fee to District, based on the type and amount of cargo handled, as set forth in the agreement.

Agreement No. 10186–3.

Filing Party: Seymour H. Kligler, Esquire, Brauner Baron Rosenzweig Kligler Sparber & Bauman, Attorneys At Law, 120 Broadway, New York, New York 10005.

Summary: Agreement No. 10186–3, a space chartering agreement between Korean Shipping Corporation and Orient Overseas Container Lines, Inc., amends the basic agreement to authorize the chartering of space to each other on vessels operated by each other in the trades between Korea, Japan, Taiwan, Hong Kong, Thailand, Singapore, Indonesia, the Philippines and the United States.

Agreement No. 10377.

Filing Party: Dennis N. Barnes, Morgan, Lewis & Bockius, 1800 M Street, N.W., Washington, D.C. 20036.

Summary: Agreement No. 10377 is a space charter agreement whereby Toko Kaiun Kaisha, Ltd. (Toko) will charter unused capacity aboard its vessels to Suh Jin Shipping Co., Ltd. (Suh Jin). The principal commodities carried will be iron and steel products, plywood and other general cargoes. Neither Toko nor Suh Jin will transport any cargoes in containers from Korean or Japanese ports to U.S. West Coast ports. The agreement, as proposed, would terminate on October 30, 1983.

Dated: August 29, 1979.

By Order of the Federal Maritime Commission.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

[Independent Ocean Freight Forwarder License No. 1836]

Earle's Air Freight, Earle's Moving and Storage Co., Inc., d.b.a.; Order of Revocation

On August 20, 1979, Earle's Air Freight, Earle's Moving and Storage Co., Inc. d/b/a, P.O. Box 789, Annapolis, Maryland 21404, voluntarily surrendered its Independent Ocean Freight Forwarder License No. 1836 for revocation.

Therefore, by virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised), section 5.01(c), dated August 8, 1977;

It is ordered, that Independent Ocean Freight Forwarder License No. 1836 issued to Earle's Air Freight, Earle's Moving and Storage Co., Inc. d/b/a, be and is hereby revoked effective August 20, 1979, without prejudice to reapplication for a license in the future.

It is further ordered, that a copy of this Order be published in the **Federal Register** and served upon Earle's Air Freight, Earle's Moving and Storage Co., Inc. d/b/a.

Robert G. Drew,

Director, Bureau of Certification and Licensing.

BILLING CODE 6730-01-M

[Docket No. 79-85]

Trailer Marine Transport Corp.—Proposed Reduced Rates on Sugar Cane and Refined Sugar N.O.S.; Order of Investigation and Hearing

On July 27, 1979, Trailer Marine Transport Corporation (TMT) filed revised pages to its Tariff FMC-F No. 5 which would reduce the rates on sugar cane and refined sugar, N.O.S. subject to proportional and round trip applications, effective August 27, 1979.

TMT Tariff FMC-F No. 5 establishes local, joint, and proportional commodity rates between U.S. Atlantic and Gulf Coast ports and ports in the Commonwealth of Puerto Rico and the Virgin Islands via direct and transshipment service at Puerto Rico. The proposed reduced rates are applicable only to cargo for which the bill of lading states that it is "* * * part of a round trip movement involving raw sugar moving northbound to the refinery at Port Wentworth (Savannah) Georgia and the return southbound movement of refined sugar to Puerto Rico." Specifically, the proposed rates would apply: from San Juan, Puerto Rico to Jacksonville, Florida on shipments of 45,000 lb. minimum trailerload (TL) quantities of raw sugar, delivered to TMT's terminal at San Juan, moving to Jacksonville and destined via motor carrier to Port Wentworth, Georgia (Item 6190, TMT Freight Tariff No. 7, FMC-F No. 5); and from Jacksonville to San Juan on shipments of 45,000 lb. minimum TL quantities of refined sugar loaded into the trailer by the shipper or its agent, moved via motor carrier from Port Wentworth to Jacksonville and destined to San Juan, TMT terminal only. (Item 4535 TMT Freight Tariff No. 7, FMC-F No. 5).

Protests and requests for investigation and suspension were received from the Georgia Ports Authority (Port Authority) and Sea-Land Service, Inc. (Sea-Land).

The Port Authority protests the implementation of the proposed rate change solely as being in violation of section 16 of the Shipping Act, 1916, (Act) for giving undue and unreasonable preference to the Port of Jacksonville by diverting traffic that is naturally tributary to the Port of Savannah and cuusing "irreparable injury" to the Port.

It is the position of Sea-Land that the proposed rates of TMT are in violation of both section 16 and 18(a) of the Act. Sea-Land contends that TMT's proposed rates are predatory in nature in that they are below costs, are designed to divert cargo essential to Sea-Land's direct all-water service between Savannah, Georgia (not served by TMT) and San Juan, and are prejudicial as the rates aply only to one shipper. In support of these arguments, Sea-Land states that it has provided 14 sailings between Savannah and San Juan in the first half of 1979, lifting 946 loads of cargo of which 273 loads were sugar covered by TMT's proposed rates. Sea-Land further argues that the rates northbound and southbound do not meet out-of-pocket costs or fully distributed costs and are, therefore, unreasonable.

TMT filed a reply to the protests of Sea-Land and the Port Authority. According to TMT, the movement of raw sugar from Puerto Rico to Savannah is the result of a fire which destroyed part of the facilities of Sugar Corporation for refining and packing sugar. Sugar Corporation, therefore, arranged with Savannah Sugar Corporation to refine the raw sugar and return it to Puerto Rico, and in early 1979 a barge under charter transported approximately 5,000 long tons of raw sugar to Savannah. After 1979, TMT states that Sugar Corporation intends to evaluate its overall costs of having the sugar refined in the U.S. versus the cost of rebuilding its plant facilities. Based on these circumstances, TMT asserts that the traffic in question did not exist prior to early 1979 and, therefore, it is clearly demonstrated that this cargo has not been naturally tributary to Savannah, nor would this volume of sugar have normally been available to Sea-Land at Savannah.

TMT has further replied to the question of the reasonableness of its proposed rates. It is TMT's position that Sea-Land erred in its analysis and that the proposed rates will not produce revenues below fully distributed costs, rather the revenues are clearly in excess of such costs. Consequently, TMT contends that its proposed rates on sugar cane and refined sugar are not unreasonable and in violation of section 18(a) of the Act.

We have permitted the subject rate decrease to go into effect without suspension in view of its not being a general decrease in rates subject to section 3(c)(1)(B) of the Intercoastal Shipping Act, 1933, as amended, and as the protesting parties have not provided justification of such competitive impact to warrant suspension. Further, the Commission has considered the question raised by the protest of the Port Authority regarding diversion of cargo naturally tributary to the Port of Savannah, and based on the factual conditions surrounding the recent movement of this amount and type of sugar, we have determined not to include it as an issue in this case.

Reductions in rates may be proper if they do not go beyond lawful limits of competition. However, based on the amount of decrease in TMT's rates on sugar, and the uncertainty of whether the rates will meet costs, if that is required, the Commission is of the opinion that TMT's proposed decrease in rates be made the subject of a limited public hearing in order to determine whether the rates are so low as to be unjust, unreasonable or otherwise unlawful under sections 16 First and 18(a) of the Shipping Act, 1916, (46 U.S.C. 815, 817(a)).

Now, therefore, it is ordered, That pursuant to the authority of sections 16 First, 18(a) and 22 of the Shipping Act, 1916, (46 U.S.C. 815, 817(a), 821), an investigation is hereby instituted into the lawfulness of the tariff matter contained in Items 6190 and 4535 of Trailer Marine Transport Corporation Tariff FMC-F No. 5, for the purpose of making such findings as the facts and circumstances warrant;

It is further ordered, That this proceeding be limited to an investigation of the following areas:

1. The method by which the proposed rates on sugar cane (Item 6190) and refined sugar N.O.S. (Item 4535) were constructed by TMT.

2. Identification and determination of the cost elements which must be met by the cargo.

3. Determination of whether the cargo has met those cost elements identified in Issue No. 2.

4. Whether, upon a determination of Issues No. 2 & 3, TMT's proposed decreased rates on sugar cane and refined sugar N.O.S. are so low as to be unjust and unreasonable, or so as to give undue or unreasonable preference or advantage to one shipper, or subject one carrier to undue or unreasonable prejudice or disadvantage in violation of the Act.

It is further ordered, That Trailer Marine Transport Corporation be named Respondent in this proceeding;

It is further ordered, That Sea-Land Service Inc. and the Georgia Ports Authority be named Protestants in this proceeding;

It is further ordered, That in accordance with Rule 42 of the Commission's Rules of Practice and Procedure (46 CFR 502.42), Hearing Counsel shall be a party to this proceeding;

It is further ordered, That this proceeding be assigned for public hearing before an Administrative Law Judge of the Commission's Office of Administrative Law Judges and that the hearing be held at a date and place to be determined by the Presiding Administrative Law Judge, but in any event shall commence on or before February 22, 1980;

It is further ordered, That the hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon a proper showing that there are genuine issues of material facts that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents, or that the nature of the matters in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record;

It is further ordered, That during the pendency of this investigation, Respondent will serve the Administrative Law Judge and all parties of record with notice of any tariff changes affecting the material under investigation at the same time such changes are filed with the Commission;

It is further ordered, That notice of this Order be published in the **Federal Register,** and a copy be served upon all parties of record;

It is further ordered, That any person other than parties of record having an interest and desiring to participate in this proceeding shall file a petition for leave to intervene in accordance with Rule 72 of the Commission's Rules of Practice and Procedure (46 CFR 502.72);

It is further ordered, That all future notices, orders, and/or decisions issued by or on behalf of the Commission in this proceeding, including notice of the time and place of hearing or prehearing conference, shall be mailed directly to all parties of record;

It is further ordered, That except as provided in Rules 159 and 201(a) of the Commission's Rules of Practice and Procedure, (46 CFR 502.159, 46 CFR 502.201(a)), all documents submitted by any party of record in this proceeding shall be filed in accordance with Rule 118 of the Commission's Rules of Practice and Procedure (46 CFR 502.118), as well as being mailed directly to all parties of record.

By the Commission.

Correction

In FR Doc. 79-26636, published on page 50400, on Tuesday, August 28, 1979, in the second column, the first line, "Agreement No. T-3738-1." should be corrected to read "Agreement No. T-3787-1.".

BILLING CODE 1505-01-M

FEDERAL RESERVE SYSTEM

Bank Holding Companies; Proposed De Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than September 27, 1979.

A. *Federal Reserve Bank of San Francisco,* 400 Sansome Street, San Francisco, California 94120:

BANKAMERICA CORPORATION, San Francisco, California (industrial loan, financing, and insurance activities; California): to operate, through its direct subsidiary, FinanceAmerica Thrift Corporation, ("Thrift") an industrial loan company and to offer credit-related life, disability and property insurance and to engage in the actitivies of a finance company to the extent of providing management facilities and related services to FinanceAmerica Corporation, an indirect subsidiary of Applicant. BankAmerica Corporation, San Francisco, California (bookkeeping, data processing and industrial loan activities, California), through its direct subsidiary, FinanceAmerica Corporation ("FinanceAmerica") to perform the activities of bookkeeping and data processing for Thrift and to operate as an industrial loan company to the extent of providing management and related services to Thrift. The proposed activities of Thrift would be conducted from offices in Bellflower, Diamond Bar, Placentia and Upland, California and would serve the State of California. The proposed activities of FinanceAmerica will be conducted from an office in Allentown, Pennsylvania and will serve the State of California.

Board of Governors of the Federal Reserve System, August 28, 1979.

Griffith L. Garwood,

Deputy Secretary of the Board

BILLING CODE 6210-01-M

Federal Open Market Committee; Authorization for Domestic Open Market Operations

In accordance with the Committee's rules regarding availability of information, notice is given that on August 14, 1979, paragraph 2 of the Committee's authorization for domestic open market operations was amended to read as follows:

2. The Federal Open Market Committee authorizes and directs the Federal Reserve Bank of New York (or, under special circumstances, such as when the New York Reserve Bank is closed, any other Federal Reserve Bank) (a) to lend to the Treasury such amounts of securities held in the System Open Market Account as may be necessary from time to time for the temporary accommodation of the Treasury, under such conditions as the Committee may specify; and (b) to purchase directly from the Treasury for renewable periods not to exceed thirty days, when authorized by the Board of Governors of the Federal Reserve System pursuant to an affirmative vote of not less than five members, for its own account (with discretion, in cases where it seems desirable, to issue participations to one or more Federal Reserve Banks) such amounts of special short-term certificates of indebtedness as may be necessary from time to time for the temporary accommodation of the Treasury, provided that the rate charged on such certificates shall be a rate of ¼ of 1 percent below the discount rate of the Federal Reserve Bank of New York at the time of such purchases and provided that the total amount of such certificates held at any one time by the Federal Reserve Banks shall not exceed $2 billion.

By order of the Federal Open Market Committee, August 27, 1979.

Murray Altmann,

Secretary.

Federal Open Market Committee; Rules of Organization

The Federal Open Market Committee has amended sections 4 and 5 of its rules of organization concerning selection of staff officers and managers.

Effective August 14, 1979, sections 4 and 5 of the Committee's rules of organization are amended to read as follows:

Sec. 4. STAFF. (a) Selection of staff officers. At its first meeting on or after March 1 of each year, the Committee selects, from among the officers and employees of the Board and the Federal Reserve Banks, the following staff officers to serve until the first meeting on or after March 1 of the next following year: Secretary, Deputy Secretary, and one or more Assistant Secretaries; General Counsel, Deputy General Counsel, and one or more Assistant General Counsels; Economists, one or more of whom may be designated as Senior or Associate Econmists or given titles reflecting their area of particular specialization; and such other officers as the Committee might wish from time to time.

Sec. 5. MANAGERS. The Committee selects a Manager for Domestic Operations, System Open Market Account; and a Manager for Foreign Operations, System Open Market Account. The foregoing shall be satisfactory to the Federal Reserve Bank selected by the Committee to execute open market transactions for such Account and shall serve at the pleasure of the Committee. The Managers keep the Committee informed on market conditions and on transactions they have made and render such reports as the Committee may specify.

First Railroad & Banking Company of Georgia, Augusta, Georgia, has applied for the Board's approval under section 3(a)(3) of the Banking Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares of the successor by merger to the Commercial Bank of Cobb County, Marietta, Georgia. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than September 28, 1979. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, August 29, 1979.

Griffith L. Garwood,

Deputy Secretary of the Board.

BILLING CODE 6210-01-M

First Tulsa Bancorproation, Inc.; Proposed Acquisition of Firstul Leasing and Financial Co.

First Tulsa Bancorporation, Inc., Tulsa, Oklahoma, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to retain voting shares of Firstul Leasing and Financial Company, Tulsa, Oklahoma.

Applicant states that the subsidiary would continue to engage in the activity of leasing personal property and engage *de novo* in the activities of financing of business accounts receivable and business inventories and sales of commercial, industrial and farm equipment. These activities would be performed from an office of Applicant's subsidiary in Tulsa, Oklahoma, and the geographic area to be served is the Tulsa metropolitan area and environs. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts or interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 27, 1979.

Board of Governors of the Federal Reserve System, August 27, 1979

Griffith L. Garwood,

Deputy Secretary of the Board.

BILLING CODE 6210-01-M

Lone Tree Service Co.; Proposed Retention of Kent Insurance Agency

Lone Tree Service Company, Lone Tree, Iowa, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to retain voting shares of Kout Insurance Agency, Lone Tree, Iowa.

Applicant states that the subsidiary would engage in the activity of acting as agent for the sale of credit life and credit accident and health insurance directly related to extensions of credit by Applicant's subsidiary bank, Farmers and Merchants Savings Bank, Lone Tree, Iowa. These activities would be performed from offices of Applicant's subsidiary in Lone Tree, Iowa, and the geographic area to be served extends for a distance of approximately eight miles to the east of Lone Tree, Iowa, and for a distance of approximately five miles to the north, west and south of Lone Tree. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 28, 1979.

Board of Governors of the Federal Reserve System, August 28, 1979.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

Educational Opportunity Centers, Upward Bound, Special Services for Disadvantaged Students; Talent Search; Application Preparation Workshops

AGENCY: Office of Education, HEW.

ACTION: Notice of Locations for Application Preparation Workshops.

SUMMARY: Application Preparation Workshops will be held throughout the United States to aid prospective applicants in developing applications for the Educational Opportunity Centers, Upward Bound, Special Services for Disadvantaged Students and Talent Search programs.

DATES: Application Preparation Workshops will be conducted on the following dates:

September 6-7, 1979—San Francisco, California.
September 11-12, 1979—Hato Rey, Puerto Rico.
September 11-12, 1979—Philadelphia, Pennsylvania.
September 13-14, 1979—Chicago, Illinois.
September 13-14, 1979—Atlanta, Georgia.

ADDRESSES: Application Preparation Workshops will be conducted at the following locations:

San Francisco—Irving G. Breyer Board Room, Room 30, San Francisco Unified School District, 135 Van Ness Avenue, San Francisco, California (accessible to handicapped: 170 Fell Street Entrance).

Hato Rey—Metro Building, Penthouse, Mayaguez Street, Edificio Metro, Penthouse, Box 25A Calle Mayagues, (Esq. Ponce de Leon), Hato Rey, Puerto Rico.

Philadelphia—Montgomery Auditorium, The Free Library of Philadelphia, Logan Square, Philadelphia, Pennsylvania.

Chicago—Field Museum of Natural History, Roosevelt and Lake Shore Drive, Chicago, Illinois.

Atlanta—Auditorium, Walter George High School, 800 Hutchens Road, S.W., Atlanta, Georgia.

FOR FURTHER INFORMATION CONTACT: Program Development Branch, Division of Student Services and Veterans Programs, Room 3514, ROB-3, U.S. Office of Education, 400 Maryland Avenue, S.W. Washington, D.C. 20202. Telephone: (202) 245-2511.

SUPPLEMENTARY INFORMATION: Each Application Preparation Workshop will be one and a half days long. On the first day, registration will begin at 8:30 a.m. and presentations are scheduled from 9:00 a.m. to 5:00 p.m. The presentations will include a review of the requirements for filing applications for grants under the Special Programs for Students from Disadvantaged Backgrounds (Talent Search, Upward Bound, Special Services for Disadvanted Students, Educational Opportunity Centers) and a review of the regulations for each program. In addition there will be a discussion of the suggested application development guides and the technical review evaluation forms. The morning session will cover the general requirements and procedures applicable to all four programs and the specific requirements for the Educational Opportunity Centers program. The afternoon session will cover the specific requirements for the Special Services, Upward Bound, and Talent Search programs. Time will be provided throughout the day for questions and answers. On the second day, no formal presentations will be made. Office of Education staff will be available from 9:00 a.m. to 12:00 noon to answer any additional questions.

(Catalog of Federal Domestic Assistance Numbers: 13.543 Educational Opportunity Centers; 13.492 Upward Bound; 13.482 Special Services for Disadvantaged Students; 13.488 Talent Search.)

Dated: August 31, 1979.

John Ellis,

Executive Deputy Commissioner for Educational Programs.

BILLING CODE 4110-02-M

Commission on the Review of the Federal Impact Aid Program; Meeting

AGENCY: Commission on the Reivew of the Federal Impact Aid Program.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of the first meeting of the Commission on the Review of the Federal Impact Aid Program, the members of which were appointed by the President on August 15, 1979. The meeting will be open to the general public and all interested persons are invited to attend. Notice of this meeting is given in accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C., Appendix 1).

DATE: September 28 and 29, 1979. The Commission will meet at 9:00 a.m. each day and continue until 5:00 p.m., unless business is completed earlier on the 29th.

ADDRESS: Capitol Room, Hotel Washington, 15th and Pennsylvania Avenue, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Richard Dallas Smith, Executive Director, Designate, Commission on the Review of the Federal Impact Aid Program, c/o Ann Bailey, Committee Management Staff, Room 2135, F.O.B. 6, 400 Maryland Avenue, S.W., Washington, D.C. 20202. (202) 245-7960.

AUTHORITY AND FUNCTION: The Commission on the Review of the Federal Impact Aid Program is established under section 1015 of the Education Amendments of 1978 (Public Law 95-561). The Commission is to conduct a review and evaluation of the administration and operation of the impact aid program, authorized under the Act of September 30, 1950 (Public Law 874, 81st Congress), and report its recommendations on that program to the President and the Congress not later than December 1, 1980. Such recommendations are to include proposed legislation to accomplish the recommendations. Public Law 874 requires that the Commissioner make payments to local educational agencies in accordance with a formula designed to compensate such agencies for the financial burden carried by them by reason of Federal activities—the loss of revenue because of Federal ownership of real property and the provision of educational services for federally connected children—or by reason of sudden or substantial increases in school attendance resulting from Federal activities.

Tentative Agenda

1. Swearing in of Commission members.
2. Organization of the Commission.
3. Discussion and determination of the means by which the charge of the Commission is to be implemented.
4. Determination of the dates, sites, and purposes of subsequent meetings of the Commission.

RECORDS: Records of all proceedings of the Commisson will be kept in accordance with law and will be available for inspection by the public at the office of the Commission, located at a site yet to be determined, notice of which location is to be available from the Committee Management Staff, Office of Education, Department of Health, Education, and Welfare, Room 2135, F.O.B. 6, 400 Maryland Avenue, S.W., Washinton, D.C. 20202.

Signed at Washington, D.C., on the 24th day of August 1979.

Richard Dallas Smith,

Executive Director, Designate, Commission on the Review of the Federal Impact Aid Program.

[FR Doc. 79-27549 Filed 9-4-79; 8:45 am]

BILLING CODE 4110-02-M

Office of the Secretary

Public Meeting on Proposed Data Collection of Compliance Information

Notice is hereby given that the Office for Civil Rights will hold a one-day meeting Thursday, September 20, 1979, from 9:00 a.m. to 5:00 p.m. in Federal Office Building #6, Room 6104, 400 Maryland Avenue, S.W., Washington, D.C.

The purpose of the meeting is to review and discuss the proposed contents of the Fall 1980 OS/CR 101 and 102 Elementary and Secondary School Survey forms.

A translator for the deaf will be available. The building is accessible.

FOR FURTHER INFORMATION CONTACT: Janet Smallwood, DHEW, Office for Civil Rights, 330 Independence Avenue, S.W., Washington, D.C. 20201, 202/245-6241.

Dated: August 30, 1979.

Bruce Mayor,

Acting Director Office for Civil Rights.

BILLING CODE 4110-12-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N-79-945]

Notice of Availability of Recent Changes to HUD Minimum Property Standards

AGENCY: Housing and Urban Development.

ACTION: Notice of Availability—Changes to Minimum Property Standards.

SUMMARY: The Assistant Secretary for Housing—Federal Housing Commissioner has established certain changes in the HUD Minimum Property Standards. These changes are being made to clarify, eliminate, and update certain provisions of the existing standards.

EFFECTIVE DATE: October 5, 1979.

FOR FURTHER INFORMATION CONTACT: Richard A. Gray, Director, Minimum Property Standards Division, Office of Architecture and Engineering Standards, Room 6170, telephone 202–755–6590.

SUPPLEMENTARY INFORMATION: HUD Minimum Property Standards are published in handbooks: Minimum Property Standards for One- and Two-Family Dwellings in Handbook 4900.1, Multifamily Housing in Handbook 4910.1, and Care-Type Housing in Handbook 4920.1. The Minimum Property Standards are incorporated by reference into 24 CFR 200.927. An updated copy of the Minimum Property Standards is available for public examination in (1) the Information Center, Room 1104, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C., and in each HUD Regional, Area, and Service Office; and (2) the Office of the Federal Register, 1100 L Street, N.W., Room 8401, Washington, D.C. In addition, copies of volumes 1, 2, and 3 of the Minimum Property Standards may be purchased from the United States Government Printing Office, Washington, D.C. 20402.

Notices of changes in the Minimum Property Standards are required by 24 CFR 200.933 to be published in the **Federal Register**. An official, historic file of such changes is available in the office of the Rules Docket Clerk in the HUD Headquarters in Washington, D.C., and in each HUD Regional, Area, and Service Office. A similar copy of the standards is also being maintained in the Office of the Federal Register, Washington, D.C.[1]

Public comments to these changes are not being solicited because they do not contain substantive revisions to technical requirements. The changes are primarily made for editorial purposes, reference updating and clarification.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this Finding of Inapplicability will be available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Office of General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410.

The most recent changes made are intended to:

(1) Clarify criteria and eliminate inconsistencies in response to field, user and product association requests,

(2) Bring criteria in line with recognized codes,

(3) Delete gratuitous, procedural, programmatic and redundant material,

(4) Update reference material as necessary,

(5) Correct format and edit material in anticipation of reprinting the standards.

Issued at Washington, D.C., on August 27, 1979.

Lawrence B. Simons,

Assistant Secretary for Housing—Federal Housing Commissioner.

[FR Doc. 79-27555 Filed 9-4-79; 8:45 am]

BILLING CODE 4210-01-M

[1] A copy of the standards was filed as part of the original document and is available in the Library at the Office of the Federal Register.

Office of the Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Protection

[Docket No. N-79-944]

Consumer Forum on HUD-Owned Multifamily Property Disposition; Forum

AGENCY: Department of Housing and Urban Development (HUD).

ACTION: Notice is given announcing a consumer forum.

SUMMARY: The Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Protection is announcing a Consumer Forum on HUD-owned Multifamily Property Disposition. The Forum is scheduled for September 24, 1979, and the description of the Forum is stated.

DATE OF FORUM: A Consumer Forum on HUD-owned Multifamily Property Disposition is scheduled to be held on Monday, September 24, 1979, from 9:00 a.m. to 5:00 p.m. at the Shoreham Americana Hotel, 2500 Calvert Street, N.W., Washington, D.C.

ADDRESS: Joseph Smith, Director, Consumer Liaison Division, Office of Consumer Affairs, Room 4212, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT: Portia James, 202–755–6996; Joseph Smith, 202–755–5360.

SUPPLEMENTARY INFORMATION: The one-day HUD-owned Multifamily Property Disposition Forum will provide an overview session and a series of workshops to enable participants to develop an in-depth understanding of HUD's Multifamily Property Disposition Program.

The Forum will acquaint consumers and neighborhood organizations with HUD's criteria for public/private organizations owning, managing and rehabilitating HUD-owned multifamily properties.

An overview of the multifamily property disposition process will be highlighted in the morning session with keynote presentations by HUD officials. In the afternoon, workshops will focus on specific topics and issues.

The Forum on HUD-owned Multifamily Property Disposition will be open to the public.

Issued at Washington, D.C., August 27, 1979.

Geno C. Baroni,

Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Protection.

[FR Doc. 79-27554 Filed 9-4-79; 8:45 am]

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Commercial Recreation Use Fees—Rivers

August 27, 1979.

AGENCY: Bureau of Land Management, Interior.

ACTION: Commercial Recreation Use Fees—Rivers.

SUMMARY: For the 1980 through and including 1982 river use seasons, fees for commercial river float boating will be increased from the present $75.00 per 100 user days to $120.00 per 100 user days on the following areas:

Green River—Desolation/Gray Canyons
Colorado River—Westwater Canyon
Dolores River—Utah state line to confluence with the Colorado River
San Juan River—Bluff, Utah to Mexican Hat, Utah

Fees for trips of one day or less duration will be $50.00 per 100 user days on the following areas:

Green River—Nefertiti Rapid to the Diversion Dam
Colorado River—Rose Ranch to Castle Creek

The above fee increase is based on an appraisal conducted during the fall of 1978 and supplemented during the summer of 1979. Results of this appraisal indicated fees should be based on three percent of the effective gross revenues collected. This amounted to an average of $1.20 per user day on multiple day trips, including one day trips on Westwater, and $.50 per user day on trips of one day or less for the "daily" section as described above. The fee schedule will be reappraised every three years, with the next fee adjustment falling due in 1983.

DATE: Effective Date: January 1, 1980.

ADDRESS: State Director, Bureau of Land Management, 136 East South Temple, Salt Lake City, Utah 84111.

FOR FURTHER INFORMATION CONTACT: State Director, Utah.

SUPPLEMENTAL INFORMATION: Use fees on the above mentioned river segments have remained at the same level since their inception in 1973 except for the 1979 river use season. The Federal Land Policy and Management Act of 1976 directs that fair market value be charged for commercial use.

The current fee schedule is based on an appraisal using the market approach and effective gross revenue data obtained from commercial river guides. Fees collected will be returned to the area from which they were generated for site protection and management.

Gerald E. Magnuson,

Acting State Director.

[FR Doc. 79-27544 Filed 9-4-79; 8:45 am]

BILLING CODE 4310-84-M

Coal Management Program Briefings and Planning Workshops

AGENCY: Bureau of Land Management, Interior.

ACTION: Coal Management Program Briefings and Planning Workshops.

SUMMARY: The Office of Coal Management, Bureau of Land Management and the Office of Coal Leasing, Planning, and Coordination, U.S. Department of the Interior, will hold a series of briefings, workshops and open house events to be conducted in eight States during September and October 1979, to acquaint elected officials, the coal industry and the public with details of the new Federal coal management program.

DATES: The opening session is scheduled for September 10, 1979, in Denver, Colorado. See supplementary information below for full schedule of dates and city location.

ADDRESS: Any suggestions or remarks should be sent to the Assistant to the Director for Coal Management, Bureau of Land Management, Room 3610, 18th & C Streets, N.W. Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Mary Beth Henry (202) 343–4191, or Tom Walker (202) 343–4537.

SUPPLEMENTARY INFORMATION: The sessions are intended to increase understanding, by the mining industry and the public, of the new Federal coal management program, implemented by Secretary of the Interior, Cecil D. Andrus, on June 4, 1979. The program initiates, for the first time since 1971, competitive leasing of Federal coal to assure adequate coal production to meet U.S. energy needs. The schedule includes:

Denver, Colorado—September 10–11—covering the Denver-Raton Mesa, Uinta-Southwest Utah, Green River-Hams Fork, and the San Juan River Coal Regions.
Cheyenne, Wyoming—September 12–13—covering the Green River-Hams Fork, and Powder River coal regions.
Tuscaloosa, Alabama—September 17–18—covering the Southern Appalachian coal region.
Salt Lake City, Utah—September 20–21—covering the Uinta-Southeast Utah, Green River-Hams Fork, and San Juan River coal regions.
Albuquerque, New Mexico—October 2–3—covering the San Juan River, Denver-Raton Mesa, and Texas coal regions.
Oklahoma City, Oklahoma—October 4–5—covering the Western Interior coal region.
Bismarck, North Dakota—October 17–18—covering the Fort Union coal region.
Billings, Montana—October 29–30—covering the Powder River and Fort Union coal regions.

Specific building and street locations of the sessions within the cities shown will be announced later. Further inquiry can also be directed to address shown above, or by contacting the respective State Director, Bureau of Land Management, Interior, at the following location:

State Director, Colorado, Colorado State Bank Building, Room 700, 1600 Broadway, Denver, Colorado 80202, (303) 837–4325.
State Director, Montana, 222 N. 32nd Street, P. O. Box 30157, Billings, Montana, 59107, (406) 657–6461.
State Director, New Mexico, U.S. Post Office Federal Building, South Federal Place, Box 1449, Santa Fe, New Mexico 87501, (505) 988–6217.
State Director, Utah, University Club Building, 136 East South Temple, Salt Lake City, Utah 84111, (801) 524–5311.
State Director, Wyoming, 2515 Warren Avenue, P. O. Box 1828, Cheyenne, Wyoming 82001, (307) 778–2220.
Director, Eastern States, 350 South Pickett Street, Alexandria, Virginia 22304, (703) 235–2830.

Each of the two-day workshops will include an evening Open House program offering opportunities for community leaders and the interested public to discuss the program with officials involved in the development and operation of the program. Comprehensive workshops for the coal industry and other interested groups will be held on the second day in each of the cities. Topics shall include identification of potential coal lands, data analysis, surface owner consent, designation of lands unsuitable for coal leasing, preferred lease areas, and methods for hearings and appeals. All sessions are open to the public.

Sessions covering the Central and Northern Appalachian and the Eastern Interior coal regions are also in the planning stage for late October or early November, and formal announcement will be made regarding these proposed workshops.

Guy R. Martin,

Secretary for Land and Water Resources.

August 29, 1979.

BILLING CODE 4310–84–M

Bureau of Reclamation

Cascade Reservoir Land Use, Management Plan, Payette Division, Boise Project, Idaho; Intent To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior intends to prepare an environmental impact statement on the proposed Cascade Reservoir Land Use Management Plan, Idaho. The proposed management plan presents current recreation and wildlife activities and construction on the perimeter of Cascade Reservoir and presents plans for future actions. Cascade Reservoir is located approximately 130 kilometers (80 miles) north of Boise, Idaho, and has been in operation since 1948.

The statement will cover the impacts of the preferred management plan alternative which proposes the allocation of land for both recreation and wildlife management, and the other alternatives including: (1) Managing the Reclamation lands primarily for recreation, (2) managing primarily for wildlife, and (3) no management plan. The environmental impact statement will address the impacts of recreation and wildlife uses on the reservoir lands, locations of recreation developments, and the effects of the implementation of the management plan on the nearby towns and counties.

Environmental studies and preparation and processing of an environmental impact statement for this proposed project will be in accordance with provisions of the National Environmental Policy Act of 1969, and will be accomplished under the Council on Environmental Quality regulations published in the **Federal Register** on November 29, 1978.

Issues and concerns related to the proposed management plan have been identified through a series of public meetings in Cascade and Boise, Idaho, on April 11 and 13, 1978, and on November 30 and December 1, 1978.

The Department of the Interior invites comments and suggestions on the proposal to ensure that all significant issues are identified and discussed in the statement. Interested agencies, organizations, and individuals should write to or contact the Bureau of Reclamation at the address provided below. The contact person will be:

Gaye W. Lee, Environmental Protection Specialist, Bureau of Reclamation, Pacific Northwest Region, Box 043, 550 West Fort Street, Boise, ID 83724, Telephone: 208–384–1926.

Dated: August 28, 1979.

R. Keith Higginson,

Commissioner of Reclamation.

BILLING CODE 4310–09–M

DEPARTMENT OF JUSTICE

Law Enforcement Assistance Administration

Coordinating Council on Juvenile Justice and Delinquency Prevention Meeting

Notice is hereby given that the Coordinating Council on Juvenile Justice and Delinquency Prevention will meet Wednesday, September 19, 1979 at 633 Indiana Avenue, N.W., Washington, D.C., 13th Floor Conference Room. The meeting will be open to the public.

The meeting will begin at 10:00 a.m. The Council will discuss issues of staff support for the Council; the impact on the Council of proposed amendments to the Juvenile Justice and Delinquency Prevention Act; the role of the Council in relation to other key provisions of the Juvenile Justice Delinquency Prevention Act of 1974, as amended; and, approaches to organizing the work of the Council.

Presentations will be made on the outcome of the discussions at the previous meeting of the Council on Title XX of the Social Security Act; the White House Working Group on Youth and the Working Group on Youth Unemployment; and, the work of the Community Research Forum of the University of Illinois under a grant from the Office of Juvenile Justice and Delinquency Prevention of the Law Enforcement Assistance Administration. There will be a luncheon recess from 12:00 noon until 1:00 p.m.

For further information contact Mr. James C. Shine, Executive Assistant and Special Counsel, Office of Juvenile Justice and Delinquency Prevention, Law Enforcement Assistance Administration, Department of Justice, 633 Indiana Avenue, N.W., Washington, D.C. 20531.

David D. West,

Acting Associate Administrator Office of Juvenile Justice and Delinquency Prevention.

[FR Doc. 79–27558 Filed 9–4–79; 8:45 am]

BILLING CODE 4410–18–M

National Advisory Committee for Juvenile Justice and Delinquency Prevention; Meeting

Notice is hereby given that the National Advisory Committee for Juvenile Justice and Delinquency Prevention (the Committee) and its Subcommittees will meet Thursday, Friday and Saturday, September 20, 21 and 22, 1979, at the Wellington Hotel in Washington, D.C. The meeting will be open to the public.

On Wednesday, September 19, preceding the full Committee meeting, the Executive Committee will meet at 6:00 p.m. The meeting of the full Committee is scheduled to convene at 8:45 a.m. on Thursday, September 20. The session will begin with a report from the Executive Committee and reports from the Administrator of LEAA and the Associate Administrator of the Office of Juvenile Justice and Delinquency Prevention (OJJDP). At 10:30 a.m., following a brief recess, the four Subcommittees: Advisory Committee for the National Institute for Juvenile Justice and Delinquency Prevention; Advisory Committee to the Administrator on Standards for Juvenile Justice; Advisory Committee to the Administrator of the Office; and Advisory Committee on the Concentration of Federal Effort, will meet. Following a 12:30 p.m.—2:00 p.m. luncheon, the Subcommittees will reconvene in individual sessions for the remainder of the day.

On Friday, September 21, at 10:00 a.m., the full Committee will reconvene to review recommendations arising from the previous day's joint meeting of the Subcommittee to Advise the Administrator and the Subcommittee on Concentration of Federal Effort on the topics of State Subsidies and the establishment of Regional Advisory Committees. The rest of the day will be devoted to the Report of the Advisory Committee to the Administrator on Standards. That report will review recommended Standards for the Administration of Juvenile Justice and Strategies for delinquency prevention. At the conclusion of this review, the Committee will vote on their adoption.

The full Committee will reconvene on Saturday, September 22, at 9:00 a.m. to continue the report of the Executive Committee and to hear the reports from the Advisory Committee to Advise the Administrator of the Office; the Advisory Committee on Concentration of Federal Effort and the Advisory Committee for the National Institute for Juvenile Justice and Delinquency Prevention. This will be followed by a review of plans for the November/December meeting of the Committee. The meeting of the full Committee is scheduled to adjourn at 11:30 a.m.; an hour long meeting of the Executive Committee will follow.

For further information, contact Mr. David D. West, Acting Associate Administrator, Office of Juvenile Justice and Delinquency Prevention, Law Enforcement Assistance Administration, Department of Justice, 633 Indiana Avenue, N.W., Washington, D.C. 20531.

David D. West,

Acting Associate Administrator, Office of Juvenile Justice and Delinquency Prevention.

BILLING CODE 4410–18–M

NATIONAL COMMISSION ON AIR QUALITY

Policy on Public Participation

The National Commission on Air Quality Public Participation Plan published below is intended to assure active and meaningful public involvement in the Commission's studies of the Clean Air Act, as mandated under Section 323 of that Act.

The Commission during its studies will seek to ensure broad public participation at important stages of its program, including during the development of its reports and recommendations to Congress. The plan published below seeks to assure not only that the Commission informs the interested publics about its studies but also that the Commission is advised of the experiences of all sectors involved in air quality issues and applies that information to the overall study.

The Commission's Public Participation Plan will be a flexible document subject to modification as necessary, and the Commission accordingly invites public comments on the plan and on additional ways in which the Commission can achieve its goals of involving the public in its activities. As detailed below, the Commission is especially interested in receiving public comments on three issues: The feasibility and value of the Commission's sponsoring a national conference on air quality; the concept of a formal, independent mid-point evaluation of the Commission's public participation program, with recommendations, if appropriate, for improving the effort; and the necessity for reimbursing particular sectors of the public for travel costs associated with participation in Commission activities.

Comments and questions on the Public Participation Plan should be addressed to Mr. Morris A. Ward, Assistant Director, Public Affairs and Administration, National Commission on Air Quality, Second Floor, 499 South Capitol St., SW., Washington, D.C. 20003; telephone (202) 245–6355.

William H. Lewis, Jr.,

Director.

August 30, 1979.

National Commission on Air Quality—Public Participation Plan

Introduction

The Public Participation Plan of the National Commission on Air Quality (NCAQ) is divided into four sections: Initiation of Public Contact; Information Dissemination; Consultation and Response; and Evaluation.

Public Participation activities in each section are closely related to the Commission's technical work, as outlined in the Commission's June 22, 1979, Plan of Study. The activities are intended to increase communication between the public and the NCAQ Commissioners and staff members on air quality issues.

The Commission expects this Public Participation Plan to be flexible and dynamic, changing in response to public comments, to meet changing needs. The plan will be revised also to reflect ongoing evaluations. NCAQ hopes that the public will continue to propose additional innovative ways to accomplish the participation objective, provide insights about successes and failures of other federal Commissions' public participation efforts, and suggest areas of emphasis throughout the study period.

The Public Participation Plan proposes that the Commission undertake a variety of activities such as workshops, expert panels, ad hoc information groups, public hearings, a formal evaluation, and perhaps also a national conference. These activities would provide opportunities for substantive dialogue among air pollution control interests, but they also are costly in terms of staff time, time and expenses of the public, and logistical costs. While the Commission places a high priority on public participation, its resources are limited. Public comment on the cost effectiveness and relative merit of each of these activities will affect the Commission's resource allocations. The Commission is particularly inviting comment about the feasibility and value of the national conference and of the formal independent evaluation of the Public Participation Plan and how it is implemented. The advantages and resource constraints of each are discussed in Part III.G. and Part IV. of the Plan, respectively.

Another resource constraint which affects the Public Participation Plan is the Commission's travel budget. The approved fiscal year 1979 and fiscal year 1980 travel budgets for the Commission will cover only essential travel for the Commissioners and staff. This restriction consequently limits the degree to which the Commission can reimburse the public for travel costs associated with participation. Therefore, the Commission is seeking comment concerning criteria for reimbursing travel expenses within the limits described, alternative ways to encourage participation, and assessments of activities which will suffer most from a lack of travel support.

Objective

The purpose of this Public Participation Plan is to ensure that any and all interested parties become actively involved in the ongoing work of the National Commission on Air Quality and to provide opportunities for consensus to emerge concerning technical issues related to the Clean Air Act and the Commission's recommendations to Congress.

Because these recommendations will relate to national policy on air pollution control, it is essential that diverse interests contribute to the Commission's examination of the Clean Air Act, and to its study of alternative means of achieving the Act's goals.

Accordingly, this Plan proposes a strategy for fulfilling the Commission's desire and obligation both to inform and to respond to a multiplicity of interests and opinions regarding air quality issues.

I. Initiation of Public Contact

The Commission intends to identify groups or individuals who may be interested in or affected by air pollution control issues. An initial mailing list has been compiled. The Commission expects that this list will be continually expanded as additional names are suggested and as additional groups seek to be kept informed of Commission activities. As the work of the Commission progresses, the general mailing list will be divided by location and by particular areas of interest. Tasks to initiate public contact include:

A. *Identification and inclusion on the mailing list of groups and individuals*

interested in air quality issues. Initial estimate is 5,000 names including (in alphabetical order):

1. Agricultural Interests
2. Civic Associations
3. Congress and Congressional Staff
4. Consumer Groups
5. Conservation Organizations
6. Educational Associations and Institutions
7. Environmental Groups
8. Federal Departments and Agencies
9. Individuals
10. Industry Groups and Individual Corporations
11. Labor Organizations
12. Local, City, County Government Agencies
13. Minority Groups
14. National and Local Media
15. Public Health Organizations
16. Regional Government Agencies
17. Scientific and Professional Associations
18. Small Businesses
19. State Executive Branches
20. State Legislative Branches
21. Trade Press and Specialized Press
22. Other

B. *Summarizing of interests, activities, publications, and potential involvement* of groups and individuals identified above. This effort will include the preparation of descriptions of the groups' past air quality activities and current areas of emphasis and will include listing the publications and newsletters of each group.

C. *Organization of the mailing list* into the following categories:

1. A list of the most active, interested, and involved groups and individuals nationwide—initial estimate 1,000. The Commission will attempt to keep the groups and individuals on this list fully informed about the Commission's progress and will contact them by direct mail on occasions when public comment is being sought.

2. Lists of groups and individuals according to geographic regions. This list will be particularly important for those regions selected for study under Parts II and III of the Commission's Plan of Study.

3. Lists of groups and individuals expressing specific interest or having particular expertise in a technical or policy area being studied by the Commission.

D. *Initiation of Public Contacts.* While much initial contact will be made by telephone, the following formal contacts will also be made:

1. Media contacts for print media including national newspapers and news magazines, trade and specialized publications. In many cases, information will be delivered to Washington bureaus of out-of-town papers, or to news services which supply local publications. Regional mailing lists will be developed in areas where NCAQ Commissioners live and work and in regions selected for intense study. Press releases and other information will be addressed to the appropriate environmental writer or editor.

Mailing lists for radio and television will be developed in an identical manner and scope. When live coverage is appropriate, special efforts will be made to notify assignment editors and "talk-show" producers.

2. Initial mailings to entire mailing list including NCAQ Plan of Study and accompanying fact sheet, introduction of Commissioners and key staff, and background information on NCAQ mandate, history, and organizations.

II. Information Dissemination

In order to participate effectively, the public must have accurate, understandable, and pertinent information about air quality issues the Commission is addressing. NCAQ will establish and maintain information depositories in public libraries or universities in regional areas studied by the Commission and in other areas deemed appropriate or necessary. The depositories will contain copies of technical studies completed under contract to NCAQ, background information about the Commission, and other relevant information. NCAQ will be reponsible for keeping the contents of the depository current. The NCAQ library in Washington, D.C., will be open to the public during normal working hours. Requests for copies of reports and documents will be filled by NCAQ when possible or will be referred to contractors and other sources who may charge a fee for reproduction. In its effort to disseminate information, the Commission will:

A. *Serve as a clearinghouse,* directing the public to existing sources of air quality information. The Commission intends to be responsive to requests for basic information. However, a substantial amount of information has already been produced by public and private sources. Therefore, the Commission will research existing public information sources and will develop a list of contact people in outside organizations to whom requests can be referred.

B. *Maintain an NCAQ speakers bureau.* Commissioners and NCAQ staff will be active participants in various public meetings, conferences, workshops, panels and forums of groups interested in air quality issues. Commission members and NCAQ staff will inform those groups of the Commission's activities and will encourage involvement of those groups in the Commission's work. NCAQ participation and speeches will be announced in the NCAQ bulletin and through proper media channels. Texts of speeches by NCAQ members and staff will be available upon request when written versions of the speech were prepared.

C. *Distribute timely information on a regular basis.* The Commission regularly will prepare information for wide distribution to keep interested parties advised of the Commission's progress. This effort includes dissemination of information in the following ways.

Type	Timing	Distribution
1. Four page NCAQ bulletin containing articles on contracts awarded, upcoming speeches, announcements, summaries of Commission meetings, notices of available reports, articles by staff, etc.	Monthly	Entire mailing list.
2. Announcements of Commission meetings:		
a. FEDERAL REGISTER Notices	30-day advance	Readers of FEDERAL REGISTER.
b. NCAQ Bulletin	Monthly	Entire mailing list.
c. Dear Colleague letter	Occasionally	Congressional offices.
3. Summaries of NCAQ meetings describing the content of presentations, discussions, and actions taken.	Monthly	Core list.
4. Articles in newsletters, and other publications of outside organizations.	Frequently	Outside organizations.
5. National Press (print/electronic). Trade Press (print/electronic). Regional Press (print/electronic).		

D. *Ensure that technical background documents are available* for public scrutiny. A copy of each document will be placed in the regional depositories and in the NCAQ library. Examples of documents to be provided are:

Type	Timing
1. Contractor reports	Upon approved completion of contract.
2. Existing studies	When compiled.
3. Reports of expert panels	When completed.
4. NCAQ staff studies	When completed.
5. Regional profiles and status reports	When plan of study parts II and III regional attainment and nonattainment areas are selected.
6. Industrial profiles and status reports	When plan of study part VI industries are selected.

E. *Distribute information which facilitates the formal public comment process.* The Commission will solicit and consider public comments prior to making certain key decisions. Some solicitations will include a **Federal Register** notice and some will be by direct mail. Comments and suggestions will be solicited prior to selection of attainment and nonattainment areas under Parts II and III of the Plan of Study, before industries are selected for study under Part VI, prior to substantive revisions of the Public Participation Plan, before final recommendations to Congress are developed, and at other points yet to be identified. When public comments are being sought, the Commission will provide information concerning the action or decision at least 30 days prior to the decision. This time is needed so the public can develop informed comments and so that the Commission can carefully consider public views before taking final action. The information will include:

Type	Timing
1. The proposed document or summary of action to be taken.	30-days advance.
2. Fact sheet, when appropriate, summarizing: Issues involved. Ramifications of decision. Alternatives considered. Trade-offs of alternatives. Known positions of outside organizations or individuals. Areas particularly needing comment.	30-days advance.
3. Technical background documents	When requested.

III. Consultation and Response

Throughout the study, NCAQ will encourage and maintain a dialogue with members of the public. NCAQ will exchange views and openly explore issues, alternatives, and consequences with individuals and groups representing a variety of interests. Consultation will take place at formal and informal meetings, workshops and hearings, through discussions with expert panels and ad hoc information groups, and during the public comment periods. When appropriate, as after a public comment period, a formal NCAQ response will identify those who participated and subjects discussed; summarize the public's views, important comments, criticisms and suggestions; and detail how public contributions affected NCAQ actions and/or why public comments were not incorporated. This formal response hereafter will be called a responsiveness summary.

An attachment to the Public Participation Plan delineates in chart form the formal meetings and responses proposed by the Commission. In its effort to consult and respond effectively the Commission will:

A. *Conduct montly Commission meetings which are open to the public* unless otherwise provided by majority vote of the Commissioners. Approximately thirty (30) days prior to each meeting, a notice and proposed agenda will be published in the **Federal Register.** This notice will appear also in the NCAQ bulletin. In order to inform the public of events that take place at Commission meetings, NCAQ will make available summaries of each meeting upon request. Unless otherwise provided by majority vote, a transcript will be kept of all proceedings of the full Commission, and the transcript will be available for public inspection during regular staff working hours in the NCAQ library.

B. *Schedule numerous informal meetings between NCAQ staff and outside interests.* These meetings will be kept informal in order to encourage open expression of views. These meetings will also allow NCAQ staff to become fully familiar with existing relevant information and technical studies in the possession of a variety of public and private interests. Examples of such meetings include:

Who	Why
1. Liaison staff/Technical staff/Outside groups and individuals	To brief groups about NCAQ progress; To learn about available data/concerns/preferences.
2. Brown bag lunches for NCAQ staff with outside groups and individuals representing different interests.	To brief groups about an issue; listen to suggestions; build understanding of other viewpoints.

C. *Convene panels of experts for in-depth discussion of specific issues relating to air quality.* Through seminars, commissioned papers, and workshops the Commission will consult with experts about air quality issues where there is a level of controversy or where no consensus exists on a particular issue. The expert panels are expected to provide NCAQ with a variety of cogent opinions and, where possible, to work together to achieve consensus. After receipt of an expert panel report, NCAQ will place a copy in each regional depository and in the NCAQ library. Expert panels are proposed for the following issues:

1. Photochemical oxidants (Plan of Study, Part I). Scientists will recommend scientific approach and identify areas needing research.

2. Modelling techniques (Plan of Study, Part II). Scientists will review existing techniques and recommend NCAQ modelling approach.

3. Benefit methodology (Plan of Study, Part V). Economists will clarify estimation techniques and crituque existing studies.

4. Cost Methodology (Plan of Study, Part V). Economists will identify relevant cost methodology and critique existing studies and techiques.

5. Particle size and composition (Plan of Study, Part I). Experts will evaluate potential effects and adequacy of data.

6. Biomedical effects of diesel exhaust (Plan of Study, Part I). Experts will discuss potential effects and recommend areas of research.

7. High altitude carbon monoxides (Plan of Study, Part I). Medical experts will evaluate the health effects of carbon monoxide at high altitude.

D. *Establish Ad Hoc Information Groups and consult with members of those groups.* Ad Hoc Information Groups will be established as follows. Under Parts II and III of the NCAQ Plan of Study, the Commission will select up to six areas for intense study. These will include both areas which attain ambient air quality standards for certain pollutants and areas which are not attaining standards for some pollutants. An Ad Hoc Information Group will be established for each area to fully reflect government, business, environmental, and civic interests in the selected area. Throughout the study, individuals serving on the Ad Hoc Information Groups will be consulted about data, opinions, growth projections and local experiences to ensure use of best available and most realistic information.

V 44/173 SEP 5 79

Two workshops will be held for the Ad Hoc Information Groups and other interested or affected parties in each regional study area. The first workshop will be held shortly after the study begins to explain NCAQ objective for the study, determine sources for existing information, and respond to questions. The second workshop will be held at the end of the study to consult with the Ad Hoc Information Group and other interested parties concerning NCAQ findings and tentative conclusions concerning that regional study.

An Ad Hoc Information Group will also be established for the industry selected for study under Part VI of the Plan of Study. This group will consist of representatives of the industries to be studied, state and local control agencies, environmental organizations, and labor organizations and will provide a forum for communication among NCAQ staff, industry representatives, and those affecting and affected by the industry.

E. *Require certain contractors to consult with and respond to the public.* Certain research contracts will produce more useful information and better conclusions if a public participation task is included in the contractor's scope of work. Other contracts will include tasks to gather information about public participation in current air quality control programs. These tasks will help the Commission keep the public informed about ongoing technical projects, will contribute to the data base about costs and benefits of public participation, and will further integrate the research and public affairs aspects of the Commission's work.

Appropriate contractor public participation tasks may include individual interviews with various interests, workshops, information distribution, a survey of interested parties, and a compilation of data from files. Groups and individuals to be contacted may include the Ad Hoc Information Group members, expert panel members or segments of the NCAQ mailing list grouped according to location or interest area.

While other studies undoubtedly will be identified, technical studies currently proposed to include a public participation task are:

1. Survey of State Implementation Plan Submittals (Plan of Study, Part I). Contractor will compile information from files and other sources to ascertain the extent of public participation in the SIP process.

2. Assessment of Transportation Control Measures (Plan of Study, Part I). Contractor will interview various groups and individuals to evaluate the extent of public participation and its effect on implementing TCM's.

3. Survey of PSD and Offset Permits (Plan of Study, Part I). Contractor will compile information from files and other sources to identify the extent of public participation in the permitting process.

4. Ability of Federal, State, and Local Governments to Implement and Enforce Provisions of the Clean Air Act (Plan of Study, Part VII). Contractor will conduct a nationwide survey to discover limitations on implementation ability and effects of those limitations on air quality goals.

5. Study of Mechanisms Necessary to Address Inter-Regional Transport of Photochemical Oxidants (Plan of Study, Part VII). Contractor will expand upon the EPA study of oxidant transport in the Northeast Corridor. State, local, and federal officials will be interviewed about potential inter-regional abatement mechanisms.

F. *Conduct formal public meetings or hearings* concerning specific air quality issues and Commission recommendations. In addition to the previously discussed regional study area workshops and meetings of expert panels, the Commission intends to formally consult with the public in various locations on a variety of topics. Included will be:

1. Meetings connected with technical studies. These meetings will feature presentations on a specific topic by various interests, followed by a panel discussion. The public will be invited to attend the two meetings currently planned. The theme of one meeting will be "A Study of Effects of Legal Requirements on Relations between Government and the Scientific Community" (Plan of Study, Part I). This meeting will allow various interests to discuss effects on the criteria-development process of government requirements for open meetings. A "Regulatory Reform Workshop" (Plan of Study, Part VII) will solicit both constructive criticism of existing procedural requirements in the air pollution control programs and recommendations for streamlining those procedures.

2. Meetings to involve groups and individuals outside of Washington, D.C. As resources permit and opportunities arise, the Commission will consult with the public in many locations about general air quality issues and about NCAQ purposes, progress, and findings. These meetings may be arranged specifically to discuss the Commission's air quality work or may occur during workshops or conferences sponsored by outside organizations.

3. Public Hearings. At the end of the NCAQ study, public hearings will be held in various locations to receive public comments on the Commission's final recommendation to Congress.

G. *Sponsor a National Air Quality Conference.* NCAQ is considering the values and costs associated with sponsoring a National Air Quality Conference. This conference could bring together interested and involved people from various parts of the country to discuss tentative NCAQ recommendations and could provide an opportunity for consensus to develop on air quality issues.

As proposed, NCAQ would sponsor a national conference at the end of the study period before final recommendations to Congress are developed and before the public hearings mentioned above begin. This conference would draw participants from the regional study areas, the selected industry sites and other areas. The conference's purposes would be (1) to focus attention on the work of the Commission's upcoming recommendations for Congress; (2) to engage people from different parts of the country with different perspectives in a dialogue about the issues; and (3) to provide NCAQ with comments and suggestions which, to the degree possible, reflect a consensus of the participants.

A national conference would offer numerous benefits, but it also would involve substantial staff time and money. Travel to the conference location could pose a problem because of the limited travel budget. In addition, subsidized travel might be necessary for some participants who otherwise could not afford to attend and without whom attendance at the conference may not be reasonably representative of all interests.

It is possible that some funding for such a conference could be provided by outside public and private sources. The Commission plans to explore this possibility. Also, staff time could be reduced and travel funds could be made available if the conference were produced under contract to an outside organization. This option would, of course, reduce the total amount of funds available to the Commission's technical studies.

The Commission particularly invites comments about the feasibility and value of a national conference. A conference of this scope would necessarily divert resources from other proposed public participation activities. Therefore, comments are sought concerning the relative merit of a conference versus other activities. On the matter of whether to hold a national conference, the Commission especially encourages comments on the following questions:

- Should NCAQ select participants (if so, according to what criteria), or should attendance be open?
- Should NCAQ reimburse some participants for travel? How? What selection criteria should be used to determine eligibility for reimbursement? What alternative funding mechanisms are available?

IV. Evaluation

The NCAQ staff will continually evaluate accomplishments and activities against the overall public participation objective. The Public Participation Plan is meant to be flexible, evolving to meet needs as they arise. A formal mid-point evaluation will help the staff make necessary changes and improvements. In order to conduct a fair and thorough evaluation, the Commission will:

A. *Develop evaluation criteria.* Based on comments received on this section of the Public Participation Plan, the Commission will develop several criteria to measure progress in meeting the public participation goal. Those criteria will become part of the Public Participation Plan. NCAQ is specifically seeking comment on appropriate evaluation criteria.

B. *Schedule periodic evaluations of staff performance in meeting the public participation objective.* The results of these internal evaluations will be included in the NCAQ library file.

C. *Consider the values and costs of an independent mid-point evaluation.* Under this proposal, NCAQ would establish and pay expenses of a panel of individuals who collectively represent the major parties interested in air quality issues and involved in the work of the Commission. Through independent interviews, and using the evaluation criteria, the panel would assess Commission efforts to meet the public participation objective and would suggest appropriate modifications to the public participation program.

The NCAQ is especially interested in comments on the feasibility and value of such an objective mid-point evaluation. If supportive, comments should propose selection criteria for panelists, and appropriate evaluation procedure. If an independent evaluation is not supported, comments should focus on evaluation criteria to be used by the Commission internally.

Summary of Formal Meeting Proposed by NCAQ

Type	Who	When	Why	Response
1. *Seminars*	Expert Panels	Throughout the study	Take advantage of outside expertise; build consensus.	Report on conclusions for the public files.
2. Two *Workshops* in each *Regional Study Area.*	Ad Hoc Info Groups and interested public.	One at beginning of study	To brief the public and learn local concerns.	Report of workshop for the public file.
		One at end of study	To listen to the public and receive comments about study.	Responsiveness summary.
3. Two *Workshops* on *Selected Industries*	Ad Hoc Information Groups and interested public.	One at beginning	To brief the group re purposes of the study and to hear different viewpoints.	Report of workshop for the public file.
		One at end of study	To receive comments about each industry.	Responsiveness summary.
4. *Public Meetings*	Interested public	Throughout the study	To brief the public, receive comments, discuss issues.	Report on meeting for the public file.
5. *National Air Quality Conference*	Participating and interested public.	Near the end of the study	Discuss NCAQ tentative recommendations.	Report on conference for the public file.
6. *Public Hearings*	Interested public	3-Months prior to end of study	Formal comment on proposed recommendations to Congress.	Responsiveness summary.

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Revised Notice of Meeting

Regarding the previous **Federal Register** Notice (published on August 23, 1979 (44 FR 49527)) for the meeting of the Advisory Committee on Reactor Safeguards to be held on September 6–8, 1979, in Washington, D.C., changes in scheduling are indicating below:

Thursday, September 6, 1979

8:30 A.M.–9:00 A.M.: Executive Session (Open)

The Committee will hear and discuss the report of the ACRS Chairman regarding miscellaneous matters relating to ACRS activities.

9:00 A.M.–12:00 Noon: Meeting with NRC Staff (Open)

The Committee will hear and discuss a report by the NRC Staff regarding the implications of the accident which occurred at the Three Mile Island Nuclear Plant Unit 2.

1:00 P.M.–2:00 P.M.: Meeting with Stone and Webster Engineering Corporation (Open)

The Committee will hear and discuss comments from representatives of the Stone and Webster Engineering Corporation regarding the seismic design of nuclear power plant systems.

Portions of this session will be closed as necessary to discuss Proprietary Information.

2:00 P.M.–3:00 P.M.: Meeting on Nuclear Operations Institute (Open)

Representatives of the Atomic Industrial Forum Policy Committee on Follow-up to the Three Mile Island Accident will brief the Committee regarding the proposed activities of the Nuclear Operations Institute.

3:00 P.M.–4:00 P.M.: Meeting with NRC Staff (Open)

The Committee will hear and discuss a report regarding areas of potentially high stresses in the Mark I containment resulting from recent large scale test data.

4:00 P.M.–7:00 P.M.: Executive Session (Open)

The Committee will hear and discuss the report of its Subcommittee on the review of Licensee Event Reports submitted by the operators of commercially licensed nuclear power plants during the period of 1976–78.

The Committee will discuss the status of action being taken to evaluate systems interactions at the Zion Nuclear Station and Indian Point Nuclear Plant Unit 3.

Friday, September 7, 1979

8:30 A.M.–12:30 P.M.: Three Mile Island Unit 2 Accident Implications (Open)

The Committee will discuss underlying causes which contributed to the accident which occurred at the Three Mile Island Nuclear Station Unit 2.

V 4 4 / 1 7 3 S E 5 7 9 UMI

1:30 P.M.–6:30 P.M.: Executive Session (Open)

The Committee will hear and discuss the report of its Subcommittee Chairman regarding a proposed plan of action to review and evaluate the status of generic items which were listed in ACRS Report No. 7 dated March 21, 1979 as applicable to light-water nuclear reactors.

The Committee will discuss proposed ACRS recommendations to the Nuclear Regulatory Commission regarding implications of the accident which occurred at the Three Mile Island Nuclear Station Unit 2.

The Committee will discuss the proposed scope and organization of its annual report to Congress on the NRC Safety Research Program.

Saturday, September 8, 1979

8:30 A.M.–3:30 P.M.: Executive Session (Open)

The Committee will discuss proposed ACRS comments and recommendations regarding the implications of the accident which occurred at Three Mile Island 2 on March 28, 1979, its proposed report to the NRC regarding evaluation of Licensee Event Reports, and proposed ACRS position/comments regarding other matters discussed during this meeting.

The Committee will discuss proposed activities related to the development of quantitative risk criteria for nuclear facilities.

The Committee will discuss proposed resolution of Anticipated Transients Without Scram for Boiling Water Reactors.

The Committee will discuss its schedule for future activities and the activities of individual members.

Dated: September 4, 1979.

John C. Hoyle,

Advisory Committee Management Officer.

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

Impediments to International Trade in Services; Solicitation of Public Views and Comments

1. Solicitation of Views: Preparation for discussion in the Organization for Economic Cooperation and Development (OECD) concerning impediments to international trade in services is now underway. It is contemplated that public sector advisory committees will be formed to provide advice on this subject. Pending the availability of advice from such committees the Office of the Special Representative for Trade Negotiations is particularly interested in receiving public views and comments and hereby solicits public views and comments on work undertaken to prepare an inventory to define and categorize types of impediments to international trade in services. Public views and comments concerning foreign barriers to U.S. service industries were solicited in connection with the Tokyo Round of Multilateral Trade Negotiations. (See: 42 FR 38445, 42 FR 59784, 42 FR 38445.)

For further information concerning services and service industries, reference should be made to: "U.S. Service Industries in World Markets: Current problems and future Policy Development," U.S. Dept. of Commerce, 1976, available for purchase by reference to publication No. PB262528 from the Department of Commerce, National Technical Information Service, Washington, D.C. 20230.

A copy of a preliminary draft of the inventory of impediments to international trade in services will be available for public inspection by September 7, 1979 at the Office of the Special Representative for Trade Negotiations, Room 735, 1800 G Street, NW., Washington, D.C.

For further information contact:

Nancy Adams or Dorothy Dwoskin, Room 735, 1800 G Street, NW., Washington, D.C. 20506, (Telephone 202–395–5140).

C. Michael Hathaway,

Acting General Counsel.

BILLING CODE 3190-01-M

PRESIDENT'S COMMISSION ON THE ACCIDENT AT THREE MILE ISLAND

Meetings

In accordance with the Federal Advisory Committee Act (Pub. l. 92463), announcement is made of the following meetings:

Name: President's Commission on the Accident at Three Mile Island.
Place: Washington, D.C., 2100 M Street, N.W.
Time: Wednesday, September 12, 9 a.m.—6 p.m. Thursday, September 13, 9 a.m.—6 p.m. Friday, September 14, 9 a.m.—6 p.m. Saturday, September 15, 9 a.m.—6 p.m.

Proposed Agenda:

I. Discussion of staff reports.
II. Discussion of findings and recommendations.
III. Discussion of issuance of *subpoenas ad testificandum* and *duces tecum*.
IV. Other business.

The Commission was established by Executive Order 12130 on April 11, 1979, to conduct a comprehensive study and investigation of the accident involving the nuclear power facility on Three Mile Island in Pennsylvania.

On September 12–13, 1979, the Commission will meet in closed session to discuss staff reports and issuance of any additional subpoenas. On September 14–15, 1979, the Commission will meet in closed session to discuss its findings and recommendations.

These meetings will be held pending notification and approval by the GSA Administrator.

Inquiries should be addressed to Barbara Jorgenson (202/653–7677).

Dated: August 31, 1979.

Barbara Jorgenson,

Public Information Director.

DEPARTMENT OF STATE

Office of the Secretary

[Public Notice CM-8/221]

National Committee of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Meeting

The Department of State announces that the National Committee of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT) will meet on September 24, 1979 at 1:00 p.m. in Room 1912, Department of State, 2201 C Street N.W., Washington, D.C.

The National Committee assists in the resolution of administrative/procedural problems pertaining to U.S. CCITT activities; provides advice on matters of policy and positions in the preparation for CCITT Plenary Assemblies and meetings of the international Study Groups; provides advice and recommendations in regard to the work of the U.S. CCITT Study Groups; and recommends the disposition of proposed U.S. contributions to the international CCITT which are submitted to the Committee for consideration.

The purpose of the meeting on September 24 is to review the Organization's charter, which must be renewed on October 15, and to discuss preparations for U.S. participation at the VIIth Plenary Assembly of the CCITT, to be held November 10–21, 1980, at Geneva, Switzerland.

Members of the general public may attend the meeting and join in the discussion subject to instructions of the Chairman. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. It is therefore requested that prior to September 24, 1979, members of the general public who plan to attend the meeting inform Mr. Richard H. Howarth, Office of International Communications Policy, Department of State, telephone (202) 632–1007, of their intention. All non-Government attendees must use the C Street entrance to the building.

Dated: August 24, 1979.

Richard H. Howarth,

Chairman, U.S. CCITT National Committee.

DEPARTMENT OF THE TREASURY

Office of the Secretary

Bicycle Tires and Tubes From the Republic of Korea; Extension of Comment Period

On Monday, July 30, 1979 the Department published notice in the **Federal Register** (44 FR 44639), that a petition, dated January 30, 1979, had been filed pursuant to section 516(a), Tariff Act of 1930, as amended by the Trade Act of 1974 (19 U.S.C. 1516(a)), on behalf of Carlisle Tire and Rubber Company, an American manufacturer of bicycle tires and tubes. The "Notice of Petition" directed that all relevant data, views or arguments with regard to the petition be submitted to the Commissioner of Customs, 1301 Constitution Avenue, N.W., Washington D.C. 20229, in time to be received no later than August 29, 1979.

Requests for an extension of the comment period, however, have been received. To permit interested persons desiring to submit comments an opportunity to do so, an additional 21 days (until September 19, 1979) will be granted for the filing of data, views or arguments regarding the aforementioned petition. Written submissions will be made available for public inspection in accordance with § 103.8(b), Customs Regulations (19 CFR 103.8(b)), at the Classification and Value Division, Headquarters, U.S. Customs Service, Washington, D.C. during regular business hours.

David R. Brennan,

Acting General Counsel of the Treasury.

August 29, 1979.

BILLING CODE 8320-01-M

INTERSTATE COMMERCE COMMISSION

[Notice No. 147]

August 21, 1979

Motor Carrier Temporary Authority Applications

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register.** One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifing the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of property

MC 200 (Sub-375TA), filed July 18, 1979. Applicant: RISS INTERNATIONAL CORPORATION, 903 Grand Ave., Kansas City, MO 64106. Representative: H. Lynn Davis (same as above). *General commodities (except those of unusual value, Classes A and B explosives, household goods as defined by the commission, commodities in bulk, and those requiring special equipment,* serving Henryetta, OK as an intermediate connection with applicant's existing service route No. 26 in its original certificate between Sapulpa, OK, and Jctn US Hwy 75 and 270, about 9 miles north of Calvin, OK, for 180 days. Supporting shipper(s): Four M Corporation, 600 E. 16th Ave., North Kansas City, MO 64116. Send protests to: Vernon V. Coble, D/S, ICC, Room 600 Federal Bldg., 911 Walnut St., Kansas City, MO 64106.

MC 531 (Sub-417TA), filed July 18, 1979. Applicant: YOUNGER BROTHERS, INC., 4904 Griggs Road, Houston, TX 77021. Representative: Wray E. Hughes (same as applicant). *Petroleum oils,* in bulk, in tank vehicles, in shipper owned trailers from Oak Points, LA to Pascagoula, MS, for 180 days. An underlying ETA seeks 90 days authority. Supporting shipper(s): Chevron, U.S.A., Inc., 575 Market St., San Francisco, CA 94105. Send protests to: John F. Mensing, DS, ICC, 515 Rusk Ave. #8610, Houston, TX 77002.

MC 730 (Sub-455TA), filed July 13, 1979. Applicant: PACIFIC INTERMOUNTAIN EXPRESS CO., 25 North Via Monte, Walnut Creek, CA 94595. Representative: Edgar E. Reddick (same address as applicant). *Meat and Packing House products* requiring refrigeration between facilities of John Morrel and Co at or near Esterville and Sioux City, LA, Sioux Falls, SD and Worthington, MN on the one hand, and on the other, points in AL, FL, GA, KY, LA, MS, NC, SC, TN, TX, VA and WV, for 180 days. An underlying ETA seeks 90 days authority. Supporting shipper(s): John Morrell & Co., 208 S. LaSalle Street, Chicago, IL 60604. Send protests to: A. J. Rodriguez, 211 Main Street, Suite 500, San Francisco, CA 94105.

MC 2860 (Sub-181TA), filed July 16, 1979. Applicant: NATIONAL FREIGHT, INC., 71 West Park Avenue, Vineland, NJ 08360. Representative: Gerald S. Duzinski, 71 W. Park Avenue, Vineland, NJ 08360. *Insulating materials and*

related commodities. From Barrington, NJ on the one hand, and on the other hand, points in IL, IN, IA, LA, MO, MI, KY, TN and WV, for 180 days. An underlying ETA seeks 90 days authority. Supporting shipper(s): Owens-Corning Fiberglas Corporation, Fiberglas Tower, Toledo, OH 43659. Send protests to: Joel Morrows, D/S, ICC, 744 Broad St., Room 522, Newark, NJ 07102.

MC 4941 (Sub-54TA), filed May 29, 1979. Applicant: QUINN FREIGHT LINES, INC., 1093 North Montello St., Brockton, MA 02403. Representative: Russell S. Callahan (same as applicant). *Wooden kitchen cabinets, set up* from the facilities of International Paper Company at Austintown, OH to points in CT, ME, MA, NH, RI and VT for 180 days. An underlying ETA seeks 90 days authority. Supporting shipper(s): International Paper Company, 220 E 42nd St., New York, NY 10017. Send protests to: John B. Thomas, D/S, ICC, 150 Causeway St., Room 501, Boston, MA 02114.

MC 4941 (Sub-55TA), filed July 17, 1979. Applicant: QUINN FREIGHT LINES INC., 1093 North Montello St., Brockton, MA 02403. Representative: Russell S. Callahan (same as applicant). *Common carrier;* irregular route: *paper and paper products* from the facilities of Fonda/Royal Lace Group Division of Saxon Industries, Inc. at St. Albans, VT to points in IL IN and OH for 180 days. An underlying ETA seeks 90 days authority. Supporting shipper(s): Fonda/Royal Lace Group Division of Saxon Industries, Inc., St. Albans, VT 05478. Send protests to: John B. Thomas, District Supervisor, Interstate Commerce Commission, 150 Causeway Street, Boston, MA 02114.

MC 8771 (Sub-56TA), filed May 29, 1979. Applicant: SAW MILL SUPPLY, INC., 1018 Saw Mill River Road, Yonkers, NY 10710. Representative: John R. Sims, Jr., 915 Pennsylvania Bldg., 425 13th St., N.W., Washington, D.C. 20004. Machinery, machinery parts, contractors' equipment, commodities which because of size and weight require the use of special equipment and self-propelled vehicles weighing more than 15,000 pounds each. From points in CT, DC, DE, MA, ME, MD, NH, NJ, NY, PA, RI, VA, and VT, to points and places in the states of AL, AR, AZ, CA, FL, GA, IL, IN, KS, KY, LA, MO, MS, NC, NM, OH, OK, SC, TN, TX, WI, and WV. Supporting shipper(s): Abstract of shipments in Appendix A–B– in excess of 29 pages verified statement of Eugene E. Knoch, Vice President, Saw Mill Supply, Inc. (original application may be examined at Commission's office in New York or Washington, DC.) Send protests to: Stephen P. Tomany, 26 Federal Plaza, Rm. 1807, New York, NY 10007.

MC 13700 (Sub-10TA), filed July 3, 1979. Applicant: ROOKS TRANSFER LINES, INC., 650 East 16th Street, Holland, MI 49423. Representative: Neil R. Wimbush, 650 East 16th Street, Holland, MI 49423. General commodities, except those of unusual value, classes A & B explosives, household goods as defined by the Commission, livestock, commodities in bulk, and those requiring special equipment; serving South Bend, IN and its commercial zone as an off-route point in conjunction with applicant's regular route operation (on Hwy I–94). Restricted to handling of interline traffic only. For 180 days. Supporting shipper(s): Murphy Motor Freight Lines, Inc., P.O. Box 43640, St. Paul, MN 5164; South Bend Freight Lines, 1200 South Olive, South Bend, IN 46624 and Lee Way Motor Freight Inc., P.O. Box 12750, Oklahoma City, OK 73157. Send protests to: C. R. Flemming, D/S, I.C.C., 225 Federal Building, Lansing, MI 48933.

MC 26120 (Sub-8TA), filed July 9, 1979. Applicant: GEORGE L. HOOKER, INC., Tuscarawas Rd., Uhrichsville, OH 44683. Representative: Richard H. Brandon, 220 W. Bridge St., Dublin, OH 43017. Contract carrier: Irregular routes: *Products and materials, equipment and supplies used in the manufacture and shipping of clay products except commodities in bulk,* between Waynesburg, Magnolia, Mineral City, Midvale, and Alliance, OH, on the one hand, and, on the other, points in the United States in and east of WI, IA, MO, TN and MS, for 180 days. An underlying ETA seeks 90 days authority. Supporting shipper(s): Whitacre Greer Fireproofing Co., Box 428, Waynesburg, OH 44688. Send protests to: D/S, I.C.C., 101 N. 7th St., Philadelphia, PA 19106.

MC 29910 (Sub-222TA), filed July 19, 1979. Applicant: ARKANSAS–BEST FREIGHT SYSTEM, INC., 301 S. 11 St., Ft. Smith, AR, 72901. Representative: Don A. Smith, P.O. Box 43, Ft. Smith, AR 72902. (1) *New furniture,* crated and uncrated, from Ft. Smith, AR to points in the U.S. (except AK and HI), and (2) *materials, equipment and supplies* used in the manufacture and distribution of the commodities in (1) above, (except commodities in bulk) from points in the U.S. (except AK and HI) to Ft. Smith, AR, for 180 days. Underlying ETA sought corresponding authoirty for 90 days. Supporting shipper(s): Riverside Furniture Corporation, P.O. Box 1427, Ft. Smith, AR 72902. Send protests to: William H. Land, DS, 3108 Federal Bldg., Little Rock, AR 72201.

MC 29910 (Sub-224TA), filed July 16, 1979. Applicant: ARKANSAS–BEST FREIGHT SYSTEM, INC., 301 S. 11 St., Ft. Smith, AR 72901. Representative: Joseph K. Reber (same address as applicant). *Automotive parts* between Detroit, MI; Syracuse, NY and Laredo, TX, for 180 days. Underlying ETA sought corresponding authority for 90 days. Supporting shipper(s): Chrysler Corporation, Box 1976, Detroit, MI 48288. Arkansas-Best Freight System, Inc., 301 S. 11 St., Ft. Smith, AR 72901. Send protests to: William H. Land, DS, 3108 Federal Bldg., Little Rock, AR 72201.

MC 33641 (Sub-145TA), filed May 25, 1979. Applicant: IML FREIGHT, INC., P.O. Box 30277, Salt Lake City, UT 84125. Representative: Martin J. Rosen, 256 Montgomery Street, San Francisco, CA 94104. *Common carrier*-regular route: *General commodities,* except those of unusual value, classes A & B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between Denver, CO, and Houston, TX: from Denver, CO, over US Hwy 287 to Ft. Worth, TX, then over Interstate Hwy 20 to Dallas, TX, then over Interstate Hwy 45 to Houston, TX, and return over the same route, serving the intermediate points of Ft. Worth and Dallas, TX, and also the commercial zones of Houston, Dallas, and Ft. Worth, TX, for 180 days. Supporting shipper(s): There are 98 shippers. Their statements may be examined at the office listed below and Headquarters. Send protests to: L. D. Helfer, DS, ICC, 5301 Federal Bldg., Salt Lake City, UT 84138.

MC 41951 (Sub-49TA), filed July 5, 1979. Applicant: WHEATLEY TRUCKING, INC., P.O. Box 458, Cambridge, MD 21613. Representative: Gary E. Thompson, 4304 East-West Highway, Washington, DC 20014. (1) *Salt in packages* from Ludlowville, Horseheads, Retsof, Watkins Glen and Silver Springs, NY, and Cleveland, Akron, Rittman, and Cincinnati, OH, to points in DE, Cecil, Kent, Queen Annes, Talbot, Caroline, Dorchester, Somerset, Worchester, Wicomico, and Baltimore Counties, MD, and Baltimore, MD, Accomack, Northampton, York, Isle of Wright, and Southampton Counties, VA, and Norfolk, Virginia Beach, Portsmouth, Suffolk, Chesapeake, Newport News, and Hampton, VA, and (2) *Salt in packages* from Baltimore and Baltimore County, MD, to points in DE, and Accomack and Northampton Counties, VA, and Norfolk, Virginia Beach, Portsmouth, Suffolk, Chesapeake, Newport News, and Hampton, VA for 180. An underlying ETA seeks 90 days authority. Supporting shipper(s): Harvey Salt Company, 1325 Mohrs Lane, Baltimore, MD 21220. Send protests to: ICC., Fed. Res. Bank Bldg., 101 N. 7th St. Rm. 620, Phila, PA 19106.

MC 52861 (Sub-72TA), filed May 16, 1979. Applicant: WILLS TRUCKING, INC., 3185 Columbia Rd., Richfield, OH 44286. Representative: John Wilson (same as applicant). *Scrap metal in dump vehicles* from Chicago, IL to Youngstown, and Fostoria, OH and South Haven and St. Joseph, MI for 180 days. Supporting shipper(s): General Iron Industries, Inc., 1909 N. Clifton Ave., Chicago, IL 60614. Send protests to: ICC, Fed. Res. Bank Bldg., 101 N. 7th St., Rm. 620, Phila., PA 19106.

MC 67450 (Sub-94TA), filed June 21, 1979. Applicant: PETERLIN CARTAGE COMPANY, 9651 Ewing Avenue, Chicago, IL 60617. Representative: Joseph Winter, 29 South LaSalle Street, Chicago, IL 60603. *Malt Beverages,* (except commodities in bulk), from Evansville, IN, Newport, KY, St. Paul, MN and LaCrosse, WI to points in IL, IN, MN and WI for 180 days. Fain, 333 Madison St., Jefferson City, MO 65101. *Fabricated iron and steel pipe,* from the facility of Progressive Fabricators, Inc. at or near St. Louis, MO to Hope Creek Generating Station, Salem County, NJ; and to Bailley Station nuclear plant at Bailleytown, IN. *Steel plate,* from the facilities of U.S. Steel at or near South Chicago and Gary, IN; and also from the facility of Bethlehem Steel at or near Burns Harbor, IN; to the facility of Progressive Fabricators, Inc. at or near St. Louis, MO. For 180 days. An underlying ETA seeks 90 days authority. Supporting shipper: Progressive Fabricators, Inc., 6800 Prescott St., St. Louis, MO. Send protests to: John V. Barry, DS, ICC, 911 Walnut St., Kansas City, MO 64106.

MC 146730 (Sub-6TA), filed July 17, 1979. Applicant: L & W TRANSPORTATION, INC., Route 3, Box 195, Sedalia, MO 65301. Representative: Charles J. Fain, 333 Madison St., Jefferson City, MO 65101. *Heavy electrical switchgear, electrical transformers, portable electrical substations, related protective coverings, housing, fencing material, iron and steel articles, aluminum articles, electrical substation shelter aisle switchgear, breaker sleds, bases, switching sleds, and related installation equipment,* from the facilities of Central Electric Manufacturing located at or near Fulton, MO to the following points: Ozark, AR; Albany and Atlanta, GA; Marissa, Percy, Stonefort, Sparta, Campbell Hill, Alton, Vermont, Chicago, and Maywood, IL; Carlisle and Dugger, IN; Hayes and Wichita, KS; Inez and White Plains, KY, New Orleans, LA; Beulah, ND; Cumberland, OH; Jasper, Lynn, and Cleveland, OK; Milan County, Houston, and Austin, TX; Holden, WV; Milwaukee, Koehler, Oak Creek, Glendale, Hartford, and Fond Du Lac, WI; and from those points to the facilities of Central Electric Manufacturing located at or near Fulton, MO. For 180 days. An underlying ETA seeks 90 days authority. Supporting shipper: Central Electric Manufacturing, Bus. Rt. 54 South at JCT BB, Fulton, MO 65251. Send protests to: John V. Barry,

ICC, Room 600, Federal Bldg., 911 Walnut St., Kansas City, MO 64106.

MC 147040 (Sub-1TA), filed June 21, 1979. Applicant: EMERSON ELLCESSOR d.b.a. E. M. Transfer Co., RR #6, Box 215B, Muncie, IN 47302. Representative: Emerson Ellcessor (address same as applicant). *Paper cartons and carton parts,* from Eaton, IN, to Alton, Streator, Vandalia, East St. Louis and Granite City, IL: Detroit, MI: Troy, St. Peters and St. Louis, MO: Washington, PA: Columbus, Lima, Cincinnati, Lancaster and Zanesville, OH: and Huntington, WV, for 180 days. Supporting shipper: Clevepak Corporation, RR#1, Eaton, IN. Send protests to: Beverly J. Williams, Transportation Assistant, ICC, 46 E. Ohio St., Rm. 429, Indianapolis, IN 46204. An underlying ETA seeks 90 days authority.

MC 147161 (Sub-3TA), filed July 11, 1979. Applicant: MASS TRANSIT, INC., 2450 Orange Street, Signal Hill, CA 90806. Representative: William D. Taylor, 100 Pine St., Suite 2550, San Francisco, CA 94111. *Contract:* irregular: *Wrought Steel Pipe and Pipe Fittings,* from the facilities of Kelly Pipe Company at or near Santa Fe Springs, CA to points and places in Clark County, NV, under a continuing contract or contracts with Kelly Pipe Company, for 180 days. An underlying ETA seeks up to 90 days operating authority. Supporting shipper(s): Kelly Pipe Company, 11700 Bloomfield Ave., Santa Fe Springs, CA 90670. Send protests to: Irene Carlos, T/A, ICC, P.O. Box 1551 Los Angeles, CA 90053.

MC 147370 (Sub-1TA), filed July 11, 1979. Applicant: BALTIMORE BOX COMPANY, 725 Pittman Rd., Baltimore, MD 21226. Representative: Robert J. Carson, Smith, Somerville & Case, 100 Light St., Baltimore, MD 21202. *Contract* carrier, irregular routes: *Scrap and waste paper,* from New York City, NY, and its commercial zone, to Richmond, VA and its commercial zone, under a continuing contract with Tessa Industries, Inc., for 180 day. Supporting shipper(s): Harvey Lurie, President, Tessa Industries, Inc., 80 E. 11th St., New York, NY 10003. Send protests to: W. L. Hughes, DS, ICC, 1025 Federal Bldg., Baltimore, MD 21201.

MC 147491 (Sub-1TA), filed June 29, 1979. Applicant: TAB TRUCKING, INC., 4342 Janitrol Rd., Columbus, OH 43228. Representative: Brian S. Stern, 2425 Wison Blvd., Arlington, VA 22201. *Automobile parts and materials, equipment, and supplies used in the manufacture, production, and assembly of motor vehicles,* between Pontiac, MI, on the one hand, and, on the other, Columbus and Norwood, OH, and from Columbus, OH to Flint, MI, for 180 days. Supporting shipper: Pontiac Motor Division, General Motors Corporation, 1 Pontiac Plaza, Pontiac, MI 48053. Send protests to: D/S, ICC, 101 N. 7 St., Philadelphia, PA 19106.

MC 147521 (Sub-3TA), filed July 17, 1979. Applicant: J.S.I. 605 E. Commercial Street, Anaheim, CA 92801. Representative: Miles L. Kavaller, 315 South Beverly Drive, Suite 315, Beverly Hills, CA 90212. *Foodstuffs,* from Orange County, CA to Denver and Grand Junction, CO and points in OR and WA, for 180 days. Supporting shipper(s): Doric Food Corportation, 1230 Tustin Avenue, Anaheim, CA 92807. The Coca Cola Company, Foods Division, 1226 N. Olive Street, Anaheim, CA 92803. Send protests to: Irene Carlos, TA, ICC, P.O. Box 1551, Los Angeles, CA 90053.

MC 147620 (Sub-1TA), filed June 11, 1979. Applicant: KENNETH E. MOWERY, d.b.a. K M TRUCKING, P.O. Box 254, Stephens City, VA 22655. Representative: Edward N. Button, 1329 Pennsylvania Ave., Hagerstown, MD 21740. *Apple products and juices,* from Martinsburg, WV, Mt. Jackson and Winchester, VA and their respective commercial zones, to pts. in TX, LA, AR, MS, and OK, for 180 days. An underlying ETA seeks 90 days authority. Supporting shipper(s): National Fruit Products Co., P.O. Box 2040, Winchester, VA 22601, Bowman Apple Products, Mt. Jackson, VA. Shenandoah Apple Co-operative, Inc., P.O. Box 435, Winchester, VA 22601. Send protests to: ICC, Fed. Res. Bank Bldg., 101 N. 7th St., Rm. 620, Phila., PA 19106.

MC 147621, (Sub-1TA), filed July 18, 1979. Applicant: BEE-JAY TRANSPORTATION, INC., 1576 Hart Street, P.O. Box 186–D, Rahway, NJ 07065. Representative: Henry J. Capro, 1585 Morris Avenue, Union, NJ 07083. *Contract carrier,* irregular routes for 180 days. *Roofing, building materials, floor tiles, floor coverings, plastic articles, and foam products,* from South Bound Brook, NJ, Thorofare, NJ, Gloucester City, NJ, Vailsgate, NY and Fullerton, PA (Allentown Industrial Park) to AL, AZ, CA, CO, FL, GA, IL, LA, MI, MN, MO, OK, OR, TN, TX, UT, WA, WI, for 180 days. An underlying ETA seeks 90 days authority. Supporting shipper: GAS Corporation, 1361 Alps Road, Wayne, NJ 07470. Send protests to: Robert E. Johnston, DS, ICC, 744 Broad Street, Room 522, Newark, NJ 07102.

MC 147630 (Sub-1TA), filed July 16, 1979. Applicant: WILLIAM CHARLES REAK d.b.a. NORTHWEST FLORIDA DRIVEAWAY, P.O. Box 777, Gulf Breeze, FL 35261. Representative: William Charles Reak, Sr., 201 Poinciana Drive, Gulf Breeze, FL 35261. *Motor vehicles in Drive-A-Way and/or Tow-Away Service* between points in FL on and west of U.S. Highway 231 and points in AL on and west of U.S. Highway 231 between the Florida-Alabama State Line and Dothan, AL, points on and south of U.S. Highway 84, between Dothan, AL, and the Alabama-Mississippi State Line, on the one hand, and, on the other, points in the U.S. except HI., for 180 days. An underlying ETA seeks 90 days authority. Supporting shipper(s): Florida First National Bank at Pensacola, P.O. Box 12750, Pensacola, FL 32575; Century Bank of Gulf Breeze, P.O. Box 730, Gulf Breeze, FL 32561; Credithrift Acceptance Corp., 6425 Pensacola Blvd., Bldg 2, Suite 7, Pensacola, FL 32505; Vince Whibbs Pontiac Co., 3401 Navy Blvd., Pensacola, FL 32505. Send protests to: Mabel E. Holston, T/A, ICC, Room 1616—2121 Building, Birmingham, AL 35203.

MC 147651 (Sub-1TA), filed July 12, 1979. Applicant: PLACER TRUCKING, Rt. 8, Box 4335, Keck Dr., Burlington, NC 27215. Representative: W. G. Reese III, P.O. Box 3004, Charlotte, NC 28203. *Contract carrier*—Irregular routes; *Firefighting equipment, machinery, chemicals, plastics* between the facilities of Walter Kidde & Co. located at or near Belleville, NJ, Chicago, IL, Mebane, NC, Atlanta, GA and Los Angeles, CA, for 180 days. An underlying ETA seeks 90 days authority. Supporting shipper: Walter Kidde & Co., 675 Main St., Belleville, NJ. Send protests to: Terrell Price, 800 Briar Creek Rd—Rm CC516, Charlotte, NC 28205.

MC 147690 (Sub-1TA), filed July 16, 1979. Applicant: PORT CITIES DRAYAGE, INC., P.O. Box 2051, Ft. Smith, AR 72902. Representative: Don A. Smith, P.O. Box 43, Ft. Smith, AR 72902. *Contract carrier*—irregular routes. (1) *Plastic articles and paper products,* and (2) *Sugar,* in bags and packages, (1) from Ft. Smith, AR to New Orleans, LA and (2) from Mathews, LA to points in AR, for 180 days. Underlying ETA sought corresponding authority for 90 days. Supporting shipper: The South Coast Corporation, P.O. Box 8036, Houma, LA 70361. Send protests to: William H. Land, DS, 3108 Federal Bldg., Little Rock, AR 72201.

MC 147701 (Sub-1TA), filed July 23, 1979. Applicant: JOCELYNE EUBANK, d.b.a. CALIFORNIA CARRIERS EXPRESS, 1228 South Wright Street, Santa Ana, CA 92705. Representative: Jocelyne Eubank, same address as applicant. *Contract:* irregular: *Chemicals, cleaning and scouring compounds, solvents, compounds, plastic liquid, plastic sheeting, machines and machine parts, cartons and containers, defoaming compounds, brush and stencil marking ink (except in bulk, in tank vehicles),* (1) Between the facilities of Dynachem Corporation in Orange County, CA, on the one hand, and, on the other, Indianapolis and Terra Haute, IN; Elmhurst, IL; Herndon, VA; Charlotte and Matthews, NC; Moss Point, MS; Kearney, NJ; Farmingdale, NY; Woburn and South Hadley Falls, MA, and (2) From Moss Point, MS, to Charlotte and Matthews, NC; and South Hadley Falls, MA, for 180 days. An underlying ETA seeks up to 90 days operating authority. Supporting shipper: Thiokol/Dynachem Corporation, P.O. Box 12047, Santa Ana, CA 92711. Send protests to: Irene Carlos, TA, ICC, P.O. Box 1551, Los Angeles, CA 90053.

MC 147740 (Sub-TA), filed June 19, 1979. Applicant: RAY CLARK, d.b.a. RAY CLARK TRUCKING, P.O. Box 114, Haines, OR 97833. Representative: David C. White, 2400 S.W. Fourth Ave., Portland, OR 97201. *Contract,* irregular, *used railroad ties* from ports of entry on the International Boundary Line between the U.S. and Canada in WA, ID, and M to Seattle, WA, Hermiston and Portland, OR and points in CA under contract with W. J. Railroad Ties and Supply, Inc. of Umatilla, OR. Supporting shipper: W. J. Railroad Ties & Supply, Inc., P.O. Box 1106, Umatilla, OR 97882. Send protests to: R. V. Dubay, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 114 Pioneer Courthouse, Portland, OR 97204.

MC 147741 (Sub-TA), filed June 25, 1979. Applicant: AUBURN D. ARD, Star Route, Box 13, Chipley, FL 32428. Representative: Auburn D. ARD, (same as applicant). *Contract carrier,* irregular routes, *dry, inorganic fertilizer both bag and bulk,* from fertilizer plants in Dothan, AL, Pelham and Bainbridge, GA to Craven Farm Center on Falling Waters Road in Chipley, FL for 180 days. Supporting shipper(s): Craven Farm Center, Falling Waters Road, P.O. Box 204, Chipley, FL 32428. Send protests to: G. H. Fauss, Jr., DS, ICC, Box 35008, 400 West Bay Street, Jacksonville, FL 32202.

MC 147860 (Sub-TA), filed July 9, 1979. Applicant: ISHMAEL L. BUNCH, Route 2, Hohenwald, TN 38462. Representative: Wm. Landis Turner, 102 North Court Street, Hohenwald, TN 38462. *Steel coils* from Florence, AL to Linden and Lexington, TN, For 180 days. Supporting shipper(s): A. J. Gerrard & Co., P.O. Box 1229, Florence, AL 35630. Send protests to: Glenda Kuss, TA, ICC, Suite A–422, U.S. Court House, 801 Broadway, Nashville, TN 37203.

MC 147861 (Sub-TA), filed July 12, 1979. Applicant: THE STANDISH CORPORATION, 339 South Leonard, Liberty, MO 64068. Representative: Tom B. Kretsinger, 20 East Franklin, Liberty, MO 64068. *Laundry and cleaning materials and supplies, wire and paper products,* between points in the U.S. (except AK and HI) under continuing contract or contracts between Midwest Hanger Co. and Standish Corporation, for 180 days. Supporting shipper(s): Midwest Hanger Company, 339 South Leonard, Liberty, MO 64068. Send protests to: Vernon V. Coble, D/S, ICC, Room 600 Federal Bldg., Kansas City, MO 64106.

MC 147861 (Sub-1TA), filed July 12, 1979. Applicant: The Standish Corporation, 339 South Leonard, Liberty, MO 64068. Representative: Tom B. Kretsinger, 20 East Franklin, Liberty, MO 64068. *Footwear, roller skates and roller skate accessories,* (1) from Laredo, TX and Red Wing, MN to Olathe, KS; and (2) between Lynwood, CA on the one hand, and, on the other Olathe, KS, for 180 days. Supporting shipper: R C Sports Inc., 315 N. Lindenwood, Olathe, KS 66061. Send protests to: Vernon V. Coble, D/S, ICC, Room 600 Federal Bldg., 911 Walnut Street, Kansas City, MO 64106.

Water Carriers of Passengers

W–1291 (Sub-3TA). By order entered July 6, 1979, the Motor Carrier Board granted Alumina Transport Corp., Richmond, VA. 60 day temporary authority to engage in the business of transportation by water vessel, in interstate commerce, in the transportation of *phosphate rock, in bulk,* from Jacksonville, FL to Crockett and Stockton, CA via the Panama Canal for the account of Occidental Chemical Company. Peter A. Greene, 900 17th Street, N.W., Washington, DC 20006, for applicant. Any interested person may file a petition for reconsideration within 20 days of the date of this publication. Within 20 days after the filing of such petition with the Commission, any interested person may file and serve a reply thereto.

By the Commission:

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Permanent Authority Decisions Volume No. 137]

Permanent Authority Applications; Decision-Notice

Decided: August 6, 1979.

The following applications are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the **Federal Register.** Failure to file a protest, within 30 days, will be considered as a waiver of opposition to the application. A protest under these rules should comply with Rule 247(e)(3) of the Rules of Practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (as specifically noted below), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

On cases filed on or after March 1, 1979, petitions for intervention either with or without leave are appropriate.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

If applicant has introduced rates as an issue it is noted. Upon request an applicant must provide a copy of the tentative rate schedule to any protestant.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of

record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

We find: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the transportation policy of 49 U.S.C. § 10101. Each applicant is fit, willing, and able properly to perform the service proposed and to confrom to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a protestant, that the proposed dual operations are consistent with the public interest and the transportation policy of 49 U.S.C. § 10101 subject to the right of the Commission, which is expressly reserved, to impose such conditions as it finds necessary to insure that applicant's operations shall conform to the provisions of 49 U.S.C. § 10930(a) [formerly section 210 of the Interstate Commerce Act].

In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

Applicants must comply with all specific conditions set forth in the grant or grants of authority within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board Number 3, Members Parker, Fortier, and Hill.

Agatha Mergenovich,
Secretary.

MC 138423 (Sub-2F), filed October 23, 1978, and previously published in the **Federal Register** on December 14, 1978. Applicant: MACDOUGALL & SON TRANSPORT LIMITED, a corporation, P.O. Box 65, Erin, Ontario, Canada NOB 1TO. Representative: S. Michael Richards, P.O. Box 225, Webster, NY 14580. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting (1) *wire, wire products, and fencing materials*, from ports of entry on the International Boundary line between the United States and Canada, at or near Buffalo, NY, and Detroit, MI, to points in CT, DE, IN, IL, MA, MD, ME, MI, NH, NJ, NY, OH, PA, RI, VA, VT, and WV, and (2) *materials, equipment, and supplies* used in the manufacture of the commodities named in (1) above, (except commodities in bulk), in the reverse direction, under a continuing contract with Lundy Steel Limited, a subsidiary of Ivaco Industries Ltd, of Dunnville, Ontario, Canada. (Hearing site: Buffalo, NY.)

Note.—The purpose of this republication is to add MI and NY as origin and destination points.

BILLING CODE 7035-01-M

[Ex Parte No. 311]

Expedited Procedures for Recovery of Fuel Costs

Decided August 28, 1979.

In our decision of August 21, 1979, a 9-percent surcharge was authorized on all owner-operator traffic, and on all truckload rated traffic whether or not owner-operators were employed. We ordered that all owner-operators were to receive compensation at this level.

The weekly figures set forth in the appendix for transportation performed by owner-operators and for truckload rated traffic, whether or not owner-operators are employed, is 9.3 percent.

As stated in our decisions of August 14 and 21, 1979, we have received additional information from the nine Ex Parte No. MC-82 rate bureaus on the relationship of fuel expenses (including taxes) to operating revenues for truckload traffic. Based on our evaluation of this information, it is apparent that the general freight motor carriers are being overcompensated for fuel cost increases on their truckload traffic. This is based on the finding that for truckload traffic the percentage of fuel expense total operating revenue for these carriers which do not rely heavily on owner-operators, is significantly less than the 16.9 percent figure currently being applied to this traffic as well as to owner-operator traffic.

However, the 16.9 percent figure of percentage of fuel expense to operating revenue for owner-operator traffic appears to remain valid. For both practical and competitive reasons, therefore, we remain of the view that the same surcharge level must be placed on all truckload rated traffic, whether or not owner-operators are employed.

However, the general freight motor carriers represented by the MC-82 rate bureaus are predominantly less-than-truckload (LTL) carriers. To offset the over compensation from the surcharge on truckload traffic, an adjustment is ordered on the surcharge on LTL traffic. Effective Tuesday, September 4, 1979, 12:01 a.m., the LTL surcharge will be 1.6 percent.[1] Data developing the 1.6 percent figure is shown in the appendix to this decision.

The overall impact on all general commodity traffic of reducing the LTL surcharge is a reduction of .7 percentage points. This is illustrated in the table below:

	Surcharge		
	Prior method (percent)	Adjusted method (percent)	Reduction (percent)
T.L. rated traffic	9.0	9.0	0
L.T.L. traffic	2.7	1.6	1.1
Total traffic (average)	4.7	4.0	.7

The above calculations are based on data provided by the general commodity carriers and represent a 7.3% rather than 16.3 percent as the percentage of fuel expenses to operating revenue.

Although the weekly figures for owner-operators and all truckload traffic is 9.3 percent, we are authorizing that the surcharge for this traffic should be held at 9 percent. The Commission wishes to emphasize that the truckload surcharge applies only to truckload-rated traffic. We are instructing the Bureau of Investigations and Enforcement to determine if carriers are unlawfully applying this surcharge to all shipments in excess of 10,000 pounds.

It is ordered: All motor carriers must cancel presently applicable surcharges on LTL traffic in excess of 1.6 percent by Tuesday, September 4, 1979, 12:01 a.m. Simultaneously, the carriers may file tariff supplements indicating a 1.6 percent surcharge for this traffic.

Notice of this decision shall be given to the general public by mailing a copy of this decision to the Governor of each State and to the Public Utilities Commissions or Boards of each State having jurisdiction over transportation, by depositing a copy in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection, and by delivering a copy to the Director, Office of the Federal Register, for publication therein.

By the Commission. Chairman O'Neal, Vice Chairman Stafford, Commissioners Gresham, Clapp, Christian, Trantum and Gaskins. Vice Chairman Stafford absent and not participating in the disposition of this proceeding. Commissioners Gresham and Gaskins not participating in the disposition of this proceeding.

Agatha L. Mergenovich,
Secretary.

[1] One exception is noted. The motor carriers of bus passengers may retain their use of the 2.7 percent surcharge. Any further adjustment to this surcharge will be handled in the Ex Parte No. 311 (Sub No. 2) proceedings.

Appendix.—*Fuel Surcharge*

Base Date and Price Per Gallon (Including Tax)

January 1, 1979 ..... 83.5¢

Date of Current Price Measurement and Price Per Gallon (Including Tax)

August 27, 1979 ..... 98.4¢

Average Percent Fuel Expenses (Including Taxes) of Total Revenue

(1) From Transportation Performed by Owner Operators (Apply to All Truckload Rated Traffic)	(2) Other (Including Lease-Truckload Traffic)
16.9%	2.9% [1]

Percent Surcharge Developed

9.3%	1.6%

Percent Surcharge Allowed

9%	1.6%

[1] Additional data for general commodity carriers indicate the following:
(a) Percent Fuel (including tax) of revenue (all traffic) 7.3%
(b) Percent T.L. and LTL Revenue of total revenue:

	Revenue (000)	Percent
T.L.	$3,451,661	32
LTL	7,427,232	68
Total	10,878,893	100

Utilizing the T.L. and LTL weighting factors and retaining the realtionship of fuel to revenue for owner operators (also applied to T.L. rated traffic) and in total of 16.9 percent and 7.3 percent respectively, the comparable relationship for LTL is 2.9 percent. This figure should not be construed as an actual relationship but is developed as a method to adjust the LTL surcharge.

BILLING CODE 7035-01-M

Motor Carrier Board Transfer Proceedings

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include request for oral hearing, must be filed with the Commission on or before October 5, 1979. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

MC-FC-78173 (republication) filed May 28, 1979, published in the **Federal Register** issue of June 22, 1979, and republished this issue. By decision of July 26, 1979, the Motor Carrier Board approved the transfer of operating rights in Certificate No. MC-69364, issued June 3, 1942, from Enterprise Transfer Co., 740 Ashland, River Forest, IL 60305 (transferor) to R-A Industries, Inc., 1092 N. North Branch St., Chicago, IL 60622 (transferee). The operating rights in No. MC-69364 authorize the transportation of general commodities, with exceptions, between points in Lake County, IN, and those in Illinois within the Chicago, IL Commercial Zone as defined by the Commission in 1 M.C.C. 673. The purpose of this republication is to indicate that rights in Certificate No. MC-69364 are sought to be transferred, not those in Certificate No. MC-69364 Sub 1 as inadvertently published in the **Federal Register** issue of June 22, 1979. Representative: Phillip A. Lee, 120 W. Madison, Chicago, IL 60602.

Agatha Mergenovich,
Secretary.

1

[M-240, Amdt. 2; Aug. 30, 1979]

CIVIL AERONAUTICS BOARD.

Notice of deletion of item from the August 31, 1979, meeting.

TIME AND DATE: 9 a.m., August 31, 1979.

PLACE: Room 1027, 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

SUBJECT: 9. Docket 33019—Chicago-Midway Expanded Service Investigation (OGC).

STATUS: Open (1-30); closed (item 31).

PERSON TO CONTACT: Phyllis T. Kaylor, the Secretary.

SUPPLEMENTARY INFORMATION: Item 9 is being deleted from the August 31, 1979 calendar in order that the Board Members may have additional time to consider the staff recommendation. Accordingly, the following Members have voted that agency business requires the deletion of Item 9 from the August 31, 1979 calendar and that no earlier announcement of this deletion was possible:

Chairman Marvin S. Cohen
Member Richard J. O'Melia
Member Elizabeth E. Bailey
Member Gloria Schaffer

[S-1718-79 Filed 8-31-79; 2:15 pm]

BILLING CODE 6320-01-M

2

[M-240, Amdt. 3; Aug. 30, 1979]

CIVIL AERONAUTICS BOARD.

Deletion of item and making item 31 open for the August 31, 1979, meeting.

TIME AND DATE: 9 a.m., August 31, 1979.

PLACE: Room 1027, 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

SUBJECT:

Deleted: 23. Dockets 31290 and 21866-4; Notice of Proposed Rulemaking proposing options for eliminating the mandatory joint fare program established in phase 4 of the DPFI (memo 9053, BDA, OGC, OEA, BIA, OCCR, BCP).

Deleted: 24. Docket 34138, in the matter of Commuter/Certificated Joint Fares (memo 8311-F, OGC).

Open: 31. International passenger fares proposed by Pan American and TWA and staff International Passenger Fare Study (memo 9094 BIA, BDA, OGC, OEA, BCP).

STATUS: Open.

PERSON TO CONTACT: Phyllis T. Kaylor, the Secretary (202) 673-5068.

SUPPLEMENTARY INFORMATION: Items 23 and 24 are being deleted from the August 31, 1979 calendar because Member Bailey would like to be present for discussion of these matters. Item 31 is going to be open because on reflection, the staff believes that, if the Board and staff are discreet, it should be possible to have an adequate discussion on the staff recommendation without jeopardizing foreign policy interests or divulging confidential information. We think that the advantages of an open meeting outweigh the disadvantages of having to be mildly circumscribed in discussion. Accordingly, the following Members have voted that Items 23 and 24 be deleted from the August 31, 1979 meeting and that Item 31 be changed from closed to open and that no earlier announcement of these changes was possible:

Chairman Marvin S. Cohen
Member Richard J. O'Melia
Member Elizabeth E. Bailey
Member Gloria Schaffer

Part II

Department of Energy

Proposed Designation of Processing Sites and Establishment of Priorities Under the Uranium Mill Tailings Radiation Control Act 1978

DEPARTMENT OF ENERGY

Proposed Designation of Processing Sites and Establishment of Priorities Under the Uranium Mill Tailings Radiation Control Act of 1978 (Pub. L. 95-604)

AGENCY: Department of Energy.

ACTION: Notice of proposed designation of processing sites and establishment of priorities as required by Section 102 of Pub. L. 95-604, Uranium Mill Tailings Radiation Control Act of 1978, enacted on Novembr 8, 1978.

SUMMARY: The purpose of the Uranium Mill Tailings Radiation Control Act of 1978 is to provide, in cooperation with interested states, Indian tribes, and persons who own or control inactive mill tailings sites, a program of assessment and remedial action at these sites to stablize and control the tailings in a safe and environmentally sound manner and to minimize or eliminate radiation health hazards. Where appropriate, the program may include the reprocessing of tailings to extract residual uranium and other mineral values.

Consistent with the provisions of Section 102(a)(1) of Public Law 95-604, the Secretary of Energy shall, no later than November 8, 1979, designate processing sites for remedial action at or near the following locations:

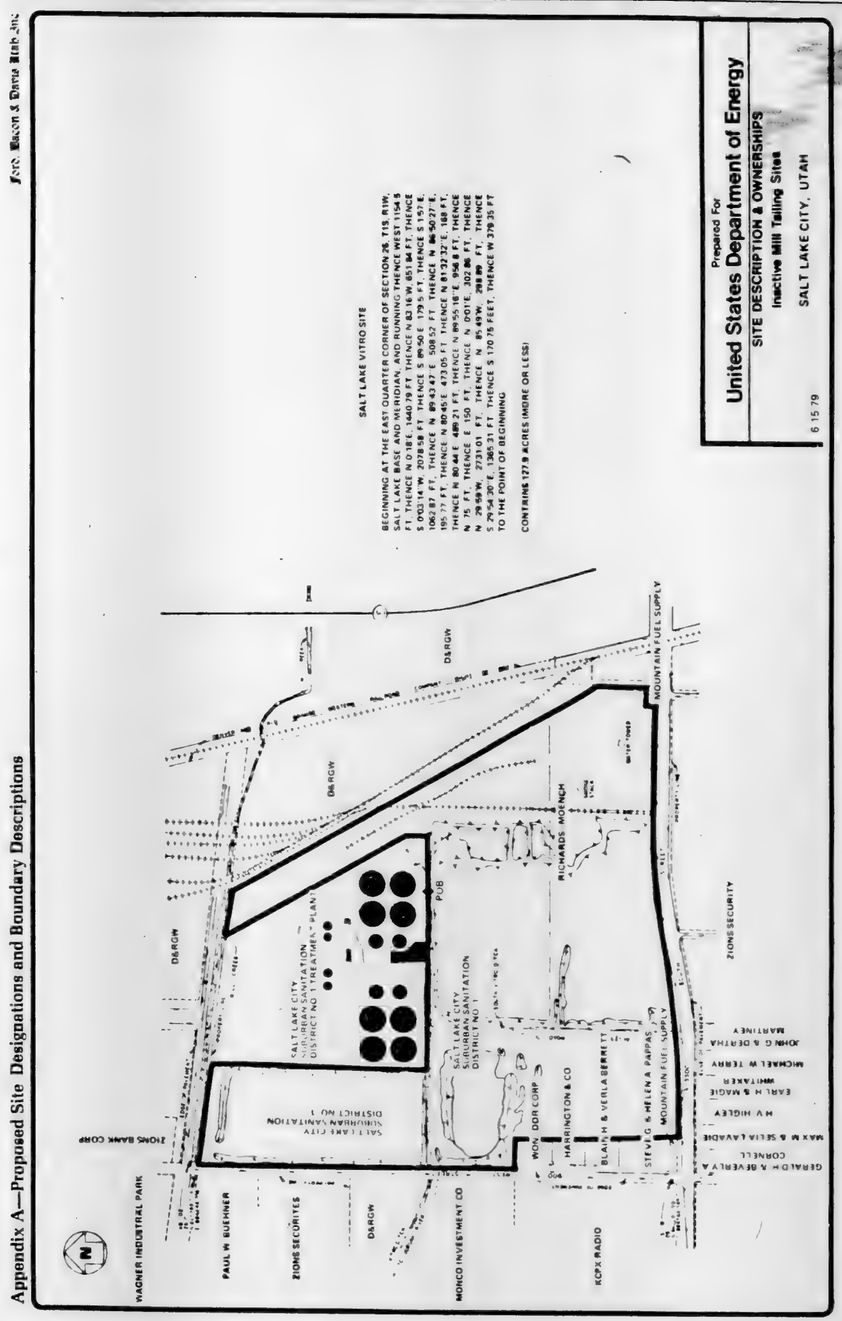
Salt Lake City, Utah
Green River, Utah
Mexican Hat, Utah
Durango, Colorado
Grand Junction, Colorado
Rifle, Colorado (two sites)
Gunnison, Colorado
Naturita, Colorado
Maybell, Colorado
Slick Rock, Colorado (two sites)
Shiprock, New Mexico
Ambrosia Lake, New Mexico
Riverton, Wyoming
Converse County, Wyoming
Lakeview, Oregon
Falls City, Texas
Tuba City, Arizona
Monument Valley, Arizona
Lowman, Idaho
Canonsburg, Pennsylvania

As part of his designation, the Secretary shall determined the boundaries of each designated processing site. This notice announces the proposed designation of 22 processing sites for remedial action and includes the site boundaries. These 22 sites are listed, along with their respective boundary descriptions, in Appendix A.

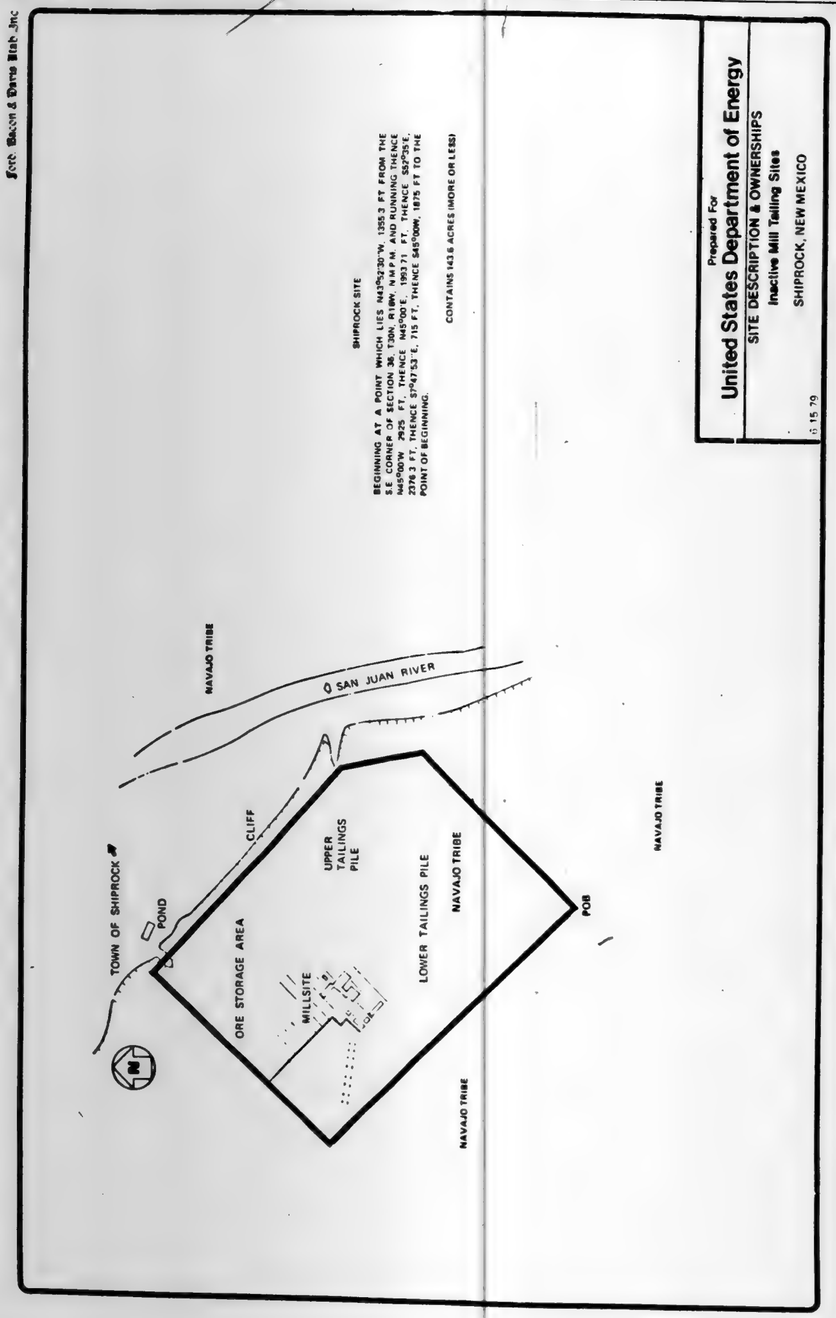
Additionally, by November 8, 1979, the Secretary is obliged to assess the potential health hazard to the public from the residual radioactive materials at designated processing sites and to establish priorities for carrying out remedial action at each site. In establishing priorities, the Secretary shall rely primarily on the advice of the Administrator of the Environmental Protection Agency. The proposed priority ranking for the 22 sites is given in Appendix B.

DATE: Request comments be received concerning the proposed designation of these processing sites and establishment of site priorities on or before September 15, 1979.

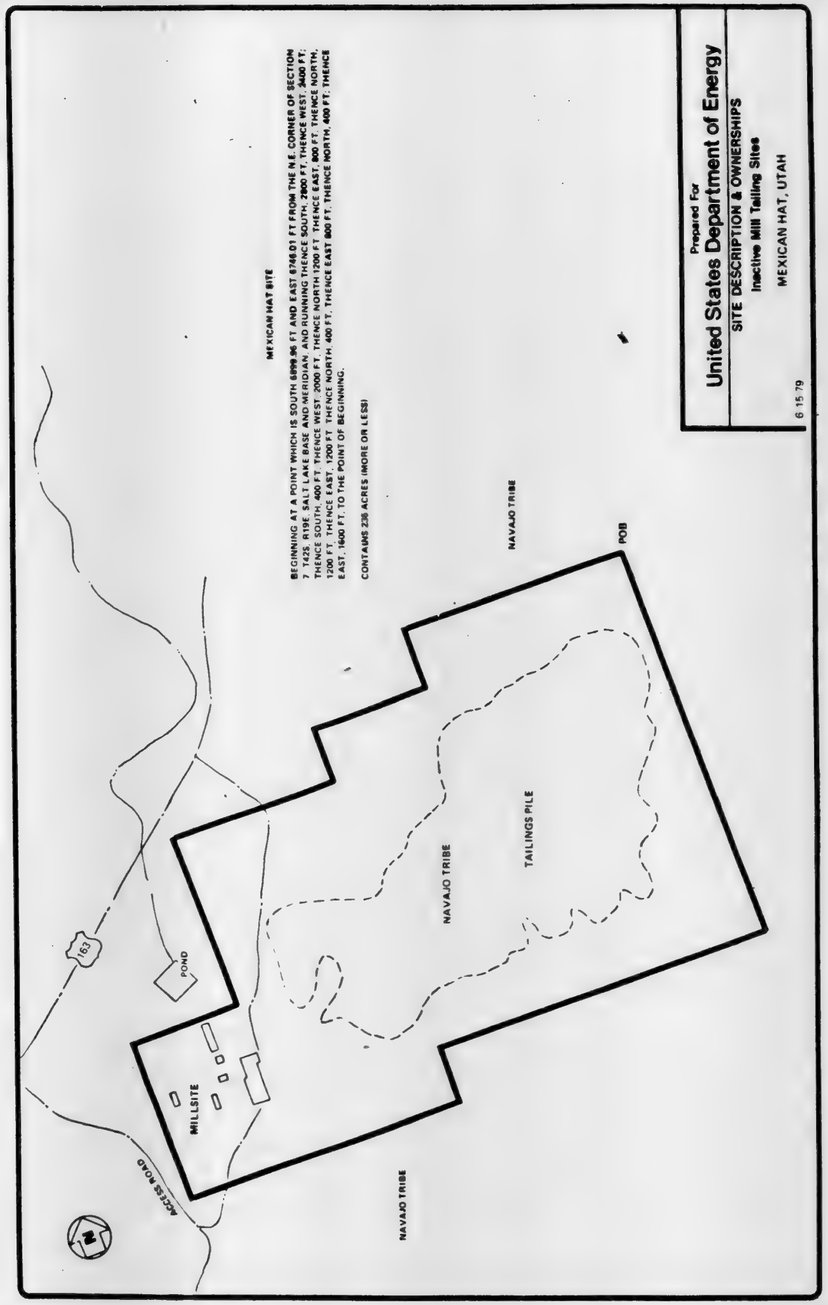
ADDRESS FOR COMMENTS AND FURTHER INFORMATION: Dr. William E. Mott, Director, Environmental Control Technology Division, Office of the Assistant Secretary for Environment, U.S. Department of Energy, Washington, D.C. 20545, telephone: (301) 353-3016.



Issued in Washington, D.C. this 22nd day of August 1979.



Ruth C. Clusen,



Assistant Secretary for Environment.

Appendix B—Priorities for sites and Locations

The Secretary requested the Environmental Protection Agency's (EPA) advice on the proposed establishment of priorities for the 22 sites at locations referenced in P.L. 95-604. EPA has viewed the suggested DOE priority listing as being reasonable and acceptable at the present time for initiating remedial action. The site locations and respective priorities are as follows:

Site Locations and Priority

Salt Lake City, Utah; High.
Canonsburg, Pennsylvania; High.
Durango, Colorado; High.
Shiprock, New Mexico; High.
Grand Junction, Colorado; High.
Riverton, Wyoming; High
Gunnison, Colorado; High.
Old Rifle, Colorado; High.
New Rifle, Colorado; High.
Mexican Hat, Utah; Medium.
Lakeview, Oregon; Medium.
Falls City, Texas; Medium.
Tuba City, Arizona; Medium.
Naturita, Colorado; Medium.
Ambrosia Lake, New Mexico; Medium.
Green River, Utah; Low.
Slick Rock (NC), Colorado; Low.
Slick Rock (UCC), Colorado; Low.
Maybell, Colorado; Low.
Monument Valley, Arizona; Low
Lowman, Idaho; Low
Converse County, Wyoming (Spook Site); Low.

Part III

Office of Management and Budget

Cost Principles for Grants to State and Local Governments

V 44 / 173 SE 5 79 UMI

OFFICE OF MANAGEMENT AND BUDGET

Cost Principles for Grants to State and Local Government

This notice offers interested parties an opportunity to comment on a proposed revision to Circular 74–4, "Cost principles for grants to State and local governments." The revision would modify the rules dealing with travel costs of chief executives and members of governing bodies.

At the present time, Circular 74–4 provides that salaries and other expenses of chief executives and governing bodies are unallowable charges against Federal grants. The revision under consideration would modify this by allowing travel costs in those cases where they are specifically related to grant programs and where prior approval for the travel has been given by the Federal funding agency.

The specific change being considered is as follows:

Attachment B, paragraph B.28.

Travel. (Add the following sentence at the end of the paragraph.)
"Notwithstanding the provisions of Attachment B, paragraphs D.6. and 8., travel costs of officials covered by those paragraphs, when specifically related to grant programs, are allowable with the prior approval of the Federal funding agency."

The Office of Management and Budget has, as yet, made no decision with respect to the proposed revision. All interested parties are encouraged to make their views known.

Comments should be submitted in duplicate to the Financial Management Branch, Budget Review Division, Office of Management and Budget, Washington, D.C. 20503. Contact person: John J. Lordan, (202) 395–6823. All comments should be received within 60 days of this notice.

Linda L. Smith,
Assistant to the Director for Administration.

Part IV

Environmental Protection Agency

Requirements for Preparation, Adoption, and Submittal of State Implementation Plans; Approval and Promulgation of State Implementation Plans

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Parts 51 and 52]

[FRL 1300-6]

Requirements for Preparation, Adoption, and Submittal of SIP's; Approval and Promulgation of State Implementation Plans

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rules.

SUMMARY: EPA proposes to amend its regulations for the prevention of significant deterioration 40 CFR 51.24, 52.21 (1978) in response to a court decision that overturned those regulations in major respects. EPA also proposes changes to its regulations affecting new source review in nonattainment areas, including restrictions on further major source growth and requirements under EPA's Emission Offset Interpretative Ruling, 40 CFR Part 51 App. S, and section 173 of the Act, to conform those rules to the court decision.

DATES: The deadline for submitting written comments is October 5, 1979.

ADDRESSES: *Comments.* Comments should be sent (in triplicate if possible) to Central Docket Section (A-130), Washington, D.C. Atten: Docket No. A-79-35.

Docket: In accordance with section 307(d) of the Clean Air Act, 42 U.S.C. 7607(d), EPA has established a docket for this rulemaking. It bears Docket No. A-79-35. The docket is an organized and complete file of all significant information submitted to or otherwise considered by EPA during this rulemaking. The contents of the docket will serve as the record in the case of judicial review under section 307(b) of the Act, 42 U.S.C. 7607(b). The docket is available for public inspection and copying between 8 a.m. and 4 p.m., Monday through Friday, at EPA's Central Docket Section, Room 2903B. A reasonable fee may be charged for copying.

PUBLIC HEARINGS: EPA intends to hold public hearings on the proposals in this notice in September in San Francisco, California, and Washington, D.C. The exact times and places will be announced in due course.

FOR FURTHER INFORMATION CONTACT: Michael Trutna, Standards Implementation Branch (MD-15), Office of Air Quality Planning and Standards, Research Triangle Park, N.C. 27711, 919/541-5292.

I. Background

A. *Prevention of Significant Deterioration.* In 1974, EPA promulgated regulations to prevent emissions of sulfur dioxide (SO_2) and particulate matter (PM) from significantly deteriorating air quality in areas where concentrations of those pollutants were lower than the applicable national ambient air quality standards (NAAQS). 39 FR 42510 (codified at 40 CFR 52.21 (1977)). EPA made those regulations part of the State Implementation Plan (SIP). The prevention of significant deterioration (PSD) regulations prohibited the construction of any new source or modification in certain categories, unless EPA or a delegate state had issued a permit evidencing that the source or modification would not cause significant deterioration of air quality in any area.

On August 7, 1977, the President signed the Clean Air Act Amendments of 1977 (1977 Amendments) into law. Pub. L. No. 9595, 91 Stat. 685. Those amendments established a new set of PSD requirements as Part C of Title I of the Clean Air Act (Act). *See* Sections 160-169, 42 U.S.C. 7470-79. The new requirements follow the outline of the old regulations, but are more elaborate and in many ways more stringent. The 1977 Amendments also directed that each SIP was to contain the new requirements. *See* Sections 161, 110(a)(2)(D) and (J), 42 U.S.C. 7471, 7410(a)(2)(D) and (J).

In response to that mandate, EPA promulgated two sets of PSD regulations on June 19, 1978. One set specified the minimum requirements that a PSD SIP revision would have to contain in order to warrant EPA approval. 43 FR 26380 (codified at 40 CFR 51.24 (1978)) (hereinafter, the "Part 51 regulations"). The other set comprehensively amended the old PSD regulations and incorporated into them the new PSD requirements. 43 FR 26388 (codified at 40 CFR 52.21 (1978) (hereinafter, the "Part 52 regulations")). EPA intended that, until it had approved a PSD SIP revision for a state, the permitting of new sources and modifications to be constructed in its clean areas would continue under the new Part 52 regulations. The United States Court of Appeals for the District of Columbia Circuit subsequently affirmed that approach. *Citizens To Save Spencer County* v. *EPA*, 12 ERC 1961 (March 27, 1979).

Many industrial and environmental groups petitioned the same court for review of the substantive provisions of both the Part 51 and Part 52 regulations. On June 18, 1979, the court issued a decision that upheld some of those provisions and overturned others. *Alabama Power Company* v. *Costle*, 13 ERC 1225. In its opinion the court merely summarized its rulings, but promised supplemental, comprehensive opinions in due course, probably by "the end of this summer." *Id.* at 1227 n.7. The court also invited the parties to file petitions for reconsideration, several of which were filed but have not yet been acted upon. In an order that accompanied the summary opinion, the court stayed the effect of its decision until it had issued the supplemental opinions. The purpose of this procedure, the court explained, was "to enable EPA to proceed as soon as possible to commence rulemaking or other proceedings necessary to promulgate those revisions in the PSD regulations required by (the court's)

rulings, and to take other prudent action to effectuate congressional policies." *Id.* at 1227.

By this notice, EPA is beginning the process the court had in mind. It is here proposing various amendments to the PSD regulations. Some of those amendments would replace the provisions rejected by the court; others would add entirely new provisions to supplement the replacement provisions. Each of the proposals is discussed in detail in material which follows this background section.

B. *Requirements Relating to Nonattainment Areas.* The only regulations before the court in *Alabama Power* are EPA's PSD regulations. They are therefore the only regulations directly affected by the court's decision. However, several statutory definitions and other concepts addressed in *Alabama Power* are also relevant to the statutory requirements for areas where pollution exceeds the national ambient air quality standards (nonattainment areas). By this notice, EPA is proposing changes to its regulations for nonattainment areas, to conform the regulations to the decisions in *Alabama Power.*

There are three separate sets of nonattainment requirements affecting the review of new or modified major stationary sources, each applicable under a different set of circumstances. First, before July 1, 1979, EPA's Emission Offset Interpretative Ruling (offset ruling) governed new construction that would cause or contribute to a violation of a standard. The offset ruling will still be effective in the future but only in a few, limited instances. The current, revised offset ruling was published by EPA on January 16, 1979. 44 FR 3274.

Second, after June 30, 1979, state plans which satisfy the requirements of Part D, Title I, of the Act (42 USC 7501 and following) are to be in effect for areas designated as nonattainment areas under section 107(d) of the act, 42 U.S.C. 7407(d). EPA has published several notices about what constitutes an acceptable Part D plan revision. *See* 43 FR 21673 (May 19, 1978), 44 FR 8311 (February 9, 1979), 44 FR 20372 (April 4, 1979), 44 FR 25243 (April 30, 1979), 44 FR 38583 (July 2, 1979). In situations where a Part D plan was not due by July 1, 1979, the offset ruling continues to apply (*e.g.*, where a violation of an ambient standard is discovered in a designated attainment area, or where the deadline for a Part D plan for a secondary standard is postponed under section 110(b) of the Act, 42 U.S.C. 7410(b)).

Finally, for areas where Part D plans are due but where the plan either does not satisfy Part D or is not carried out in accordance with Part D, the Act in sections 110(a)(2)(I) and 173(4) provides for restrictions on major new source construction. 42 U.S.C. 7410(a)(2)(I) and 7503(4). On July 2, 1979, EPA issued a ruling implementing this restriction, and invited comment on additional language to clarify how the statutory restriction will apply. 44 FR 38471, 38583, (July 2, 1979), 44 FR 42195, 42246 (July 19, 1979).

The key aspect of these nonattainment requirements that is affected by *Alabama Power* involves the definition of the new and modified stationary sources that are subject to stringent preconstruction permitting conditions. In the January 16, 1979 revision to the offset ruling, EPA adopted virtually the same definitions of "major source" and "major modification" as were adopted in the PSD regulations and were overturned in *Alabama Power.* EPA stated in the preamble to the offset ruling that those definitions were also applicable to state permitting programs required under Part D. EPA also ruled that the definitions apply to the prohibition on construction under section 110(a)(2)(I) (except that the cut-offs to limit review of sources with low allowable emissions do not apply to section 110(a)(2)(I)). 44 FR at 3276 (col. 1).

Although the definitions were adopted as final action in the offset ruling, EPA invited additional comment.

The statutory language on which the "major source" and "major modification" definitions were based is very similar for the nonattainment programs as for PSD, and the reasoning in the June 18 *Alabama Power* decision generally appears to be applicable to both. The comments on the nonattainment definitions invited in the January 16 notice have therefore been rendered irrelevant by the court decision, and EPA is now proposing new definitions.

Those sections of this preamble which relate to the definitions of "major source" and "major modification" therefore discuss nonattainment requirements as well as the PSD regulations. Where the concepts and goals of nonattainment and PSD differ, we are proposing and seek comment on alternative approaches consistent with the distinctive goals of each. In addition, the discussion on "Geographic Applicability" addresses the nonattainment requirements. The court did not directly address the nonattainment requirements so EPA offers here two alternative approaches for comment.

Because of the importance of resolving these questions expeditiously, today's proposal does not have an accompanying economic impact evaluation. Such an evaluation will be performed and be made available for public comment prior to promulgation.

The discussion which follows first highlights the proposed PSD and nonattainment changes and then focuses in detail on each of them.

II. Highlights

A. *Proposed Regulations Affecting New Source Review in Both Nonattainment and PSD Areas:*

1. *Potential to Emit:* The regulations proposed today would again make major construction projects subject to new source review (NSR) on the basis of increased potential to emit. Under the proposal the annual emission potential of a source would be determined after the application of air pollution controls rather than before as was generally done under the existing regulations. In calculating annual potential emissions of a source, maximum annual rated capacity, year-round hours of operation, and any enforceable permit conditions on the type of materials combusted or processed will be used.

2. *Fugitive Emissions:* Fugitive emissions, as proposed, means those emissions released directly into the atmosphere without passing through a stack, chimney, vent or other functionally equivalent opening. Fugitive emissions are proposed not to be considered when determining the annual emissions potential of a stationary source except when such emissions come from specified industry types.

3. *Source:* Source means any building structure, facility, or installation which emits or may emit any regulated pollutant. "Building, structure, facility or installation" means plant in PSD areas and in nonattainment areas except where the growth prohibitions would apply or where no adequate SIP exists or is being carried out. "Building, structure, or facility" means plant and "installation" means the individual emission unit within the plant for these nonattainment review situations. The manner in which source is defined places a vital role in determining when NSR would apply. When installation is defined differently than facility, more changes at major stationary sources would be subject as major modifications (see below).

4. *Major Modification:* The proposal would subject changes in the design or operation of a major stationary source to NSR only if (1) a significant net increase in the potential emissions of a pollutant for which the source is major would occur, or (2) cumulative net increases in the potential emissions of a pollutant regulated under the Act occur

at the same source after the applicable NSR time of concern that in total would exceed the applicable 100/250-ton threshold. The proposal, unlike the existing regulations, would allow certain emission reductions occurring at the same source to offset any increases due to proposed construction and avoid review. If a source has the potential to emit more than it is legally allowed to emit, no offset credit could be taken by a source for reducing its potential emissions down to the allowed level.

5. *No Tiered Review:* Under the existing regulations, only those sources and modifications which have large uncontrolled emission potential and also increased allowable emissions equal to or greater than 50 tons per year would receive a detailed review. All major sources and major modifications are now fully covered as discussed elsewhere.

6. *Preconstruction Notice:* Under the proposed regulations, an owner or operator of certain sources would be required to give written preconstruction notice to the applicable reviewing authority in lieu of getting a permit. This requirement would apply to (1) construction not qualifying as major modifications due to sufficient offsetting emission reductions, (2) emission reductions to be used for future offset credit in (1), and (3) construction not qualifying as major stationary sources due to application of air pollution controls not generally required by the SIP or 40 CFR Parts 60 and 61. The notice would contain a schedule of the applicable emissions changes and a demonstration that the proposed reductions are or would be sufficient and enforceable.

B. *Proposed Changes Specific to Nonattainment Requirements.*

1. *Major Modification:* The same basic definitional structure for "major stationary source" and "major modification" is being proposed for both nonattainment requirements and PSD requirements. The principal difference is the extent to which emission decreases may be used to offset increases at the same major stationary source to determine whether the source is "modified" and needs a permit.

a. *Emissions Baseline for Modification:* The proposed regulations would generally subject a change at a major source to review only if a significant net increase in the potential to emit a nonattainment pollutant for which the source is major. An exception is that no credit may be taken for reducing those potential emissions which are greater than allowable emissions. In nonattainment areas where the offset ruling or Part D NSR would apply, the applicable SIP would generally define the allowable emissions baseline for reduction credit. b. *"Bubble" Exemption:* The use of offsets inside the same source is called the "bubble." EPA proposes use of the definition of "source" (see above) to limit the use of the bubble under nonattainment requirements in the following respects:

i. Part D SIPs that include all requirements needed to assure reasonable further progress and attainment by the deadline under section 172 and that are being carried out need not restrict the use of a plantwide bubble, the same as under the PSD proposal.

ii. Part D SIPs that do not meet the requirements specified must limit use of the bubble by including a definition of "installation" as an identifiable piece of process equipment. New or modified major-source installations would require NSR permits regardless of any offsetting emission reductions elsewhere in the facility. A change or a series of changes that do not result in a significant net increase in the installation's potential to emit, and do not constitute a reconstruction of the installation, will not be subject to NSR permitting requirements.

iii. The offset ruling is proposed to also include a definition of "installation" with the effect described in paragraph ii.

iv. The restriction on construction for inadequate Part D SIPs (or failure to carry out the same) under section 110(a)(2)(1) is proposed to include a definition of "installation". However, unlike the situation described in paragraph ii, no bubble will apply, and any significant increase in the nonattainment pollutant for which the source is major would be subject.

2. *Regulatory Transition:* EPA intends to promulgate regulations within 90 days after issuance of the final *Alabama Power* opinion by the U.S. Court of Appeals. Such changes would generally apply to any future permitting situations after promulgation, but sources compelled to meet more restrictive requirements under the old regulations may apply to the applicable permitting authority to reevaluate such requirements. A change in a permit which would make the SIP no longer adequate to demonstrate attainment would require an accompanying SIP revision to ensure attainment would not be jeopardized.

The proposed changes also affect how state adopted NSR programs may be approved for designated nonattainment areas. EPA generally proposes to approve any state plan that would meet the existing SIP approval criteria or the criteria proposed today. Restrictions on growth would be implemented using the existing definitions affecting source applicability until today's regulations are promulgated.

3. *Geographic Applicability:* The proposed regulations would apply the applicable nonattainment NSR requirements throughout the area designated as nonattainment. The existing regulations now allow a source within a designated nonattainment area to demonstrate that it would construct in a clean portion and affect significantly no dirty portion of the nonattainment area. Growth prohibitions, Part D, or the offset ruling would also apply when a proposed major source or major modification in a clean area would significantly impact a nonattainment area.

C. *Proposed Changes Specific to PSD Requirements.*

1. *Baseline Concentration:* The term "baseline concentration" is used in an abstract sense to establish the starting point for defining significant deterioration occurring from area and minor sources of PM and SO_2. Under the existing regulations, a uniform August 7, 1977 baseline date was established for all PSD areas of the country. Today's proposal would establish the baseline date as the time after August 7, 1977 that the first permit application by a proposed major source or major modification (subject to the regulations as promulgated is filed for a clean area designated under section 107(d)(1)(D) or (E). The baseline date once established for any designated clean portion of an Air Quality Control Region (AQCR) would apply to all clean parts of the AQCR designated under section 107(d)(1)(D) or (E) for PM and SO_2.

2. *Best Available Control Technology (BACT):* The regulations today propose that the BACT requirements apply to all pollutants regulated under the Act for which the major construction would create significant net emission increases. The existing requirements require BACT only for those pollutants for which the proposed construction would be major.

3. *Ambient Monitoring:* The proposed regulations generally will call for more extensive ambient monitoring both before and after construction. The proposal would extend the preconstruction requirement for an analysis of the air quality existing at the areas affected by the proposed construction to all pollutants regulated under the Act and not just criteria pollutants as the existing PSD regulations require. The new monitoring requirements apply to any pollutants regulated under the Act without regard to whether such pollutant emissions individually qualify the proposed construction as being major. Under today's proposal, PM and SO_2 data as required would be used to improve modeling predictions of increment availability to future sources. Regulations governing the adoption of acceptable PSD SIPs are also proposed to be revised to indicate when state authorities can accept less than one year's continuous air quality data for a criteria pollutant.

4. *"De Minimis" Cutoffs:* The regulations proposed today would exempt on a pollutant specific basis major modifications from all permit requirements and new major sources on a pollutant specific basis from all requirements when emissions of the particular pollutant are below a specified *de minimis* or significant emission rate. *De minimis* air quality levels are also proposed as guidance for exempting from PSD monitoring requirements on a pollutant specific basis a major new source or major modification with net emission increases that cause air quality impacts below the specified values.

5. *Major Modification:* In determining whether a "no net increase" in emissions would occur for purposes of PSD, the regulations as proposed would no longer credit emission reductions on the basis of how the emissions being reduced would affect the available PSD increment. Today's PSD regulations would parallel nonattainment NSR in that the emissions baseline for determining a no net increase would be the lesser of potential emissions or allowable emissions.

Use of a plant wide "bubble" is permitted under PSD in determining if a significant increase would occur in the potential to emit a pollutant for which the source is major.

6. *Regulatory Transition:* As discussed above in the case of nonattainment permit reviews, the proposed changes would generally be prospective with regard to future PSD permits. EPA expects that when the regulations as proposed become final, sources that obtained PSD permits under the existing PSD regulations would have 90 days to have their permits reevaluated under the new rules.

The proposed changes also affect how PSD SIPs may be approved. EPA proposes to approve any state plan that would meet the existing 40 CFR Part 51 regulations or the revised regulations proposed today, but states will have to revise their plans to conform to the regulations as promulgated. The revised definitions for baseline and major construction will be retroactive for purposes of increment consumption.

7. *Geographic Applicability:* The proposed regulations would generally apply the requirements of PSD review to all areas designated under section 107(d)(1)(D) or (E). However, even where an area is designated as nonattainment under section 107, PSD review would apply when a proposed source would have a significant impact on a clean area in another state. EPA has petitioned the court to restore the existing PSD requirements which protected clean areas from new source emissions regardless of the location of the source.

III. Transition

A. *PSD Part 52 Regulations.* As described above in the background information of this preamble, the court in *Alabama Power Company* v. *Costle* communicated its decisions on the PSD regulations in the form of a summary opinion. Simultaneously, it stayed the effect of those decisions until it had considered any petition for reconsideration and issued supplemental opinions explaining the decisions and disposing of any petitions.[1] The court adopted this unusual procedure partly to allow EPA to begin as soon as possible to overhaul the regulations. The procedure, however, has raised many questions about what rules should govern PSD preconstruction review and for how long. What follows are EPA's answers to those questions.

First, EPA is proposing a set of amendments which would replace, or delete entirely, each of the provisions the court has declared invalid. EPA intends to promulgate the amendments in final form as soon as possible after the issuance of the supplemental opinions. EPA may be able to promulgate some amendments sooner than others, since the supplemental opinions of the court may well leave little or no room for discretion on certain issues. An example of such an issue is whether Congress intended the key phrase "potential to emit" in the statutory definition of "major emitting facility" to refer to controlled emissions. On some issues, though, the Agency will have more room for discretion. For example, the court has ruled that EPA has broad discretion to define the term "facility" through legislative rulemaking. 13 ERC at 1229. Since such rulemaking may result in extensive public comment, it may take EPA longer to promulgate a definition of "facility" than a new definition of "potential to emit."

Next, to avoid any moratorium on permitting, the Agency is treating the existing regulations as being in effect now. It is therefore continuing to process applications for permits under them. EPA intends to continue operating under the existing regulations for so long as, and to the extent that, they remain unchanged. To make this possible, it has moved the court for a further stay of the effect of its decisions. If granted, the stay would last until EPA completes this rulemaking or until 90 days after the issuance of the supplemental opinions, whichever comes first. If EPA requires more than the extra 90 days on some issues, it will move the court for additional time.

EPA intends to put the replacement provisions governing PSD applicability into effect immediately upon promulgation. Each would then apply to any proposed source or modification which had not filed a complete PSD application by the time of the promulgation of the provision.[3] Making the regulations immediately effective would eliminate the delay and expense of the permitting process for sources not covered by the regulation.[3] Examples of the provisions that EPA intends to make effective immediately upon promulgation are the definitions of "potential to emit," "stationary source," "facility," and "modification."

Many PSD permits will have been issued by the time EPA completes its overhaul of the regulations. EPA is proposing here that such permits would remain in effect, but would be rescinded upon a showing that a source or modification would not need a permit under the new regulations. See proposed § 52.21(w). A permittee would have only 90 days from the time the overhaul is complete to make that showing. In this way, projects which Congress never intended to undergo PSD review could obtain relief from the constraints of their PSD permit. At the same time, EPA would be able to evaluate individual decisions on applicability and keep its records straight. It should be noted that,

[1] EPA has petitioned the court for reconsideration of its decision on geographic applicability. Industry petitioners have petitioned as to the decision on the definition of "modification," on the regulation of pollutants other than sulfur dioxide and particulate matter, and on the modeling of stack heights. Where relevant these decisions are described in later sections of this preamble.

[2] When an applicant can show a reasonable and good faith effort to submit all information necessary for permit issuance, the permitting authority may consider an application as being complete for purposes of avoiding the new more restrictive requirements of the final PSD or nonattainment NSR regulations, as applicable.

[3] If an applicant believed the new regulations would exclude his facility, he could withdraw his application at any time. Alternatively, he could ask EPA to delay the processing of it. In either case, EPA would not reserve increment for the applicant.

V 44 / 173 S E 5 7 9 UMI

if a source or modification were later found to be causing or contributing to an increment violation, additional controls might be necessary. *See* 40 CFR 51.24(a)(3) (1978).

The proposed definition of "major modification" except where the growth sanctions would apply defines that term as *any* significant net increase in potential emissions at a major stationary source. In contrast, the existing definition defines it as any gross increase in potential (uncontrolled) emissions above 100 or 250 tons per year, depending on source type. 40 CFR 52.21(b)(2) (1978). The proposed definition may sweep into PSD review some modifications that the existing definition would not. That would occur if a particular gross increase at the site of an existing major stationary source would be under the 100/250-ton threshold, but would not be offset by sufficient contemporaneous emission reductions at the same site. In addition, under the existing regulations the potential to emit calculation can account for limited hours of operation whereas it cannot under today's proposal. EPA believes that such modifications and sources with limited operating hours can be grandfathered from all future permitting requirements. It is therefore proposing an amendment to § 52.21(i) which would provide that preconstruction review does not apply to any new or modified source obtaining all necessary approvals under the SIP before the date the proposed definitions of "major modification" and "potential to emit" come into effect and on which physical construction would commence within 18 months of this date (or any earlier time required under the SIP) if it would not have been a major modification or major stationary source under the existing regulations. See proposed § 52.21(i)(7).

Aside from the new provisions which would govern PSD applicability, EPA is proposing provisions which would establish new substantive requirements. Examples are the provisions which would require any major stationary source to perform air quality analysis and to have BACT for any regulated pollutant that it emits in significant amounts. See proposed paragraphs (n)(1) and (j)(2) of § 52.21. EPA intends to make such provisions effective upon final promulgation and to apply them only to construction projects whose applications for a permit were not complete before this time. In addition, special interim rules apply during the first year that the new regulations would be effective to the pollutant specific collection of continuous monitoring data when it would not have been required under the existing regulations. The Administrator generally will require less than a year's worth of data on a prorated basis. An affected source would be required to gather data over the time period from the effective date of the new regulations until the date that the source would file an otherwise complete PSD application.

Finally, in some cases the proposed definitions would redefine the baseline date, which marks the time that area and minor source growth would consume the available PSD increment. Consequently emissions from some sources which consumed increment under the existing regulations would now be counted as baseline emissions. (See discussion on "Baseline Concentration.")

The existing regulations contain various rules for the grandfathering of major stationary sources and major modifications. In essence, they generally provide that the existing regulations do not apply to a source or modification which received certain permits by March 1, 1978, and commenced construction by March 19, 1979. *See* 40 CFR 52.21(i) (2)–(4) (1978). The proposals in this notice would not affect the substance of those grandfather provisions. Also, it should be noted that EPA proposed in a recent *Federal Register* notice to amend the deadlines for "commencing" construction in those provisions. *See* 44 FR 42722 (July 16, 1979). EPA will probably promulgate the proposed amendment before it completes this rulemaking.

To the existing grandfather provisions, EPA is proposing to add two new provisions to make explicit principles that are merely implicit now. One would state that a source or modification to which the regulations apply must have a PSD permit before construction on it may begin. See proposed § 52.21(i) (1) and (2). The other would state that the existing preconstruction requirements do not apply to any source or modification on which construction commenced before August 7, 1977, the date of enactment of the Clean Air Act Amendments of 1977. This provision would merely put into the regulations what section 168(b) of the Act already provides. *See* 42 U.S.C 7478(b).

B. *Nonattainment NSR Regulations.* For implementation of the offset ruling and the restrictions on new sources under sections 110(a)(2)(I) and 173(4) of the Act, EPA proposes to advise the states to require generally the same transition principles as for PSD. Provisions of the final regulations which will be more stringent than existing requirements would apply to all applications not complete by the time the final regulations appear in the **Federal Register.** Provisions of the final regulations which will be less stringent than existing requirements could apply (unless the state has in the attainment demonstration relied upon more stringent requirements) to all sources and modifications which had not received a permit before the final regulations are promulgated.

Unlike the case of PSD, the Administrator does not believe that EPA should be directly involved in any efforts by individual sources to overturn certain more restrictive aspects of permits issued under the existing requirements. First, air quality levels worse than those judged adequate to safeguard public health and welfare are involved. Rescinding of permits in such areas might jeopardize the applicable attainment strategy approved in the plan or at least consume in part the growth allowance identified in the attainment demonstration. Therefore, any action taken to rescind a permit must be accompanied by a formal revision to the SIP so as to adjust the attainment demonstration. Next, the plan can use various control methods and strategies in demonstrating attainment by the prescribed date. This, at the state's option, can include a more restrictive NSR policy in order to comply with the attainment mandate. Finally, states have generally issued the permits, not EPA. Permitted sources that want relief from the conditions of permit issued under the existing regulations should, therefore, apply to the applicable state reviewing authority for a reevaluation. Such sources should remember that for several reasons the state may not be able to rescind a permit.

C. *PSD and Nonattainment SIP Revisions.* As discussed above, the review of permit applications will be governed by the existing regulations until the regulations are amended. However, a more flexible approach is needed for review and approval of SIP revisions. In brief, EPA proposes for now to approve a SIP revision if it satisfies either the existing EPA regulations or the regulations proposed in this notice.

It is essential that states adopt and EPA approve new source review programs without delay. The July 1, 1979 deadline creates particular urgency for nonattainment plans, and the Act and EPA policy call for prompt state adoption of PSD plans as well. Most state plans already prepared have been designed to satisfy EPA's existing regulations. To avoid delay in getting

state plans submitted and approved, EPA proposes to accept for the time being any plan that satisfies EPA's existing regulations, even if the plan does not satisfy all requirements as interpreted in *Alabama Power.* This approach is legally acceptable because the court's mandate is stayed and section 406(d) of the 1977 Amendments establishes that states have time to come into compliance after EPA regulations are altered.

Plans developed to satisfy existing regulations will in some respects be more stringent than the court has ruled are required by law. To encourage prompt submittal and approval of plans that have already been developed, EPA will take a realistic approach toward subsequent relaxation of such plans. EPA proposes to approve any state-submitted relaxation so long as the revised SIP meets all requirements proposed in this rulemaking. This proposal approval would apply to only plans that would meet, as a minimum, the proposed regulations and not the more lenient alternative approaches discussed in the preamble. The Administrator does reserve the option to approve SIPs where the decision may depend upon the final court opinion with the understanding that the state will have to revise its plan to comply with EPA's final regulations. If EPA's final regulations are in any respect less stringent than the proposed regulations, EPA will then permit further relaxation if a state so wishes.

In some respects EPA's final regulations implementing *Alabama Power* will be more stringent than the existing regulations, and may be more stringent than the regulations now being proposed. States will have additional time after EPA promulgates final regulations to submit revisions making the SIPs at least as stringent as the EPA regulations then required.

Even during the interim period, however, a plan will not be acceptable if it meets a combination of old and new requirements in such a way that it is less stringent than would be allowed under either the old or new set of requirements. For example, in determining what modifications need permits, the proposed new requirements are more stringent than the old ones in setting the level of emissions (significant net increase), but are more lenient in allowing contemporaneous reductions to be considered (the "bubble") in determining whether that level of emissions is surpassed. It would not be acceptable for a plan to apply the old, generally more lenient emission level in combination with the new more lenient bubble.

Over the past several months, EPA has invited comment on the proposed approval of individual SIP revisions designed to satisfy requirements for PSD or nonattainment, or both. Additional proposals will be published in the period before final regulations are published implementing *Alabama Power.* EPA intends to take final action on individual SIP submittals prior to the time it can complete its review of comments solicited by this notice. Therefore, this notice may be considered a part of the notice. of proposed rulemaking applicable to each individual SIP submittal. To the extent issues dicussed here are relevent to whether a particular plan submittal should be approved, commenters may address those issues in comments on the particular plan submittal. Comments on a particular plan may be submitted to the appropriate EPA Regional Office during the comment period established in the proposed rulemaking on the particular plan submittal. If the discussion published today requires alteration of any comments on a plan for which the comment period has already ended, the commenter should contact the appropriate EPA Regional Office immediately so that the issue can be appropriately dealt with.

In summary, EPA proposes to find SIPs now approvable if they meet the minimum requirements of either existing EPA regulations, or the regulations now being proposed. EPA strongly urges that, where a state has prepared a plan that satisfies existing requirements but has not yet submitted it to EPA for approval, the state should submit it without delay. There will be opportunity later to revise the plan in accordance with *Alabama Power.*

IV. Potential To Emit

The preconstruction review requirements of section 165 of the Act apply to any "major emitting facility." 42 U.S.C. 7475. Under section 169(1), that term means any stationary source which emits or has "the potential to emit" 100 tons per year or more of any pollutant and comes within any of 28 specified categories. It also includes any other source with "the potential to emit" 250 tons per year or more of any pollutant. 42 U.S.C. 7479(1).

The scope of the category "major emitting facility" obviously depends largely on the meaning of the phrase "potential to emit." Many more sources would fall into the category if the phrase referred to the amount of pollution that a source would emit without pollution controls than if it referred to the amount a source would emit with such controls.

In the PSD regulations promulgated on June 19, 1978, EPA defined "potential to emit" in general as "the capability at maximum capacity to emit a pollutant *in the absence* of air pollution control equipment." 40 CFR 51.24(b)(3), 52.21(b)(3) (1978) (emphasis added). The court in *Alabama Power Company* v. *Costle* rejected EPA's interpretation. In its view Congress intended "potential to emit" to refer to controlled emissions:

> We think the fairly discernible meaning of the statute * * * is that an emitting facility is "major" within the meaning of section 169(1), only if it either (1) actually emits the specified annual tonnage of any air pollutant, or (2) has the potential, when operating at full design capacity, to emit the statutory amount * * *. In our view the design capacity of the facility takes into account not only its maximum production capacity (which EPA uses) but also the design controls on emissions. (13 ERC at 1228.)

In response to the court's decision, EPA is proposing to amend the definitions of "potential to emit" in the existing PSD regulations. As proposed, the new definitions would provide that the term means "the capability at maximum capacity to emit a pollutant *after the application* of air pollution control equipment." *See* proposed §§ 51.24(b)(3) and 52.21(b)(3) (emphasis added). Thus, whether a source is "major" would depend primarily upon what control equipment has been incorporated into its design.

The existing defintion of "potential to emit" also states:

> Annual potential shall be based on the maximum annual rated capacity of the source, unless the *source is subject to enforceable permit conditions which limit the annual hours of operation.* (40 CFR 51.24(b)(3), 52.21(b)(3) (1978) (emphasis added).)

Under that sentence, a source can escape PSD reviews, if the person proposing the source binds himself in a state NSR permit to limit sufficiently the hours of operation, that is, to operate at less than full design capacity. In *Alabama Power,* the court plainly thought that the calculation of a source's "potential to emit" should be based on its *full* design capacity 13 ERC at 1228. EPA therefore is proposing to delete the "unless" clause. It intends to rule out the possibility of a source escaping PSD review merely because of a voluntary limitation on hours of operation. This action also makes it possible to minimize stress placed on the short term increments by sources of intermittent operation with low annual but high daily emissions. EPA would therefore generally presume that a source can

V 4 4 / 1 7 3 S E 5 7 9 UMI

physically operate 24 hours per day, 365 days per year. The Administrator asks for comment on the need to adjust this assumption to the extent that new sources would have limited hours of operation due to physical incapability of operating 24 hours a day year round. Such an exemption would follow the Administrator's proposal to discount the amount of credit that can be claimed for reductions at existing sources because of physical incapability on the part of the affected emission unit(s) (see discussion in "Modification").

The existing definition recognizes not only limitations on hours of operation, but also limitations on the amount of material to be combusted or processed:

> Enforceable permit conditions on the type *or amount* of material combusted or processed *may be used in determining the potential emission rate of a source.* (40 CFR 51.24(b)(3), 52.21 (b) (3) (1978) (emphasis added).)

For the same reasons that EPA is proposing to delete the clause relating to hours of operation, it is proposing to delete the words "or amount" in the sentence quoted above.

In calculating a source's "potential to emit" under the proposed definition many other variables would have to be considered. Among them are the efficiency of the proposed control equipment, the sulfur content of any coal to be burned at the source, and the applicability of fugitive emissions. First, in line with the court's opinion, EPA will assume that the "air pollution control equipment incorporated into the design of the facility will function to control emissions *in the manner reasonably anticipated* when the calculation is made." 13 ERC at 1228 (emphasis added). Second, with respect to the sulfur content of any coal to be burned, EPA generally intends to use a long-term, nominal average. For determining increment consumption, however, it typically will use a 30-day average. Finally, how EPA intends to deal with the problem of fugitive emissions is discussed in a subsequent section of this notice.

The definition of "potential to emit" is important not only to PSD preconstruction review, but also to NSR under the offset ruling, 44 FR 3274, and under the statutory requirements for nonattainment areas. It is also important to the determination of what sources and modifications are subject to the restrictions on construction in sections 110(a)(2)(I) and 173(4) of the Act. EPA is proposing for each of those nonattainment programs the same definition of "potential to emit" that it is proposing for the PSD program. EPA also intends that definition to be implemented for those programs in the same way as for PSD.

EPA has traditionally distinguished for the purposes of NRS review between the direct emissions of a source and its "secondary emissions." (See discussion on "Additional Issues.") In revising the offset ruling in January 1979, the Agency added a definition of "secondary emissions" and a provision describing for what purposes and under what circumstances those emissions are to be taken into account. *See* FR 3281, 3283, 3283–84 (January 16, 1979). EPA is proposing to add a definition of that term to the PSD regulations and to the proposed nonattainment provisions relating to SIP revisions and restrictions on construction. The Agency is also proposing to add to each the definitions of "potential to emit" in those sets of provisions a statement that "secondary emissions" are to be excluded in determining whether a source or modification is "major." How the Agency would treat those emissions for other purposes, including PSD air quality impact analysis, is described below.

V. 50-Ton Exemption

In the existing PSD regulations, EPA in general exempts from full PSD review any major stationary source or major modification which would have allowable emissions for each of its pollutants of less than 50 tons per year, 1,000 pounds per day, or 100 pounds per hour, whichever is more restrictive (hereinafter, a "50-ton source"). Specifically, an applicant for a permit for a 50-ton source does not have either to show that the source would have BACT or to provide an ambient impact assessment. *See* 40 CFR 51.24(j)(2), (k), 52.21(j)(2), (k) (1978). The exemption does not apply in certain narrow circumstances, *Id.*

In *Alabama Power,* the court thought that its ruling on "potential to emit" made a ruling on the 50-ton exemption "academic," since no 50-ton source would ever be "major" if "potential to emit" referred to controlled emissions. 13 ERC at 1228–29. Nevertheless, it remanded the exemption to the Agency for reconsideration and noted that the Agency had exceeded its authority in establishing the exemption. *Id.* In response, EPA is proposing to delete the provisions which embody the exemption. It is also proposing to delete parallel provisions in the offset ruling, 44 FR 3274.

EPA, however, is proposing to add to the PSD regulations another similar exemption for certain modifications. This exemption would track section 165(b) of the Act closely. See 42 U.S.C. 7475(b). Essentially a source qualifying for the exemption would face a limited air quality review for SO_2 and PM, including insulation from the monitoring requirement. Use of the exemption would be restricted to those 50 tons or less modifications of SO_2 or PM after application of BACT which would impact no Class I area and would not interfere with the attainment of PM and SO_2 standards. In addition, the exemption, as proposed, would be applicable to the cumulative total of net emission increases occurring since August 7, 1977, at a plant existing on that date.

VI. Fugitive Emissions

In determining under the existing PSD and nonattainment NSR regulations whether a stationary source or modification has the potential to emit 100 or 250 tons per year of a pollutant, EPA commonly takes into account all of the emissions of that pollutant, at least to the extent that they are reasonably quantifiable. Whether or not the emissions would be "fugitive" has so far been immaterial in requiring permits. For example, EPA has generally regarded strip mines as candidates for PSD review, since it would include the dust from the haul roads, storage piles, and other surfaces at such a mine in determining whether it is "major." *See* 43 FR 26395 (June 19, 1978).

In *Alabama Power,* the court held that "fugitive emissions" are to be included in determining whether a source or modification is "major" "only if and when EPA issues an appropriate legislative rule." 13 ERC 1231. The court did state, however, that once the permitting requirements otherwise applied, then fugitive emissions and nonfugitive emissions at the same source were to be considered in performing the permit analysis. In so holding, the court indicated that EPA had not yet gone through the requisite rulemaking. With respect to the meaning of the term "fugitive emissions," the court recognized that the Act nowhere defines it. *Id.* at 1230 n.18. Nevertheless, it discerned that Congress intended "fugitive emissions" to refer to those emissions which emanate from other than a point, such as a stack or chimney. *Id.* at 1230 n. 14. "Fugitive dust," the court thought, refers to fugitive emissions of particulate matter. *Id.* at 1230 n.14. It should be noted that those meanings differ from the ones EPA has traditionally given the two terms. *See, e.g.,* 41 FR 55560 n.3 (December 21, 1976).

In response to the court's holdings, EPA is proposing that certain industrial fugitive emissions, to the extent reasonably quantifiable, may be included in determining whether a source of modification is "major." The actions described below apply to regulations both PSD and nonattainment NSR.

First, EPA is proposing to define "fugitive emissions" as those emissions which do not pass through an opening which the owner or operator uses for ventilation, such as a stack, chimney, roof vent or roof monitor. *See* proposed §§ 51.24(b)(20) and 52.21(b)(20). EPA would also delete the existing definition of "fugitive dust" at 40 CFR 51.24(b)(6) and 52.21(b)(6) (1978).

Second, EPA is proposing to incorporate into the existing regulations the principle that rulemaking must precede the inclusion of "fugitive emissions" in an applicability determination by adding the following line to the definitions of "potential to emit": "Fugitive emissions shall not be included in determining potential, except with respect to the following stationary sources: * * *."

Finally, the Agency is proposing to list the following stationary sources whose fugitive emissions are to be taken into account: (1) Coal cleaning plants, (2) kraft pulp mills, (3) portland cement plants, (4) primary zinc smelters, (5) iron and steel mill plants, (6) primary aluminum ore reduction plants, (7) primary copper smelters, (8) municipal incinerators, (9) hydrofluoric, sulfuric, or nitric acid plants, (10) petroleum refineries, (11) lime plants, (12) phosphate rock processing plants, (13) coke oven batteries, (14) sulfur recovery plants, (15) carbon black plants, (16) primary lead smelters, (17) fuel conversion plants, (18) sintering plants, (19) secondary metal production plants, (20) chemical process plants, (21) fossil fuel-fired boilers, (22) petroleum storage and transfer units, (23) taconite ore processing plants, (24) glass fiber processing plants, (25) charcoal production plants, (26) fossil fuel-fired steam electric plants, and any other stationary source category which, at the time of the applicability determination, is being regulated under section 111 or 112 of the Act.

EPA believes that there is no reason why a source of a particular pollutant regulated under the Act should escape review because the emissions of the pollutant are fugitive, when a source of the same pollutant has to get a permit if the emissions are not fugitive. In both cases, the emissions would deteriorate air quality regardless of how they emanate. Thus, it serves the purposes of NSR to scrutinize the one as well as the other. EPA is focusing first on the sources listed above because its experience in quantifying the "fugitive emissions" from such sources is, in general, greater than its experience in quantifying such emissions from other sources. *See, e.g.,* U.S. EPA, *Compilation of Air Pollutant Emission Factors* (AP–42) (3d ed., August 1977). The Administrator over the next several months will consider the need for additional source types to be added to the list beyond those which would be newly regulated under 40 CFR Parts 60 and 61, including strip mines.

VII. Fugitive Dust Exemption

The existing PSD regulations provide that any "fugitive dust" from a major stationary source or major modification is to be ignored in determining what the effect of the source or modification on air quality would be. 40 CFR 51.24(k)(5), 52.21(k)(5) (1978). Because of its decision on "fugitive emissions" and apparently because it thought EPA had no authority to establish the exemption, the court remanded it to the Agency for further consideration. 13 ERC at 1231. In response, EPA is proposing to delete the provisions which embody the exemption. The Agency is also proposing to delete a parallel provision in the offset ruling, 44 FR 3274.

VIII. Source/Facility Installation

A. *Definition of "Source".* In its existing PSD regulations and the offset ruling, EPA has defined "stationary source" as "any structure, building, facility, equipment, installation, or operation (or combination thereof) which is located on one or more contiguous or adjacent properties and which is owned or operated by the same person (or by persons under common control)." EPA also defined "facility" as an "identifiable piece of process equipment." 40 CFR 51.24(b)(4), (5), 52.21(b)(4), (5); 40 CFR Part 51, Appendix s, sections II.A.1 and 2, as amended 44 FR 3282.

In *Alabama Power* the court said that the definition of "stationary source" in section 111(a)(3) governs PSD review. Slip op. at 11. Section 111(a)(3) defines "stationary source" as "any building, structure, facility, or installation which emits or may emit any air pollutant." 42 U.S.C. 7411(a)(3). The court stated that EPA may not add items to this list, Slip op. at 11. In conformance with the court's opinion EPA is proposing to delete the terms "equipment", "operation" and "combination thereof" from the definition of stationary source in both the PSD and nonattainment regulations. The court also found that EPA exceeded its statutory authority in the way in which it tried to apply preconstruction review to both a *single* building, structure, facility or installation, which is permitted by section 111(a)(3), and a *combination* of such units. Slip op. at 12. EPA therefore proposes to delete the term "combination thereof" from the definition of stationary source.

The court did, however, state that EPA has substantial discretion to define the terms in the definition of source—that is, building, structure, facility, or installation—to include a wide range of pollution-emitting sources. Slip op. at 11. The components of "source" could be defined differently for PSD purposes than for the purposes of other provisions of the Act. Slip op. at 12, note 13. The key constraint on EPA's discretion is that "the definitions applicable to each set of provisions must be reasonably appropriate for the purposes of those sections." *Id.* The same court has earlier stated that, in defining the components of source, "EPA is guided by a reasoned application of the terms of the statute it is charged to enforce, not by an abstract 'dictionary' definition." *ASARCO, Inc.* v. *EPA,* 578 F.2d 319, 324 note 17 (D.C. Cir. 1978). These two court opinions instruct the Agency to analyze the statutory purposes of the various PSD and nonattainment NSR provisions and define the terms "building," "structure," "facility," and "installation" to carry out best the statutory intent of the provisions.

B. *Sources Subject to PSD Requirements.* One of the fundamental purposes of PSD is to maintain air quality better than the ambient standards. This purpose can best be served if NSR applies to the largest industrial grouping that, as a practical matter, industry and the reviewing authorities can reasonably deal with as a single unit. EPA believes the appropriate grouping is all emitting activities on contiguous or adjacent property and under common control—typically an industrial plant.

For PSD, EPA believes that a large industrial grouping is the appropriate unit for review of both construction of new plants and new and modified pieces of process equipment at existing plants. Applying PSD review to large groupings rather than separate pieces of process equipment ensures adequate review of new plants. EPA believes that unit-by-unit review, without plant-wide review, would fail to protect air quality standards and increments. Large new plants could be constructed at one site as a collection of individual process units, each below the potential-to-emit threshold, and thereby escape review altogether. If clustering of new growth were permitted without preconstruction

V 4 4 / 1 7 3 S E 5 7 9 UMI

V 4 4 / 1 7 3 S E 5 7 9 UMI

review, increments and even standards could easily be violated.

While increased protection of air quality might be achieved by reviewing groupings even bigger than a plant, review of larger groupings is infeasible. New units not on adjacent property or under common control would be an awkward grouping to evaluate and regulate. Therefore, PSD review will apply to groupings of new construction no larger than a plant.

Plant-wide review also serves the basic purposes of PSD when pieces of equipment are being built or modified at existing plants. With plant-wide review, industry can construct new and modified equipment without a permit, by reducing emissions enough that net emissions at the plant do not increase. (Allowing use of offsetting emission reductions within the source to avoid NSR is called the "bubble" approach. For discussion of the bubble, see "Modification"). The purposes of PSD are served, because assuring that there will be no net increase in emissions from the plant also assures that the construction will not interfere with maintaining good air quality.

Permitting offsets only within individual process units would go beyond maintaining the status quo. While additional emission reductions beyond existing levels are needed to attain standards in nonattainment areas (see discussion in the next section), such reductions are ordinarily unnecessary to meet the purposes of the PSD program. In addition, the review itself would not make sense relative to RSD goals, if new units at sources with offsetting plant-wide decreases were forced to undergo review. Sources might be required to model and monitor increment consumption when air quality is expected to improve or stay the same. In addition, application of the bubble on a plant-wide basis encourages voluntary upgrading of equipment, and growth in productive capacity.

Since obtaining offsets is often less expensive and less time-consuming than obtaining a PSD permit, providing industry with the offset option will facilitate upgrading of production capacity, and encourage application of improved controls to obtain offsets. Permitting plant-wide use of offsets provides the greatest opportunity for both of these desirable results. Thus, plant-wide review is the preferred approach under PSD for reviewing construction of both new plants, and new and modified pieces of equipment at existing plants.

For these reasons, EPA proposes that PSD review apply to a large grouping of pollutant-emitting activities, like an industrial plant. To accomplish this, EPA proposes to define "building, structure, facility, or installation" to mean a grouping of activities on contiguous or adjacent properties and under common control. The term "grouping" is intended to include a plant consisting of a single isolated activity, as well as a plant consisting of many activities.

C. *Sources Subject to Nonattainment Requirements.*

1. *Purpose to be Served by Nonattainment NSR Definitions.* Unlike the PSD provisions, the nonattainment provisions are primarily intended not merely to prevent excessive increases in emissions, but to reduce emissions. This fundamental difference in purpose requires a different approach to defining the sources that will be subject to NSR. To assure adequate review, EPA believes that both entire plants and individual pieces of equipment must be subject to NSR. The one exception under EPA's proposal is for areas subject to fully complete SIPs satisfying Part D requirements. In these areas, where attainment is assured, NSR need apply only to entire plants.

To assure adequate review of new plants, a large grouping must be subject to nonattainment NSR for the reasons discussed above for PSD. To do otherwise would allow a new plant that is divided into separate process units, each below the potential emission threshold, to escape review. New emissions could thus be added to the existing violation, without review, making attainment virtually impossible. Therefore, EPA believes that nonattainment programs, like PSD programs, must apply NSR to entire plants.

EPA believes that pieces of process equipment within plants should also be subject to NSR under nonattainment programs. This would prevent use of plant-wide offsets for increases from construction or modification of major pieces of process equipment. The plant-wide bubble is less appropriate for nonattainment programs than for PSD programs because it only holds emissions constant. Nonattainment programs, in contrast to PSD programs, must positively reduce emissions.

If increases from construction of new or modified pieces of process equipment could be offset on a plant-wide basis the construction would make attainment of the standards substantially more difficult. For each nonattainment area, there are only a limited number of cost-effective ways to reduce existing emissions enough to attain standards. If the cost-effective opportunities to reduce emissions are used to offset equally large increases from new construction, then other, less cost-effective ways to reduce emissions must be found to achieve attainment.

Therefore, to ensure that construction within existing plants does not make attainment of the standards more difficult, nonattainment programs must provide for NSR new and modified pieces of equipment. The NSR requirements will assure that the most stringent controls are applied to new and modified equipment, and that more than offsetting reductions in existing emissions are obtained to assure adequate continued progress toward attainment. The nonattainment requirements also ensure that other sources in the state, owned or operated by the same owner, are in compliance with SIP requirements needed for attainment.

This policy argument is strongly supported by the legislative history. Even where demolition of obsolete equipment reduces emissions, Congress indicated that construction of replacement equipment should be subject to NSR under nonattainment programs without regard to the offsetting reductions:

> Thus, [under the offset ruling and Part D NSR requirements,] a new source is still subject to such requirements as "lowest achievable emission rate" even if it is constructed as a replacement for an older facility resulting in a net reduction from previous emission levels.[4] [Statement of Senator Muskie, 123 Cong. Rec. at S 13702 col. 2 (daily edition, August 4, 1977)].

2. *Proposed Definitions.* To implement this specific expression of Congressional intent, as well as the general purposes of the nonattainment provisions discussed above, EPA is proposing to define "source" to include not only plant-wide groupings of activities, but also individual pieces of process equipment. "Building, structure or facility" [5] would be defined as a large grouping of activities (a plant) and "installation" would be defined as an "individual piece of process equipment."

These definitions would prevent use of plant-wide bubble for all new and modified major pieces of process equipment. ("Major" means having high enough potential emissions to be a major stationary source. "Minor" means having less than that.) The plant-wide bubble would still serve to avoid NSR, when emissions from a new or modified *minor* piece of equipment (or from some activity like a coal pile that is not an installation) are offset by enough

[4] Then, as now, "facility" was defined in EPA's offset ruling as a piece of process equipment.

[5] Referred to hereafter as "facility."

reductions at the plant so that there is no net increase in emissions at the plant. Furthermore, in accordance with the Congressional intent noted above, a replacement of an older piece of equipment would be treated as a new installation, regardless of any reductions from previous emission levels. A "reconstruction" would be treated in the same way as a replacement, when the capital cost of the new improvements exceeds 50% of a comparable replacement.

The proposed definitions tend to limit applications of the bubble, by defining certain large kinds of sources and certain small kinds of sources, and recognizing that some small sources are included within the boundaries of large sources. This approach is consistent with both the language of the Act and the interpretation in *Alabama Power.*

Congress, in defining "source" as any "structure, building, facility, or installation" must have contemplated that some of these components could be defined to be smaller than others and that the small components could be found within the large components. Defining some sources as small enough to be within the boundaries of larger-defined sources is also consistent with the court's instruction not to define source as a "combination" of facilities, installations, or other single source units. The proposed regulations define "facility" not as a combination of narrowly-defined sources, but rather as an independently-defined enitity. This single entity is composed of a grouping of emitting activities (which individually may or may not be sources)[6] meeting requirements of common control and adjacency. This plant definition is exactly the sort of "common sense industrial grouping" that the court said is a proper subject for NSR. Slip op. at 12.

The court stated that the same definitions of facility, building, structure, and installation, must govern the determination of not only whether there is a new major stationary source subject to NSR, but also whether there is a *modified* major stationary source subject to NSR. Slip op. at 21. EPA's definitions adhere strictly to this principle. Major facilities and major installations constitute both the new sources and the modified sources subject to NSR. Under these definitions, construction that is neither a new nor a modified major facility may be a new or modified installation, and vice versa. Congress, in defining "source" to include several items in the alternative, provided for such a result where necessary to achieve the purposes of the Act.

The following illustrates how the nonattainment NSR definitions would work. Suppose a firm proposed to construct three pieces of process equipment on a single plant site. Each piece of equipment would be an "installation," and the entire plant would be a "facility". Each installation would be a "source" and the entire facility would be a "source." If the installations would have annual potential emissions of 40, 190, and 150 tons per year, respectively, the facility would have potential emissions of 380 tons per year:

Installation (A)—40 tons per year (minor source).

Installation (B)—190 tons per year (major source).

Installation (C)—150 tons per year (major source).

Facility (A)—380 tons per year (major source).

Permits would be needed for the three major sources: Installation (B), Installation (C), and Facility (A). Since the permit for Facility (A) would, as a practical matter, cover all three installations, only a single permit application would be needed.

Suppose next that the firm proposed to modify Installation (C) to increase emissions by 70 tons, and decrease contemporaneously the emissions of Installation (B) by the same amount. There would be no modification of Facility (A), whose total emissions woud remain the same, but there would be a modification of Installation (C), whose emissions would increase by 70 tons. A permit would be needed for the modification of Installation (C).

If installation (B) were then modified to increase its emissions by 50 tons, but there were contemporaneous reductions of the same amount at the same Installation (B), no net increase in emissions would occur at either Installation (B) or at Facility (A) (technically, there would be no "modification"), and no permit would be needed. If there were a 20-ton increase at Installation (A) and a contemporaneous 25-ton decrease at Installation (C), there would be a modification of minor Installation (A), whose net emissions increased, but no modification of major Facility (A), whose net emissions decreased, and no permit would be needed.

3. *Nonattainment Programs to Which the Proposed Definitions Apply.* The definitions described above are to apply to sources subject to the offset ruling and to restrictions on construction under sections 110(a)(2)(1) and 173(4) of the Act. EPA also proposes that these definitions apply to "incomplete" state plans under Part D of the Act. Incomplete plans are those that do not yet show reasonable further progress and attainment of the ambient standards, based exclusively on currently adopted, approved, and enforceable requirements. Incomplete plans therefore include any plan where approval under part D is conditioned on submission of additional material by the state, any plans containing state-adopted schedules for submission of additional material,[7] and any plans where additional submissions are needed by July 1, 1982, as required by section 129(c) of the 1977 Amendments (note under 42 U.S.C. 7502). Since incomplete plans do not yet include all requirements needed for attainment, EPA believes that the definitions described above, including the definition of "installation," are needed for the reasons discussed above.

However, EPA believes that complete Part D SIPs, which contain adopted and enforceable requirements sufficient to assure attainment, may apply the approach proposed above for PSD, with plant-wide review but no review of individual pieces of equipment. Use of only a plant-wide definition of source will permit plant-wide offsets for avoiding NSR of new or modified pieces of equipment. However, this is only appropriate once a SIP is adopted that will assure the reductions in existing emissions necessary for attainment. *See* 44 FR 3276 col. 3 (January 16, 1979). If the level of emissions allowed in the SIP is low enough to assure reasonable further progress and attainment, new construction or modifications with enough offset credit to prevent an emission increase should not jeopardize attainment. Protection of attainment under the SIP is also assured by not permitting offset credit for emission reductions required by the approved SIP (see "Modification").

However, for sources subject to restrictions on construction in sections 110(a)(2)(I) and 173(4), EPA believes that no offsets should be permitted.[8] EPA

[6] For example, a coal pile is not a piece of process equipment, and is, therefore, not an "installation" under the proposed definitions. However, it is an emitting activity, and can therefore be part or a "facility" under the proposed definitions. The Agency recognizes that the emissions from the coal pile would be fugitive emissions and subject to regulation as discussed in the section on "Fugitive Emissions."

[7] For a discussion of conditional approvals and schedules, see 44 FR 20372 (April 3, 1979) and 44 FR 38583 (July 2, 1979).

[8] Reconstructed major installations, regardless of whether they are considered "modifications" even under the restrictive definition of major modification, are new major sources subject to the restrictions on construction.

proposes to accomplish this through the definition of "major modification," rather than the definition of the components of "source." This is discussed in the section on "Modification".

EPA is considering one other approach for nonattainment areas. Under this approach, all components of "source" would be defined as pieces of process equipment, and none would be defined as plants. NSR would apply to new pieces of equipment, regardless of offsets elsewhere in the plant. For modifications of existing pieces of equipment, offsetting reductions within the same piece of equipment could be considered in determining whether there is a significant net increase in emissions. However, under this alternative approach, new or modified minor installations would never be subject to review, regardless of whether they are part of a major plant.

Since numerous individual pieces of process equipment typically have less than 100 tons per year potential, and would escape preconstruction review even though they are part of a single plant with over 100 tons potential emissions, this approach would allow much new construction to take place without preconstruction review. This problem could be counteracted somewhat, by requiring that state plans provide for close tracking of new minor source construction. However, as discussed above, EPA believes that failing to review entire new plants would create enough risk of massive new emissions that this approach is undesirable.

D. *Summary.* In summary, EPA is proposing two different ways to define source for different kinds of NSR programs:

(1) For PSD and complete Part D SIPs, review would apply only to plants, with an unrestricted plant-wide bubble.

(2) For the offset ruling, restrictions on construction, and incomplete Part D SIPs, review would apply to both plants and individual pieces of process equipment, causing the plant-wide bubble not to apply for new and modified major pieces of equipment.

In addition, for the restrictions on construction, EPA is proposing to define "major modification" so as to prohibit the bubble entirely. Finally, an alternative discussed but not favored is to have only pieces of process equipment reviewed, resulting in no plant-wide bubble and allowing minor pieces of equipment to escape NSR regardless of whether they are within a major plant.

EPA invites comment generally on what approach should be used for each type of program.

IX. Modification

A. *No Net Increase.* Under current EPA regulations, a modification is "major" if potential emission increases from the modification would equal or exceed the applicable 100/250-ton threshold. The court in *Alabama Power* rejected this approach. It held that a change in a major stationary source is subject to PSD review if it results in a net increase in the source's potential to emit. The court also held that any emission increase which is entirely offset by contemporaneous emission reductions at the source would not be considered a modification. Slip op. 20–22. These rulings are incorporated into the proposed regulations for both PSD and nonattainment NSR provisions. The one exception is construction restrictions under sections 110(a)(2)(I) and 173(4), for which EPA proposes not to consider offsetting reductions in determining whether there is a modification.

While the court addressed the *amount* of increase that triggers review, it did not address *which* pollutants must be increased to trigger review. The court, thus, did not object to EPA's current approach of requiring preconstruction review only if the increase in potential emissions is for a pollutant for which the source is a major source. Nor did the court object to EPA's current approach of aggregating small increases in emissions occurring after the time of program concern (e.g., August 7, 1977 for PSD) to determine whether they add up to enough in total to make the source a major source subject to preconstruction review. Therefore, these two aspects of existing regulations are being retained.

The fact that review is necessary only if there is an increase for a pollutant for which the source is a major source is not inconsistent with the Act's instructions that PSD requirements apply to all pollutants emitted. If any one pollutant initiates PSD review, then review is required for all pollutants emitted in greater than *de minimis* amounts but if no one pollutant triggers review, then review is not required for any pollutant emitted.

The court's ruling requires additional guidance on how the new definition of modification will be implemented, what "contemporaneous" change means, what emission offsets are creditable, and how "net increase" is calculated. It should be noted that the topic of net emission increases is distinct from the more general topic of emission offset banking, although they are closely related. Banking is discussed in the Federal Register notice regarding EPA's offset ruling, 44 FR 3274 (January 16, 1979).

1. *Implementation.* The regulations proposed today would require that any emission increases at a stationary source which would qualify as a major modification, were it not for sufficient contemporaneous emission reductions occuring within the source, must be reported to the Administrator or reviewing authority (the state governmental body responsible for issuing permits is called the reviewing or permitting authority). In addition, a source must report emission decreases which it wishes to use as future offset credit. EPA intends the reporting requirement to fill a need for preconstruction notice and not to act as a time-consuming substitute for a permitting program. For more discussion of the preconstruction notice requirements, see the section of this preamble entitled "Notification."

2. *Contemporaneous Reductions.* Under the court decision, a modification is a change, or series of contemporaneous changes, that results in a net increase in potential to emit. The term "change" derives from the definition of "modification" under section 111(a)(4), and means "any physical change in, or change in the method of operation of, a stationary source." Only an actual physical change in, or change in the method of operation of, a major stationary source may be considered in calculating contemporaneous decreases. In addition, because a source's potential to emit is calculated based on full design capacity assuming year-round, 24-hour-a-day operation, only an actual change that reduces design capacity can be credited as an offset in calculating whether a net increase has occurred. For example, imposition of a legal obligation to reduce operating hours or operating loads will not, by itself, qualify as an actual change decreasing potential to emit. In contrast, an actual change that permanently reduces the source's maximum production capacity, such as disconnecting an entire process, would qualify for credit.

The proposal would exempt an emissions increase from PSD review if equal reductions in emissions occur at the same source contemporaneously with the emissions increase. In the court's view, this exemption has the advantage of deferring or avoiding the cost of review while providing an incentive to industry to upgrade air pollution control equipment.

A narrow interpretation of the term "contemporaneous" would restrict creditable emission reductions to those occurring at the same time as the emission increases being offset. This, however, would undercut the incentive to upgrade controls, since it is not always possible for a source owner to effect the necessary reductions at exactly the right time. Although the term "contemporaneous" appears to preclude a formal, open-ended banking system for previously-achieved emission reductions at the same source, it is not so limited as to require simultaneous offsetting. Requiring sources to continue operation of obsolete equipment, simply to preserve offset credit, makes little economic or air quality sense.

To provide some latitude for crediting emission reductions, EPA is proposing to credit any reported reduction that would occur after the effective date of the promulgated regulations but before the proposed emission increases are scheduled to occur. For shutdowns and curtailments occurring before these regulations are promulgated, offset credit may be retained if the source files a notice within 90 days after promulgation recording the previous shutdown or curtailment. A follow-up notice would also be required to document the construction schedule for the increase to be offset and to ensure that the applicable offsets are enforceable under the SIP. Failure to identify such a timetable or to comply with it will prevent use of the earlier emission reductions to offset that increase. This, in turn, may require the affected owner or operator to obtain a NSR permit.

3. *Emission Offset Baseline.* Additional guidance is necessary on how to determine if proposed emission reductions at a stationary source are sufficient in type and amount to offset prospective emission increases at the same source, assuming the changes are contemporaneous. The basic rule contained in the regulations is that a new increase in a source's potential to emit occurs whenever the sum of increases minus the sum of the decreases is greater than zero. The size of the increase or decrease for a particular emission unit is generally determined by the difference between the unit's potential to emit before and after the change or series of changes.

As mentioned in "Potential To Emit," the Administrator believes that potential emissions of an existing source can be no greater than its actual emission capacity. If a source is no longer physically able to operate at its maximum design capacity, its potential to emit is limited accordingly. For a source physically constrained from operating at maximum capacity, offset credit will be based on its potential emissions, taking into account physical constraints on operation at maximum capacity. For example, an obsolete unit which has been shut down for several years due to severe operational difficulties would not offer any offset credit to new construction. If potential emission calculations did not account for physical incapabilities inherent in the operation of existing sources, a source could offset new usable production capacity with old unusable production capacity and thereby avoid preconstruction review. A common result would be significant and unreviewed increases in actual emissions. If this were permitted, increments and standards could be severely impacted or even exceeded.

This policy continues a philosophy which was implicit in several requirements of the existing PSD regulations and offset ruling. For example, under existing regulations and today's proposal, a source's operation over a one- to two-year period is considered in calculating the size of an emission reduction. If a source has not been operating at full capacity for a significant part of the one- to two-year period, it is considered to be physically incapable of operating at full capacity and its emission reduction credit will be calculated based on its operation for the one- to two-year period. A source owner or operator may overcome the presumption of physical incapability if he shows that it was not physical incapability that caused the low production rates.

Physical incapability includes situations where one part of an existing source cannot be used at its full capacity because its capacity is larger relative to the rest of the associated units, and therefore its output is limited by the capacity of the other units. In addition, if a plan is unsafe for a certain level of operation or has obsolete or worn-out components which cannot be routinely replaced, its potential to emit would be limited by these conditions.

Under the proposal, emission reductions must be reported to the permitting authority to receive future offset credit (see "Notification"). EPA would accordingly allow full credit for a systematic phase-down or production curtailment at a source if it is reported in advance to the permitting authority. Industry would be allowed to phase in orderly growth without running highly polluting, obsolete units at full operation, simply to accrue maximum offset credit.

An adjustment to the potential emissions rule is needed in a case where potential emissions are greater than allowable emissions. In such a case, no credit may be taken for reducing potential emissions down to allowable emissions. This adjustment is needed to implement Congress' intent, as interpreted in *Alabama Power*, that offsets should be permitted as an incentive to upgrade air pollution controls. Slip op. at 21. Where the improvement in control technology would be legally required under the SIP, the source should not be permitted to take credit for making the legally required decrease. This approach appears in the offset ruling, which was endorsed by Congress. The 1977 Amendments provide that the emissions baseline for calculating offsets under the ruling must be the state plan requirement in effect at the time the source applies for a permit. See section 129(a)(1) of the 1977 Amendments (note under 42 U.S.C. 7502(a)(1)).

In addition, allowing offset credit for independently required reductions would make it difficult for the SIP to reduce total emissions in an area where standards or increments are violated. If such offsets were allowed, a source that came into compliance with a required emission limitation could then use the same reduction to offset increases in emitting capacity such that no net increase would occur. Total emissions for the source would remain the same and the violation would still exist. The proposed regulations would avoid this unacceptable result by prohibiting the source from taking credit for such a reduction.

"Allowable emissions" are defined as the most stringent of (1) any new source performance standard or standard for hazardous pollutants applicable to the construction under review,[9] (2) applicable SIP emission limits, or (3) the emission rate specified as an enforceable permit condition. Where there are any enforceable emission limits that must be complied with in the future, and which are different from the limit currently required, the most stringent of the present and future emission limitations is used in determining the allowable emissions.

To continue existing regulations and policies, the Administrator intends that each candidate reduction meet all of the following criteria:

(1) It must be enforceable under the applicable SIP, either through a SIP

[9] Here the applicable performance standard or standard for hazardous pollutants refers to the standard that a particular source is subject to and not new standards or revisions of existing standards which affect the relevant source category but that would not apply to the particular source.

V 44 / 173 S E 5 7 9 UMI

revision or an alteration of the source's permit.

(2) It must be for the same pollutant as the emission increase and have comparable impacts to health and welfare. Section IV.C.4. of the offset ruling, involving credit for hydrocarbon substitution, should apply. The criteria outlined in the proposed policy statement on state implementation of the "bubble" concept for existing sources (44 FR 3743 col. 1) January 16, 1979, would also apply. Accordingly, reductions of pollutants within the same pollutant categories but with different health or ambient air impacts cannot be traded against each other.

(3) It must not have been already committed to in the SIP.

(4) Air quality need not improve or stay the same at every location affected by the proposed construction, but on balance the affected area should not be adversely impacted.

The Administrator recognizes a problem associated with crediting offsets as defined. Under today's proposal there is a possible incentive to seek a loose BACT requirement when undergoing PSD review in order to lay an early claim to an excess amount of the increment. If an applicant obtains approval of proposed construction under a loose BACT requirement, he could then alter the proposal to provide for the installation of the better controls so as to offset a future expansion at the same site without full PSD review. The Administrator asks for comments on how best to address this problem.

B. *Restrictions on Construction.* EPA is proposing that the bubble should not apply at all for areas subject to construction restrictions under section 110(a)(2)(I) or 173(4). For these provisions, EPA is proposing to define "major modification" as any change in, or change in the method of operation of a major stationary source that results in *any increase* in the potential to emit of a pollutant for which the source is major if the increase exceeds the *de minimis* cutoff for the pollutant. (See *"De Minimis* Exemptions").

EPA believes that the *Alabama Power* decision, establishing that internal offsets must be permitted in determining applicability of PSD to modifications, does not apply to section 110(a)(2)(I) or 173(4) restrictions on construction. The offset ruling was essentially an interim policy to allow some further growth while adequate plan revisions were developed. EPA believes that in termining the offset ruling on June 30, 1979, and restricting further major construction until Part D plans are approved and implemented, Congress intended to terminate not only offset transactions between different sources but also those within the same plant. In light of this intent, not permitting internal offsets is particularly important because most offset transactions permitted under the offset ruling have involved offsets inside the same source.

This interpretation is also required to avoid undermining the purpose of the restrictions on construction. As discussed in the "Source/Facility/Installation" section of the preamble, when a source matches an emission reduction with an equal amount of increased emissions from new construction, the nonattainment problem gets harder to solve. This is especially true where there is no adequate SIP that demonstrates attainment. EPA believes that the restriction on construction was designed to stop the problem from becoming worse and provide an incentive for states to submit and carry out corrective SIPs. Allowing offset credit for reductions would instead provide an incentive for sources to seek delays in the adoption of acceptable state plans. Delay would allow sources more time to convert reductions into offsets before a plan requiring those reductions can be adopte and approved.

An alternative to prohibiting the bubble outright may be to allow no offset credit for reducing potential emissions down to the level that would be required if reasonably available control technology (RACT) were applied. Since RACT is required in approvable Part D SIPs, the effect would be to discount credit for reductions that would be legally required if an approvable SIP were in place. Such a policy would preserve the incentive to submit adequate SIP revisions for affected areas.

While Congress removed a similar RACT baseline from the offset ruling, in section 129(a) of the 1977 Amendments, EPA does not believe that Congress prohibited a similar approach where areas do not have, or have failed to implement, acceptable Part D plans. A major drawback to this approach, however, is that RACT may be difficult to define in the absence of a full regulatory proceeding, such as those required for SIP submission and approvals. Therefore, EPA is proposing instead to prohibit internal offsets in areas subject to construction restrictions. However, EPA also invites comment on the alternative approach of permitting offset credit in areas where the growth prohibitions apply if RACT were first applied.

C. *Accumulation.* As noted above, EPA proposes to continue the current policy of requiring NSR for a source when aggregate new emissions from individually minor units at the same site, after an applicable date, are sufficient to qualify the series of changes as a major modification. For PSD review, the date from which emissions increases are aggregated is August 7, 1977, (40 CFR 51.24(b)(2), 40 CFR 52.21(b)(2)) and for sources subject to the offset ruling, December 21, 1976, 44 FR 3283, col. 1 (January 16, 1979). These dates continue current EPA policy. For sources subject to Part D plans and restrictions on construction affecting designated nonattainment areas, the applicable date for accumulation will also be December 21, 1976. Accumulating net emission increases from that date forward ensures that modifications resulting in emissions which Congress defined as major will be subject to review under a Part D plan or else to the restrictions on growth. In addition, these sources received notice as of December 21, 1976 that accumulation could later subject them to nonattainment review.

EPA is proposing one change to tis existing accumulation provision to conform it to the court's decision. The current accumulation regulation aggregates emission increases after an applicable date, with no credit given for contemporaneous emission decreases. The court, however, defined modification as a net increase in potential to emit. To make the accumulation provision consistent with this definition, EPA is proposing that a source be subject to NSR when the aggregate *net* increase in its potential to emit after the applicable date qualifies it as a major stationary source. As in the existing regulations, only net emission increases after August 7, 1977 for PSD sources, and December 21, 1976 for sources subject to nonattainment requirements will be considered in determining if a source is subject to NSR.

Under this approach, if a modification at a minor source results in a net increase in emissions, such that its aggregate net increases in potential emissions since the date of concern exceeds the applicable 100/250-ton threshold, the modification will be subject to review. This approach requires review for a single modification to a minor source constructed before the applicable date when the modification results in a net increase in potential emissions of over the applicable 100/250-ton threshold.

Once a series of individual minor changes accumulates to a major modification, questions arise concerning the degree of review that would apply to the earlier emission increases. In general, today's proposal would focus

the requirement to apply BACT or LAER on only that emissions increase which makes the source subject to review. On the other hand, total aggregated emissions from the source will be of concern when performing air quality tests. Such tests include increment analysis for PSD sources and those relevant to emission offsets for sources subject to nonattainment NSR. Any subsequent modification at the source resulting in a net increase in potential to emit that exceeds the *de minimis* cutoff will be subject to NSR.

The accumulation approach as modified to conform with the court's decision closes a loophole in EPA's current regulations. Previously, a modification was not subject to review unless it increased a source's potential emissions by 100 or 250 tons per year, whichever was applicable. Under both the existing and proposed accumulation provision, a power plant constructed after the date of concern which emits 90 tons of SO_2 and then adds a new 50 ton SO_2 boiler, would be subject to control technology requirements for the 50-ton unit and to air quality review for the entire facility. Under the existing provision, if the plant then added another 90-ton boiler, however, the boiler would not be subject to existing review requirements because it would not meet the 100-ton threshold. This is true because the current regulations allow the accumulation slate to be wiped clean after a permit was obtained. Under the approach proposed today, any net increase in potential to emit after the source becomes major is subject to review. Consequently, the next 90-ton increase would be subject to review, unless there were sufficient contemporaneous emission decreases.

The *de minimis* exemption, as discussed more fully in the section on "*De Minimis* Exemptions," would also apply to emissions from major modifications on a cumulative basis. Once a minor source is subject to review because its aggregate potential emissions make it major, any future net emission increase will also be reviewed unless it qualifies as a *de minimis* increase. However, any future *de minimis* net increase from a modification will be cumulated with net increases from subsequent modifications to determine if total net increases exceed the applicable *de minimis* cutoff.

Finally, if a minor source becomes major through accumulation of its emissions and the source is located in a PSD area where no baseline date applies, that source's application for a major modification permit will trigger a baseline date for the area. The baseline date would be the date a complete application for the major modification is filed and not the date on which the first unit of the then-minor source was constructed.

X. "De Minimis" Exemption

In the *Alabama Power* decision, the court provided that EPA may exempt from review those situations determined to be *de minimis*. Specifically, the court stated: "The Agency does possess authority, inherent in the statutory scheme, to overlook circumstances that in context fairly may be considered *de minimis*." Slip op. at 10. The court spoke of the administrator's ability to exempt from review modifications with small net increases and to dispense with the BACT and monitoring requirements through the application of *de minimis* thresholds for those pollutants emitted by an otherwise subject source. The court did limit the Administrator's discretion in formulating such exemption cutoffs by stating that a cost-effectiveness rationale would not be appropriate.

The Administrator is today proposing to exercise this authority by establishing a pollutant specific exemption system that excludes or limits review of proposed construction having emissions or air quality impacts below certain values. Table 1 contains for each pollutant regulated under the Act an emission cutoff that would be considered insignificant or *de minimis*. Table 1 would have two principal uses. First, it would be used to show that the net increase associated with a modification would be *de minimis* for all pollutants for which the source is major. In nonattainment areas, this demonstration would involve only the nonattainment pollutant(s), while a showing for all regulated pollutants for which the source is major would be required of modifications at major stationary sources in PSD areas. A successful showing would exempt a modification from PSD and nonattainment permit requirements. However, such a source would be required to provide notice to the Administrator and, therein, make the *de minimis* demonstration (see section on "NOTIFICATION"). The proposed regulations incorporate the *de minimis* concept by requiring that major modifications have a significant net increase in potential emissions.

Table 1—Guidelines for Significant Emission Rates

Pollutant and Emission Rate

Carbon monoxide—100 tons per year.
Nitrogen dioxide—10 tons per year.
Total Suspended particulates—10 tons per year.
Sulfur dioxide—10 tons per year.
Ozone—10 tons per year of volatile organic compounds.
Lead—1 ton per year.
Mercury—.2 tons per year.
Beryllium—0.004 ton per year.
Asbestos—1 ton per year.
Fluorides—0.02 ton per year.
Sulfuric acid mist—1 ton per year.
Vinyl chloride—1 ton per year.
Total Reduced Sulfur:
  Hydrogen sulfide—1 ton per year.
  Methyl mercaptan—1 ton per year.
  Dimethyl sulfide—1 ton per year.
  Dimethyl disulfide—1 ton per year.
Reduced Sulfur Compounds:
  Hydrogen sulfide (see above).
  Carbon disulfide—10 tons per year.
  Carbonyl sulfide—10 tons per year.

Even if a modification cannot be shown to be minor, Table 1 can be used to limit the pollutants for which BACT must be applied or an air quality analysis done. If a modification to a source is subject to review because it results in a significant net increase in potential emissions of a pollutant for which the source is major, or a new source is subject to review because it will have the potential to emit a regulated pollutant in major amounts, the source may still avoid BACT or an air quality analysis for other pollutants it emits if it emits such pollutants in *de minimis* amounts. Table 1 identifies the emission cutoffs that would trigger the need for control technology and ambient review for those other pollutants. Thus, when a major stationary source or modification is subject to PSD review because of potential emissions of one or more pollutants the review would apply to only those other pollutants which the source would have the potential to emit in amounts above those proposed in Table 1. No notice requirement is necessary for these pollutants since the source or modification would make the *de minimis* demonstration as part of its permit application.

Table 2 is proposed as an additional mechanism to limit the air quality review for certain pollutants which the source would have the potential to emit in significant amounts but which have an insignificant ambient impact. This may occur frequently since many of the emission values in Table 1 were derived from the air quality levels in Table 2 in a preliminary analysis that used very conservative modeling assumptions. The values in Table 2 represent a small fraction of those ambient levels deemed to be protective of public health and welfare. Table 2 does not apply to pollutants for which a new major source would emit in excess of the applicable 100/250-ton threshold nor does it apply

V 44 / 173 SEP 5 79 UMI

to major construction that would locate in a nonattainment area or would adversely impact a Class I area.

Table 2—Guidelines for Significant Ambient Air Quality Impacts

Pollutant and Air Quality Impact

Carbon monoxide—500 μg/m³, 8-hour avg.
Nitrogen dioxide—1μg/m³, annual.
Total suspended particulates—5 μg/m³, 24-hour.
Sulfur dioxide—5 μg/m³, 24-hour.
Ozone—[10].
Lead—.03 μg/m³, 3-month.
Mercury—0.1 μg/m³, 24-hour.
Beryllium—.005 μg/m³, 24-hour.
Asbestos—1 μg/m³, 1-hour.
Fluorides—.01 μg/m³, 24-hour.
Sulfuric acid mist—1 μg/m³, 24-hour.
Vinyl chloride—1 μg/m³, maximum value.
Total reduced sulfur:
  Hydrogen sulfide—1 μg/m³, 1-hour.
  Methyl mercaptan—.5 μg/m³, 1-hour.
  Dimethyl sulfide—.5 μg/m³, 1-hour.
  Dimethyl disulfide—2 μg/m³, 1-hour.
Reduced sulfur compounds:
  Hydrogen sulfide (see above).
  Carbon disulfide—200 μg/m³, 1-hour.
  Carbonyl sulfide—200 μg/m³, 1-hour.

In order to utilize Table 2, sources are required to use a preliminary screening technique to determine if their air quality impact will exceed the acceptable *de minimis* guidelines. The screening technique is set forth in *Guidelines for Air Quality Maintenance Planning and Analysis Vol. 10 (Revised); Procedures for Evaluating Air Quality Impact of New Stationary Sources* (October 1977, U.S. EPA, Office of Air Quality Planning and Standards, Research Triangle Park, N.C. 27711). If a source's ambient impacts are expected to exceed the *de minimis* guidelines using this conservative technique, it may elect to do a more sophisticated modeling analysis to demonstrate a *de minimis* impact. Upon a showing that the anticipated impact of a regulated pollutant would be less than significant, a major stationary source or major modification would not face the detailed ambient impact analyses of PSD for that pollutant (subject to the exceptions noted above). Thus, such a source would not be required to do an analysis for its impact on increments and standards. Nor would such a source be required to analyze its effect on soils, vegetation, and visibility or to conduct any ambient monitoring studies.

The following is an example of how the proposed dual *de minimis* approach would work. Suppose a new source subject to PSD would emit 275 tons of SO_2 but only 5 tons per year of PM and 50 tons per year of both nitrogen dioxide (NO_x) and volatile organic compounds (VOC). A BACT analysis would be necessary for SO_2, NO_x, and VOC but not for PM. An ambient air quality analysis would be required for SO_2. The source could do a screening analysis to determine if an ambient analysis is also required for NO_x. No ambient analysis would be required for the VOC emissions because the potential VOC emissions are under 100 tons per year.

The numbers proposed in Table 2 for criteria pollutants reflect the levels of significant impact promulgated in the existing PSD regulations on June 9, 1978 (43 FR 26398), while the *de minimis* air quality guidance proposed for beryllium, fluorides, and mercury has been derived from health effects data contained in the report entitled "Effects of Trace Contaminants from Coal Combustion"—proceedings of an ERDA workshop conference August 2–6, 1976. The remaining *de minimis* air quality guidance was formulated following a review of state ambient air quality standards, state emission regulations, and background documents used to develop standards under 40 CFR Parts 60 and 61. The one exception to this pattern in Table 2 is ozone. The Administrator here is proposing the major source cutoff of 100 tons per year as the value to trigger ambient concern after BACT has been applied. A background document will be issued by EPA providing the methodology, data, and references used in developing both Table 1 and 2.

The Administrator would like to point out that the proposed *de minimis* numbers, particularly the air quality values, may be too high or too low. Because of the urgency associated with today's proposal, the numbers identified in Tables 1 and 2 are not supported by extensive analysis. Public comment or followup investigations may result in changes in the numbers in the final package.

Although the values in Table 1 and Table 2 are subject to change, the Administrator believes that *de minimis* guidelines are necessary. EPA believes that these exemptions are not only justified by the associated insignificant air quality impacts but also by administrative necessity. The potential administrative burden of processing permits for nearly every minor change at a major stationary source appears unmanageable. For example, if no *de minimis* exemption were provided, any new element in an oil refinery, including a valve or small space heater, would be subject to NSR. In the Agency's view, neither air quality nor efficient administrative operation are served by requiring preconstruction review for such changes, or for new sources with a comparable impact.

In addition to requesting comments on the proposed values in Tables 1 and 2, the Administrator solicits comments regarding the need for both air quality and emission *de minimis* numbers and the need to put either directly into the regulations.

XI. Geographic Applicability

This section addresses issues raised by the court's interpretation of the geographic applicability of the PSD regulations. Four major topics are discussed: (1) sources constructing in designated nonattainment areas, (2) sources constructing in designated attainment or unclassifiable areas, (3) VOC source considerations, and (4) interstate pollution.

A. *Designated Nonattainment Areas.* In the *Alabama Power* decision, the court held that the PSD provisions apply only to major sources either locating in areas specifically designated as attainment or unclassifiable under section 107 ("clean air areas"), or locating in any area from which the source would substantially impact a clean air area in another state.

EPA has filed a petition for reconsideration regarding the court's restriction of the geographic applicability of the PSD provisions of the Act. In the petition, EPA argues that Congress intended PSD review to apply to major construction, whether located inside or outside a designated nonattainment area, that would significantly impact any clean area. The Agency argued further that, even if the court does not accept EPA's entire position, the court should rule that the PSD provisions should apply to any major construction that would impact a Class I area or a tribal reservation. The Administrator believes that as much as 40 percent of the total acreage of the mandatory Class I areas is located in or adjacent to formally designated nonattainment areas, and must be protected against the impact of new construction in the nonattainment areas.

Today's proposal conforms to the court's June 18, 1979 opinion. EPA would require permits only for major construction occurring in designated attainment or unclassifiable areas or for construction in a designated nonattainment area that would significantly impact a clean air area in another state. If the court alters its opinion as EPA asked it to do, EPA will have to reconsider this proposal.

[10] No *de minimis* air quality level is proposed for ozone. However, any net increase of 100 tons per year of volatile organic compounds subject to PSD would be required to perform an ambient impact analysis, including the gathering of ambient air quality data.

EPA is also proposing to extend NSR under section 173 and the offset ruling, and the Part D restrictions on growth, to cover major sources everywhere in the designated nonattainment area. This rule would apply regardless of whether the source could demonstrate that it would not significantly impact the specific point(s) of violation. This would be a change to the current policy, which now allows a source to be exempt from nonattainment requirements if it makes such a demonstration.

The above change is needed to overcome a very significant shortcoming that would otherwise be created in the regulatory system. Under the current regulations, proposed major sources in designated nonattainment areas with no significant impact on the violations could be exempted from nonattainment requirements because they are made subject to PSD preconstruction review requirements. But, under *Alabama Power* and the regulations now being proposed, such major sources would usually not be subject to PSD requirements. It would be inequitable and contrary to the apparent statutory purpose to allow such major sources to be totally exempt from any preconstruction review permit requirements, including no minimum emission control requirement and no evaluation of air quality impact. Therefore, EPA proposes to eliminate the shortcoming by extending nonattainment requirements to all major sources constructing in designated nonattainment areas. If the court accepts EPA's petition for rehearing, and extends PSD requirements to more sources in designated nonattainment areas, EPA may reconsider this proposal.

B. *Designated Attainment and Unclassifiable Areas.* The court's decision in the *Alabama Power* case addressed only the issue of whether the PSD requirements of the Act apply to sources in designated nonattainment areas. The court did not address the issue of whether the Agency may apply the nonattainment preconstruction permit requirements of the Act to sources locating in areas designated attainment or unclassifiable.

Currently, major sources in designated attainment or unclassifiable areas that would cause or contribute to a violation of a standard anywhere, are required to meet all applicable nonattainment requirements. These include state plan requirements adopted to meet Part D of the Act for neighboring designated nonattainment areas, and offset ruling requirements for newly discovered violations in areas designated attainment or unclassifiable.[11] In addition, EPA has proposed that the restriction on construction for a designated nonattainment area with an inadequate (or inadequately implemented) Part D plan should apply to major construction outside of the area, if it would significantly impact on any point(s) of violation in the area. (44 FR 38585, July 2, 1979.)

Although specific regulatory language is not being proposed, EPA is considering changing its policy on the applicability of nonattainment requirements to sources in designated clean areas. Under the approach being considered, nonattainment requirements would only apply to proposed major construction either inside a designated nonattainment area, or proposed in a designated clean area for a site where an ambient standard is actually violated. State plan requirements providing for NSR under section 173 of the Act would apply only to major construction within the designated nonattainment area. Likewise, the restrictions on construction for failure to have or carry out a Part D plan would apply to major construction only within the designated nonattainment area. The offset ruling would apply to major source construction at a site where the standard is violated within a designated clean area.

Major construction that would have a significant impact on a violation of a standard anywhere, but locating where the standard is attained, would still have to reduce its imapct enough so that it would not cause or contribute to the violation. The source could reduce its impact the needed amount by applying more emission controls, by obtaining offsets, or both.

EPA has earlier proposed the legal argument that the existing, more restrictive approach is required by section 165(a)(3)(B). This section states that no source subject to PSD review may be constructed unless the permit applicant demonstrates that the source will not cause or contribute to air pollution in excess of any national ambient air quality standard in any air quality region. In the earlier proposal, EPA stated the view that this provision applies to any source whose own emissions, irrespective of offsets, causes or contributes to the violation, 44 FR 38584 (July 2, 1979). In the proposal, EPA interpreted the literal language of section 165(a)(3)(B) as forbidding any such source to construct at all. EPA saw this prohibition overridden only if the source satisfied all conditions of the offset ruling or a state plan program under section 173. If no Part D plan were in effect and carried out after the deadline for having such a plan, EPA then proposed that the restrictions on construction described in sections 110(a)(2)(1) and 173(4) would apply, through strict application of the language of section 165(a)(3)(B). EPA invites comment on whether the more relaxed approach now under consideration would satisfy the requirements of section 165(a)(3)(B).

This change in approach is not required by the court's opinion in *Alabama Power*. The court's decision was based on its interpretation of the phrase "any area to which this part applies" in section 165 and a review of other provisions in the Act. In contrast, section 172(b)(6) simply states that nonattainment preconstruction review should apply to "new and modified major stationary sources." There is no language limiting Part D review to sources in any particular area. Likewise, the offset ruling which was ratified by Congress in section 129 of the 1977 Amendments, applies by its terms to all sources wherever located, that cause or contribute to an ambient violation. Finally, section 165 requires that prior to construction a source cannot create a violation anywhere. There is no comparable language in Part D saying that Part D sources must protect PSD increments. All of these factors tend to distinguish the nonattainment program from the PSD program, so that *Alabama Power* should not be viewed as governing geographic applicability of nonattainment requirements.

Although neither the court's opinion nor the statute prohibit the application of nonattainment requirements to PSD sources, EPA believes that there may be significant policy and administrative reasons for limiting the applicability of nonattainment NSR in this way. The PSD requirement of BACT and air quality offsets (i.e., an impacting source must offset its contribution to a violation anywhere) provides sufficient air quality protection for an area that is neither designated nonattainment nor is actually violating the standard. Application of all nonattainment requirements to PSD sources will be burdensome to both the permitting authority and the permit applicant.

On the other hand, there may be important program reasons for having the offset ruling continue to apply, along with PSD requirements, to proposed construction at a site designated as clean but where there is a violation of the standard. Construction at a site where there is a violation ordinarily has the greatest impact on the violation, and

[11] *See* 44 FR 3275 col. 4, January 16, 1979.

is therefore most in need of stringent nonattainment controls. In addition, retaining offset ruling requirements for construction at sites with ambient violations would reduce any incentive states and sources might otherwise have to include too much territory within the boundaries of designated clean areas. This approach is legally permissible because, as explained above, EPA believes nonattainment requirements including the offset ruling may apply regardless of the applicable designation. However, EPA also invites comment on whether such construction should be totally exempt from nonattainment requirements including the offset ruling, as is proposed for other construction in designated clean areas.

In addition, if EPA should adopt this applicability approach, EPA seeks comments on whether states should be allowed time to consider adjusting boundaries of existing area designations before EPA changes its policy.

C. *Geographic Applicability for VOC Sources.* Whatever approach is taken on the legal and policy issue discussed above, it will be necessary to determine, as a factual matter, whether a standard is violated at any particular site, and whether a major source at that site would significantly contribute to a violation elsewhere. This raises particular difficult issues for sources of volatile organic compounds.

On publishing its offset ruling on January 16, 1979, the Agency sought public comment on applicability issues specific to sources of volatile organic compounds (VOC) that would impact an area of ozone NAAQS violation. Atmospheric simulation techniques are generally not available to estimate the air quality impact of an individual VOC source. In the offset ruling, the Agency proposed the policy that, in lieu of modeling, a major VOC source would be subject to review, as significantly contributing to the violation, if it proposed construction within 36 hours travel time of a nonattainment monitor, under wind conditions associated with the ozone concentrations found to exceed the NAAQS for ozone.

Comments were solicited on the final establishment of the "36 hour rule." Industry comments have raised significant questions on the technical basis for the rule. Also, states with thorough ozone monitoring networks commented that the rule gave a competitive economic advantage to states with less sufficient monitoring systems. Other comments noted that the 36 hour rule presents an all-or-nothing situation requiring full or no offsets. The requirement for full offsets at potentially long distances from a nonattainment monitor was considered inequitable treatment of VOC sources which (1) would not be able to avoid the nonattainment requirements by reducing emissions so that the impact is less than significant, (2) would be subject to offset requirements even if the source is significantly farther away from the violation than would be required for particulate or sulfur dioxide sources that impact on PM or SO_2 violations, and (3) would be subject to offset requirements based on less rigorous technical estimates than required for PM and SO_2 sources.

In response to the comments received, the Agency proposes to eliminate the 36 hour rule as a criterion for determining whether or not a VOC source will impact a nonattainment area. Under the proposal, EPA would assume that proposed construction would have a significant impact on an ozone violation only if the source is physically within the boundaries of a designated nonattainment area or is at a site in another area where the ozone standard is actually violated. If a source were in a designated attainment or unclassifiable area at a site where there is no violation of the ozone standard, EPA proposes to treat the source as having no significant impact on any ozone violation anywhere.

The monitoring required for a PSD permit would in most cases indicate whether the particular site attains the ozone standard.[12] However, in some cases, a source located in a designated clean area with potential emissions over 100 tons but less than 250 tons will not be subject to PSD review but may be subject to review under the offset ruling.[13] Unlike PSD, the offset ruling does not require monitoring. For any sources covered by this ruling, but not PSD, it may therefore be necessary to determine, without monitoring of the particular site, whether the ozone standard is violated. To simplify such determinations, EPA is considering whether a violation measured at one monitor should be presumed to extend throughout the entire county where the monitor is located, or to some other area around the monitor thought to be representative of air quality. Comment is invited on the question of how far around a monitored violation the standard violation should be presumed to extend. In the absence of monitoring data, there would be a presumption that the standard is attained throughout an area designated as attainment.

The Agency is of the opinion that exceedances of the ozone standard can be found in all directions from a major city. Thus, a source proposing to locate upwind of a nearby city should expect to find ozone NAAQS exceedances when monitoring according to EPA's monitoring procedures found in *Ambient Air Monitoring Guidelines for Prevention of Significant Deterioration.* OAQPS No. 1.2-096, U.S. EPA, Research Triangle Park, North Carolina 27711. A policy memorandum outlining the background data for this decision has been made a part of the Docket.[14]

D. *Interstate Pollution.* The court's discussion of the geographic applicability of PSD raises issues concerning interstate pollution. The court in *Alabama Power* gave new emphasis to protection against interstate pollution of PSD areas, pointing to sections 160(4) and 110(a)(2)(E)(i) of the Act as prohibiting emissions that would interfere with another state's PSD plan. *Alabama Power,* Slip op. at 26-27. The Agency seeks comment on when a source shuld be subject to review because of its interstate impacts and how to set emission limits necessary to protect against pollution that interferes, or may interfere, with another state's PSD measures.

The Agency intends to continue using the already established levels of significance for determining whether an impact on a Class II or III area warrants review. See, e.g. 43 FR 26398 (June 19, 1978). EPA also proposes to maintain its current policy of allocating increment consumption equally at state lines in cases of interstate disputes. Comments are sought on this approach. Finally, EPA is considering whether interference with another state's PSD program is adequately prevented by permitting sources located in one state but impacting on another state, to use one-half of the remaining increment at the points of impact in the other state. EPA solicits comments on whether interstate protection should be broadened to require compliance with emission limitations or other PSD requirements contained in the plan of the substantially impacted state.

XII. Pollutant Applicability

The regulations proposed today would maintain the practice of determining pollutant by pollutant whether a source is subject to PSD review, nonattainment review or both. However, in accordance with the *Alabama Power* decision, once a source is subject to PSD review, it must meet the applicable control technology and air quality analysis requirements for each pollutant. For nonattainment NSR, only emissions of the nonattainment pollutant are subject to the applicable review requirements.

Under today's proposal, a modification would be subject to PSD if it would result in a significant net increase in the emissions of any regulated pollutant for which the source is major. In addition, the area must be designated attainment or unclassifiable for the pollutant, or designated nonattainment if the source impacts a PSD area in another state. In contrast, the NSR requirements of section 173, the offset ruling, or the section 110(a)(2)(I) construction restrictions would apply only to a modification which would result in a significant net increase in the amount of the nonattainment pollutant which the source already emits in major amounts (i.e., 100 or more tons per year). A large addition or a series of small additions since the applicable time of concern at an existing "minor" source would be treated as a "major modification": *Provided,* That the net emissions resulting from the addition or additions, in conjunction with the emissions from the existing minor source would exceed the applicable threshold for a major stationary source (see discussion on "Accumulation" in "Modification").

The applicability of the proposed regulations to new sources is more straightforward. For PSD, a new source is subject to review if its potential to emit any pollutant regulated under the Act would make it a major stationary source. Nonattainment review applicability again requires that the nonattainment pollutant be potentially emitted in major amounts.

Examples of the proposed applicability follow:

(1) Construction of a new plant with potential emissions of 500 tons per year (tpy) SO_2 and 50 tpy hydrocarbons (HC) locating in an area designated attainment for SO_2 but nonattainment for ozone would be subject to PSD preconstruction review for both pollutants. PSD review (BACT and air quality analysis requirements) applies to any pollutant emitted by the source once the source is subject to review for one pollutant.

(2) Construction of the same plant described in example (1) in a nonattainment area for both SO_2 and ozone would be subject solely to applicable nonattainment provisions for SO_2. No PSD or nonattainment requirements would be applicable for HC because nonattainment requirements apply only to pollutants for which the source is major. This assumes that the source would affect no clean air area in another state.

(3) A modification to the example (1) plant which would cause a significant net increase in both SO_2 emissions and HC emissions would be subject to PSD review for SO_2 as well as HC. Nonattainment review for the net HC emission increase would not be applicable unless the new construction would itself qualify as a major modification.

(4) Modification at an existing source of 50 tpy SO_2 emissions, itself constructed since December 21, 1976, in a nonattainment area for SO_2, adding a new unit with 90 tpy SO_2 emissions, would subject the source to nonattainment requirements.

(5) Construction of a new source with potential emissions of 500 tpy HC and 50 tpy SO_2 locating in an ozone nonattainment area would subject the source only to nonattainment review. Since the source is not major for other pollutants regulated under the Act for which the area is designated unclassifiable or attainment, PSD would not apply.

(6) Modification to a source with emissions of 500 tpy SO_2 and 50 tpy HC in an area designated nonattainment for both SO_2 and ozone, resulting in 20-ton net increases in the level of emissions for both pollutants, would subject the source to applicable nonattainment provisions only for the SO_2 emission increase. There is no requirement in the nonattainment provisions of the Act, comparable to the requirement in the PSD provisions, that subjects a source to review for all regulated pollutants it emits once it is subject to review for one pollutant.

(7) A new source with potential emissions of 150 tpy of PM located in an area designated attainment for PM but impacting on a violation in a designated nonattainment area to which a Part D plan applies. Under the regulations proposed today, the source would be subject to both PSD and nonattainment requirements (see "Geographic Applicability" discussion). This would include application of LAER, certification of statewide compliance by other sources owned or operated by the source owner or operator, sufficient offsets to insure reasonable further progress in the nonattainment area, preconstruction monitoring and increment analysis.

(8) A new plant which would be a 50-tpy source of both SO_2 and HC proposes to construct in an area designated nonattainment for SO_2 and ozone. Neither PSD nor any nonattainment NSR under section 173, the offset ruling, or the section 110 restrictions on construction would apply.

XIII. Baseline Concentration

The term "baseline concentration" generally means the actual ambient concentration levels of pollutants in an area as of the applicable baseline date. This term is applicable only for sources of SO_2 and PM. The baseline concentration of an area is important because all emissions not counted in the baseline concentration count against allowable increments.

EPA's current regulations set a uniform baseline date of August 7, 1977 (40 CFR 51.24(b)(11), 52.21(b)(11) (1978)) as explained at 43 FR 26400 (June 19, 1978). The court in *Alabama Power* found that this uniform baseline date deviated impermissibly from section 169(4) of the Act, which generally defines baseline in terms of the ambient concentration existing at the time of the first application for a permit in an area. Slip op. at 37.
